Date Released: January 2010

New Home Market

Modest Rise in Fourth Quarter Starts

While 2009 was a slower year for new home starts in the Hamilton Census Metropolitan Area (CMA), there was some revitalization in new home building activity during the fourth quarter. As economic recovery gained momentum towards the end of the year, consumers brought forward their home purchases in anticipation of higher prices and mortgage rates in 2010. Builders started a number of homes during the quarter, reaching the highest quarterly total for 2009. Much of the rise was due to more semi-detached and townhouse starts, as well as a number of single-detached homes. Apartment starts however were absent during the second half of 2009, which is a contrast to the large number condominium apartments started in 2008. In the Brantford

CMA, starts were up by just one unit as compared to a year ago. Total starts in 2009 lagged behind 2008 and there were also fewer homes in the construction and completion stage

Although starts were down, builders were busy completing and selling homes. Completions were up by nearly 17 per cent in the Hamilton CMA, and the number of homes still yet unsold fell to a record low by the end of the year. Similarly in Brantford, the number of homes completed and not yet occupied also fell 24 per cent from a year prior. Given the decreased inventory, any uptick in demand will stimulate new construction. The largest numbers of completions were of freehold and condominium townhouses in Glanbrook and Stoney Creek. Persistent growth of townhouse communities in these markets in recent years kept new home building activity strong in the Hamilton CMA. Another onequarter of the completions were of condominium apartments, most of which were started in Burlington the year prior. High rise construction is expected to continue with 186 pending condominium apartment starts in Burlington in December.

Resale Market

Average MLS® Price Reaches Record High

While there was modest growth in new home construction, the resale market performed relatively well during the fourth quarter. Sales in the Hamilton CMA were up 44 per cent during the fourth quarter, nearly matching that of 2007, the record year for MLS® sales in the CMA. This included a number of condominiums. In the Brantford CMA, sales were also up 24 per cent during the quarter. Buyers' expectations of rising prices and mortgage rates in 2010 prompted them to purchase in the present.

While the number of homes sold increased, listings remained almost unchanged from the same quarter in 2008 in the Hamilton CMA and fell in the Brantford CMA. Consequently,

there were more buyers in the market competing for a home, while the number of sellers did not rise at the same pace. This prompted the market to tighten up and buyers reacted by making offers above the asking price. The dollar volume of homes sold in the Hamilton CMA nearly doubled during the fourth quarter. The average price of an existing home reached a record high of \$299,000 in the Hamilton CMA. In the Brantford CMA, prices rose by just over five per cent to \$224,000, which was just below the record price level set during the third quarter.

More People Seeking Jobs

Despite a rising unemployment rate in the Hamilton CMA, the local job market was relatively stable through the fourth quarter. Continued investments into the health care industry and growth in the financial service sector contributed to a modest I per cent increase in jobs. Despite the modest growth, the unemployed component of the labour force also rose, but much of this was a result of new people entering the labour force. This was particularly true for the 25 to 44 age group, where the number of unemployed increased by 20 per cent. As a result, the unemployment rate rose to 7.9 per cent last quarter, up from 6.3 per cent a year earlier. Also notable was that there was almost no change to unemployment in the manufacturing sector in the fourth quarter and was at its lowest level when compared to the rest of the

year. Some plants are operating below capacity, recalling workers on a temporary basis as necessary.

In the Brantford CMA, total employment also grew modestly but job losses and an unstable labour market did put a damper on new home construction. Downsizing in the primarily manufacturing-based economy throughout the year filtered through to the service producing sector, where unemployment increased four-fold in the fourth quarter. The less diversified economy in Brantford means that there have been fewer opportunities for growth and new entrants into the labour market have had difficulty securing a position. This also put upward pressure on the unemployment rate inadvertently in the Brantford CMA. The rate rose to 11.5 per cent in 2009 from 6.3 per cent in 2008.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "under construction" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A "Single-Detached" dwelling (also referred to as "Single") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "Semi-Detached (Double)" dwelling (also referred to as "Semi") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "Row (Townhouse)" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "Apartment and other" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada's 2001 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.

For more information, visit our website at www.cmhc.ca

You can also reach us by phone at I-800-668-2642 or by fax at I-800-245-9274. Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call 1-800-668-2642.

The Market Analysis Centre's (MAC) electronic suite of national standardized products is available for free on CMHC's website. You can view, print, download or subscribe to future editions and get market information e-mailed automatically to you the same day it is released. It's quick and convenient!
