Date Released: August 2010

New Home Market

Edmonton Year-to-date Housing Starts Surpass 2009's Annual Production

Housing starts in the Edmonton Census Metropolitan Area (CMA) continued to outperform the previous year. Housing starts in Greater Edmonton totalled 949 units in July, up from 451 units in July 2009. This represents the 13th consecutive month of year-over-year gains in new home construction. To the end of July, local builders have started 6,328 housing units, up from 2,363 during the corresponding period last year and surpassing all of 2009's annual production.

Local builders started 610 singledetached units last month.

representing a 123 per cent increase from the 273 units started in July 2009. While impressive, July's yearover-year gain was less pronounced than the 185 per cent increase to the end of June. In the latter half of the year, the single-detached sector will be competing with comparatively stronger numbers from the second half of 2009. After seven months, construction began on 3,799 singledetached units, 173 per cent higher than the 1,390 starts reported one year earlier. Singles under construction in July exceeded 4,100 units, the largest number since April 2008.

Single-detached completions increased year-over-year for the sixth consecutive month in July. Completions reached 479 units, more than double a year prior and representing the highest level since August 2008. Despite the uptick in completions, inventories (including show homes) remain near historical lows due to robust absorptions. The number of homes absorbed in July reached 505 units, representing an increase of 62 per cent over the same month last year. The median price of homes absorbed in July fell by 5.3 per cent year-over-year to \$449,850. Readers should note that the absorbed price reflects units absorbed at or after completion in a given month, which is not necessarily the month when the sale price was negotiated.

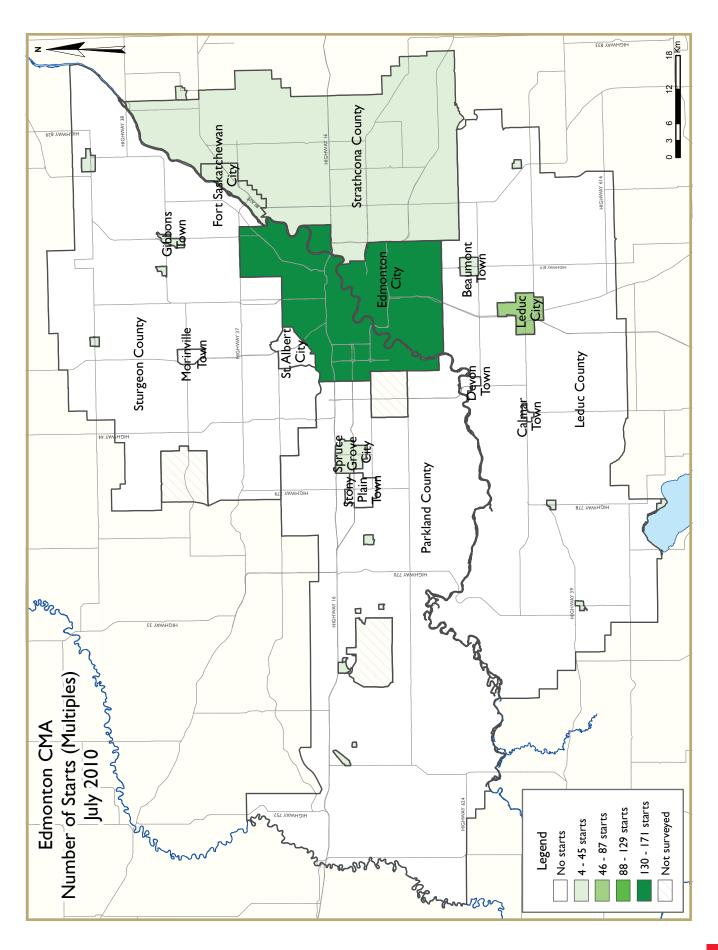

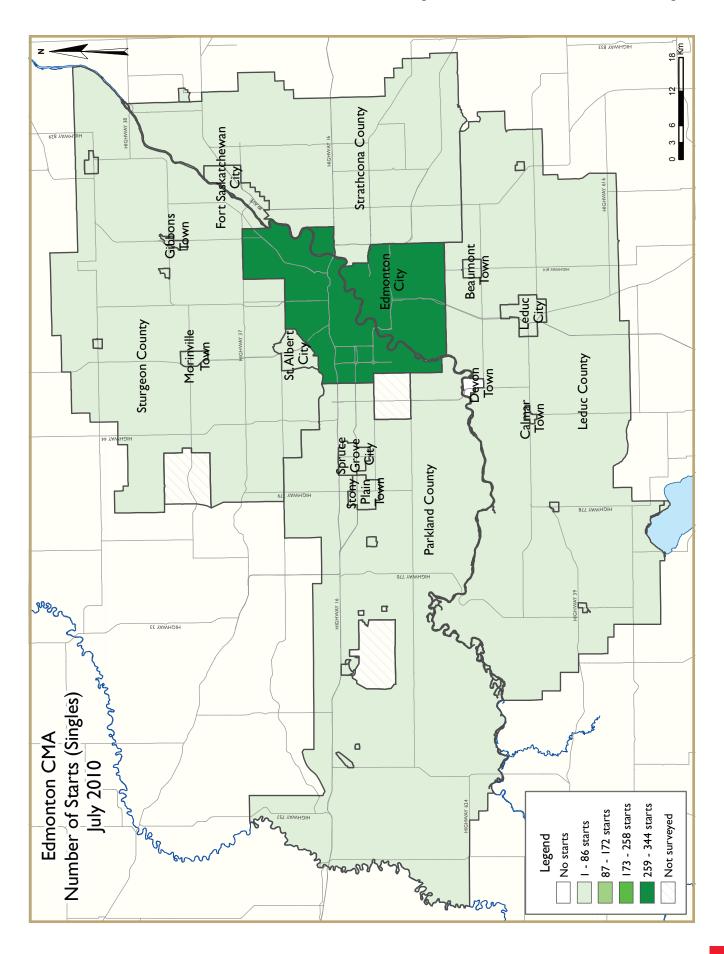

Source: CMHC

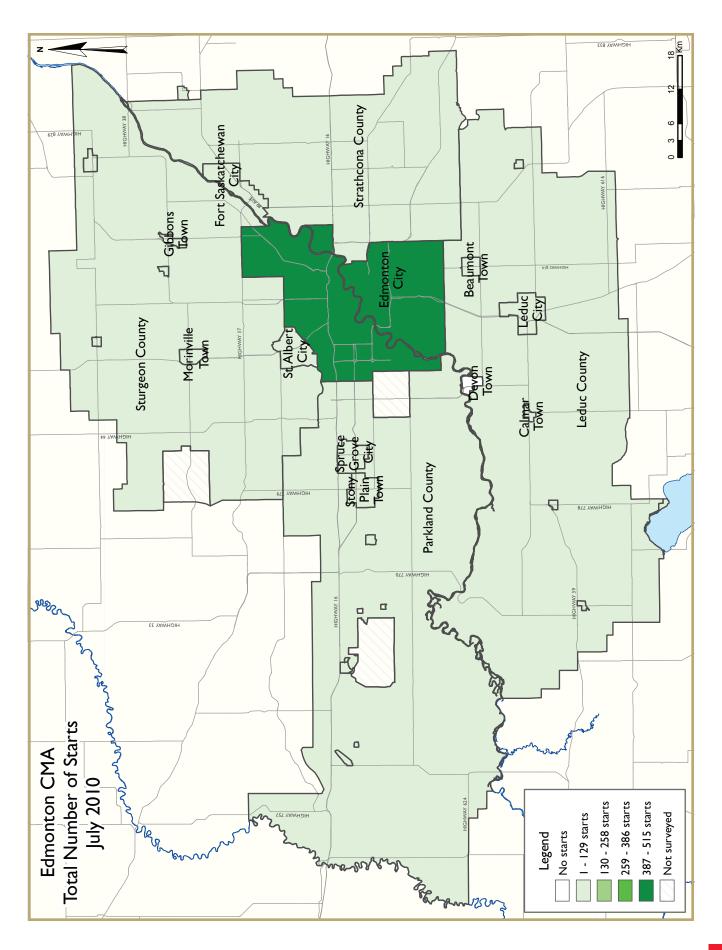

Multi-family housing starts, which consist of semi-detached units, rows, and apartments, totalled 339 units last month, 90 per cent higher than the 178 units started in July 2009. After seven months, multi-family starts reached 2,529 units, up from the 973 units started from January to July of last year. With a 315 per cent year-over-year gain to the end of July, apartments have recorded the largest increase among multi-family units thus far. However, with apartment inventories still elevated by historical standards, apartment starts will likely dissipate over the balance of the year.

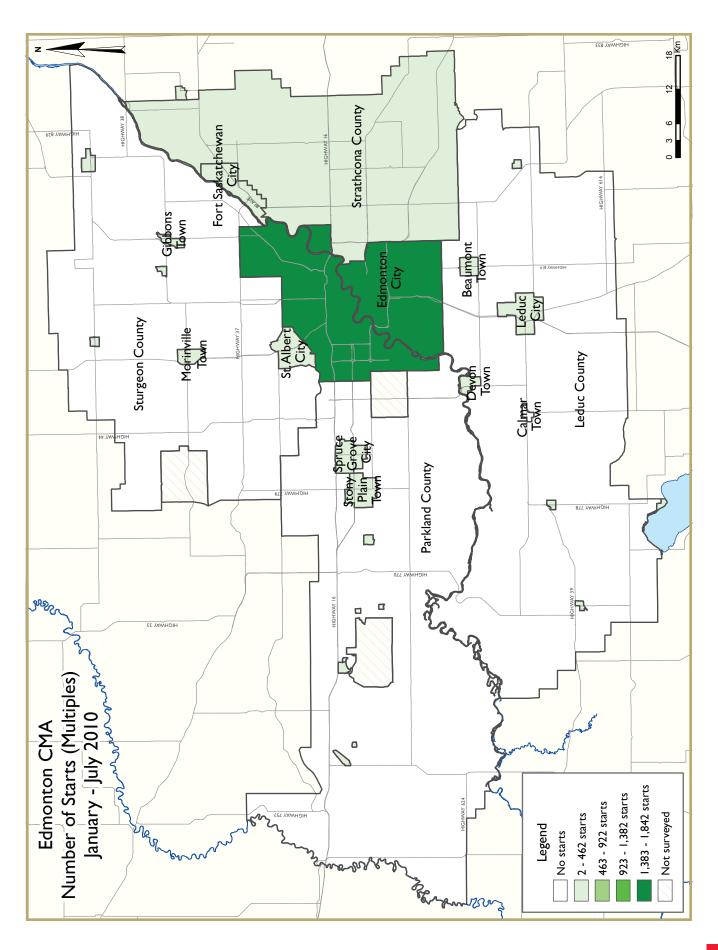

Multiple dwelling completions totalled 350 units in July compared with 526 units in July 2009. Total absorptions,

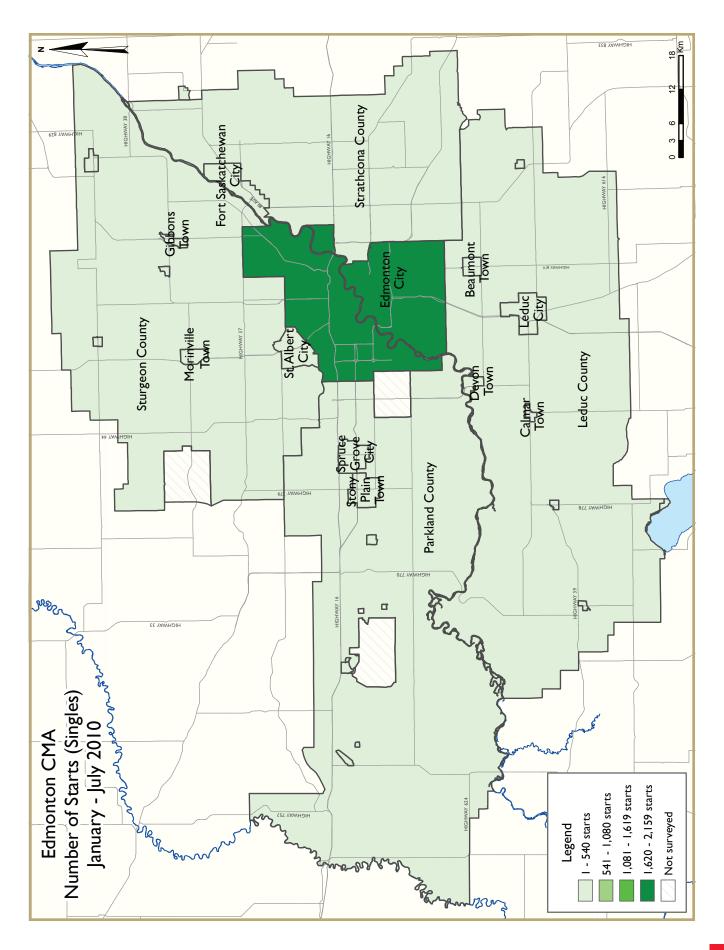

meanwhile, decreased by 51 per cent year-over-year to 246 units, brought down by weak take-up of condominium apartments. As a result, the inventory of completed and unoccupied multiple units increased from the previous month to 1,020 units. Compared with this time last year, multiple unit inventories were 12 per cent higher in July. Apartments accounted for almost 73 per cent of July's multi-unit inventory, with the lion's share of these intended for the condominium market.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "under construction" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A "Single-Detached" dwelling (also referred to as "Single") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "Semi-Detached (Double)" dwelling (also referred to as "Semi") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "Row (Townhouse)" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "Apartment and other" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada's 2001 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
