Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added new uses on corn to the product label of Stratego 250EC Fungicide, containing technical grade trifloxystrobin and propiconazole. The specific uses approved in Canada are detailed on the label of Stratego 250EC Fungicide, *Pest Control Products Act* Registration Number 27528.

Corresponding maximum residue limits (MRLs) for trifloxystrobin were proposed in the consultation document published on 27 September 2011, Proposed Maximum Residue Limit PMRL2011-35, *Trifloxystrobin*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs take legal effect in Canada as of the publication date of this document and either replace or are in addition to the MRLs already established for trifloxystrobin.

Established Maximum Residue Limits for Trifloxystrobin

Common Name	Residue Definition ^a	MRL	Food Commodity
Trifloxystrobin	methyl (α,E)- α -(methoxyimino)-2-[[[(1E)-[1-[3-(trifluoromethyl)phenyl]ethylidene]amino]oxy]methyl]benzeneacetate, including the metabolite (α,E)- α -(methoxyimino)-2-[[[(1E)-[1-[3-(trifluoromethyl)phenyl]ethylidene]amino]oxy]methyl]benzeneacetic acid, expressed as trifloxystrobin	0.1 0.05* 0.04*	Corn oil Field corn, popcorn grain Sweet corn kernels plus cob with husks removed

ppm = parts per million

^a Replaces the currently established 0.02 ppm MRL for corn commodities and adds a metabolite to the residue definition, to accommodate a new foliar application.

A complete list of all pesticide MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
