<sup>1</sup>The outlook is subject to uncertainty. Although point forecasts are presented in this publication, CMHC also presents forecast ranges and risks where appropriate. The forecasts included in this document are based on information available as of July 30, 2010.

Housing market intelligence you can count on

## **Overview**<sup>I</sup>

The economic and housing data has certainly been supportive to the recovery so far in 2010. Along with historically low interest rates, stable income levels and moderate employment growth, the economy of Atlantic Canada has performed better than forecast during the first half of 2010. By the end of the year, the level of housing activity is forecast to rise close to seven per cent compared to what occurred in 2009, with the economy showing moderate growth overall. Compared to the early part of the year, the pace of growth for both the economy and housing is expected to slow over the second half of 2010.

# **Housing Starts Improve**

Single starts will show a moderate recovery of close to nine per cent in 2010 as the economy in Atlantic Canada continues to build momentum. Low vacancy rates and demographic trends related to an aging population will continue to contribute to stability for multiple starts, which are expected to rise close to five per cent in 2010. Net-migration to the large urban centres across Atlantic Canada is

expected to continue to shift housing activity predominantly to the six key urban centres in Atlantic Canada.

# MLS<sup>®</sup> Prices and Sales Continue to Rise in 2010

With only a moderate rise in inventory so far in 2010, the growth in prices in the existing home market is expected to remain positive this year. The range in price growth will vary across Atlantic Canada from a high of 13 per cent in Newfoundland and Labrador to close to seven per cent in Nova Scotia and close to three per cent in New Brunswick. Prices in Prince Edward Island are expected to rise less than one per cent in 2010.

In 2010, existing home sales are also expected to rise modestly across most of the region. Sales growth will vary across Atlantic Canada from close to three per cent in Nova Scotia, and close to two per cent in NL. Sales in New Brunswick are forecast to decline close to four per cent and for Prince Edward Island sales are forecast to decline just over seven per cent.

# **Economic Forecast**

Economic growth will be positive in 2010 due to improved global prospects, and additional spending by the four provincial governments.

New Brunswick's economic performance is very much tied to continued improvements in the U.S. economy, with positive economic growth of 1.5 per cent forecast for 2010 and 1.4 per cent for 2011.The moderate decline in economic activity observed in New Brunswick in 2009 has been replaced by improving commodity prices and an increase in capital spending in infrastructure

projects at both the provincial and municipal level, which will contribute to positive economic growth this year and next. Consumer spending is also forecast to show moderate growth, as the outlook for the labour market continues to improve slowly. Several new, recently announced capital projects will provide additional spark to the provincial economy in 2010 and 2011, as they move through the planning stages. A global recovery focused on commodities is the cornerstone for economic growth in 2010 and 2011, as the mining and energy sectors continue to stabilize or increase production activity.

For Newfoundland and Labrador. expect 3.9 per cent GDP growth in 2010 and 3.0 per cent in 2011. Several major capital projects will continue to inject stimulus into the local economy and contribute to a positive outlook. Consumers are also a key component for positive economic growth in 2010 through related spending on retail, auto and housing. Natural declines in offshore oil production will restrain GDP growth this year and next, although increased royalties received by the province will contribute to economic growth.Additional growth comes from the province's significant infrastructure spending program in 2010 and 2011. It is expected that a number of resource related projects will begin to add to economic growth toward the end of the forecast period.

For Nova Scotia, positive economic growth of 1.6 per cent is expected in 2010 and 1.5 per cent in 2011. Nonresidential investment continues to be one of the key drivers for growth although the level of investment activity will begin to fade in 2011. Contributing to the positive outlook is consumer spending which has recently shown some signs of growth in 2010, within the current environment of low interest rates. Offsetting these positive influences will be the negative impacts from a stronger dollar continuing to impact exporters and the manufacturing sector.

For Prince Edward Island, economic growth of 1.8 per cent is forecast for 2010 and 1.5 per cent for 2011. Growth will continue to be supported by capital spending by the province, as well as the expectation of an improving global outlook. Consumer spending in Prince Edward Island has shown some improvement so far in 2010, including an upward trend in auto sales. These factors, combined with a more positive trend in employment, will continue to support a stable economic outlook for 2010 and 2011.

# CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.

For more information, visit our website at www.cmhc.ca

You can also reach us by phone at 1-800-668-2642 or by fax at 1-800-245-9274. Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call 1-800-668-2642.

The Market Analysis Centre's (MAC) electronic suite of national standardized products is available for free on CMHC's website. You can view, print, download or subscribe to future editions and get market information e-mailed automatically to you the same day it is released. It's quick and convenient! Go to www.cmhc.ca/housingmarketinformation

For more information on MAC and the wealth of housing market information available to you, visit us today at <a href="http://www.cmhc.ca/housingmarketinformation">www.cmhc.ca/housingmarketinformation</a>

To subscribe to priced, printed editions of MAC publications, call I-800-668-2642.
