#### HOUSING MARKET INFORMATION

# HOUSING NOW Hamilton and Brantford CMAs

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: November 2010

#### **New Home Market**

### More townhouse starts in Hamilton and Brantford

Single-detached and townhouse starts continued to lead the way in the Hamilton Census Metropolitan Area (CMA). There were 111 starts of single-detached homes and 112 starts of townhouses in the CMA last month, the majority of which were in the City of Hamilton. There were only a handful of single-detached starts in Burlington and

Grimsby. The number of single-detached starts in the CMA has continued to decline as a proportion of total starts, reflecting the limited land supply available for residential construction for larger homes.

The total number of starts for the first 10 months of year was up, and comparable to the level of starts produced during the same 10-month period in 2008. There were over 3,000 starts by the end of October. Approximately 47 per cent of the

starts this year were single-detached starts, and townhouses accounted for approximately 26 per cent. The rebound in starts this year resulted partially from the number of buyers looking to purchase and close on a new home prior to the imposition of the HST tax in July. Also, over 560 apartments were started this year, which is well above the longer term trend level.

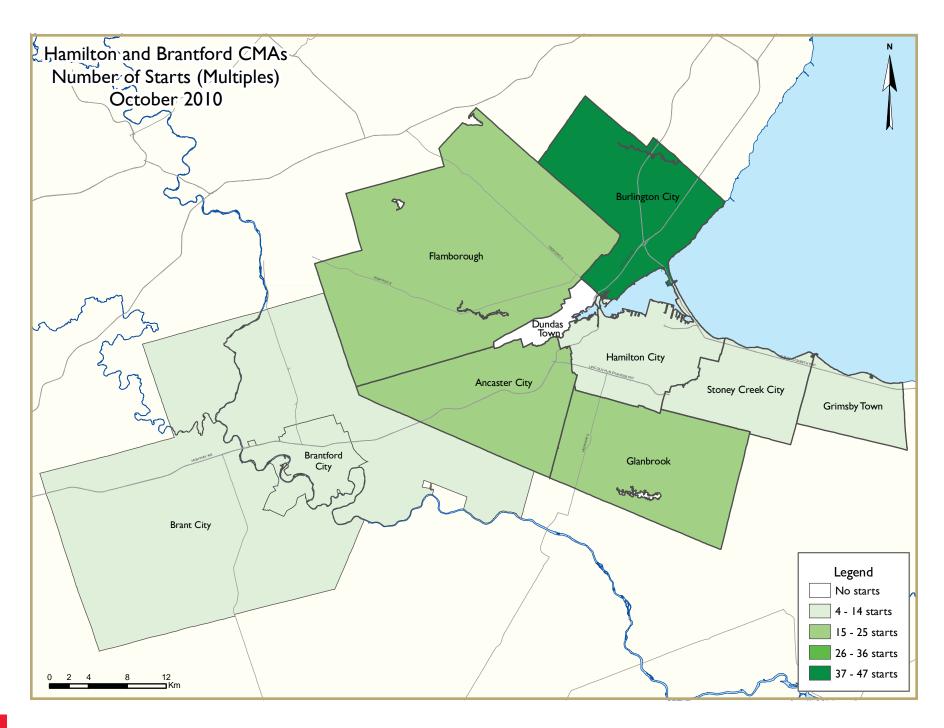

Builders in Hamilton have also been busy completing the construction of thousands of homes this year. They completed 761 condos in the CMA by the end of October, similar to a year ago. The majority of the condos were townhouses, most of which were in the City of Hamilton. Nearly all of them have been sold. Townhouses have been more prevalent in some of the higherpriced markets, where buyers have looked to smaller and less expensive homes such as townhouses as an alternative to single-detached homes. Also, more condominium apartments have been started in Burlington and the City of Hamilton this year, and all of them have sold. The trend in condo living is continuing to grow,

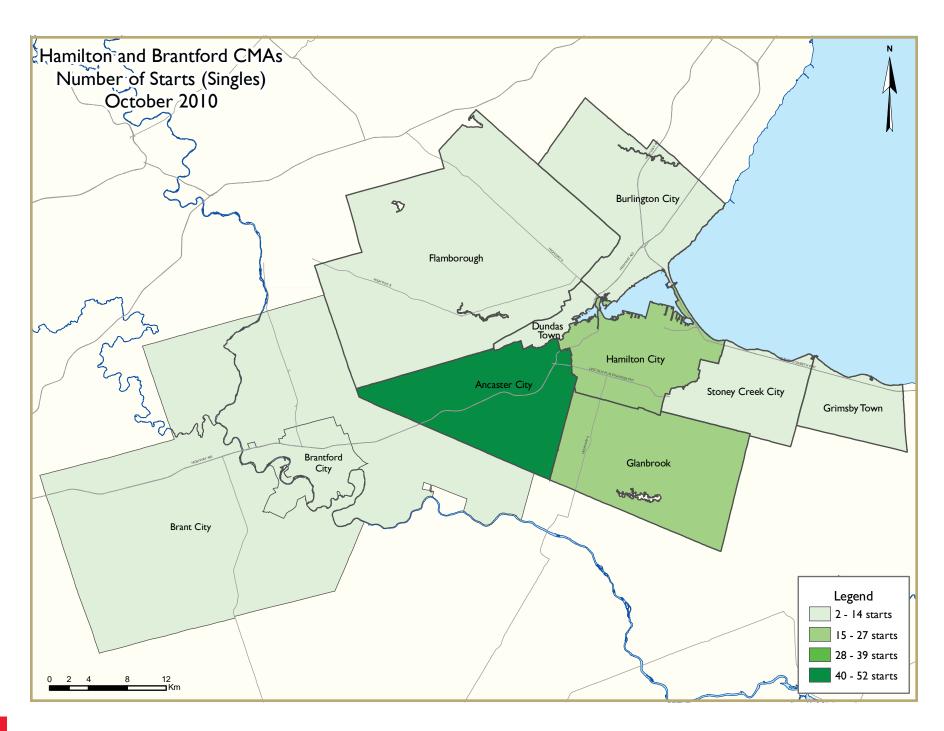

as evidenced by the number of new condos being started in addition to the growing number of conversions of non-residential buildings to condos.

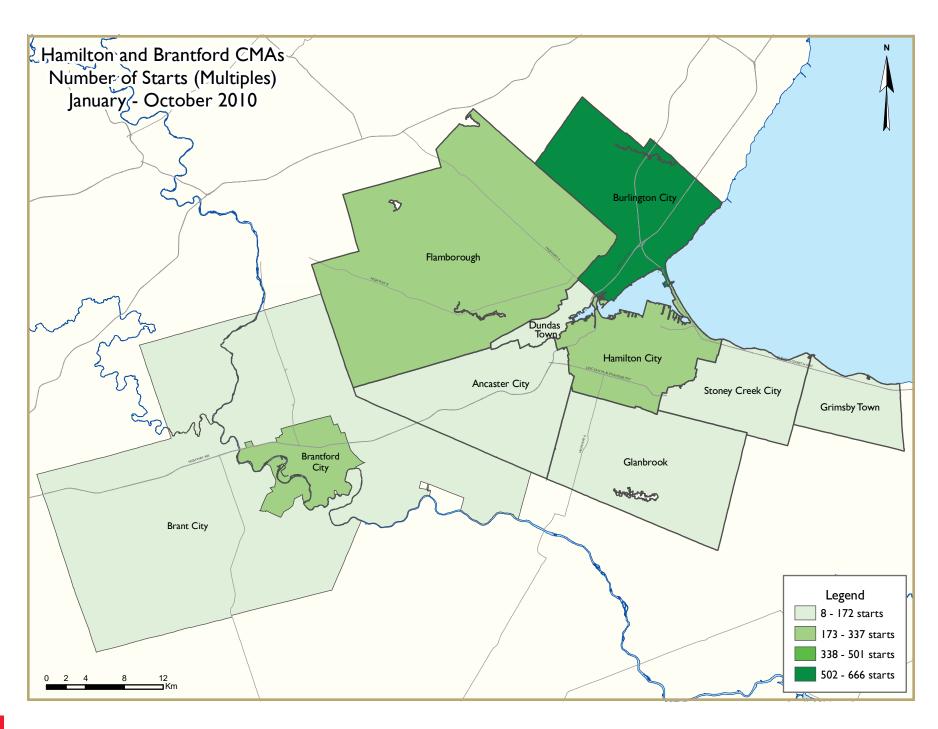

In Brantford, there were just 28 new home starts last month, although total starts for the year to date have been high. Much of the upswing in starts was from the City of Brantford, where townhouses have been springing

up more frequently than in other years. There were over 100 starts of townhouses for the year to date in the City of Brantford as of the end of October. Townhouse starts have been occurring consistently every month in the City of Brantford. Given the lower number of homes completed yet unsold at the end of the month, it can be inferred that there has been steady demand for new homes in Brantford.

#### HOUSING NOW REPORT TABLES

#### Available in ALL reports:

- I Housing Activity Summary of CMA
- Starts by Submarket and by Dwelling Type Current Month or Quarter
- 2.1 Starts by Submarket and by Dwelling Type Year-to-Date
- 3 Completions by Submarket and by Dwelling Type Current Month or Quarter
- 3.1 Completions by Submarket and by Dwelling Type Year-to-Date
- 4 Absorbed Single-Detached Units by Price Range
- 5 MLS® Residential Activity
- 6 Economic Indicators

#### **Available in SELECTED Reports:**

- 1.1 Housing Activity Summary by Submarket
- 1.2 History of Housing Activity (once a year)
- 2.2 Starts by Submarket, by Dwelling Type and by Intended Market Current Month or Quarter
- 2.3 Starts by Submarket, by Dwelling Type and by Intended Market Year-to-Date
- 2.4 Starts by Submarket and by Intended Market Current Month or Quarter
- 2.5 Starts by Submarket and by Intended Market Year-to-Date
- 3.2 Completions by Submarket, by Dwelling Type and by Intended Market Current Month or Quarter
- 3.3 Completions by Submarket, by Dwelling Type and by Intended Market Year-to-Date
- 3.4 Completions by Submarket and by Intended Market Current Month or Quarter
- 3.5 Completions by Submarket and by Intended Market Year-to-Date
- 4.1 Average Price (\$) of Absorbed Single-Detached Units

#### **METHODOLOGY**

#### **Starts & Completions Survey Methodology**

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

#### **Market Absorption Survey Methodology**

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "under construction" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

#### **DWELLING TYPES:**

A "Single-Detached" dwelling (also referred to as "Single") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "Semi-Detached (Double)" dwelling (also referred to as "Semi") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "Row (Townhouse)" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "**Apartment and other**" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

#### INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

#### **GEOGRAPHICAL TERMS:**

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada's 2001 Census area definitions.

#### CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
