Date Released: May 2011

Housing Starts Increased in April While Sales Declined

The housing market in the Halifax Regional Municipality (HRM) was mixed in April as housing starts increased while existing home sales declined.

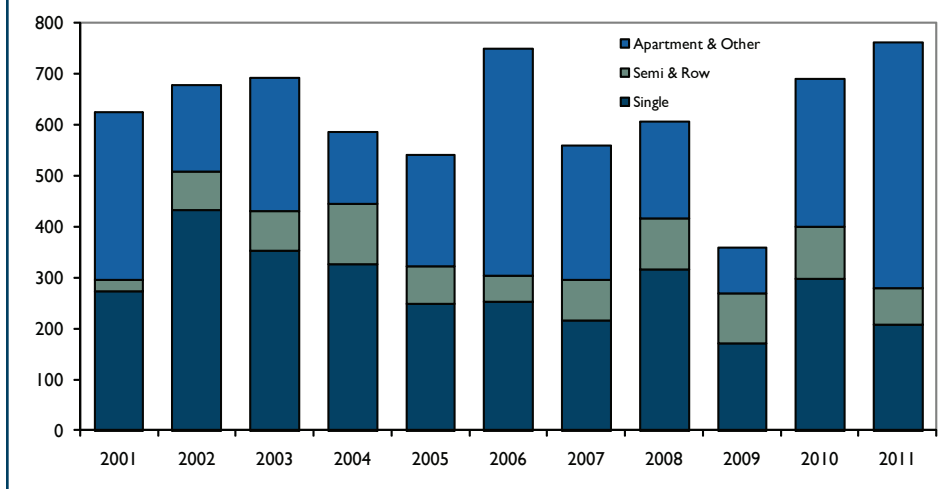

There were 244 total housing starts recorded in April compared to 223 a year ago, representing an increase of nearly ten per cent. The increase in starts was attributed to an increase in apartment-style construction as builders broke ground on 160 units last month compared to zero last year. In the single-detached market, there were 60 starts in April compared to 80 a year ago. Semi-detached and row unit starts declined to 24 last month

from 45 in 2010. There were no new condominium starts in April compared to 98 a year ago.

Year-to-date, there were 761 total housing starts in the HRM, an increase of ten per cent compared to 2010. The overall increase is attributed to an increase in apartment-style rental construction. There were 455 apartment starts in the first four months of the year compared to 192 last year. In the semi-detached and row segment of the market, starts declined to 71 from 103 in 2010. Condominium starts decreased from 98 to 28 year-to-date. In the singles market, there were 207 starts recorded through the end of April compared to 296 a year ago, which represents a decline of 30 per cent.

In the new homes market, there were 90 new, single-detached home sales recorded in the HRM in April (compared to 102 last year) at an average sale price of \$393,615 (compared to \$305,330 last year).

Year-to-date, there were 279 new, single-detached home sales recorded in the HRM at an average sale price

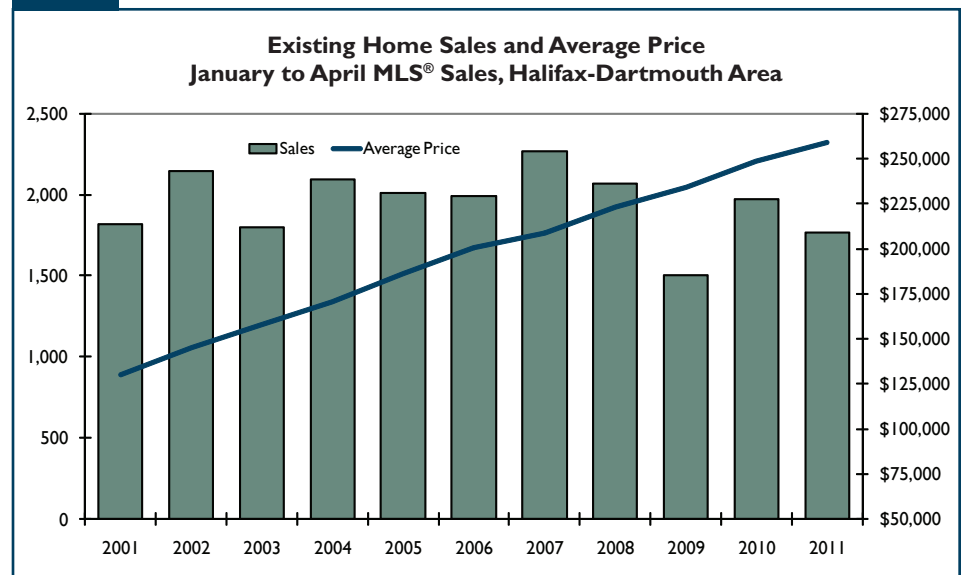

of \$381,237 compared to 310 sales at an average price of \$328,996 in 2010. The increase in the average price is attributed to an increase in demand for homes priced above \$350,000 throughout the HRM. After four months of the year, nearly half (138 of 279) of all absorbed, new, single-detached homes were priced above \$350,000 compared to 32 per cent (98 of 310) a year ago.

In the existing homes market, there were 576 sales in the HRM in April compared to 680 last year as sales declined in each submarket. Sales declined the most in Bedford-Hammonds Plains where 61 sales were recorded compared to 84 last year. The Halifax County Southwest and Dartmouth City submarkets reported sharp declines of 27 and 21 per cent, respectively. In the Halifax City submarket, the decline in sales was more modest at 5.5 per cent.

Year-to-date, existing home sales in the HRM declined 11 per cent to 1,764. In Halifax City, 478 sales were reported year-to-date compared to 521 in 2010. Existing home sales declined by 17 per cent in both Bedford-Hammonds Plains and Halifax County East while sales in Halifax County Southwest declined 14 per cent to 129.

The average price of an existing home increased 4.7 per cent in April to \$258,474. Price growth was strongest in Bedford-Hammonds Plains where the average price of an existing home increased over 16 per cent to \$357,612. In Halifax

MLS® is a registered trademark of the Canadian Real Estate Association

City, prices increased 11 per cent to \$314,764. In the Sackville submarket, the average price declined nearly five per cent to \$197,161. The average price declined the most in Fall River-Beaverbank where prices declined 11.5 per cent to \$254,750.

Year-to-date, the average price of an existing home in the HRM increased four per cent to \$258,931 as each submarket with the exception of Halifax County East, reported an increase in price through the first four months of the year.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A **“Single-Detached”** dwelling (also referred to as **“Single”**) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A **“Semi-Detached (Double)”** dwelling (also referred to as **“Semi”**) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A **“Row (Townhouse)”** dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term **“Apartment and other”** includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The **“intended market”** is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A **“Rural”** area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
