Date Released: March 2011

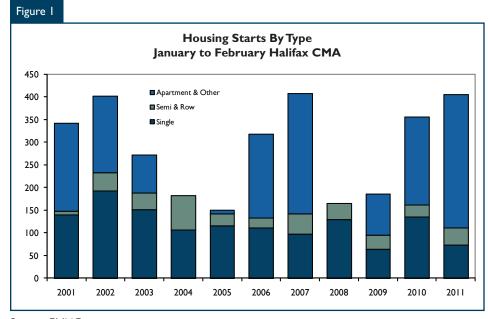

Housing Starts and Existing Home Sales Declined in February

Housing market activity in the Halifax Regional Municipality (HRM) declined in February as both construction starts and existing home sales decreased last month.

There were 158 total housing starts recorded in February compared to

292 last year as nearly every segment of the market reported a decline. In the singles market, there were 29 starts recorded compared to 80 last year. On the multiples side, builders broke ground on 113 apartment-style rental units compared to 192 last year. In the semi-detached and row segment, starts declined to 16 last month from 20 in 2010. There were no new condominium starts in February.

Year-to-date, there were a total of 405 housing starts in the HRM, an

Source: CMHC

increase of 14 per cent compared to last year. The overall increase is largely attributed to an increase in multiple-unit starts. Despite the decline in apartment starts last month, 295 apartment-style rental units started in the first two months of the year compared to 192 last year. Semi-detached and row unit starts increased from 28 to 37 year-to-date. In the singles market, there were 73 starts reported through the end of February compared to 135 last year, representing a decline of 46 per cent.

In the new homes market, there were 62 new, single-detached homes sold in the HRM in February (compared to 67 last year) at an average sale price of \$387,598 (compared to \$351,385 last year).

Year-to-date, there were 102 new, single-detached home sales recorded at an average sale price of \$385,924 compared to 147 last year at an average sale price of \$340,878. The increase in the average price is attributed to an increase in demand for homes priced above \$350,000 throughout the HRM. After two

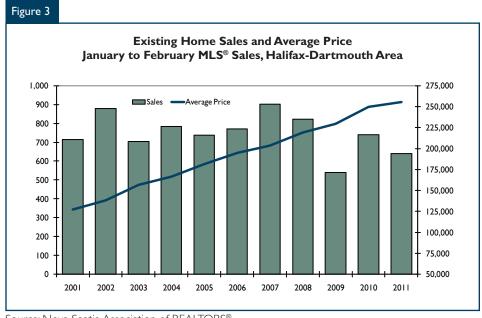

months of the year, 53 per cent (54 of 102) of all absorbed, new, single-detached homes were priced above \$350,000 compared to 32 per cent (47 of 147) a year ago.

In the existing homes market, there were 360 sales in the HRM last month compared to 444 last year as sales declined in every submarket with the exception of the Fall River – Beaverbank area. Sales declined the

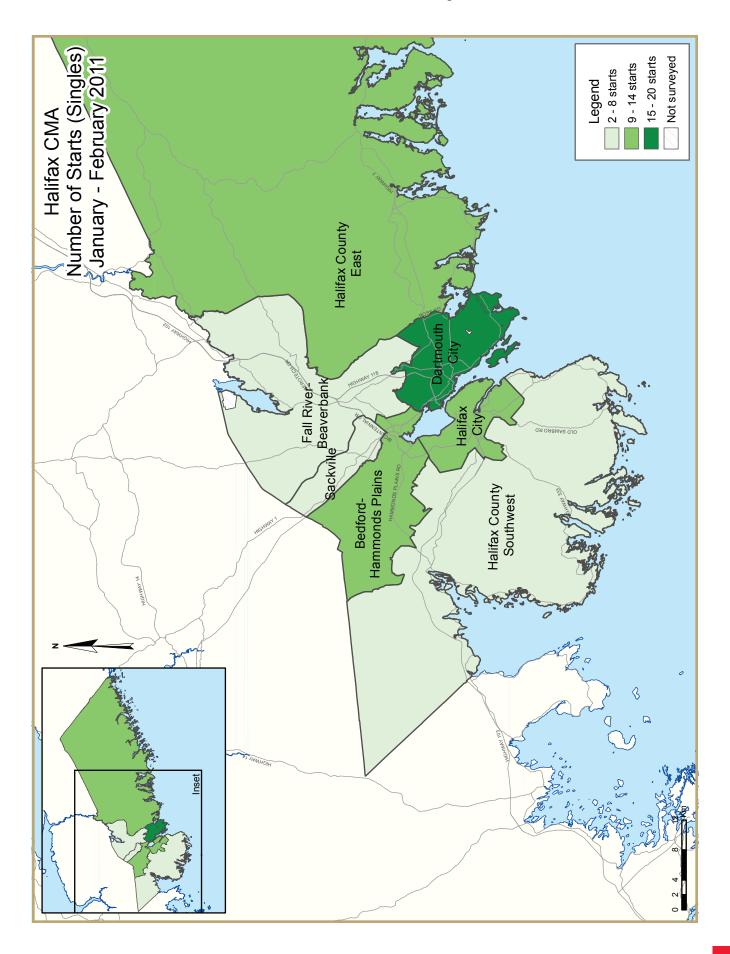

most in Bedford – Hammonds Plains where 35 sales were recorded in February compared to 54 last year. The Halifax City and Dartmouth City submarkets reported sharp declines of 25 and 28 per cent, respectively. In the Sackville submarket, existing home sales declined 21 per cent to 23 sales last month.

Year-to-date, existing home sales in the HRM declined 13.6 per cent to 639 sales. The only submarket to record an increase through two months of the year was the Halifax County East submarket where sales increased from 28 to 37.

The average price of an existing home increased 2.6 per cent in February to \$258,770. Price growth was strongest in the Fall River — Beaverbank and Sackville submarkets where the average price of an existing home increased 30 and 17 per cent, respectively. In the Halifax City and Dartmouth City submarkets, price growth was more modest at 2.4 and 4.8 per cent, respectively. Year-to-date, the average price of an existing home in the HRM increased 2.5 per cent to \$255,749.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "under construction" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A "Single-Detached" dwelling (also referred to as "Single") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "Semi-Detached (Double)" dwelling (also referred to as "Semi") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "Row (Townhouse)" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "Apartment and other" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
