Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Preface

This Interim List provides a summary of the changes to census subdivisions (e.g., municipal boundary changes) in effect between January 2, 2008 and January 1, 2009, except in British Columbia. This report represents the changes which have been processed by the Geography Division based on the information received and, therefore, does not include all the changes which may have occurred in this time period.

We would welcome any suggestions on the presentation of the Interim List or the planned frequency. Those users requiring more information about changes to census subdivisions should contact us by e-mail at infostats@statcan.gc.ca, or by phone at 1-800-263-1136.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^p preliminary
- ^r revised
- ^x suppressed to meet the confidentiality requirements of the Statistics Act
- ^E use with caution
- F too unreliable to be published

Préface

La présente Liste intérimaire fournit un résumé des modifications apportées aux subdivisions de recensement (p. ex., changements aux limites municipales) en vigueur entre le 2 janvier 2008 et le 1^{er} janvier 2009, sauf en Colombie-Britannique. Cette liste rend compte des modifications qui ont été traitées par la Division de la géographie, à partir des renseignements reçus. Elle ne renferme donc pas toutes les modifications apportées durant la période.

Vos suggestions sur la présentation ou sur la fréquence prévue sont les bienvenues. Les utilisateurs désirant avoir de plus amples renseignements sur les subdivisions de recensement sont priés de s'adresser à nous par courriel à infostats@statcan.gc.ca, ou par téléphone, 1-800-263-1136.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada :

- . indisponible pour toute période de référence
- .. indisponible pour une période de référence précise
- ... n'ayant pas lieu de figurer
- 0 zéro absolu ou valeur arrondie à zéro
- 0^s valeur arrondie à 0 (zéro) là où il y a une distinction importante entre le zéro absolu et la valeur arrondie
- ^p provisoire
- ^r révisé
- ^x confidentiel en vertu des dispositions de la *Loi sur la statistique*
- ^E à utiliser avec prudence
- F trop peu fiable pour être publié

Content considerations

Notification of the changes that take place during this period are obtained from the provincial gazette and statutes, the orders of the Municipal Board, and special provincial acts.

Boundary changes are compiled from legal descriptions and accompanying sketch maps onto a digital compilation base map which is maintained by the Geography Division, using the best available information. Copies of these maps are sent for verification to the municipal authority in each province/territory on an annual basis. Any corrections or additional changes reported back to the Geography Division are represented in the subsequent issue of the Interim List as change types 8, 8C, 9 or 9C (boundary revisions).

Geographic changes

To calculate population adjustments to census subdivisions (CSDs)¹ affected by a boundary change, the change can be categorized at the dissemination block² level into two types:

- annexation of a complete dissemination block
- annexation of a partial (split) dissemination block (complete dissemination blocks and partial dissemination blocks can be annexed within the same boundary change).

1. Census subdivision (CSD): This is a term applying to municipalities (as determined by provincial legislation) or their equivalents (e.g., Indian reserves, Indian settlements). In Newfoundland and Labrador, Nova Scotia and British Columbia, census subdivisions have been created by Statistics Canada, in cooperation with the provinces, as equivalents for municipalities.

2. A dissemination block (DB) is an area bounded on all sides by roads and/or boundaries of standard geographic areas.

Considérations relatives au contenu

Les avis de changements qui se produisent au cours de cette période sont tirés des « Gazettes provinciales », des décrets du Conseil des municipalités et des lois provinciales spéciales.

À partir des descriptions officielles et des croquis qui les accompagnent, les changements de limites sont consignés sur des fonds de cartes numérisées produites par la Division de la géographie, d'après les meilleurs renseignements disponibles. Chaque année, ces cartes sont envoyées aux autorités municipales de chaque province et territoire pour vérification. Les corrections ou autres changements communiqués à la Division de la géographie, auxquels le code 8, 8C, 9 ou 9C est alors attribué (révisions de limites), sont ensuite apportés dans la version suivante de la Liste intérimaire.

Changements géographiques

Pour calculer les ajustements de population des subdivisions de recensement (SDR)¹ affectées par des changements de limites, il importe de répartir ces changements, au niveau de l'îlot de diffusion² en deux catégories :

- annexion d'un îlot de diffusion entier;
- annexion d'un îlot de diffusion partiel (fractionné) (des îlots de diffusion entiers et partiels peuvent être annexés à l'occasion d'un seul et même changement de limites).

1. Subdivision de recensement (SDR) : Terme générique qui désigne les municipalités (telles que définies par les lois provinciales) ou leur équivalent, par exemple les réserves indiennes et les établissements indiens. À Terre-Neuve-et-Labrador, en Nouvelle-Écosse et en Colombie-Britannique, l'expression désigne également les régions géographiques créées par Statistique Canada, en collaboration avec les provinces, comme équivalents des municipalités.

2. Un îlot de diffusion (ID) est un territoire dont tous les côtés sont délimités par des rues et/ou des limites des régions géographiques normalisées.

In the case of complete dissemination blocks, the population count adjustments are made using published data counts.

Dans le cas des îlots de diffusion entiers, les ajustements des chiffres de population sont fait en utilisant les chiffres publiés.

In the case of partial dissemination blocks, adjusted population counts are derived using 2006 Census collection instruments (visitation records³ and collection maps) for the dissemination block part being annexed. The population for the part dissemination block not being annexed is the residual – published dissemination block population count minus the derived population count for the annexed part dissemination block.

Dans le cas des îlots de diffusion partiels, les chiffres de population ajustés proviennent des outils de collecte du Recensement de 2006 (registres des visites³ et cartes de collecte) pour la partie annexée de l'îlot de diffusion. La population restante pour la partie de l'îlot de diffusion qui n'a pas été annexée est le résultat des chiffres de population publiés au niveau de l'îlot de diffusion moins les chiffres de population de la partie de l'îlot de diffusion annexée.

Prior to the 1996 Census, the land area data contained in the Interim List was calculated manually using a digital planimeter for each CSD boundary change. This process was automated for the 2001 Census. As a result of this change, land area is no longer being calculated or published in the Interim List for individual changes, including those changes at the census subdivision level.

Avant le Recensement de 1996, les données sur la superficie du terrain comprises dans la Liste intérimaire étaient calculées manuellement en utilisant un planimètre numérique. Ce processus a été automatisé pour le Recensement de 2001. En raison de ce changement, la superficie du terrain n'est plus calculée et publiée dans la Liste intérimaire pour les changements individuels, y compris les changements au niveau des subdivisions de recensement.

The following two text tables show census subdivision types by province and territory and the number of CSD changes by type of change. The summary data reflect the transactions in effect between January 2, 2008 and January 1, 2009.

Les deux tableaux explicatifs suivants présentent les genres de subdivision de recensement avec leur répartition par province et territoire et le nombre de changements aux subdivisions de recensement selon le genre de changement. Ces données sommaires traduisent les changements en vigueur entre le 2 janvier 2008 et le 1^{er} janvier 2009.

3. A visitation record is a registry of dwellings enumerated and records the dissemination block in which they are located. It includes a count of the occupants in the dwelling.

3. Le registre des visites contient les ménages énumérés et l'îlot de diffusion correspondant. Ce registre inclus également les chiffres des occupants du ménage.

1. Change code:

- 1 incorporation
- 2 change of census subdivision name
- 2C correction of census subdivision name
- 23 change of census subdivision name and type
- 3 change of census subdivision type
- 3C correction of census subdivision type
- 4 dissolution
- 5 census subdivision has annexed a new part from another census subdivision
- 5A census subdivision has annexed a complete census subdivision (could also include the annexation of another census subdivision part)
- 6 census subdivision has lost a part annexed by another census subdivision
- 7 revision of Standard Geographical Classification (SGC) code
- 7C correction of Standard Geographical Classification (SGC) code
- 8 census subdivision limits have been corrected and census subdivision has gained land area and population
- 8C census subdivision limits have been corrected and census subdivision has gained land area
- 9 census subdivision limits have been corrected and census subdivision has lost land area and population
- 9C census subdivision limits have been corrected and census subdivision has lost land area
- 10 population has been increased
- 11 population has been reduced

1. Code de changement :

- 1 constitution
- 2 changement de nom d'une subdivision de recensement
- 2C correction du nom d'une subdivision de recensement
- 23 changement de nom et genre d'une subdivision de recensement
- 3 changement du genre d'une subdivision de recensement
- 3C correction du genre d'une subdivision de recensement
- 4 dissolution
- 5 une subdivision de recensement a annexé une nouvelle partie d'une autre subdivision de recensement
- 5A une subdivision de recensement a complètement annexé une subdivision de recensement (peut également inclure une partie annexée d'une autre subdivision de recensement)
- 6 une subdivision de recensement a perdu une partie annexée par une autre subdivision de recensement
- 7 révision du code Classification géographique type (CGT)
- 7C correction du code Classification géographique type (CGT)
- 8 la limite de la subdivision de recensement a été corrigée et la subdivision de recensement a gagné en superficie et en population
- 8C la limite de la subdivision de recensement a été corrigée et la subdivision de recensement a gagné en superficie
- 9 la limite de la subdivision de recensement a été corrigée et la subdivision de recensement a perdu en superficie et en population
- 9C la limite de la subdivision de recensement a été corrigée et la subdivision de recensement a perdu en superficie
- 10 la population a été augmentée
- 11 la population a été diminuée

Table descriptions

The Interim List contains two tables:

Table 1: Changes to census subdivisions in alphabetical order by province and territory (with 8C and 9C).

This table presents all types of changes received to date, with 2006 population reported according to January 1, 2009 census subdivision limits.

Table 2: Changes to census subdivision codes, names, and types in numerical order, by province and territory.

This table presents only changes that impact on the Standard Geographical Classification (SGC)⁴ and therefore excludes annexations and boundary revisions. The changes are listed in SGC code order.

An important reference for users of the Interim List is the *Standard Geographical Classification* manual. It is composed of:

Volume I (The Classification) - Catalogue number 12-571-X;

Volume II (Reference Maps) - Catalogue number 12-572-X.

4. The Standard Geographical Classification (SGC) is Statistics Canada's official classification of geographic areas in Canada. The SGC provides unique numeric identification for three types of geographic areas. They are: provinces/territories; census divisions; and census subdivisions. The three geographic areas are hierarchically related. This relationship is reflected in the seven-digit code.

Description des tableaux

La Liste intérimaire comprend deux tableaux :

Tableau 1 : Changements apportés aux subdivisions de recensement en ordre alphabétique par province et territoire (inclus 8C et 9C).

Ce tableau présente tous les changements reçus jusqu'ici, avec la population (chiffres de 2006 rapportés selon les limites de subdivision de recensement du 1^{er} janvier 2009).

Tableau 2 : Changements apportés aux codes, aux noms et aux genres des subdivisions de recensement en ordre numérique, selon la province et le territoire.

Ce tableau présente uniquement les changements ayant une incidence directe sur la Classification géographique type (CGT)⁴, donc excluant les annexions et les révisions des limites. Les changements sont montrés selon l'ordre du code de la CGT.

Une référence importante pour les utilisateurs de la Liste intérimaire est le manuel de la *Classification géographique type*. Il est composé de :

Volume I (La classification) - n° 12-571-X au catalogue;

Volume II (Cartes de référence) - n° 12-572-X au catalogue.

4. La Classification géographique type (CGT) est la classification officielle des régions géographiques du Canada utilisée à Statistique Canada. La CGT fournit des codes numériques uniques pour trois genres de régions géographiques: les provinces et territoires, les divisions de recensement, et les subdivisions de recensement. Ces trois genres de régions géographiques constituent une structure hiérarchique. Le code à sept chiffres de la CGT reproduit cet ordre hiérarchique.
