

HOUSING NOW

Vancouver and Abbotsford CMAs

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: January 2010

Vancouver CMA New Housing Market Activity

2009 closed on a strong note for housing starts in the Vancouver CMA. A total of 1,010 new housing units commenced in December, nine percent lower than the same month a year ago. For the year 2009,

home starts in the Vancouver CMA totalled 8,339, down from 19,591 the previous year. For the most part of 2009, multiple-unit residential starts were weak. However, strong single-detached housing starts in Surrey, where population density is markedly lower than Vancouver City, made up for some of the shortfall. During the fourth quarter of 2009, the Vancouver CMA started to see a return of larger scale multiple-unit residential projects.

Housing starts appear to be on the upswing – approximately 60 per cent of the year's new home construction occurred in the second half of 2009. Low mortgage interest rates provided buyers an incentive to purchase and drove the absorption of completed new homes. Not only has the inventory of completed new homes shown a steady decline since July 2009, but the rate of new home sales has also caught up with the rate of completion. This trend was present in most municipalities except West Vancouver and a few areas close to the Vancouver City core, such as Downtown and East Hastings, where the rate of absorption of new homes still lags the rate of completion somewhat. Such sales momentum has provided builders an impetus to build again.

Prices of new single-detached homes in the Vancouver CMA have mostly regained lost ground. For the year, both the median and average prices are at par with 2008. This suggests that prices for new single-detached homes have indeed firmed and the increase is not just a reflection of a few high value sales. For municipalities such as Vancouver City, North Vancouver, and New Westminster, stronger prices were evident for the year 2009 vis-à-vis 2008. In Vancouver City, for example, median new home prices were nearly 50 per cent higher and average new prices were about 20 per cent higher for the year 2009 compared to 2008.

Vancouver CMA Resale Housing Activity

Resale housing activity remained strong through the fourth quarter of 2009, a stark contrast with how things were a year ago when the market cooled rapidly. For the year, there were 14,076 sales transactions for existing single-detached homes in 2009, about 51 per cent higher than in 2008. Sales of existing attached and apartment units were 47 and 38 per cent higher in 2009 than a year ago, respectively. Because resale prices have strengthened, sales have been mostly driven by low mortgage interest rates.

With sellers encouraged by both the number and speed of sales over a period of several months, the number of new listings has also increased. Fortunately, sales have been sufficient to support the sales-to-active listings ratio, which is still in sellers' market conditions. For the year, the average sales-to-active listings ratio for all types of resale properties were stronger compared to the previous year. As such, competitive pressure has bolstered prices for resale properties. Average resale price showed the biggest year-over-year increase – about 14 per cent – in the fourth quarter for single-detached homes.

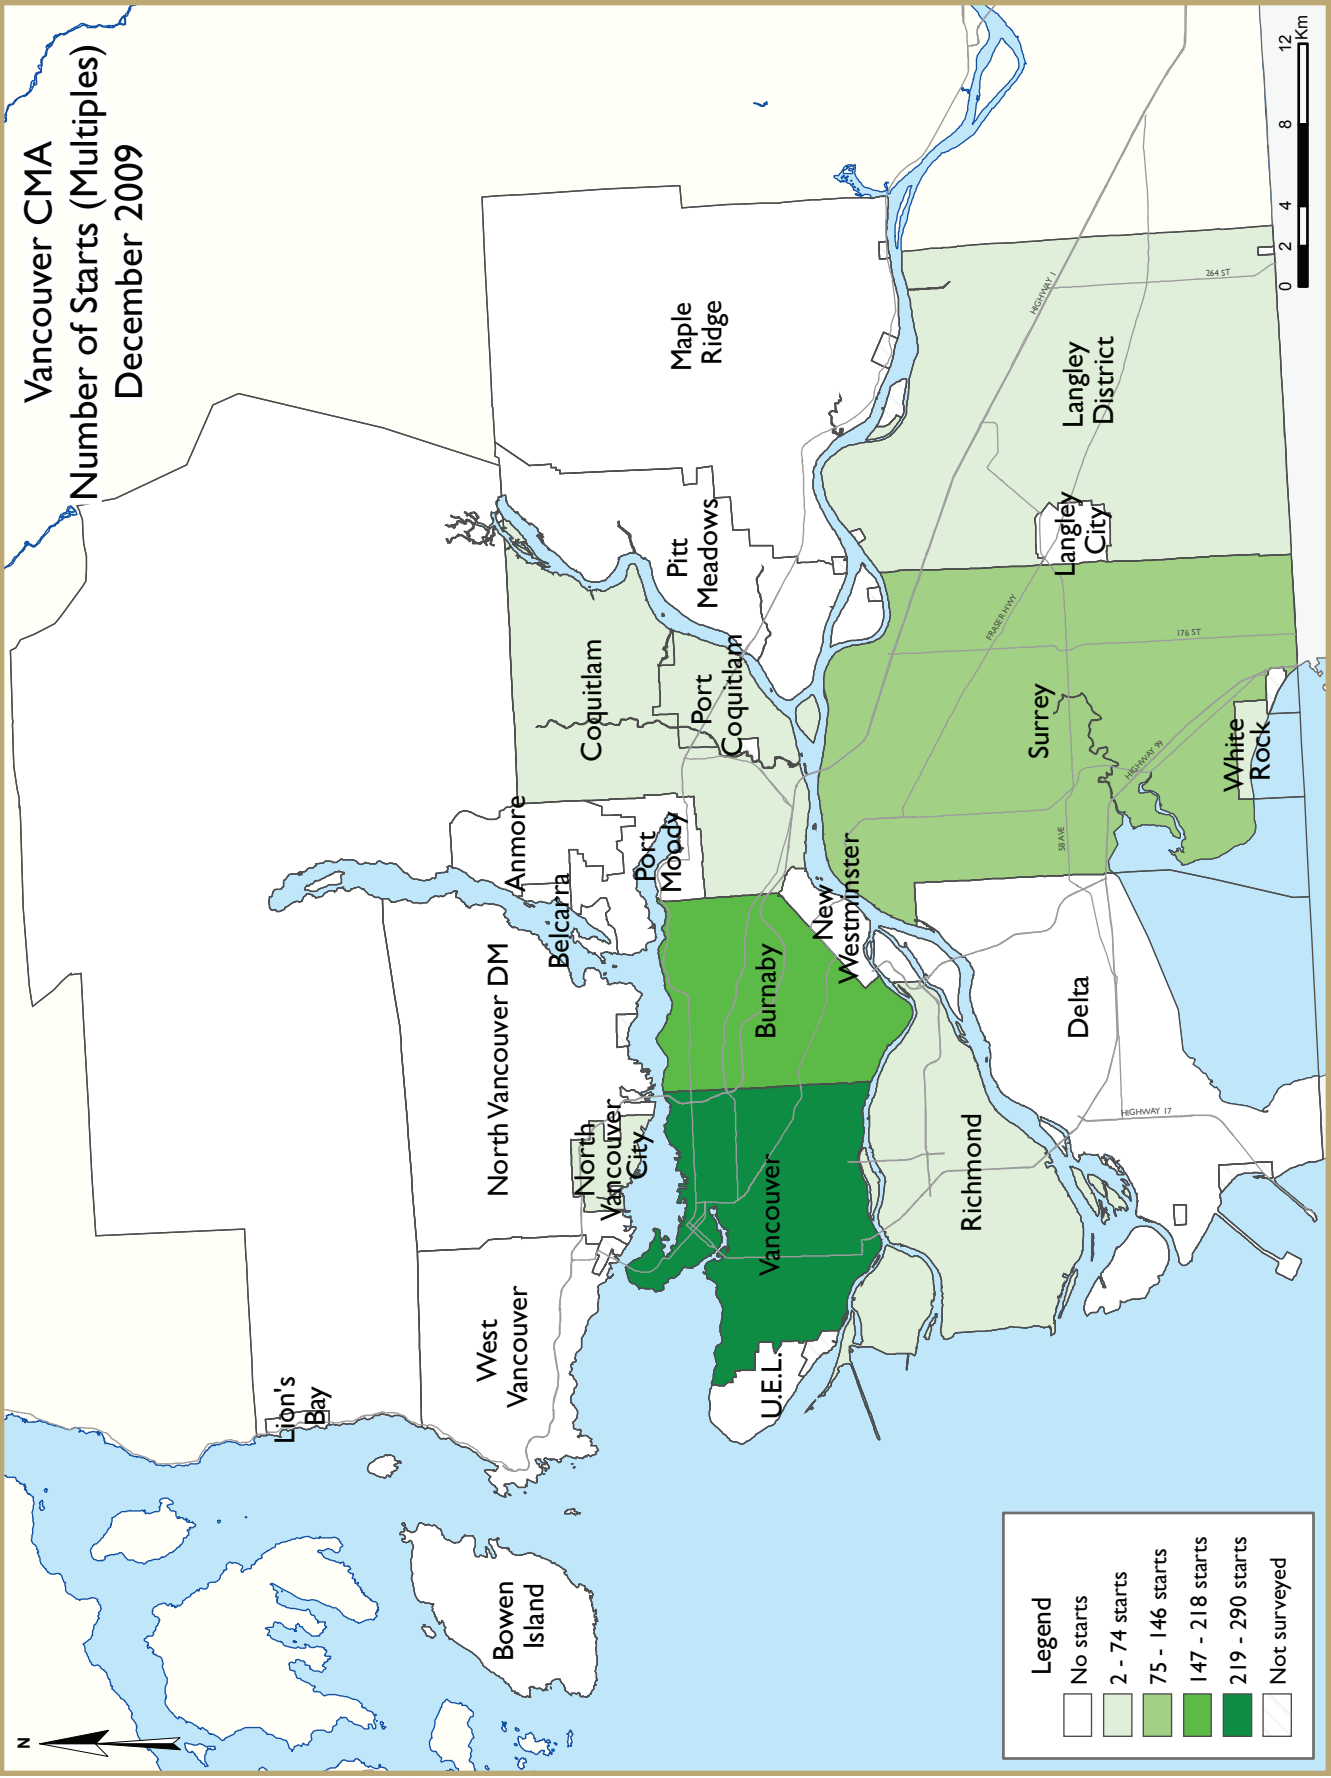

It is interesting to note the apparent price sensitivity of homebuyers in 2009. When resale prices were at their lowest during the early part of the year, generally pricier and coveted areas like Vancouver West saw a steep increase in the number of sales. When

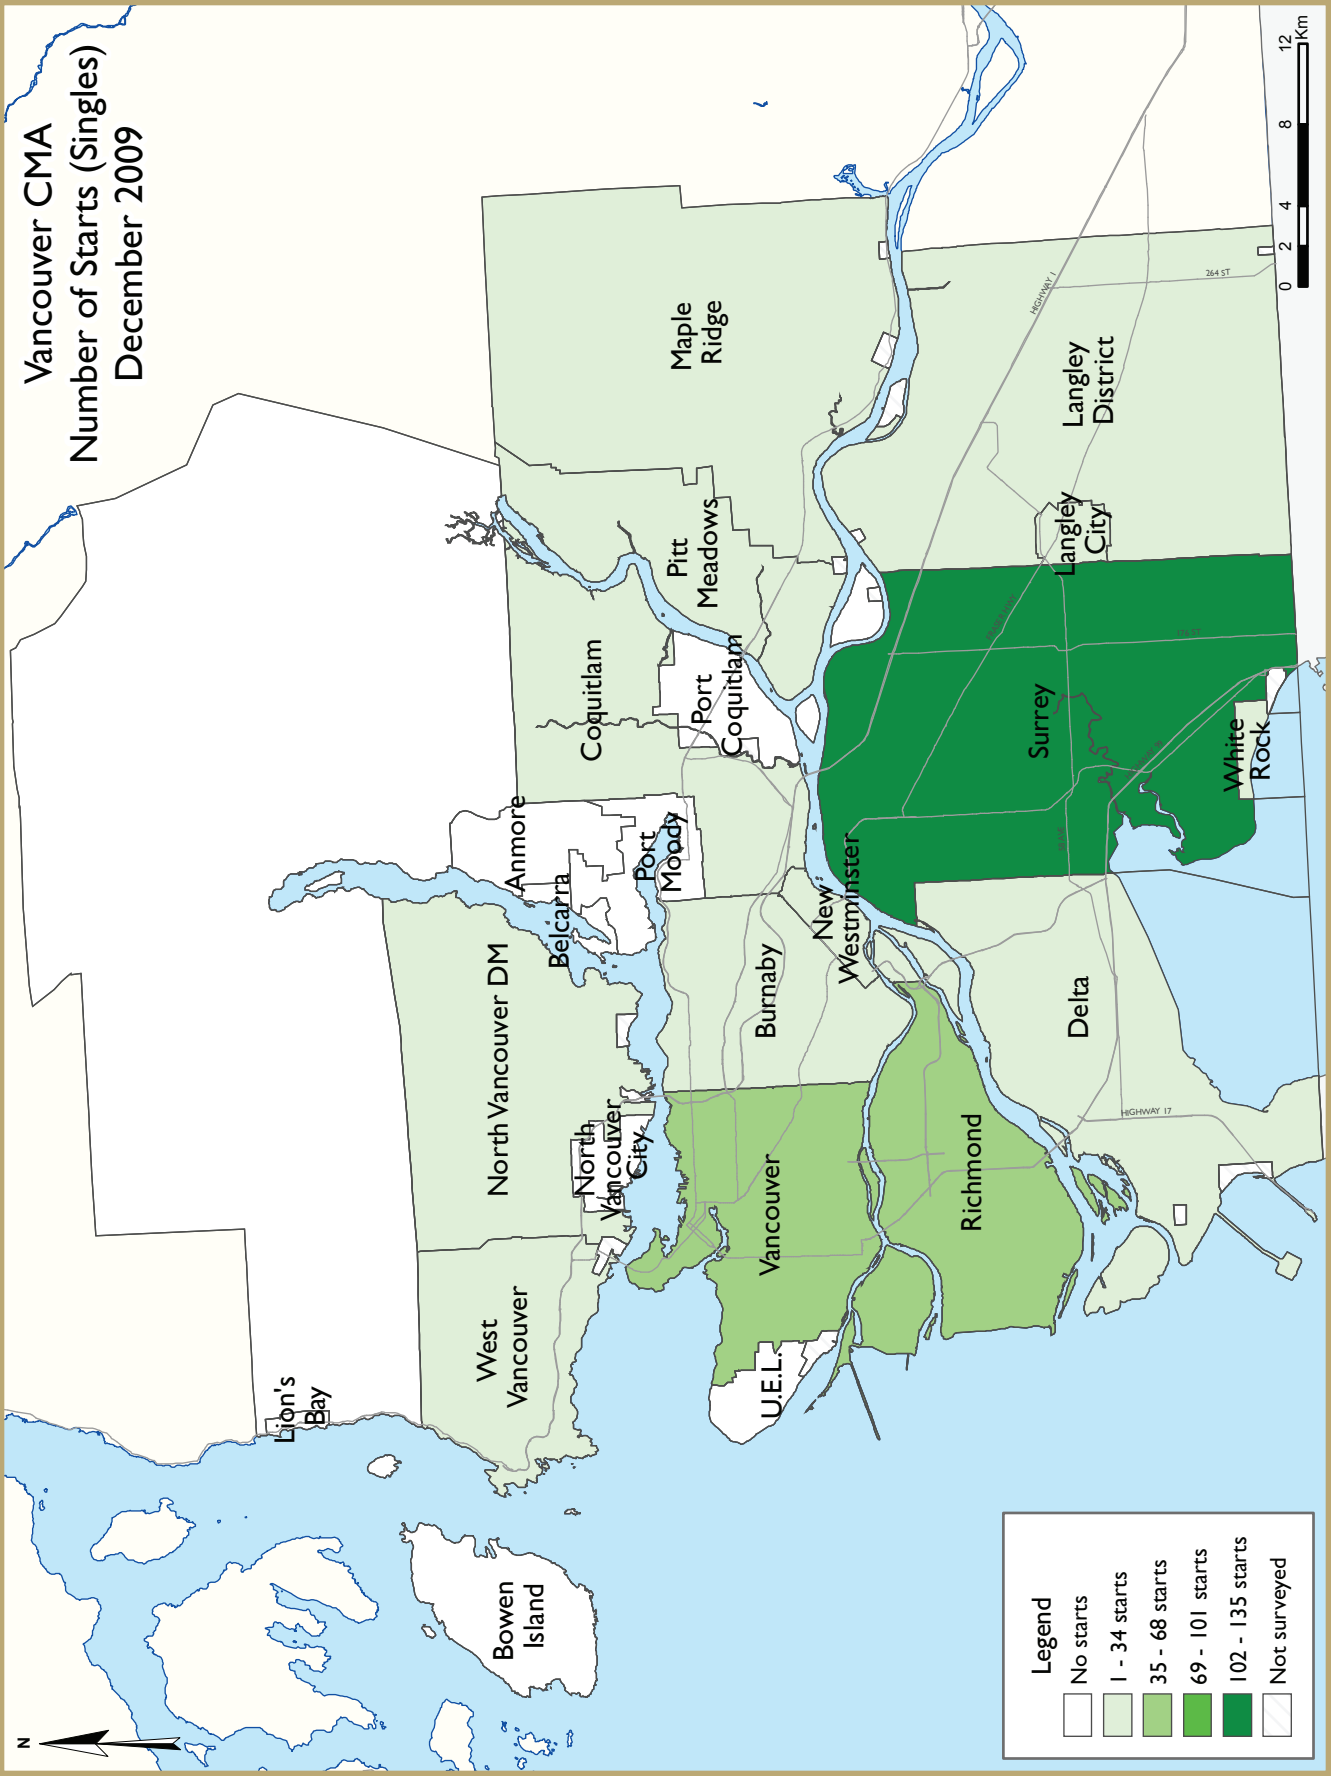

prices recovered and started to take off in July for the area, the number of transactions flattened out. Meanwhile, sales continued to rise in other areas like Vancouver East, Surrey, and Burnaby, where prices are generally lower.

Abbotsford CMA New Housing Activity

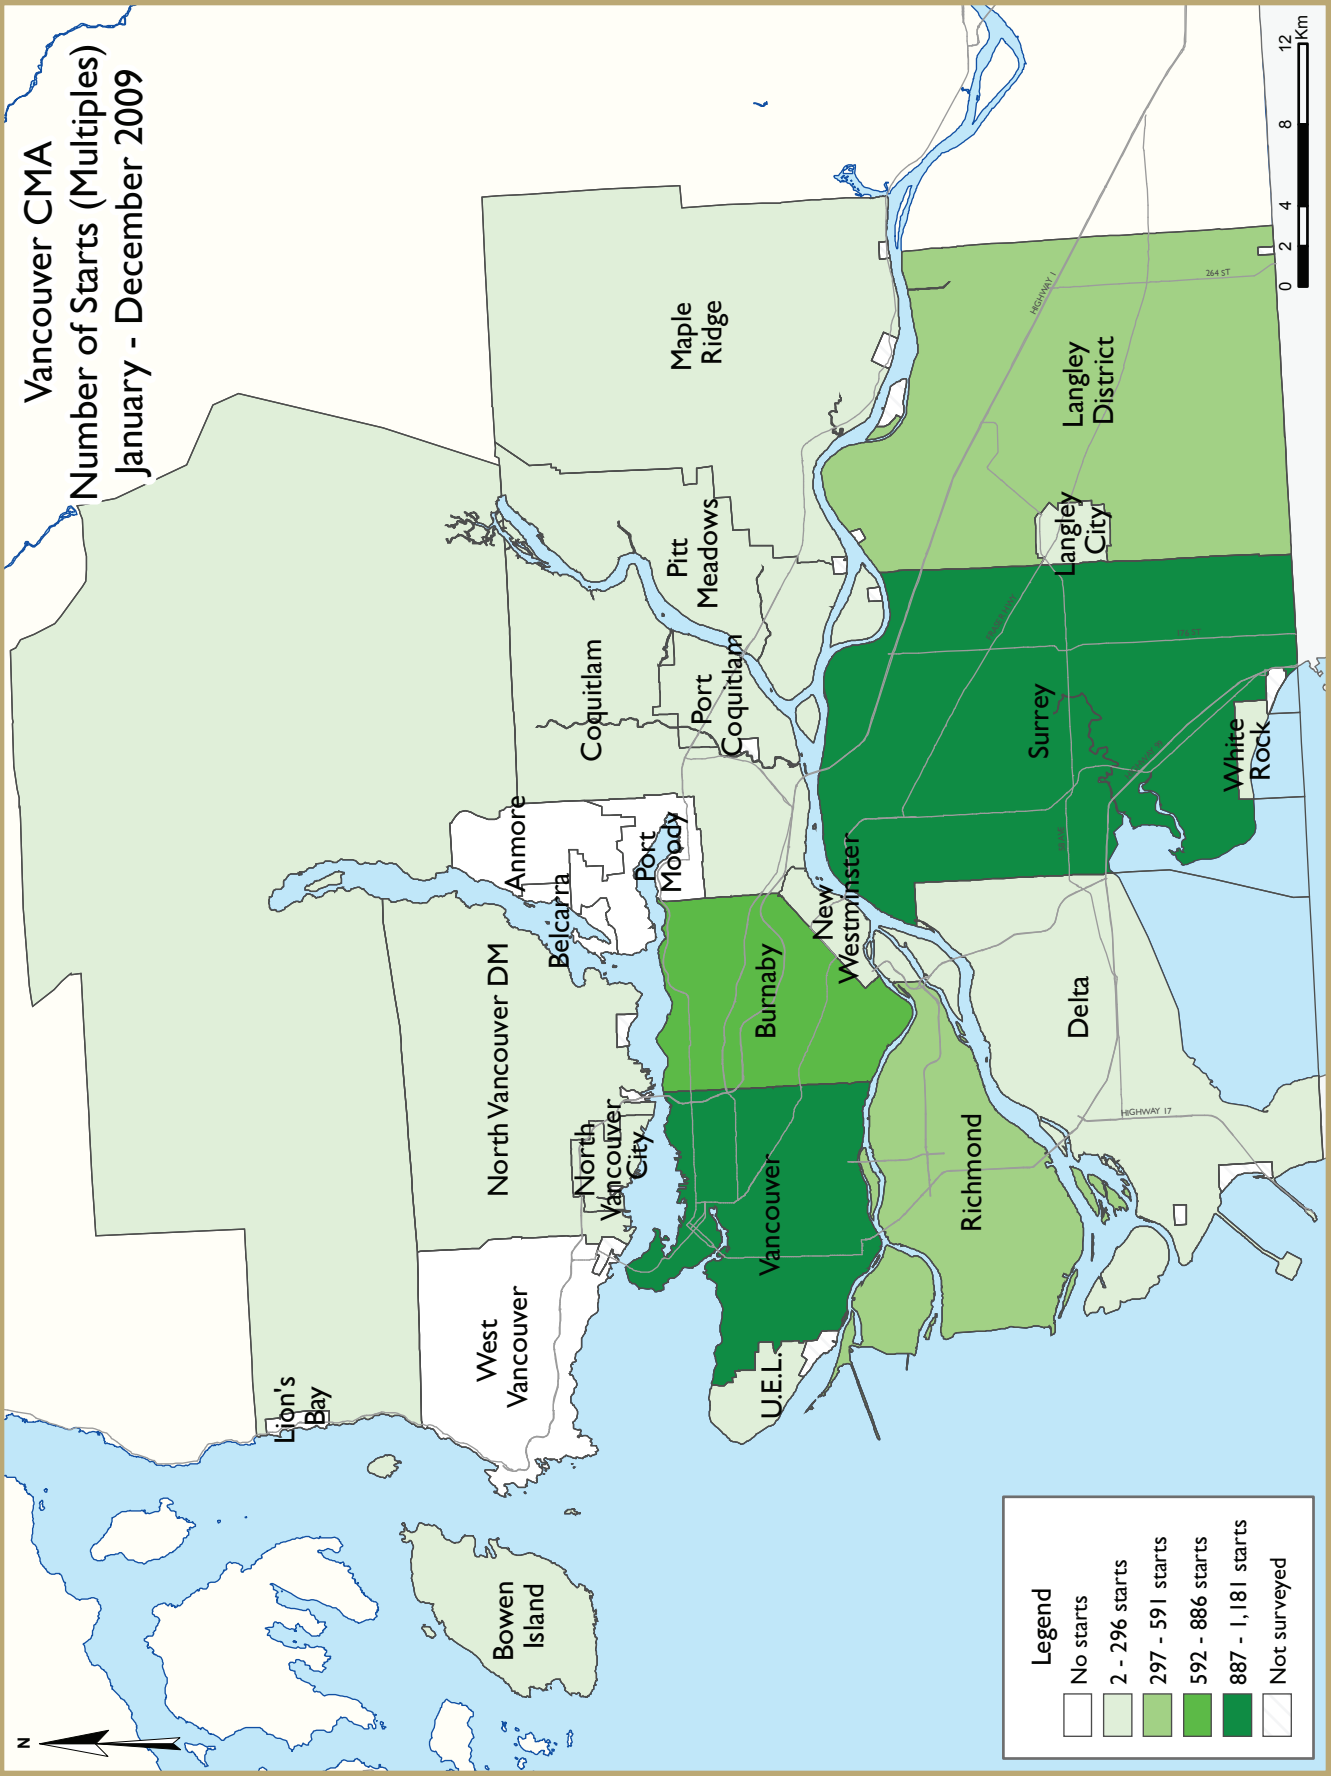

Unlike the Vancouver CMA, new home construction activity in the Abbotsford CMA remained subdued. Foundations were poured for 365 units in 2009, compared to 1,285 units in 2008. Much of this was due to a later pickup in real estate sales in Abbotsford than in Vancouver. With a large number of units still under construction the inventory of new homes remained relatively high.

However, absorption of new homes as well as existing home sales have picked up. The inventory of new and completed homes declined to 197 in December, 31 per cent lower than the same month the previous year. As such, prices have also recovered and new home prices for single-detached units are approximately at par with 2008.

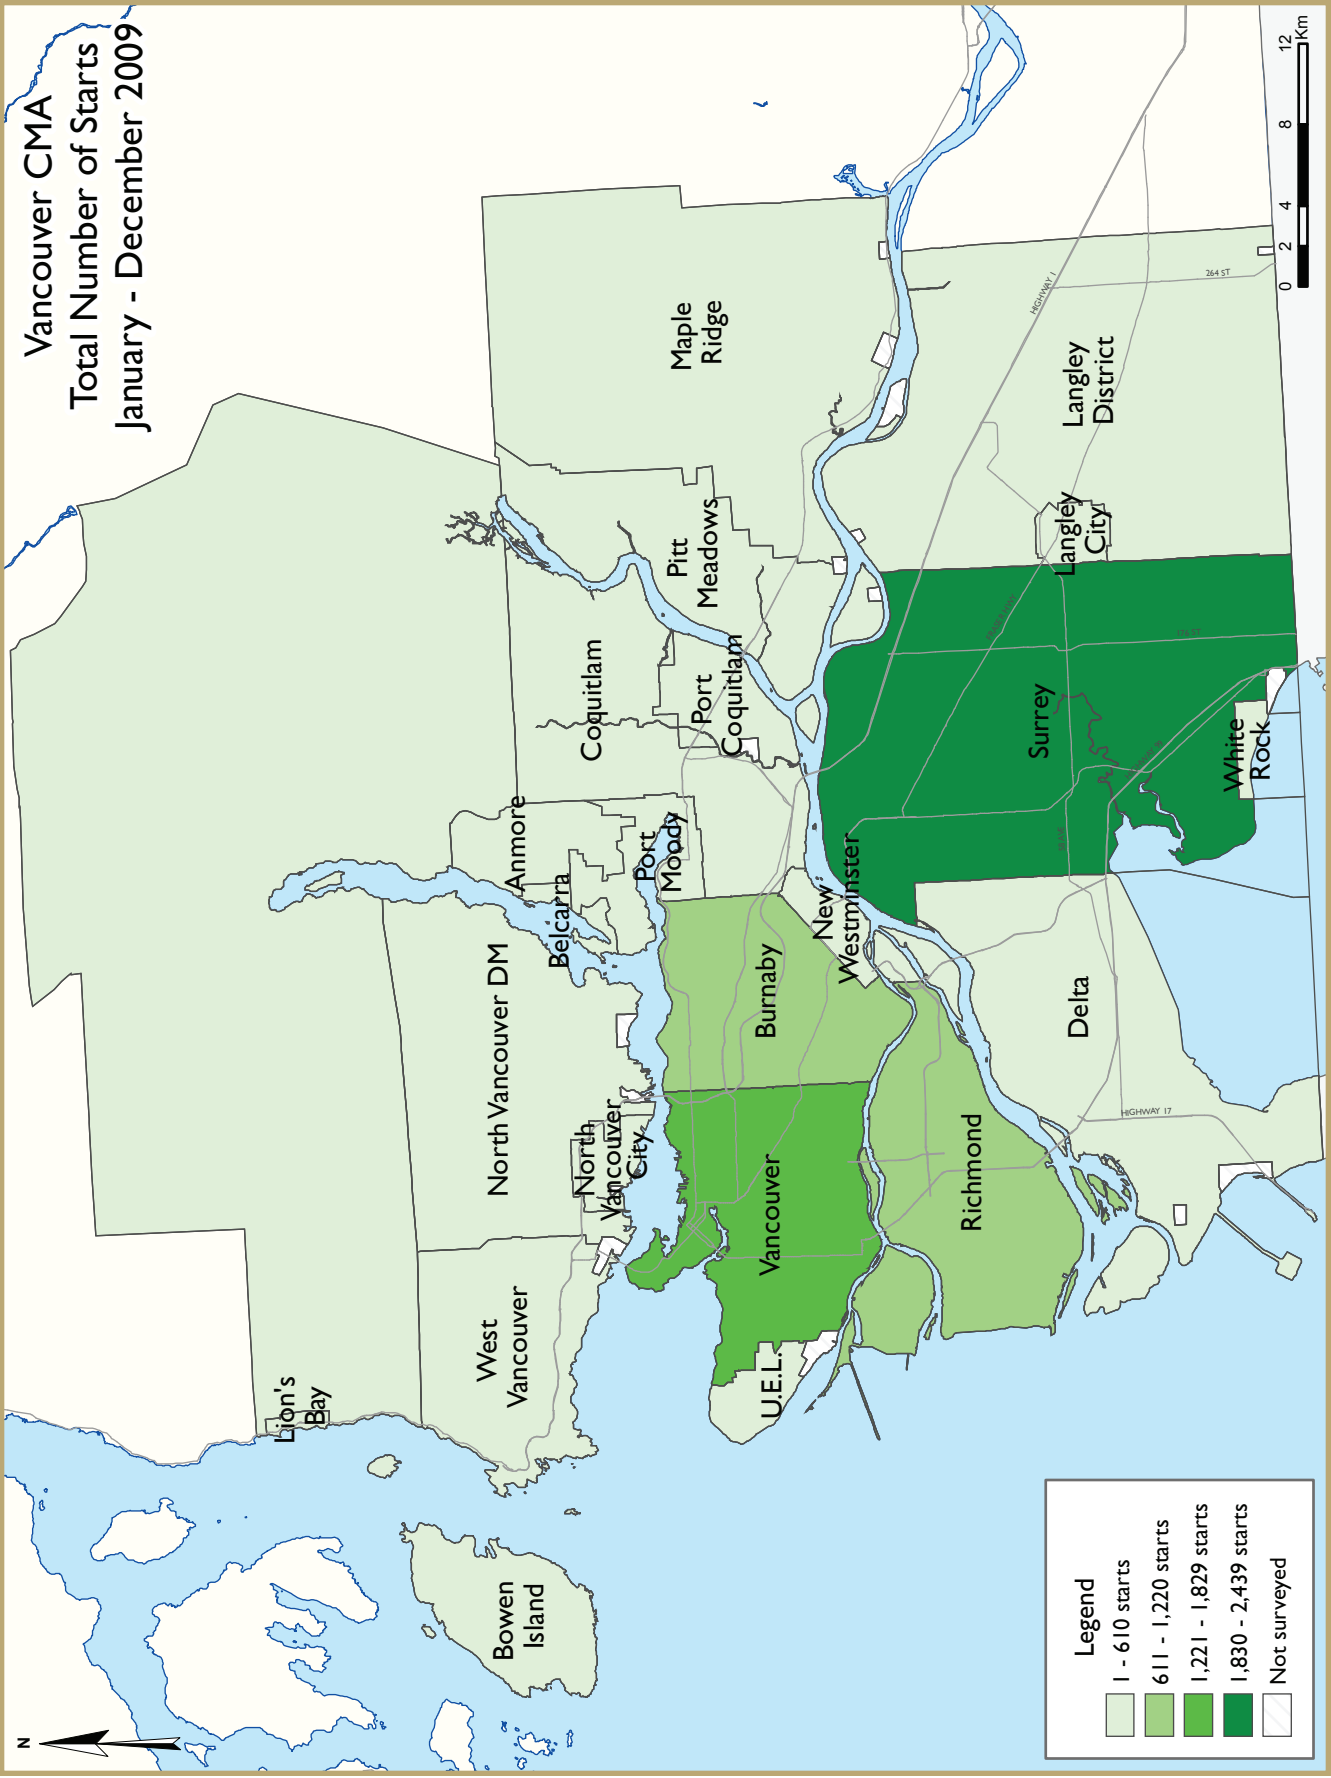

HOUSING NOW REPORT TABLES

MLS® is a registered trademark of the Canadian Real Estate Association (CREA).

All figures contained in this publication are smoothed data, except for sales and active listings

Raw data: data observed for the current quarter

Smoothed data: average for the last four quarters, to reduce strong variations from one quarter to another and give a clearer trend

* Single-family homes: detached, semi-detached and row homes

** At the end of the quarter

***: observed change greater than 100%

n/a: data not available when fewer than 8 sales are recorded during the quarter

Note: Fraser Valley Real Estate Board includes North Delta, Surrey, Langley, White Rock

Source: CREA

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada’s 2001 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
