#### HOUSING MARKET INFORMATION

## HOUSING NOW Edmonton CMA

Date Released: December 2010

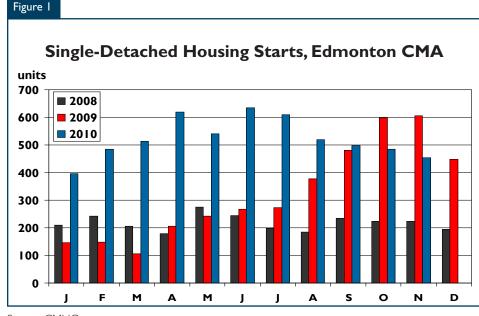

#### **New Home Market**

## Edmonton's Housing Starts Move Lower in November

Despite increased new apartment construction, total housing starts decreased on a year-over-year basis across Metro Edmonton in the month of November. Total housing starts in

the Edmonton Census Metropolitan Area (CMA) reached 755 units in November, down from 938 units in November of 2009. After 11 months, housing starts totalled to 9,401 units compared with 5,505 units recorded during the same period last year.

Single-detached starts amounted to 453 units in November, for a decrease of 25 per cent from the same month in 2009. To the end of November.

builders poured foundations for 5,753 single-detached units, two-thirds more than the production levels tallied from January to November 2009. Activity has moderated in the past two months in response to higher new home inventories and competition from a well-supplied resale market.

Single-detached completions increased by 90 per cent year-over-year in November to 557 units. Absorptions reached 541 singles, representing a gain of 70 per cent from a year prior but 16 units below the number of completions. As such, the inventory of completed and unoccupied units including show homes increased on a month-over-month basis. At 517 units, the inventory of single-detached units was 16 per cent higher than levels reported in November 2009 and represented the highest level since July of last year.

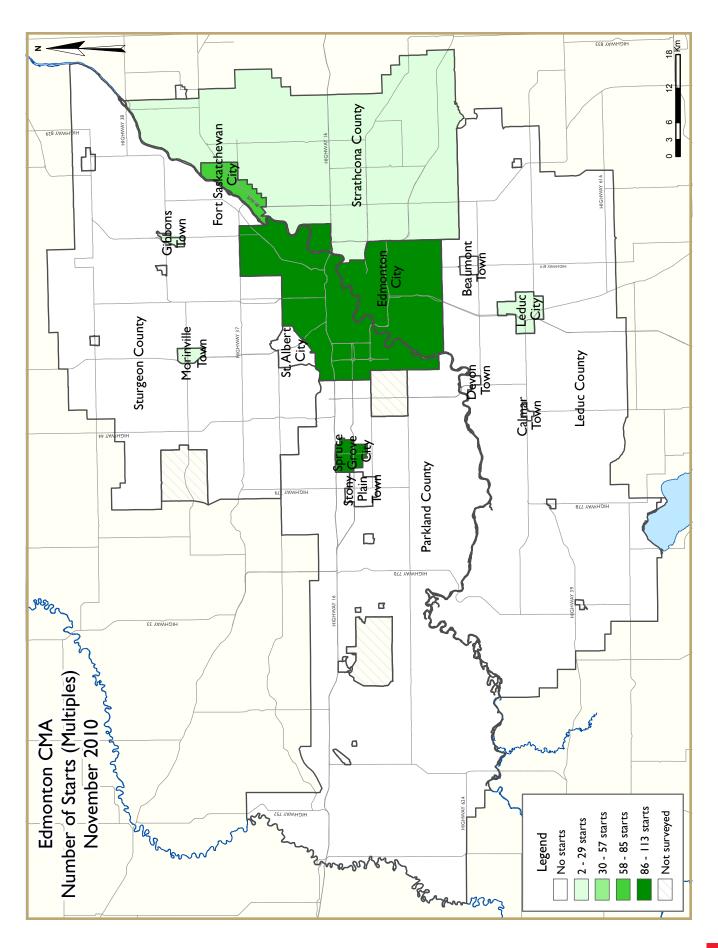

Single-detached units absorbed in November for a median price of \$434,504, down from the previous month but 0.9 per cent higher than a year prior. Since close to 82 per cent of units under construction in November were pre-sold, monthly absorbed prices represent in many cases the price negotiated prior to the start of construction. Contractor selling prices in Edmonton reported by Statistics Canada's New House Price Index (NHPI) increased by one per cent on a year-over-year basis in October.

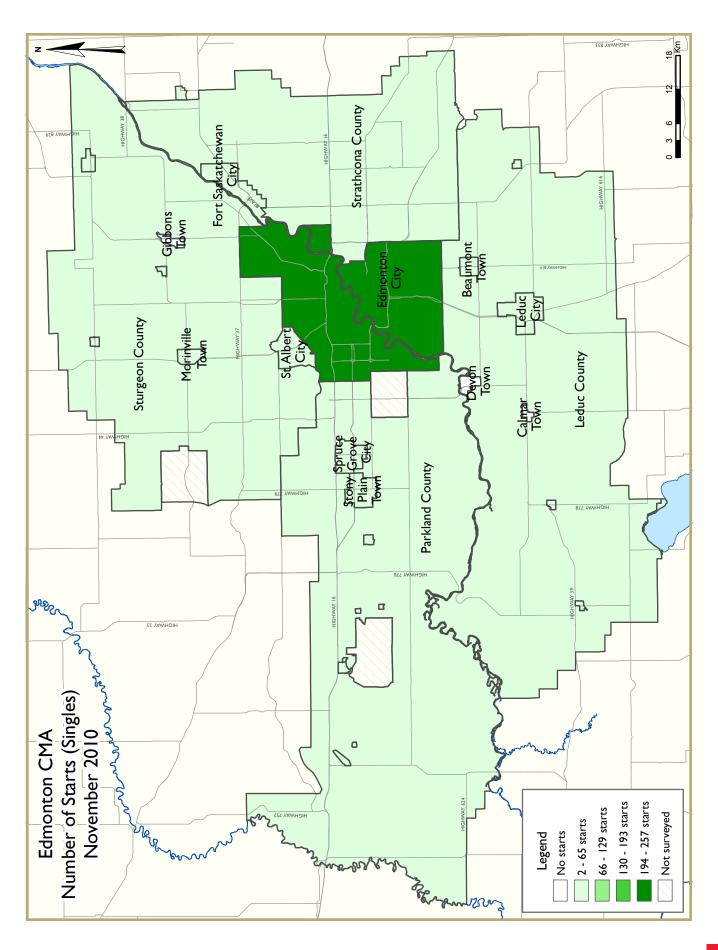

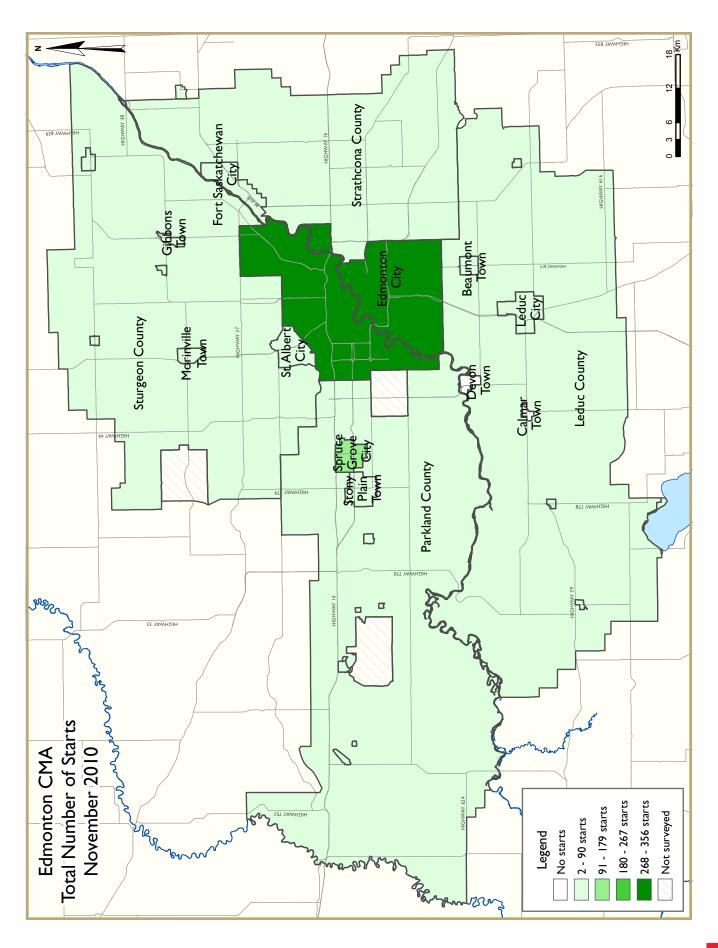

Source: CMHC

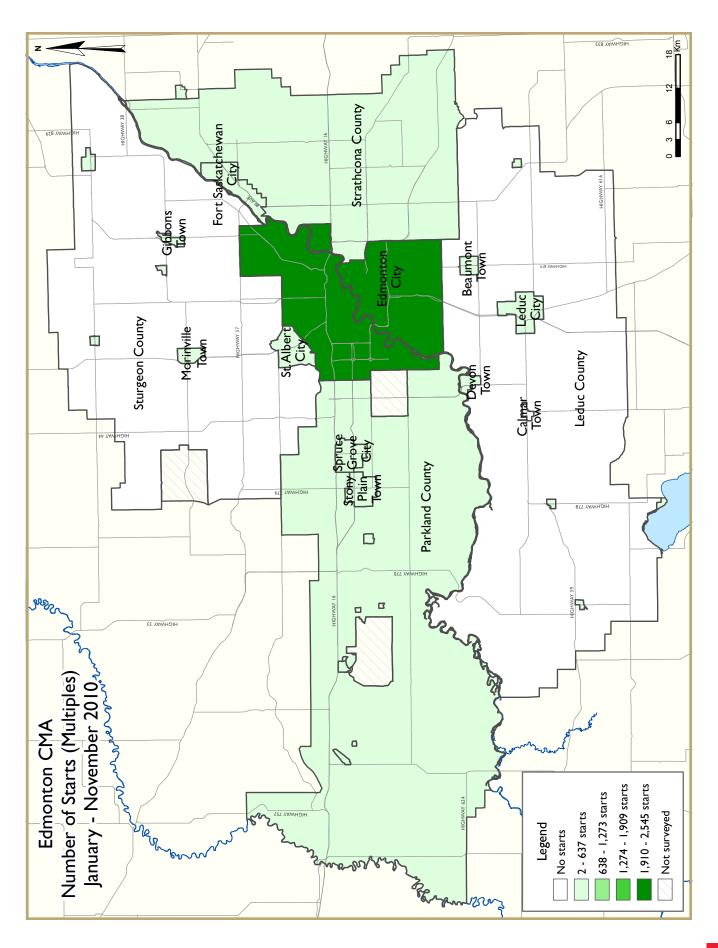

Multiple unit starts, which consist of semi-detached, row, and apartments units, totalled 302 units in November, representing a decline of 9.3 per cent from the 333 units in November of last year. Most of these advances occurred outside the City of Edmonton, in communities such as Ft. Saskatchewan and Spruce Grove. Despite the overall reduction, apartment starts across the region increased substantially to 173 units compared with 63 in November 2009. This gain was offset by lower semidetached and row unit starts, which decreased year-over-year by 65 and 34 per cent, respectively. After 11 months of activity in 2010, multiple unit starts increased by 77 per cent to 3,648 units compared with 2,056 units to the end of November 2009.

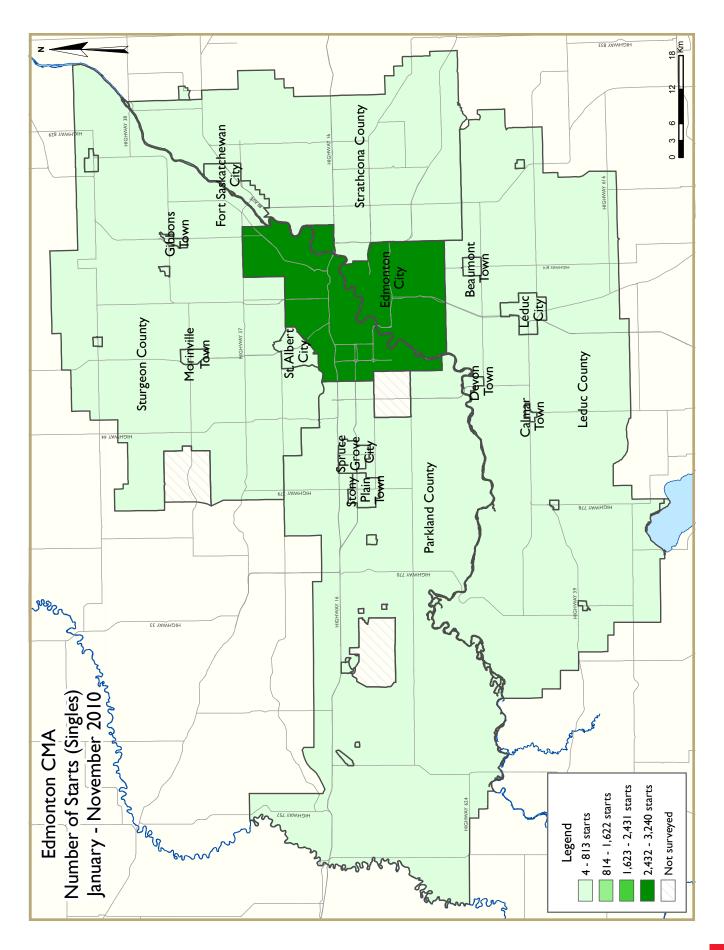

Multiple unit completions totalled 235 units in November, up from 209 units in the same month last year. Absorptions in November were six per cent higher on a year-over-year basis to 296 units. With absorptions outpacing completions, the inventory of multi-family dwellings decreased on a month-over-month basis to 837 units. The number of completed and unabsorbed multiple units in November was down by 25 per cent from a year prior and represented the lowest level since May 2009.

<sup>&</sup>quot;CPI" means Consumer Price Index

<sup>&</sup>quot;SA" means Seasonally Adjusted

#### **METHODOLOGY**

#### **Starts & Completions Survey Methodology**

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

#### **Market Absorption Survey Methodology**

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

### STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "under construction" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

#### **DWELLING TYPES:**

A "Single-Detached" dwelling (also referred to as "Single") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "Semi-Detached (Double)" dwelling (also referred to as "Semi") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "Row (Townhouse)" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "Apartment and other" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

#### INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

#### **GEOGRAPHICAL TERMS:**

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada's 2001 Census area definitions.

#### CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
