Highlights

April 2010

Employment increased by 109,000 in April, the largest monthly gain in percentage terms since August 2002. The unemployment rate edged down 0.1 percentage points in April to 8.1%, as more people participated in the labour market.

Chart 1 Employment and unemployment rates, Canada, seasonally adjusted

Analysis — April 2010

Employment increased by 109,000 in April, the largest monthly gain in percentage terms since August 2002. The unemployment rate edged down 0.1 percentage points in April to 8.1%, as more people participated in the labour market.

April's gain is of similar magnitude to some of the monthly losses experienced in the most recent employment downturn that began in the fall of 2008.

The employment increase in April brings total gains since the start of the upward trend in July 2009 to 285,000.

Two-thirds of the employment growth in April was among men aged 25 and over (+72,000), the strongest monthly increase for this group since comparable data became available in 1976.

Employment growth in April was in both part-time (+65,000) and full-time (+44,000) work. Since July 2009, growth has been concentrated in full-time work.

All of April's increase was among employees in the private sector.

Employment rose in a number of industries with wholesale and retail trade; business, building and other support services; and construction leading the way.

Employment increased in all provinces in April, with the largest increases in Ontario, Quebec, British Columbia, Alberta and Manitoba.

Compared with a year earlier, average hourly wages were up 2.0% in April, similar to the increases observed since January 2010.

Employment growth led by men and youth

Employment growth in April was primarily among men aged 25 and over and youth, while there was little change for women.

Employment grew by 51,000 in April among men aged 25 to 54, the largest percentage increase in 16 years. Despite this gain, employment for this group remains 137,000 (-2.2%) below the employment peak of October 2008.

Employment for youths aged 15 to 24 grew by 23,000 in April. Despite gains in recent months, youth employment remains 168,000 (-6.4%) lower than in October 2008.

Men aged 55 and over also experienced employment growth in April (+21,000). In contrast to youths and men aged 25 to 54, employment for this group has risen by 98,000 (+6.5%) since October 2008.

Service sector leads gains

The largest increases in April were in retail and wholesale trade (+32,000); business, building and other support services (+31,000); construction (+24,000); and information, culture and recreation (+20,000).

The industries with notable losses in April were manufacturing (-21,000) and agriculture (-10,000).

Since July 2009, employment growth has been driven by gains in services, as well as construction and natural resources. Over the same period, employment in manufacturing has remained stable.

April's employment growth was entirely among private sector employees (+109,000), while both the public sector and self-employment were unchanged.

Since July 2009, growth has been strongest among private sector employees (+2.4%), followed by those in the public sector (+1.9%). The number of self-employed workers has declined by 1.2% over the same period.

Robust employment growth in several provinces

Employment in Ontario increased by 41,000 in April, bringing gains since July 2009 to 109,000 (+1.7%). The unemployment rate was unchanged at 8.8%, as more people participated in the labour market.

In April, employment grew by 35,000 in Quebec, and the unemployment rate edged down to 7.9%. Since July 2009, employment in that province has grown by 91,000 (+2.4%).

In British Columbia, employment gains of 13,000 in April pushed the unemployment rate down 0.6 percentage points to 7.3%. Since July 2009, employment in the province has risen by 55,000 (+2.4%).

Employment in Alberta rose by 10,000 in April and the unemployment rate edged down to 7.4%. Despite April's gain, Alberta is the only province with no employment growth since July 2009.

Employment also grew in Manitoba in April, up 7,000, pushing the unemployment rate down 0.3 percentage points to 4.9%, the lowest in the country.

Note to readers

The Labour Force Survey (LFS) estimates are based on a sample, and are therefore subject to sampling variability. Estimates for smaller geographic areas or industries will have more variability. For an explanation of sampling variability of estimates, and how to use standard errors to assess this variability, consult the "Data quality" section of the publication Labour Force Information (71-001-X, free).

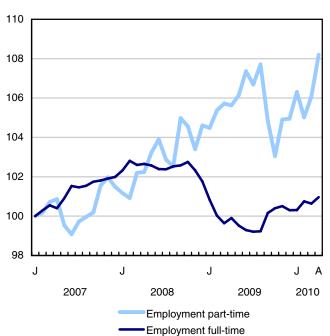

Unless otherwise stated, this release presents seasonally adjusted data, which eases comparisons by removing the effects of seasonal variations.

The 2009 Labour Force Historical Review on DVD-ROM (71F0004XVB, \$209) is now available.

System (NAICS) and sex, unadjusted for seasonality, monthly Labour force survey estimates (LFS), job tenure by North American Industry Classification System (NAICS) and sex, annual Labour force survey estimates (LFS), duration of unemployment by sex and age group, unadjusted for seasonality, monthly Labour force survey estimates (LFS), duration of unemployment by sex and age group, annual Labour force survey estimates (LFS), unemployment by type of work sought and search method,	282-0040	
System (NAICS) and sex, annual Labour force survey estimates (LFS), duration of unemployment by sex and age group, unadjusted for seasonality, monthly Labour force survey estimates (LFS), duration of unemployment by sex and age group, annual Labour force survey estimates (LFS), unemployment by type of work sought and search method,	282-0041	
unadjusted for seasonality, monthly 282-0048 Labour force survey estimates (LFS), duration of unemployment by sex and age group, annual 282-0049 Labour force survey estimates (LFS), unemployment by type of work sought and search method,	282-0042	
282-0049 Labour force survey estimates (LFS), unemployment by type of work sought and search method,	282-0047	
	282-0048	Labour force survey estimates (LFS), duration of unemployment by sex and age group, annual
	282-0049	

282-0050	Labour force survey estimates (LFS), unemployment by type of work sought and search method, sex and age group, annual
282-0051	Labour force survey estimates (LFS), retirement age by class of worker and sex, annual
282-0052	Labour force survey estimates (LFS), by census metropolitan area, sex and age group, 3-month moving average, unadjusted for seasonality, monthly
282-0053	Labour force survey estimates (LFS), by census metropolitan area, sex and age group, annual
282-0054	Labour force survey estimates (LFS), by provinces and economic regions, 3-month moving average, unadjusted for seasonality, monthly
282-0055	Labour force survey estimates (LFS), by provinces, territories and economic regions, annual
282-0056	Labour force survey estimates (LFS), employment by census metropolitan area and North American Industry Classification System (NAICS), 3-month moving average, unadjusted for seasonality, monthly
282-0057	Labour force survey estimates (LFS), employment by census metropolitan area and North American Industry Classification System (NAICS), annual
282-0058	Labour force survey estimates (LFS), employment by census metropolitan area and National Occupational Classification for Statistics (NOC-S), 3-month moving average, unadjusted for seasonality, monthly
282-0059	Labour force survey estimates (LFS), employment by census metropolitan area and National Occupational Classification for Statistics (NOC-S), annual
282-0060	Labour force survey estimates (LFS), employment by economic region and North American Industry Classification System (NAICS), 3-month moving average, unadjusted for seasonality, monthly
282-0061	Labour force survey estimates (LFS), employment by economic region and North American Industry Classification System (NAICS), annual
282-0062	Labour force survey estimates (LFS), employment by economic region and National Occupational Classification for Statistics (NOC-S), 3-month moving average, unadjusted for seasonality, monthly
282-0063	Labour force survey estimates (LFS), employment by economic region and National Occupational Classification for Statistics (NOC-S), annual
282-0064	Labour force survey estimates (LFS), by selected medium-sized cities, annual
282-0069	Labour force survey estimates (LFS), wages of employees by type of work, National Occupational Classification for Statistics (NOC-S), sex and age group, unadjusted for seasonality, monthly (current dollars)
282-0070	Labour force survey estimates (LFS), wages of employees by type of work, National Occupational Classification for Statistics (NOC-S), sex and age group, annual (current dollars)
282-0071	Labour force survey estimates (LFS), wages of employees by type of work, North American Industry Classification System (NAICS), sex and age group, unadjusted for seasonality, monthly (current dollars)

282-0072	Labour force survey estimates (LFS), wages of employees by type of work, North American Industry Classification System (NAICS), sex and age group, annual (current dollars)
282-0073	Labour force survey estimates (LFS), wages of employees by job permanence, union coverage, sex and age group, unadjusted for seasonality, monthly (current dollars)
282-0074	Labour force survey estimates (LFS), wages of employees by job permanence, union coverage, sex and age group, annual (current dollars)
282-0075	Labour force survey estimates (LFS), employees by establishment size, North American Industry Classification System (NAICS), sex and age group, unadjusted for seasonality, monthly
282-0076	Labour force survey estimates (LFS), employees by establishment size, North American Industry Classification System (NAICS), sex and age group, annual
282-0077	Labour force survey estimates (LFS), employees by union coverage, North American Industry Classification System (NAICS), sex and age group, unadjusted for seasonality, monthly
282-0078	Labour force survey estimates (LFS), employees by union coverage, North American Industry Classification System (NAICS), sex and age group, annual
282-0079	Labour force survey estimates (LFS), employees by job permanency, North American Industry Classification System (NAICS), sex and age group, unadjusted for seasonality, monthly
282-0080	Labour force survey estimates (LFS), employees by job permanency, North American Industry Classification System (NAICS), sex and age group, annual
282-0081	Labour force survey estimates (LFS), employees working overtime (weekly) by National Occupational Classification for Statistics (NOC-S), sex and age group, unadjusted for seasonality, monthly
282-0082	Labour force survey estimates (LFS), employees working overtime (weekly) by National Occupational Classification for Statistics (NOC-S), sex and age group, annual
282-0083	Labour force survey estimates (LFS), employees working overtime (weekly) by North American Industry Classification System (NAICS), sex and age group, unadjusted for seasonality, monthly
282-0084	Labour force survey estimates (LFS), employees working overtime (weekly) by North American Industry Classification System (NAICS), sex and age group, annual
282-0085	Labour force survey estimates (LFS), supplementary unemployment rates by sex and age group, unadjusted for seasonality, monthly
282-0086	Labour force survey estimates (LFS), supplementary unemployment rates by sex and age group, annual
282-0087	Labour force survey estimates (LFS), by sex and age group, seasonally adjusted and unadjusted, monthly
282-0088	Labour force survey estimates (LFS), employment by North American Industry Classification System (NAICS), seasonally adjusted and unadjusted, monthly
282-0089	Labour force survey estimates (LFS), employment by class of worker and sex, seasonally adjusted and unadjusted, monthly

282-0090	Labour force survey estimates (LFS), by census metropolitan area, 3-month moving average, seasonally adjusted and unadjusted, monthly
282-0091	Labour force survey estimates (LFS), by Montréal, Toronto and Vancouver census metropolitan areas, seasonally adjusted and unadjusted, monthly
282-0092	Labour force survey estimates (LFS), actual hours worked by North American Industry Classification System (NAICS), seasonally adjusted, monthly
282-0093	Labour force survey estimates (LFS), employment by National Occupational Classification for Statistics (NOC-S), seasonally adjusted, monthly
282-0094	Labour force survey estimates (LFS), by North American Industry Classification System (NAICS), Canada, seasonally adjusted, monthly
282-0095	Labour force survey estimates (LFS), by full- and part-time students during school months, sex and age group, annual
282-0096	Labour force survey estimates (LFS), by urban and rural areas based on 2001 census boundaries, sex and age group, unadjusted for seasonality, monthly
282-0097	Labour force survey estimates (LFS), by urban and rural areas based on 2001 census boundaries, sex and age group, annual
282-0098	Labour force survey estimates (LFS), employment by urban and rural areas based on 2001 census boundaries, class of worker and North American Industry Classification System (NAICS), unadjusted for seasonality, monthly
282-0099	Labour force survey estimates (LFS), employment by urban and rural areas based on 2001 census boundaries, class of worker and North American Industry Classification System (NAICS), annual
282-0100	Labour force survey estimates (LFS), by territories, sex and age group, 3-month moving average, seasonally adjusted and unadjusted, monthly

Selected surveys from Statistics Canada

3701 Labour Force Survey

Selected summary tables from Statistics Canada

- · Labour force characteristics
- Employment by industry
- Selected economic indicators, Canada and United States (monthly and quarterly)
- Days lost per worker due to illness or disability, by sex, by province

- Economic indicators, by province and territory (monthly and quarterly)
- Labour force and participation rates by sex and age group
- Labour force, employed and unemployed, numbers and rates, by province
- Employment by industry and sex
- Full-time and part-time employment by sex and age group
- Labour force characteristics by age and sex
- Distribution of employed people, by industry, by province
- Labour force characteristics, population 15 years and older, by census metropolitan area
- Labour force characteristics, population 15 years and older, by economic region, by province
- Days lost per worker by cause, by provinces
- Days lost per worker by industry and sex
- People employed, by educational attainment
- Reasons for part-time work by sex and age group
- Self-employment, historical summary
- Employment by age, sex, type of work, class of worker and province (monthly)
- Employment by major industry groups, seasonally adjusted, by province (monthly)
- Actual hours worked per week by industry, seasonally adjusted (monthly)
- Average hourly wages of employees by selected characteristics and profession, unadjusted data, by province (monthly)
- Labour force characteristics, seasonally adjusted, by province (monthly)
- Labour force characteristics, unadjusted, by province (monthly)
- Labour force characteristics, seasonally adjusted, by census metropolitan area (3 month moving average)
- Labour force characteristics, unadjusted, by census metropolitan area (3 month moving average)
- Labour force characteristics, unadjusted, by economic region (3 month moving average)

^{1.} For geographic descriptions of economic regions, refer to the Guide to the Labour Force Survey (catalogue number 71-543-GIE).

^{2.} Estimates for Canada are a sum of the provincial totals and exclude estimates from Yukon, Northwest Territories and Nunavut.

Note(s): All geographic regions are based on the 2001 Census boundaries. Related CANSIM table 282-0054.

Table 6-2 Labour force characteristics by territories, unadjusted for seasonality, 3 month moving average ending in April 2009 and April 2010

	Population	ation Labour force			Participation	Unemployment	Employment rate
	Labour force	Employment	Unemployment	rate	rate		
		in thous	ands			percent	
Yukon ¹ 2009 2010	24.1 24.6	17.7 17.2	16.3 15.3	1.4 2.0	73.4 69.9	7.9 11.6	67.6 62.2
Northwest Territories ² 2009 2010	31.4 31.6	22.3 21.7	21.2 20.2	1.1 1.6	71.0 68.7	4.9 7.4	67.5 63.9
Nunavut ³ 2009 2010	18.5 18.9	11.1 12.1	9.7 10.2	1.4 1.9	59.8 63.9	12.4 15.8	52.4 53.8

Since 1992, the Labour force survey (LFS) has been conducted in the Yukon, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are not included in the national totals. In 1995, the LFS in the Yukon underwent a sample redesign. One result of the redesign was that the covered population increased from 85% to 92%, which is reflected by the sharp increase in the three month moving averages estimates of January, February and March of 1995 for all the level estimates. Users are therefore warned to be cautious when comparing estimates before January 1995 to estimates for January 1995 and forward.

Note(s): Related CANSIM table 282-0100.

Since 2001, the Labour force survey (LFS) has been administered in the Northwest Territories, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are not included in national totals.

Since 2004, the Labour force survey (LFS) has been administered in Nunavut, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are 3-month moving averages and are not included in national totals. From January 2004 to December 2007, estimates represent about 70% of all Nunavut residents aged 15 and over. Starting in January 2008, coverage was extended to 92%, so that by March 2008, the 3-month moving average is completely based on the extended coverage. Because of the large difference in coverage, users are recommended not to compare estimates prior to January 2008 with data afterwards. The January and February 2008 3-month moving average estimates are based on a mix of both coverages, since the extended coverage was introduced in January 2008. Estimates from January 2004 to December 2007 are based on the 10 largest communities in Nunavut: Iqaluit, Rankin Inlet, Cambridge Bay, Kugluktuk, Baker Lake, Arviat, Pond Inlet, Cape Dorset, Pangnirtung, Igloolik. Estimates from March 2008 to present cover the above communities as well as: Taloyoak, Gjoa Haven, Kugaaruk, Coral Harbour, Repulse Bay, Qikiqtarjuaq, Arctic Bay, Hall Beach, Clyde River.

About the Labour Force Survey

The statistics contained in this report are based on information obtained through a sample survey of 53,000 representative households across the country. The Labour Force Survey, started in November 1945, was taken at quarterly intervals until November 1952. It has been carried out monthly since then. The information generated by the survey has expanded considerably over the years with a major redesign of the survey content in 1976 and again in 1997, and provides a rich and detailed picture of the Canadian labour market.

The sample used in the Labour Force Survey has been designed to represent all persons in the population 15 years of age and over residing in the provinces of Canada, with the exception of the following: persons living on Indian reserves, full-time members of the armed forces and people living in institutions (for example, inmates of penal institutions and patients in hospitals or nursing homes who have resided in the institution for more than six months). Monthly estimates of employment, unemployment and persons not in the labour force refer to the specific week covered by the survey each month, normally the week containing the 15th day.

Definitions and explanations

The **labour force** is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed persons are those who, during the reference week:

- did any work at all (a)
- had a job but were not at work

A person is considered to be full-time if his/her usual hours at the main job are 30 or more hours per week. When the number of hours worked at the main job is usually less than 30 hours per week then he/she is considered to be part-time.

Unemployed persons are those who, during the reference week:

- (a) were without work, had actively looked for work in the past four weeks (ending with reference week), and were available for work:
- (b) had not actively looked for work in the past four weeks but were on temporary layoff and were available for work:
- (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from the reference week, and were available for work.

Persons in the civilian non-institutional population 15 years of age and over who, during the reference week, were neither employed nor unemployed are classified as not in the labour force.

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.

The **participation rate** represents the labour force expressed as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, etc.) is the labour force in that group expressed as a percentage of the population for that group.

The employment rate (formerly the employment/population ratio) represents the number of persons employed expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, etc.) is the number employed in that group expressed as a percentage of the population for that group.

The **part-time rate** represents the number of persons employed part-time expressed as a percentage of the employed. The part-time rate for a particular group (age, sex, etc.) is the number employed part-time in that group expressed as a percentage of the employed for that group.

All geographic regions are based on the 2001 Census boundaries.

Seasonal adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. The seasonally adjusted series contains irregular as well as longer-term cyclical fluctuations.

The seasonally adjusted series are revised each year to take into account current data and to generate new forecast factors for the next twelve months. The data are therefore subject to slight revisions in future issues of this publication.

Sampling variability of estimates

Estimates in this publication are based on the Labour Force Survey, a monthly survey of approximately 53,000 households across Canada. Because the entire population is not surveyed, the estimates are subject to sampling error. While the published estimate is the best available indicator of the real value, changes in the level of any estimates between two months can be the result of a true change or sampling variability. The sampling error can be estimated by calculating the standard error for the published estimate or statistic. These standard errors have been included in the publication tables, in order to assist users in interpreting the data.

Interpretation based on standard error

Two thirds of the time (68%), a change greater than the sampling error indicates a real change. The larger the change compared to the standard error, the better the chance that we are observing a real change, as opposed to a change due to sampling variability. At the 95% level, in order to ensure that change is real, the change in the estimate must be greater than twice the sampling error.

Movements in estimates that are smaller than the sampling error are less likely to reflect a real change and more likely to be due to sampling variability. While the above is true for monthly movements, one can have more confidence in a series of consecutive movements in the same direction, even though some of the monthly movements may be smaller than the sampling error.

Interpretation based on confidence intervals

Confidence intervals provide another way of looking at the variability inherent in estimates of sample surveys. To illustrate how to calculate the confidence interval, let us say that one month the published estimate for total employment rose by 16,000 to reach 16,500,000. The associated standard error for the movement estimate is 27,200. The standard error used to interpret the movement estimate indicates that:

- There are approximately two chances in three (68%) that the real value of the movement between the two months falls within the range -11,200 to +43,200 (16,000 + or – one standard error).
- There are approximately nine chances in ten (90%) that the real value of the movement between the two months falls within the range -27,520 to +59,520 (16,000 + or -1.6 times the standard error).
- There are approximately nineteen chances in twenty (95%) that the real value of the movement between the two months falls within the range -38,400 to +70,400 (16,000 + or – two standard errors).

For more detailed explanations on sampling variability of estimates, and in particular for information on how to assess the variability of level estimates, consult the Data quality section of the Guide to the Labour Force Survey, (71-543-G) on page 27.
