New Home Market

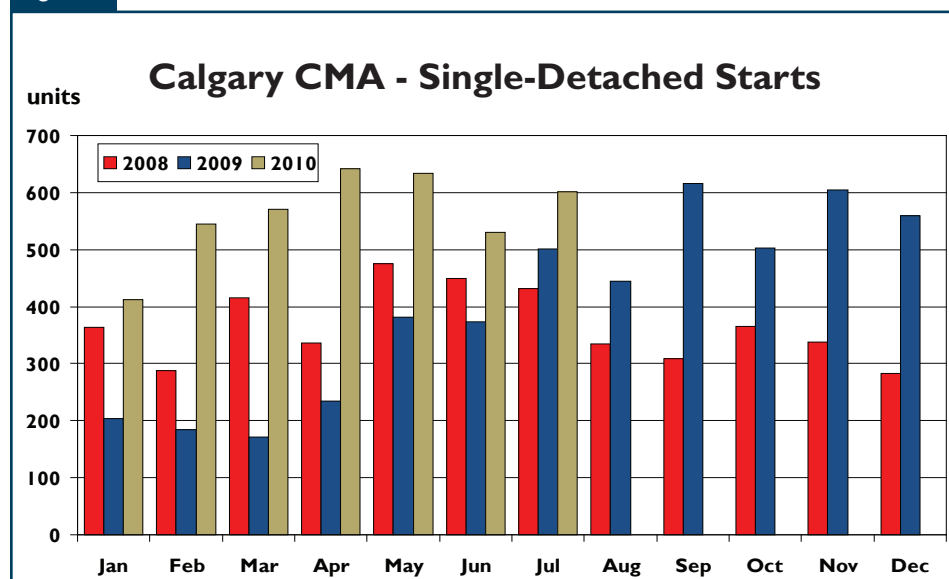

Housing starts rise in Calgary

Total housing starts in the Calgary Census Metropolitan Area (CMA) reached 1,166 units in July 2010, increasing from 755 units in July 2009. After seven months, total housing starts have reached 5,783 units, up from the 2,736 units started in the

same period last year. Although production to the end of July was more than double compared to the previous year, activity is still below the ten-year average of 7,449 units.

Single-detached starts increased to 602 units in July, representing a 20 per cent gain from the 501 units started in July 2009. This is the highest level of starts for the month of July since 2007, and the 13th consecutive month that single-detached starts

have increased on a year-over-year basis. This streak will likely end as competition from the resale market slows new home sales and moderates starts in the months ahead. Year-to-date, single-detached starts have reached 3,937 units, up 92 per cent from the 2,050 units started by this time last year.

Inventories of single-detached units in July declined to the lowest level since January 1993. There were 347 units in inventory in July, down 46 per cent from the previous year. For the second consecutive month, absorptions had outpaced completions. There were 614 units completed in July, compared to 629 absorptions. A high proportion of homes are being absorbed at completion rather than moving into inventory. Of the 614 units completed in July, 600 units were absorbed at completion.

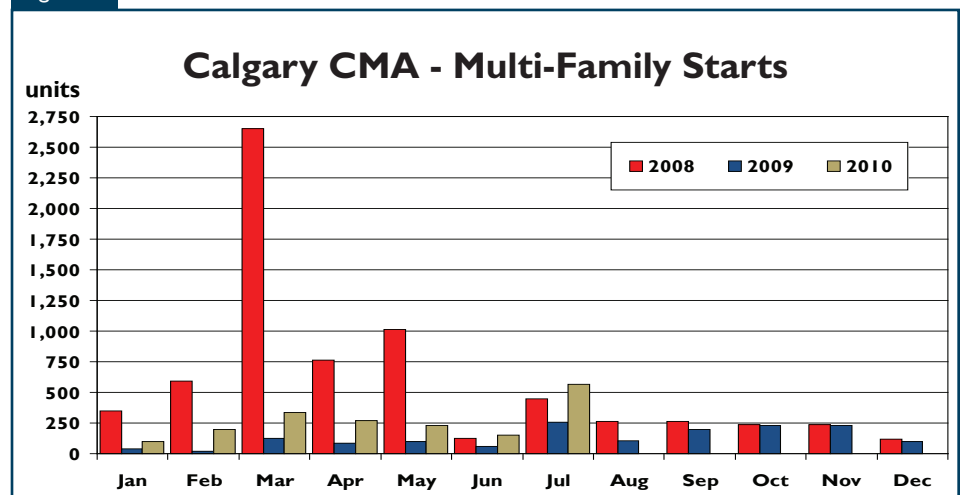

The median absorbed price, which is less influenced than the average by extreme values, reached \$448,500 in July, down four per cent from the

previous year when it was \$465,000. Readers should note that the absorbed price reflects units absorbed at or after completion in a given month, which is not necessarily the month when the price was negotiated.

Multi-family starts, which include semi-detached, row, and apartment units, totalled 564 units in July, increasing from 254 units started in the previous year. Row and apartment condominium starts along with some

new rental construction helped lift monthly multi-family activity to a 26-month high. Production of semi-detached and row units have been brisk in 2010, making up 65 per cent of total multi-family production year-to-date. Apartment starts however have been relatively low as builders focus on moving current inventory rather than starting new units. To the end of July, multi-family starts have amounted to 1,846 units, not only up from the 686 units started in the

Figure 3

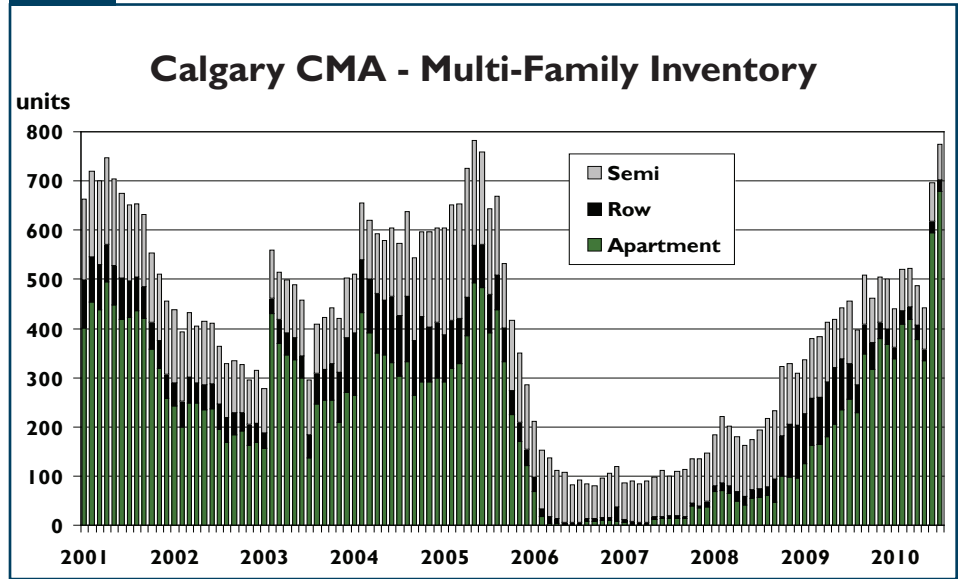

Source: CMHC

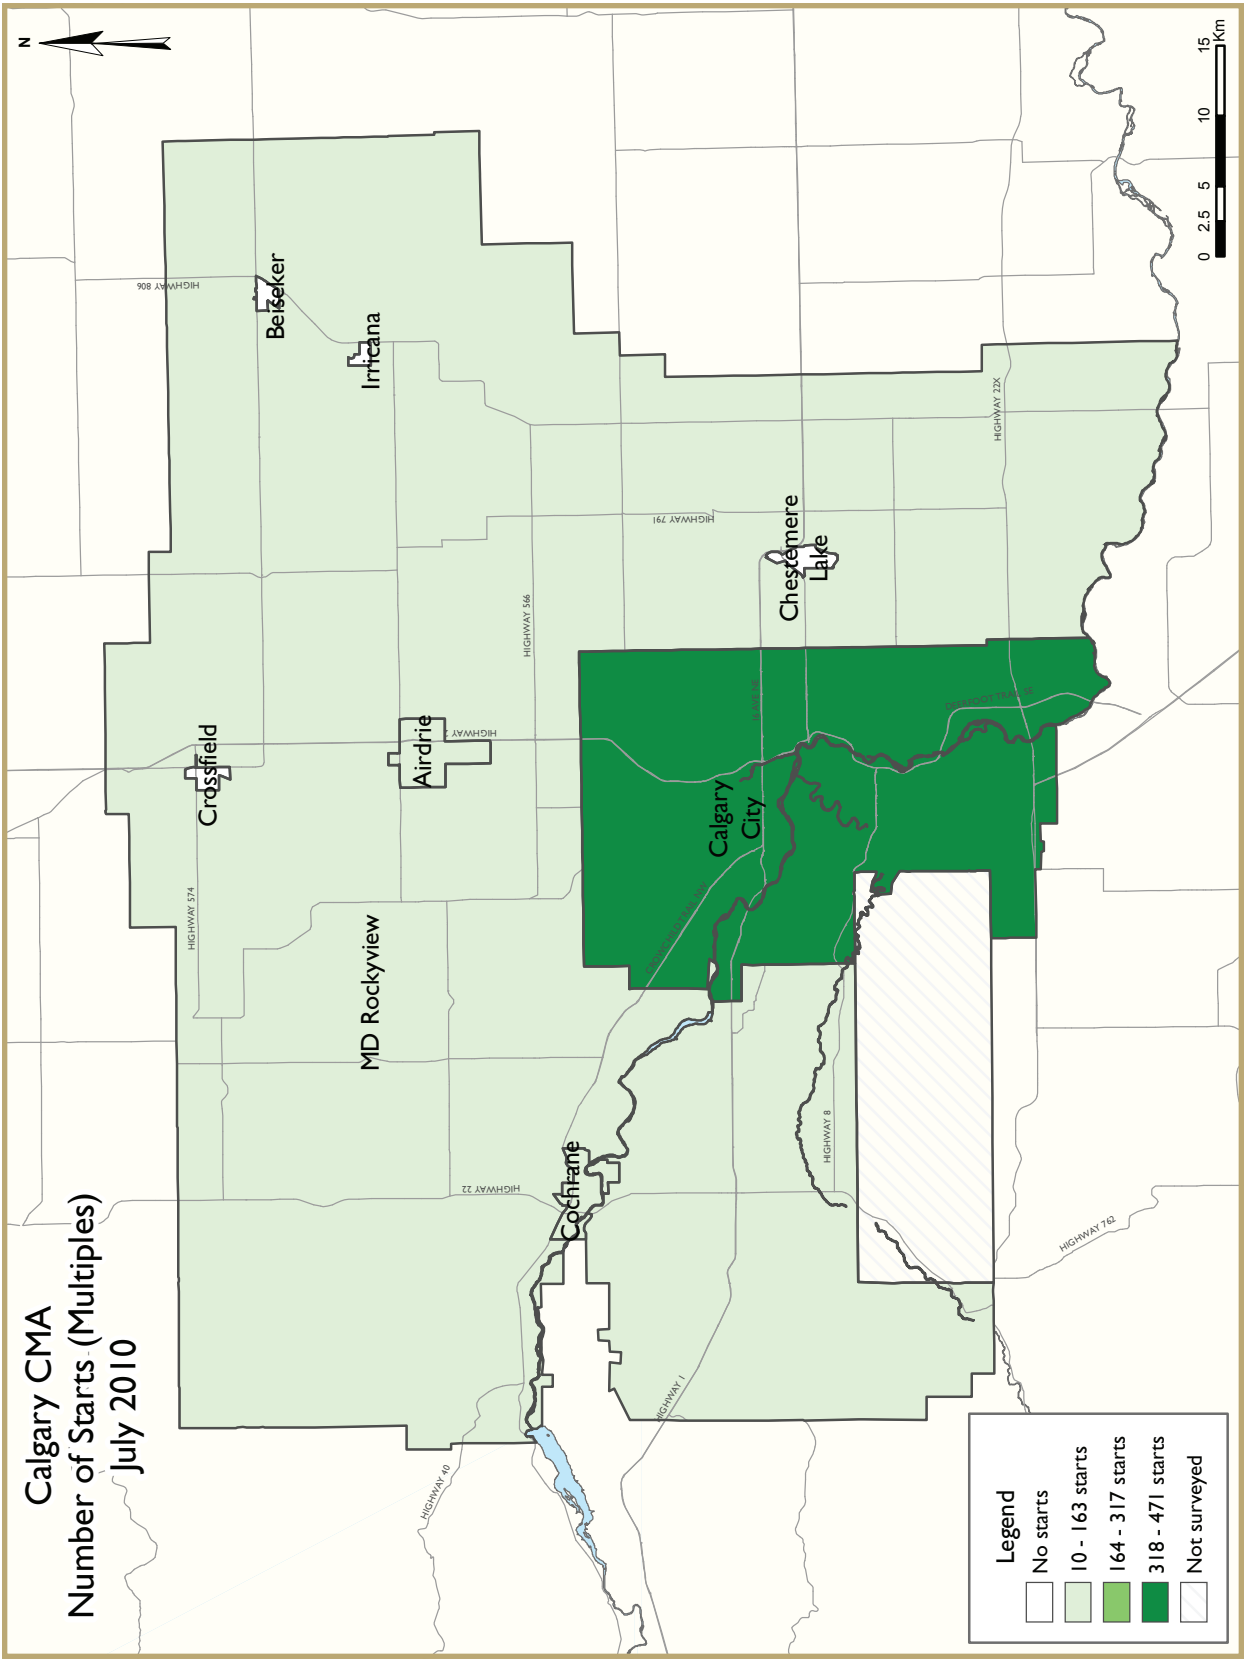

same period a year earlier but also surpassing the 1,543 units started in all of 2009.

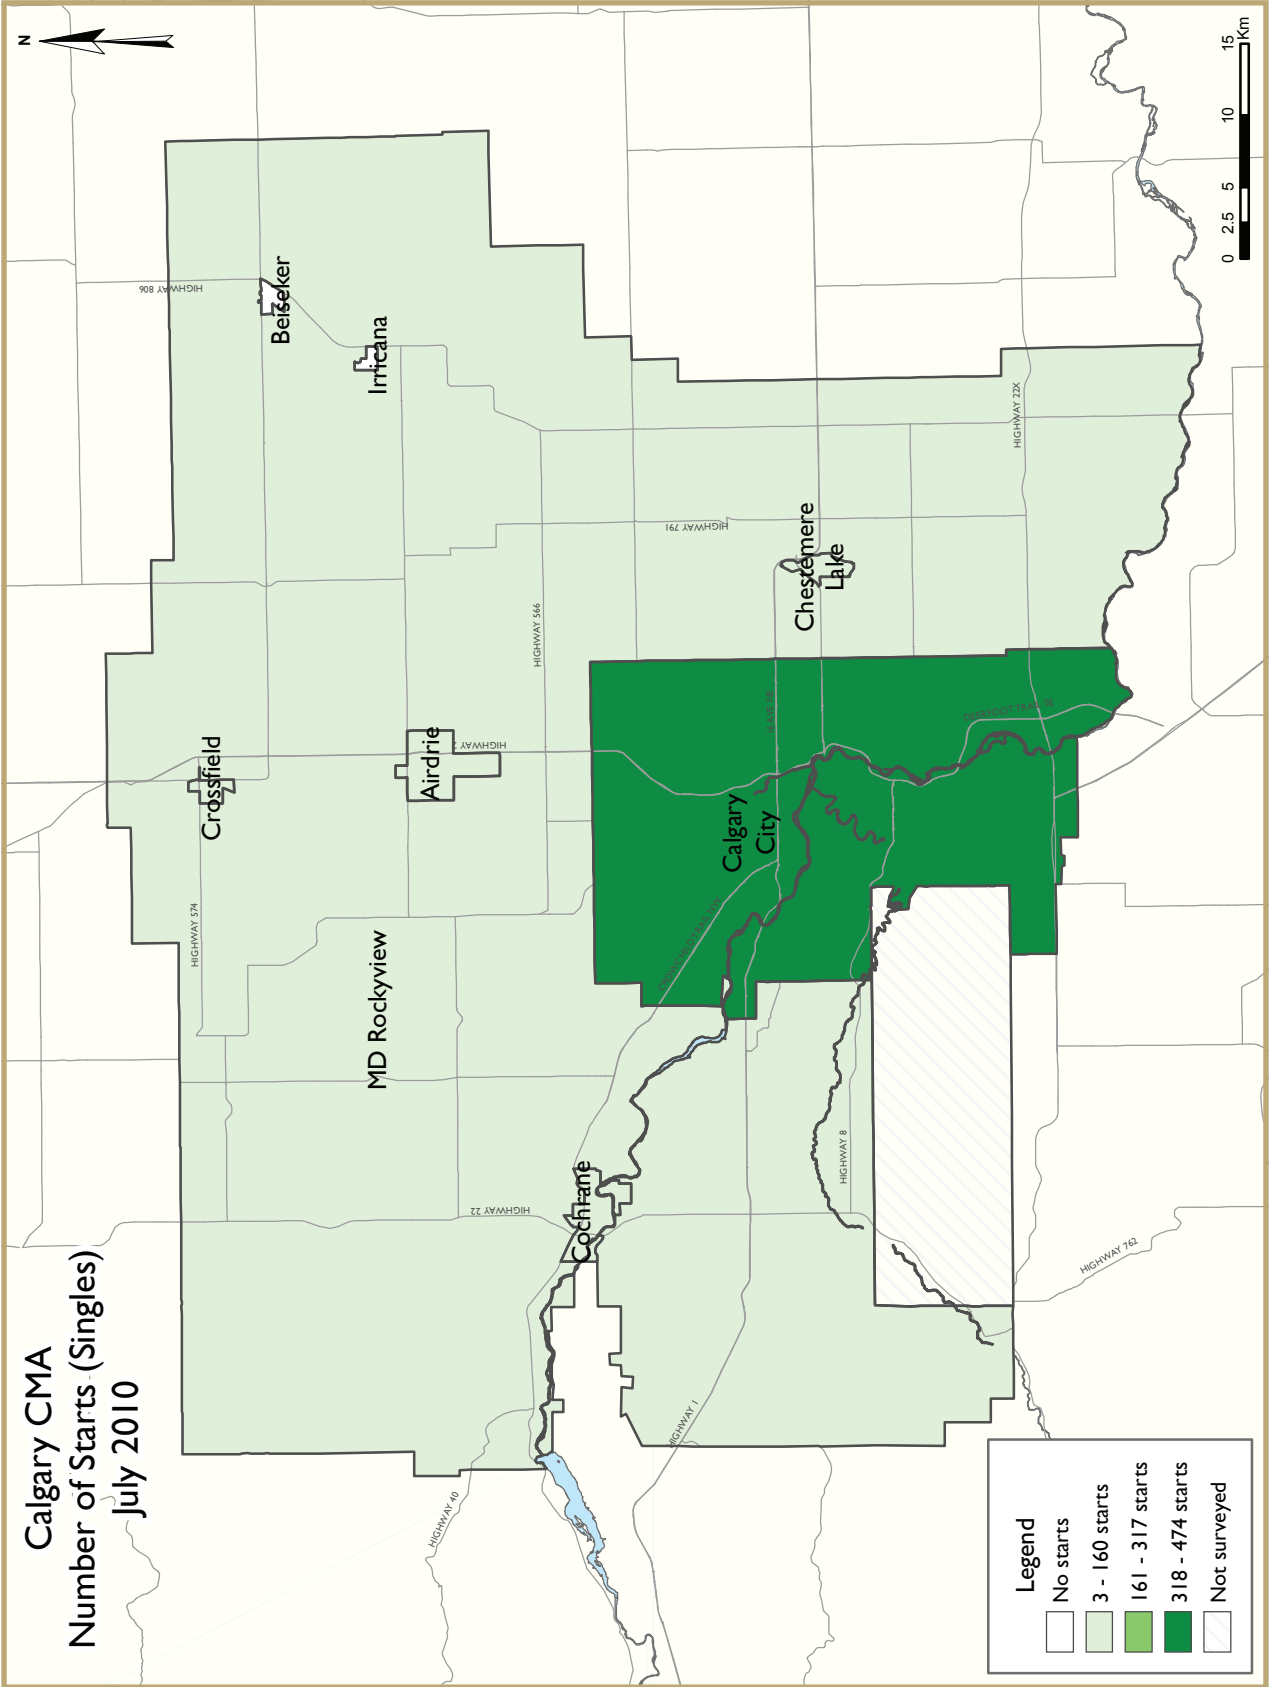

There were 791 multi-family units completed in July 2010, up 125 per cent compared to July 2009. A majority of the completions was attributed to the 627 apartment units that finished construction while 238 of those units were for social housing. Absorptions were also up, increasing 40 per cent from 339 units in July 2009 to 475 units in July 2010. With completions surpassing absorptions, multi-family inventories rose to 775 units in July, up 70 per cent from the previous year.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada’s 2001 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
