New Home Market

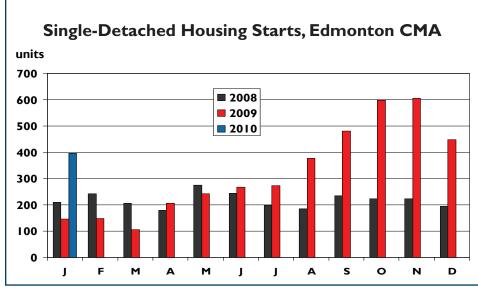

Edmonton's Housing Starts Open 2010 on Strong Note

New housing activity in Edmonton began 2010 on a firm footing thanks to continued strength in singledetached starts. Housing starts in the Edmonton Census Metropolitan Area (CMA) totalled 577 units in January compared with 413 units in January 2009. A similar trend is noted in the resale market where sales of existing homes increased by 21 per cent yearover-year in January.

Single-detached starts in the Capital region amounted to 397 units in January, up considerably from the 147 units reported during the first month of 2009. This represented

Canada

the eighth month in a row that the region's builders have started more units than a year prior. The 3,05 I singles under construction in January represented a 46 per cent increase from January of last year and the highest level since July 2008. CMHC anticipates continued strength in new single-detached production in the coming months as the local economic conditions improve.

Single-detached completions within the Edmonton CMA increased yearover-year in January by 18 per cent to 374 units. Absorptions at 352 units were on pace with January 2009 when 354 units were absorbed. Sustained absorption rates over the past year, coupled with restrained increases in single-detached starts, have resulted in a decline in the stock of completed and unoccupied singles. Across Greater Edmonton, inventory levels in lanuary (including show homes) were down by 56 per cent year-over-year. However, with completions outpacing absorptions by a small margin in January, inventories increased on a month-over-month basis for the first time since February of last year.

The median price of a new singledetached home absorbed in January was \$421,200, down 17 per cent from the \$509,050 median value reported in January 2009. This decrease was larger than the reductions in contractor selling prices reported by the Statistics Canada New House Price Index (NHPI), which fell by 9.4

per cent on a year-over-year basis in December.

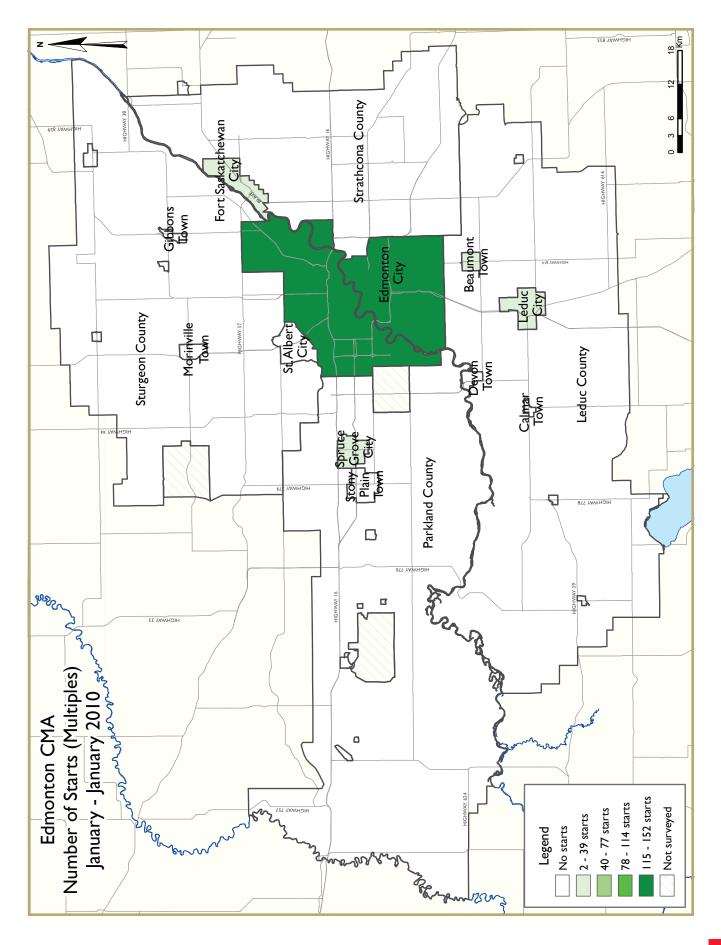

Following three months of improvement, multiple dwelling starts across Metro decreased on year-overyear basis in January. Semi-detached, row, and apartment starts totalled 180 units in January, representing a decline of 32 per cent from the 266 units recorded in January 2009. Improved activity in semi-detached and townhouse (row) construction was countered by a lower number of apartment starts. Multiple unit completions totalled 430 units in lanuary, representing a decline of 40 per cent from the 711 completions reported during the first month of 2009.

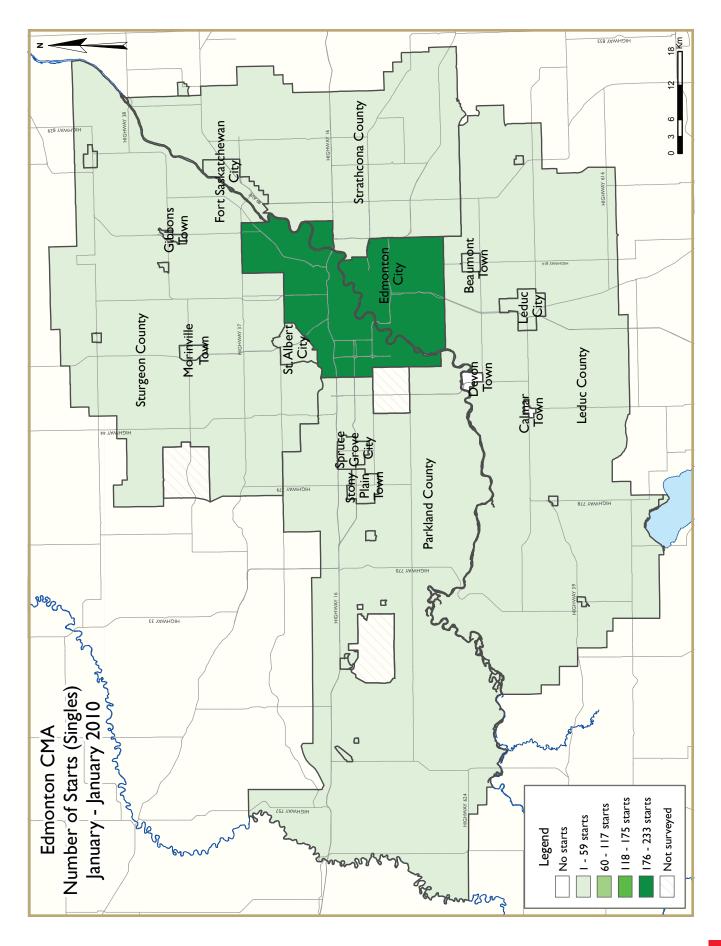

Across the region, multiple unit absorptions were down from January 2009 but managed to exceed completions by 30 units. As a result, the inventory of completed and unoccupied multiples declined in January for the fourth consecutive month. While still considerably up from this time last year, multi-family inventories in January were at their lowest since August of last year. The sustained decline in the inventory of completed and unoccupied multiples, particularly condo apartments, will ease concerns and encourage new construction in the months ahead.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "**dwelling unit**", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "**under construction**" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "**completion**", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "**absorbed**" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A "**Single-Detached**" dwelling (also referred to as "**Single**") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "**Semi-Detached (Double)**" dwelling (also referred to as "**Semi**") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "**Row (Townhouse)**" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term **"Apartment and other**" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada's 2001 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
