

# RENTAL MARKET REPORT

## Ontario Highlights\*

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: Spring 2010

Figure 1

### Highlights

- Ontario vacancy rates stabilized reaching 3.4 per cent, up from 3.3 per cent last year
- Greater Sudbury posts biggest jump in vacancies while Windsor posts biggest drop
- Ontario's softest rental markets in recent years show sharpest turnaround
- Fixed sample 2-bed apartment rents increased at a slower rate
- Notable factors exerting upward pressure on rental vacancies include strong shift to homeownership, less international migration
- Notable factors exerting downward pressure on rental vacancies include fewer apartment ownership and rental completions and stronger job gains

Figure 2

\*Only centres with a population of 10,000 + are included in the survey.

## Ontario Rental Vacancy Rates Inched Higher in April 2010

For a third consecutive spring session Ontario vacancy rates moved higher, albeit modestly, reaching 3.4 per cent, up from 3.3 per cent in the spring of 2009. Vacancy rates were either stable or moved higher in two thirds of Ontario urban centres. Western and eastern Ontario markets enjoyed tighter conditions versus one year ago. Southern and northern Ontario rental markets experienced higher vacancy rates.

The balance between rental demand and supply determines the vacancy rate. A number of factors have decreased rental demand and exerted upward pressure on provincial vacancy rates. Firstly, according to CMHC's *Home Purchase and Renovation Survey*, more first time buyers have been in the market planning a home purchase over the past year. These first-time buyer intentions translated into actual purchases as evidenced by the record pace in Ontario existing home sales since this time last year. An attempt by households to beat higher mortgage costs and higher taxes was likely behind the accelerated decision to purchase a home, particularly in some of the more expensive southern Ontario ownership markets. Consequently, more renter households shifted from renting to owning a home – dampening demand for rental accommodation.

Ontario's immigration story is another factor dampening rental demand. While the global recovery is underway, the uncertainty created from the economic downturn prompted less international

travel over the past year. Immigration into Canada and Ontario has slowed. Immigrants typically lack the savings and work experience to qualify for homeownership. Approximately 75 per cent of immigrants opt for rental accommodation when first arriving in Canada. With more renter households shifting out of rental units in search of ownership options, fewer immigrants were taking occupancy of vacated units.

However, other factors likely added to rental demand. An improving job market not only benefitted demand for ownership housing but also increased demand for rental accommodation as well. Employment among youth, declined dramatically between the fall of 2008 and the summer of 2009. Since then, job opportunities for youth have stabilized and moved higher in recent months. Young adults are more likely to rent versus households in other age categories. When job markets improve they are more likely to consider leaving the parental home to form their own household.

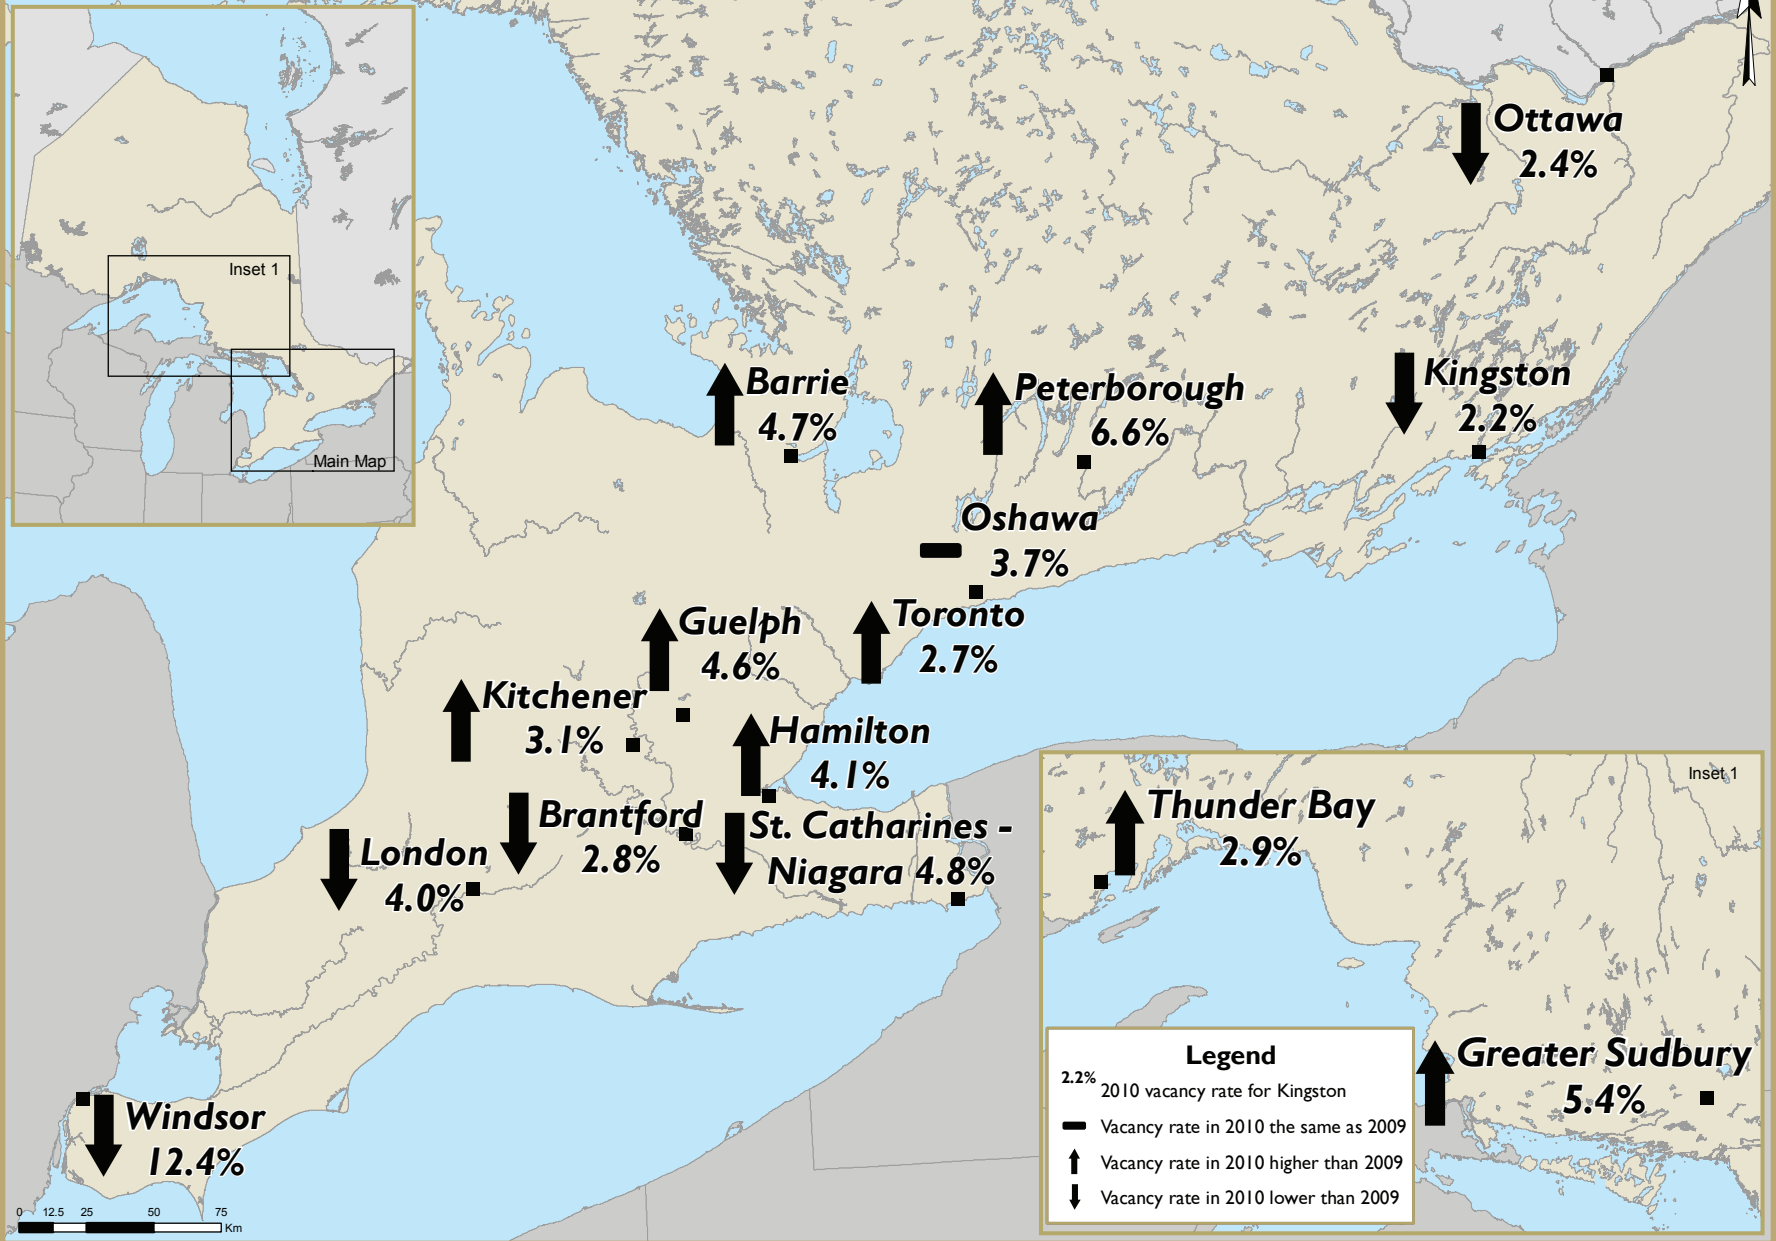

Fewer competitive headwinds from the apartment ownership and the purpose-built rental sector were another factor exerting downward pressure on vacancy rates. On the ownership front, fewer high-density apartment projects reached the completion stage since last spring. First-time buyers find condominium apartment dwellings an affordable entry point into the ownership market. With fewer renter households taking occupancy of their new apartments, few vacated their existing rental units – putting downward pressure on vacancies.

Similarly, the completion of purpose-built rental units eased over the past year creating less competition for existing landlords. However, the story varied by metropolitan area as supply pressures were more pronounced in Peterborough, Sudbury, Kitchener and London urban centres.

In addition to the trends noted above, local economic developments often help explain changes in rental markets on a city-by-city basis. For example, after boasting the tightest rental market conditions in the province of Ontario in recent years, the vacancy rate in Greater Sudbury jumped as the goods-producing sector there has not fared as well – causing a drop in rental demand. Meanwhile, other goods-producing urban centres such as Windsor, Oshawa and St. Catharines-Niagara have seen some stability return to their economies and rental markets. Increasing global demand for manufactured goods has spurred production and some re-hiring – encouraging less out-migration. Meanwhile, public sector spending benefitted eastern Ontario rental markets such as Ottawa and Kingston in the past year.

Fixed sample apartment rents for 2-bedroom units rose by 1.4 per cent in April 2010 compared with a 2 per cent increase last April. Additional vacancies in most Ontario centres kept the growth in 2-bedroom fixed sample rents below the Province Rent Review Guideline amount of 2.1 per cent this year.

<sup>1</sup>The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b- Very good, c - Good, d - Fair (Use with Caution)

\*\* Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

<sup>1</sup>The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b - Very good, c - Good, d - Fair (Use with Caution)

\*\* Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

n/u: No units exist in the universe for this category n/s: No units exist in the sample for this category n/a: Not applicable

Please click [Methodology](#) or [Data Reliability Tables Appendix](#) link for more details

## TECHNICAL NOTE:

*Difference between Percentage Change of Average Rents (Existing and New Structures) AND Percentage Change of Average Rents from Fixed Sample (Existing Structures Only):*

Percentage Change of Average Rents (New and Existing Structures): The increase/decrease obtained from the calculation of percentage change of average rents between two years (example: \$500 in the previous year vs. \$550 in current survey represents an increase of 10 percent) is impacted by changes in the composition of the rental universe (e.g. the inclusion of newly built luxury rental buildings in the survey, rental units renovated/upgraded or changing tenants could put upward pressure on average rents in comparison to the previous year) as well as by the rent level movement (e.g. increase/decrease in the level of rents that landlords charge their tenants).

Percentage Change of Average Rents from Fixed Sample (Existing Structures Only): This is a measure that estimates the rent level movement. The estimate is based on structures that were common to the survey sample for both the previous year and the current April Rental Market Surveys. However, some composition effects still remain e.g. rental units renovated/upgraded or changing tenants because the survey does not collect data to such level of details.

## METHODOLOGY FOR RENTAL MARKET SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts the **Rental Market Survey (RMS)** every year in April and October to estimate the relative strengths in the rental market. The survey is conducted on a sample basis in all urban areas with populations of 10,000 and more. The survey targets only privately initiated structures with at least three rental units, which have been on the market for at least three months. The survey collects market rent, available and vacant unit data for all sampled structures. The survey is conducted by a combination of telephone interviews and site visits, and information is obtained from the owner, manager, or building superintendent. The survey is conducted during the first two weeks of April/October, and the results reflect market conditions at that time.

CMHC's Rental Market Survey provides a snapshot of vacancy and availability rates, and average rents in both new and existing structures. There also exists a measure for the change in rent that is calculated based on existing structures only. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. The change in rent in existing structures is an estimate of the change in rent that the landlords charge and removes compositional effects on the rent level movement due to new buildings, conversions, and survey sample rotation. The estimate of per cent change in rent is available in all Canada and Provincial Highlights publications, and also in the CMA reports (fall survey only). The rent levels in new and existing structures are also published. While the per cent change in rents in existing structures published in the reports are statistically significant, changes in rents that one might calculate based on rent levels in new and existing structures may or may not be statistically significant.

## DEFINITIONS

**Availability:** A rental unit is considered available if the existing tenant has given, or has received, notice to move, and a new tenant has not signed a lease; or the unit is vacant (see definition of vacancy below).

**Rent:** The rent refers to the actual amount tenants pay for their unit. No adjustments are made for the inclusion or exclusion of amenities and services such as heat, hydro, parking, and hot water. For available and vacant units, the rent is the amount the owner is asking for the unit.

It should be noted that the average rents reported in this publication provide a sound indication of the amounts paid by unit size and geographical sector. Utilities such as heating, electricity and hot water may or may not be included in the rent.

**Rental Apartment Structure:** Any building containing three or more rental units, of which at least one unit is not ground oriented. Owner-occupied units are not included in the rental building unit count.

**Rental Row (Townhouse) Structure:** Any building containing three or more rental units, all of which are ground oriented with vertical divisions. Owner-occupied units are not included in the rental building unit count. These row units in some centres are commonly referred to as townhouses.

**Vacancy:** A unit is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

### Definitions of Census Areas referred to in this publication are as follows:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions.

### Acknowledgement

The Rental Market Survey could not have been conducted without the cooperation of the rental property owners, managers, and building superintendents throughout Canada. CMHC acknowledges their hard work and assistance in providing timely and accurate information. As a result of their contribution, CMHC is able to provide information that benefits the entire housing industry.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
