## Montréal CMA

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: January 2010

### Montreal Metropolitan Area Housing Starts in December 2009

The latest starts survey conducted in December by Canada Mortgage and Housing Corporation (CMHC) revealed that construction got under way on 1,964 housing units in the

Montréal census metropolitan area (CMA) during this month, compared to 1,234 in December 2008.

This past December was the best month since 2006, as starts increased in all market segments, posting at least double-digit gains for all housing types. The greatest hike was recorded in the rental segment (+62 %), followed by the freehold home segment (+60 per cent). This last gain was due

in greater part to the hike in semi-detached and row home building (+76 per cent) than to the increase in single-detached house construction (+54 per cent). Condominium starts, for their part, rose by 46 per cent. While condominiums posted a smaller increase in activity this past month, this segment still accounted for half of all the units started in the Montréal CMA.

Apart from the South Crown, all geographic sectors in the Montréal CMA registered increases in activity this past month. Starts more than doubled on the Island of Montréal, notably thanks to the vigour of the condominium segment. The Vaudreuil-Soulanges sector posted a gain of 88 per cent in residential construction, especially on account of the increase in single-detached home starts. In the North Crown, the strong activity in the condominium segment largely contributed to the hike recorded in this sector (+69 per cent). Only the South Crown registered a small decrease in activity (-1 per cent), mainly because of the decline in condominium starts there.

In 2009, residential construction showed two different phases. The first half of the year was characterized by a decline in demand, reflecting the prevailing economic uncertainty

and deterioration of the job market. Subsequently, the marked easing of credit conditions and tightening of the resale market in the spring helped activity pick up again.

The year-over-year decrease observed in the first six months of 2009 (-26 per cent) was largely due to the declines in starts noted in the two largest market segments, namely, freehold homes (-31 per cent) and condominiums (-29 per cent). And the rebound during the second half of the year (+3 per cent) resulted from the fact that activity picked up again in these same two segments. In comparison with the second half of 2008, freehold home building rose by 6 per cent, while condominium construction increased by almost three times as much (+17 per cent). In fact, condominium starts surpassed freehold home starts in the latter half of the year. While the annual volume shows a decrease in condominium activity, this market segment accounted for 40 per cent of all starts in the Montréal metropolitan area in 2009, a share equal to that of freehold homes.

In all, 19,251 housing starts were enumerated last year, compared to 21,927 in 2008, for a decrease of 12 per cent. This was the first time since 2001 that the starts volume fell

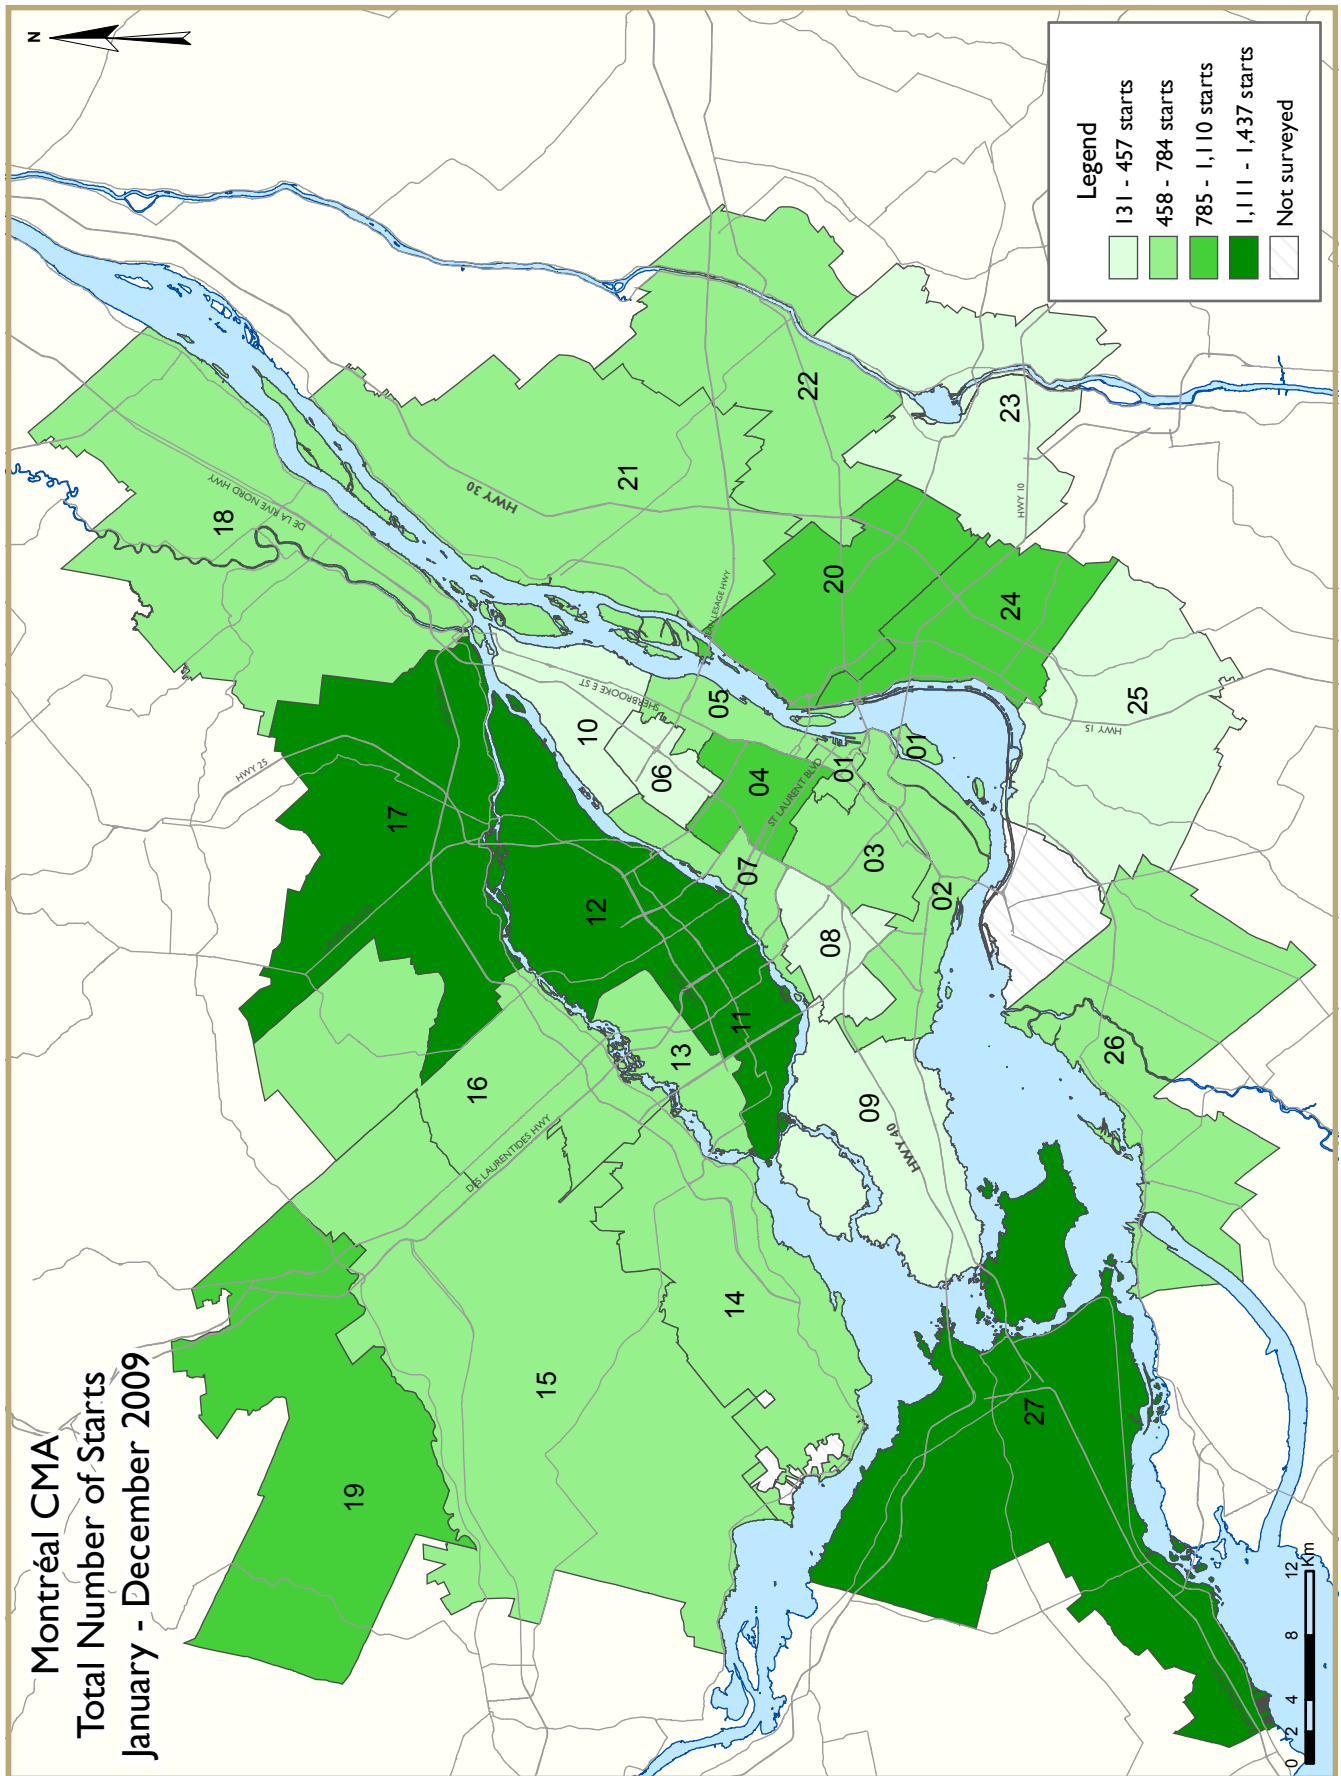

below the 20,000-unit mark in the Montréal CMA.

In 2009, freehold home starts fell by 14 per cent. While single-detached housing activity dropped by 18 per cent, the decline in the construction of less expensive houses, such as semi-detached and row homes, was three times smaller (-6 per cent). More and more dwellings of this type are effectively being built. In 2008, 26 per cent of the freehold homes started were semi-detached or row houses while, in 2009, this share rose to 29 per cent.

Rental housing starts, for their part, decreased in 2009, as a result of the slowdown in the construction of units for seniors. Foundations were laid for a total of 3,232 rental dwellings, or 26 per cent fewer than in 2008.

Finally, 7,657 condominiums were started last year, for a decline of 8 per cent from 2008.

In 2009, residential construction fell more significantly in the South Crown (-18 per cent) and North Crown (-14 per cent) than on the Island of Montréal (-9 per cent), while Vaudreuil-Soulanges was the only sector that posted a gain in starts (+6 per cent).

ZONE DESCRIPTIONS - MONTRÉAL CMA	
Zone 1	Downtown Montréal (bordered on the east by Amherst Street, on the west by Guy Street and on the north by Chemin Remembrance and Des Pins Avenue), Île-des-Soeurs.
Zone 2	Dorval, L'Île-Dorval, Montréal (Lachine, LaSalle, Le Sud-Ouest, Verdun).
Zone 3	Côte-Saint-Luc, Hampstead, Montréal (Côte-des-Neiges, Notre-Dame-de-Grâce, Outremont), Montréal-Ouest, Mont-Royal, Westmount.
Zone 4	Montréal (Parc-Extension, Plateau Mont-Royal, Rosemont (including La Petite-Patrie), Saint-Michel, Villeray).
Zone 5	Montréal (Mercier, Hochelaga-Maisonneuve, Centre-Sud).
Zone 6	Montréal (Anjou, Saint-Léonard).
Zone 7	Montréal (Ahuntsic, Cartierville, Montréal-Nord).
Zone 8	Montréal (Saint-Laurent).
Zone 9	Beaconsfield, Baie-d'Urfé, Dollard-des-Ormeaux, Kirkland, Pointe-Claire, Sainte-Anne-de-Bellevue, Senneville, Montréal (L'Île-Bizard, Pierrefonds, Roxboro, Sainte-Geneviève).
Zone 10	Montréal-Est, Montréal (Pointe-aux-Trembles, Rivière-des-Prairies).
Zone 11	Laval (Chomedey, Sainte-Dorothée, Laval-sur-le-Lac).
Zone 12	Laval (Auteuil, Duvernay, Laval-des-Rapides, Pont-Viau, Saint-François, Saint-Vincent-de-Paul, Vimont).
Zone 13	Laval (Fabreville, Laval-Ouest, Sainte-Rose).
Zone 14	MRC Deux-Montagnes (Deux-Montagnes, Oka, Pointe-Calumet, Saint-Eustache, Saint-Joseph-du-Lac, Sainte-Marthe-sur-le-Lac, Saint-Placide).
Zone 15	Mirabel.
Zone 16	MRC Thérèse-de-Blainville (Blainville, Boisbriand, Bois-des-Filion, Lorraine, Rosemère, Sainte-Anne-des-Plaines, Sainte-Thérèse).
Zone 17	MRC Les Moulins (Terrebonne, Mascouche).
Zone 18	Charlemagne, Lavaltrie, L'Assomption, Repentigny, Saint-Sulpice, L'Épiphanie
Zone 19	Gore, Saint-Colomban, Saint-Jérôme.
Zone 20	Longueuil.
Zone 21	Boucherville, Saint-Amable, Sainte-Julie, Varennes, Verchères
Zone 22	Beloeil, McMasterville, Mont-Saint-Hilaire, Otterburn Park, Saint-Basile-le-Grand, Saint-Bruno-de-Montarville, Saint-Mathieu-de-Beloeil.
Zone 23	Carignan, Chambly, Richelieu, Saint-Mathias-sur-Richelieu.
Zone 24	Brossard, La Prairie, Saint-Lambert.
Zone 25	Candiac, Delson, Saint-Constant, Saint-Mathieu, Saint-Philippe, Sainte-Catherine.
Zone 26	Beauharnois, Châteauguay, Léry, Mercier, Saint-Isidore.

## METHODOLOGY

### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

## DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

## INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

**Freehold:** A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

**Rental:** Dwelling constructed for rental purposes regardless of who finances the structure.

## GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada’s 2001 Census area definitions.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
