Definitions and Acronyms

Quantity Pending: quantity notified for which the notice has been sent for approval to the competent authorities and for which no reply has been received.

Quantity Consented: quantity notified for which all of the competent authorities have granted consent to the proposed movement of hazardous wastes or hazardous recyclable materials.

Quantity Objected: quantity notified for which any of the competent authorities have refused to grant consent to the proposed movement of hazardous wastes or hazardous recyclable materials.

Canadian Transits: a transboundary movement generated and received in Canada, passing through a foreign country

CCME: Canadian Council of the Ministers of the Environment

EIHWHRMR: *Export and Import of Hazardous Waste and Hazardous Recyclable Material Regulations*

OECD: Organisation for Economic Co-Operation Development

TDGR: *Transportation of Dangerous Goods Regulations*

Fast Facts

The requirements for publication of notice information can be found under Part 7, Division 8, Section 187 of the *Canadian Environmental Protection Act*, 1999. *Resilog* tables 1, 2, and 3 describe notices for proposed exports, imports and transits of hazardous wastes and hazardous recyclable materials received by Environment Canada in the last six months of 2010. Notice status and notified quantities are summarized below.

Notified Quantities, July 1 – December 31, 2010
(3rd and 4th Quarters, 2010)

	Exports	Imports	Transits	Canadian Transits	Total
Duly Completed Notices Received	267	661	27	0	955
Waste Streams Involved	1,797	6,495	60	0	8,352
Total Quantity Notified (Metric Tonnes)	2,342,912	9,882,845	9,647	0	12,235,404
Quantity Consented (Metric Tonnes)	1,497,929	9,280,229	8,023	0	10,786,181
Quantity Objected (Metric Tonnes)	53,620	0	0	0	53,620
Quantity Pending (Metric Tonnes)	561,300	441,032	0	0	1,002,333

The quantity notified reflects the maximum quantity of waste that will be shipped, and is not necessarily the same as the actual quantity shipped. Exporters and importers routinely overestimate waste quantities on their notices, given that they must project the quantity and the physical and chemical nature of hazardous wastes and hazardous recyclable material that will be shipped over a period of one year. Actual movements are tracked through a database containing information submitted on movement documents.

Waste Groups

- | | | |
|---|---|--|
| <ol style="list-style-type: none">1. Battery Wastes: waste whole or crushed batteries, including acid batteries.2. Biomedical Wastes: as defined in the CCME Guidelines for the Management of Biomedical Wastes in Canada, plus infectious waste (TDGR class 6.2 and Schedule 3 of EIHWHRMR)3. Corrosive Liquids: waste acidic or basic liquids and solutions (TDGR class 8).4. Corrosive Solids: waste acids and bases in solid form (TDGR class 8).5. Environmental Hazards: liquid and solid wastes that could pose a danger to the environment.6. Flammable Liquids: waste liquids that are ignitable (TDGR class 3).7. Flammable Solids: waste ignitable, pyrophoric or | <ol style="list-style-type: none">water reactive solids (TDGR class 4).8. Gases: waste aerosols, compressed and liquefied gases (TDGR class 2).9. Halogenated Organic Wastes: waste halogenated organic solvents, liquids and solids.10. Inorganic Wastes: waste inorganic substances and solutions.11. Leachable Toxic Wastes: wastes that come within Schedule 6 of the EIHWHRMR.12. Metal and Mineral Wastes: metal/mineral bearing wastes, metal treatment and processing wastes.13. Non-halogenated Organic Wastes: waste non-halogenated organic solvents, liquids and solids.14. Oils/Fuels: waste gasoline, diesel, petroleum | <ol style="list-style-type: none">processing wastes, used lubricating oils and filters and anti-knock mixtures.15. Oxidizers: oxidizing wastes and organic peroxide wastes (TDGR class 5).16. Paint-related Wastes: waste paints, resins, lacquers, inks, paint thinners and adhesives.17. Pesticide Wastes: waste biocides and wastes contaminated with pesticides.18. Toxic Liquids: waste liquids and solutions that are toxic/poisonous (TDGR class 6.1).19. Toxic Solids: wastes in a solid form that are toxic/poisonous (TDGR class 6.1).20. Polychlorinated Biphenyls: wastes that contain more than 50mg/kg of PCBs |
|---|---|--|

Tables

In the tables, the waste groups are listed across the top row by number. The names of Canadian companies that notified Environment Canada of intended imports and exports (notifiers) are entered alphabetically in the left column. Although a Canadian company may have submitted many notifications for the period covered by this *Resilog* edition, their name appears only once in each table. Therefore, the notifiers may have one or more permit(s) per waste group.

For exports and imports, a two-letter code representing the name of the country of origin (imports) or destination (exports) is entered. Furthermore, a Canadian company could have provided multiple notifications where the countries of origin or destination differ. In this case, all countries of origin (imports) or destination (exports) are listed next to a letter symbol instead of the two-letter code.

For transits, the two-letter code entered in the table represents the name of the country of origin and destination. If the countries of origin and destination are different, then a letter symbol is used.

The legend of country codes is provided at the bottom of each table.
