

RENTAL MARKET REPORT

Vancouver and Abbotsford CMAs

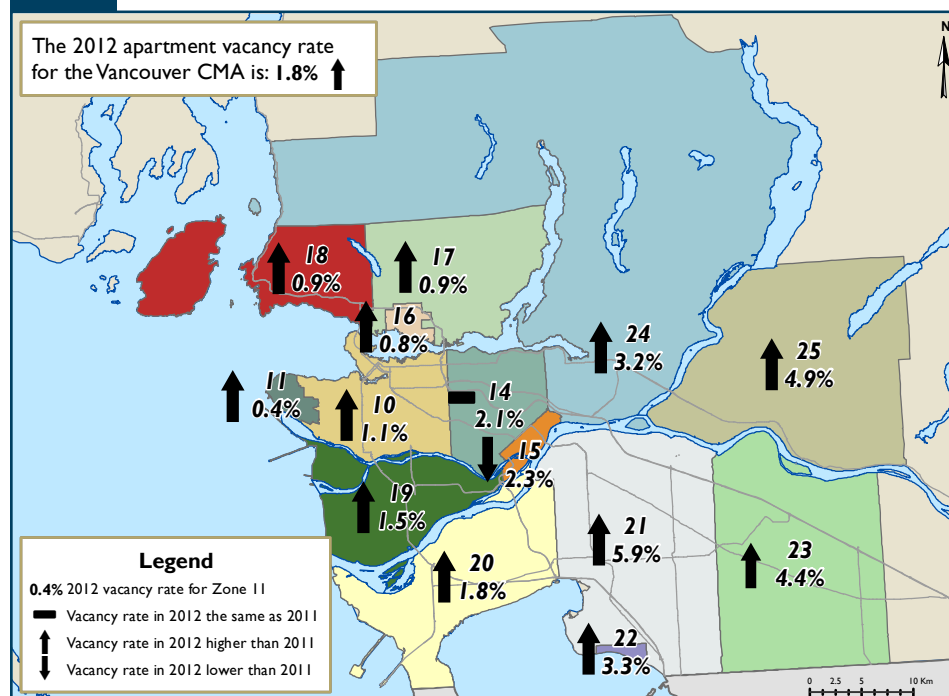

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: Fall 2012

Vancouver Highlights

- The average vacancy rate rose to 1.8 per cent in October 2012 from 1.4 per cent in October 2011 for purpose-built rental apartments.¹
- The average rate of rent increase for two-bedroom purpose-built rental apartments between October 2011 and October 2012 was 2.3 per cent.² The general rate of inflation for this period was 0.7 per cent.

Figure 1

¹ Due to seasonal factors, the results of the October 2012 Rental Market Survey are not directly comparable with the results from the April 2012 Rental Market Survey.

² CMHC compares rents from a common sample to determine market movement. This sample does not contain new units added to the rental stock in the past year.

- The relative cost of renting in purpose-built rental housing compared to the cost of home ownership will continue to support rental demand and keep vacancy rates in this market segment low.
- The rental condominium apartment vacancy rate increased to one per cent in October 2012.

Rental Vacancy Rates Edge Up

An increase in rental supply contributed to higher vacancy rates for both purpose-built and secondary market rentals in the Vancouver Census Metropolitan Area (CMA) during the past year.³ Most of the supply increase was in the secondary rental market. For the purpose-built rental market, some of this increased supply was new-construction units, but most were units that were added back into the rental pool after renovation and / or repurposing⁴. The vacancy rates edged up to 1.8 per cent for purpose-built rental apartments and one per cent for

rental condominium apartments.

Even though rental vacancy rates were slightly higher, the demand for rental housing increased during the past year. Relative to October 2011, the estimated number of occupied rental units rose; approximately 3,606 more rental apartment units were occupied in October 2012 than a year earlier.⁵ About half of these units were in Vancouver City.

Tepid employment conditions for the 15 to 44 age cohort in the Vancouver CMA also contributed to the upward movement of rental vacancy rates. In October 2012, total employment in the Vancouver CMA for the 15 to 44 age cohort slipped one per cent year-over-year, which could have imparted some moderation on an otherwise healthy rental demand.

Vacancy rates were generally lower in and near the city core, where homeownership costs are higher and where employment and educational opportunities are concentrated, attracting demand for rental housing. In Vancouver Downtown⁶, the

average vacancy rate for purpose-built rental apartments was one per cent. Vacancy rates for the rest of Vancouver City ranged from 0.7 per cent to 1.6 per cent. Areas close to Vancouver City, such as Richmond, North Vancouver, and West Vancouver, reported similar vacancy rates ranging from 0.9 per cent to 1.5 per cent. In contrast, Coquitlam, Port Moody, and Port Coquitlam, where home prices are relatively lower, recorded average vacancy rates of 3.2 per cent for purpose-built rental units.

The purpose-built rental apartment stock in the Vancouver CMA is dominated by one- and two-bedroom units. One- and two-bedroom units comprise 87 per cent of all purpose-built rental apartments in the Vancouver CMA. In October 2012, vacancy rates for these units rose to 1.7 per cent and 2.4 per cent for one- and two-bedroom units, respectively.

Three-or-more-bedroom purpose-built rental units had the lowest vacancy rates relative to other bedroom types in all areas except Maple Ridge / Pitt Meadows and Surrey. This unit type, which totalled about 2,230 units for the CMA, comprises the smallest segment of purpose-built rental housing. Census 2011 shows that there were approximately 224,930 private households with four or more persons in the Vancouver CMA.

Figure 2

Rise in Rental Supply Edges Up Vacancy Rates 2012

Source: CMHC Rental Market Survey

³ The primary rental market refers to purpose-built rentals whereas the secondary rental market refers to housing units that are either condominium apartments or accessory suites that are offered as rental housing.

⁴ Repurposing could include a shift from rental to condominium apartments, and vice versa.

⁵ Purpose-built rental and rental condominium apartments.

⁶ Refers to rental zones West End/St Stanley Park, English Bay, and Downtown combined.

With the supply of three-or-more-bedroom purpose-built rental sitting at about one-tenth of the number of households that would most likely require more than two bedrooms, the low vacancy rate is expected, particularly within Vancouver City, where property values are elevated. During the past year, vacancy rates have been stable for three-or-more-bedroom purpose-built rental units in many areas in Vancouver City, such as English Bay, Downtown, South Granville / Oak, and Marpole. In these areas, vacancy rates for larger rental units have remained at zero.

The relative cost of renting compared to home ownership has and will continue to support demand for purpose-built rental apartments and to a lesser extent, rental condominium apartments, keeping vacancy rates low in the Vancouver CMA. This is especially applicable to Vancouver City where the gap between the average monthly mortgage payment and the average rent for a purpose-built rental apartment is larger than in other areas with lower home prices. The difference between the average rent for a purpose-built rental apartment and the monthly mortgage payment for an average priced condominium apartment is approximately \$514 for a bachelor unit and increases to \$4,039 for a three-bedroom unit in Vancouver City.⁷ In Surrey, the difference between renting and owning ranges from \$171 for a bachelor unit to \$461 for a three bedroom unit. This also explains some of the regional variances in purpose-built rental vacancy rates discussed earlier.

Figure 3

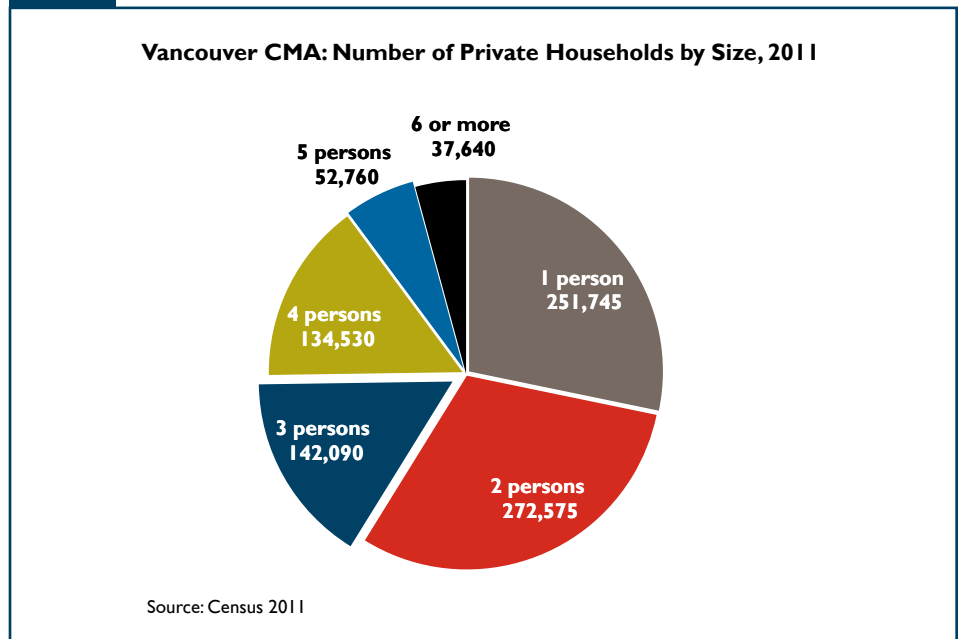

Figure 4

⁷ Mortgage payment assumptions: 20 per cent down payment, 25 year amortization, 5-year posted mortgage interest rate

Average Rents Higher

Despite the increase in vacancy rates, the rate of increase for purpose-built apartment rents has outpaced the general rate of inflation during the past year. Average rents for two-bedroom purpose-built rental units in the Vancouver CMA grew 2.3 per cent in 2012 whereas the rate of inflation was 0.7 per cent during the same period. The allowable rent increase in British Columbia for 2012 was 4.3 per cent, compared to 2.3 per cent in 2011 and 3.2 per cent in 2010. Other reasons for the relatively strong increase include suites that were renovated between October 2011 and October 2012 and could rent at a premium as well as tenant turnover.

Average rent increases were noted for most markets in the Vancouver CMA. Markets close to the downtown core recorded stronger rent growth than areas further from the core such as Surrey and the Tri-Cities where vacancy rates were relatively higher. Average rents for all bedroom types in the City of Vancouver rose three per cent from 2011 levels. Just beyond the city core, the cities of Burnaby and Richmond recorded average rent growth of two per cent and 1.2 per cent, respectively. Further out in the Tri-Cities and Surrey, average rents were relatively flat, increasing 0.8 and 0.3 per cent, respectively.

The average rents for rental condominium apartments in the Vancouver CMA kept pace with the rate of inflation. A supply increase of 3,724 rental condominium apartment units helped to keep the rate of rent increase contained. The presence of renovated suites as well as newly constructed, condominium-quality purpose-built units could narrow the perceived difference between living

Figure 5

Figure 6

in a rental condominium apartment versus a purpose-built rental unit. This, together with increases in supply, will likely reduce the rent premium, which rental condominium apartments have over purpose-built rental apartments over time.

Rental Market to Remain Stable

The Vancouver rental market is forecast to remain stable next year. Purpose-built apartment vacancy rates are expected to remain below two per cent. The supply of purpose-built rental housing is expected to increase, due in part to new rental construction under the Short Term Incentives for Rental Housing (STIR) program, which ended in December 2011. Demand for rental housing is likely to keep pace with the upcoming increase in supply and keep the average vacancy rate at about 1.4 per cent in 2013. Mortgage rule changes in July 2012 may encourage potential homebuyers to save for a bigger down payment, which could keep some renters in rental housing longer.

General economic and housing conditions are expected to support rental housing demand. Employment conditions have been positive and stable, and the current housing market conditions are tipped in favour of renting with consumers more likely to adopt a more cautious posture towards the transition into homeownership from renting. Population growth in the Vancouver CMA is largely migration-driven and new migrants tend to choose renting over home ownership when they first arrive. According to the Census 2011, approximately 74,105 new private households were added in the Vancouver CMA since 2006, bringing the total number of private households to 891,335.⁸

Figure 7

⁸ Private households do not include persons residing in collective dwellings, such as hotels, hostels, seniors' housing, hospitals, and group homes.

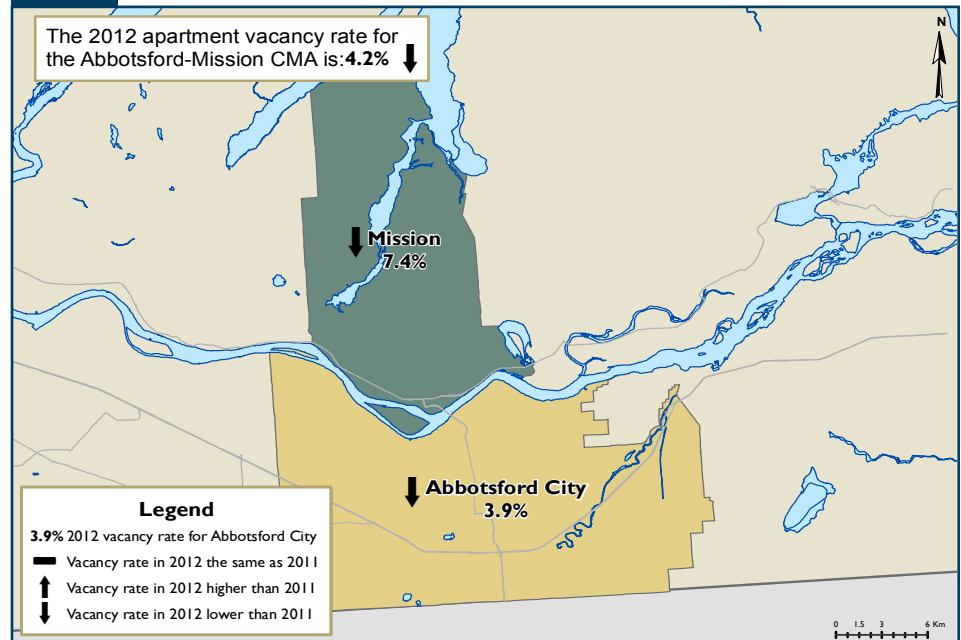

Abbotsford-Mission CMA

- Vacancy rates declined from 6.7 per cent in October 2011 to 4.2 per cent in October 2012.
- The purpose built rental stock remained stable.
- Despite a drop in the vacancy rate, average rents grew at a pace less than the rate of inflation.

Vacancy Rates Drop In the Region

The demand for apartment rental accommodations increased in 2012. Improving employment and a growing population combined with little growth in the rental stock contributed to the decline in the vacancy rate. According to CMHC's Fall Rental Market Survey, the apartment vacancy rate for purpose-built rental buildings in the Abbotsford-Mission CMA was 4.2 per cent, a decline from 6.7 per cent in October 2011. The decline in vacancy brings the rate closer to

Figure 8

the region's 20-year average of 4.1 per cent and ends three consecutive years in which the vacancy rate was above six per cent in the CMA.

Demand picked up this year for smaller apartment units. Bachelor and one-bedroom apartment suites recorded the largest vacancy rate

declines of 3.2 and 3.4 percentage points to 5.0 per cent and 4.4 per cent, respectively. However, the demand for two-bedroom apartment suites was higher among renters, reflected in the lowest vacancy rate by bedroom type in the region at 4.0 per cent.

While the overall vacancy rate (apartment and townhouse) declined in both major centres in the CMA, rental demand is greater in Abbotsford City¹. At 7.9 per cent, the overall vacancy rate in the District of Mission is more than double that of Abbotsford City at 3.9 per cent. As a major centre with a population over 100,000, part of the attraction of living in Abbotsford City is the services and amenities that are readily available, such as the regional hospital, university and international airport. Also, close proximity to the Trans Canada Highway allows for easy access to other centres in the region.

Figure 9

¹ Two major centres make up the CMA, Abbotsford City and the District of Mission.

Purpose-Built Rental Stock remain stable

The purpose-built rental stock remained relatively unchanged from fall 2011 to fall 2012. The total purpose-built rental inventory (apartment and townhomes) has been flat since 2007, near 4,000 units. New market rentals that have come on-stream have been from the secondary rental market, such as apartment condominiums or accessory suites. These units provide competition to the existing rental stock as many of these units have up-to-date features and amenities and are usually well-located in newly established neighbourhoods in the CMA. The estimated number of secondary rental units in the CMA based on the number of households is 9,365, more than double the number of purpose-built units.

Availability Rates Follow Vacancy Rates

The number of units that were available to rent declined from 7.5 per cent in 2011 to 5.4 per cent in 2012. The lower availability rate was attributable to the lower vacancy rate. Similar to the vacancy rate, the availability rate in Abbotsford City was less than half the availability rate in the District of Mission, which remained above ten per cent.

Rental Rates Remain Steady

Despite the decline in vacancies, rental rates for two-bedroom apartments held steady. The estimate of percentage change in average apartment rents indicates that rents for all bedroom types grew at a pace less than the rate of inflation for the province. In this competitive

Figure 10

Figure 11

environment, many owners may have avoided rent increases in order to keep existing tenants in their buildings and attract new tenants when a unit becomes available.

The average monthly rent for all apartment bedroom types in the region was \$737. Total average rents

in Abbotsford City were \$78 more than in the District of Mission due to stronger rental demand. The difference in average rent between the two centres was closer for smaller bachelor units at \$25 and increased as the size and bedroom counts increased.

Employment Support Rental Demand

A number of external factors have influenced the rental market in 2012, contributing to lower vacancy rates. Full-time employment growth drove the overall increase in employment levels² in the CMA. Lower land prices in the Fraser Valley as compared to areas closer to the Vancouver core and updates to the Trans Canada Highway and Port Mann Bridge have attracted companies to set up operations in the region, contributing to job growth. However, youth (15-24 year group) unemployment rates were above ten per cent so far this year.

With limited purpose-built rental stock in the CMA and home sales expected to remain relatively unchanged in 2012 relative to 2011³, an increase in demand caused by higher employment levels, positive household growth and positive net migration all added downward pressure to the vacancy rate in the region. Household growth has averaged slightly over one per cent per year over the last five years.⁴ Migration to the region has been positive, albeit on the decline for the past couple of years.

Vacancy Rates Expected to Rise

Vacancy rates are expected to rise in 2013 but stable employment growth and positive net migration into the region will keep vacancy rates below six per cent. However, the resale market in the CMA is forecast to improve next year, with some renters taking the opportunity to leave the rental market. The forecast for the vacancy rate in the Abbotsford-Mission CMA in 2013 is 5.4 per cent.

Rental rates will remain steady in the region due in part to the increase in the vacancy rate. Competition from new units in the secondary rental market, along with increasing home buyer demand will mean minimal increases in rents. Average one-bedroom rents are expected to be \$695 while two-bedroom rents will be \$830.

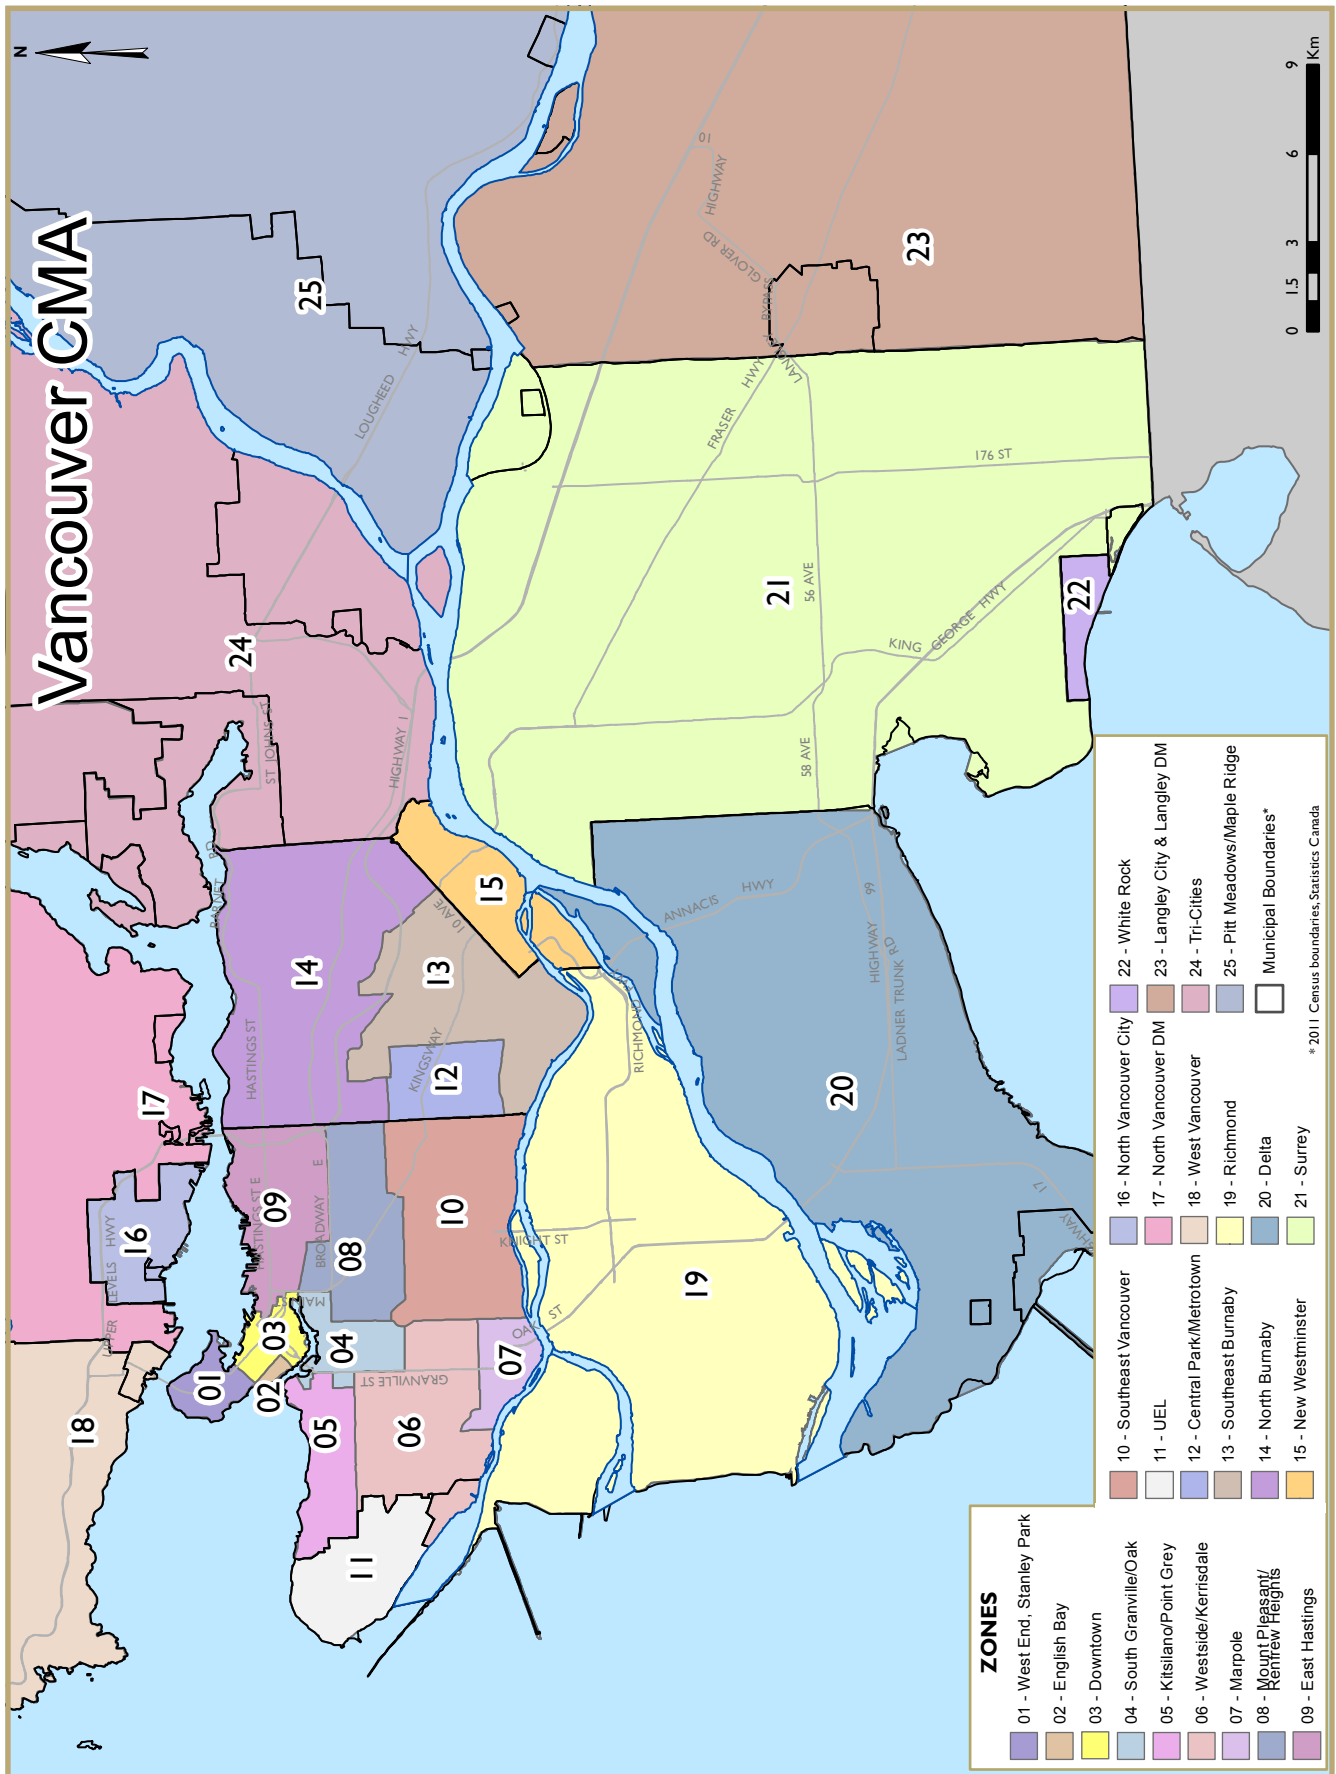

Apartment Vacancy Rates (%) by Major Centres		
	Oct. 2011	Oct. 2012

³ Vancouver and Abbotsford CMA Housing Market Outlook, Fall 2012

⁴ Statistics Canada 2006 and 2011 Census results.

RMS ZONE DESCRIPTIONS - VANCOUVER CMA	
Zone 1	West End, Stanley Park is the area between Stanley Park and Denman Street and extends to Coal Harbour to the north and English Bay to the south.
Zone 2	English Bay runs along Sunset Beach and English Bay to the south, connects to Davie Street to the North and Burrard Street to the East.
Zone 3	Downtown is the remainder of the West End not covered in Zone 1 and 2. Does not include the Downtown Eastside.
Zones 1-3	West End/Downtown
Zone 4	South Granville/Oak is west of Mount Pleasant and extends south to 33rd Avenue and west to Granville Street. Also includes the Fairview area and contains a section between Broadway to the north and 16th Avenue to the south, Burrard Street to the west and Granville Street to the east.
Zone 5	Kitsilano/Point Grey is the area west of South Granville/Oak that extends along 16th Avenue to the University Endowment Land.
Zone 6	Westside/Kerrisdale is the area south of Kitsilano/Point Grey and South Granville/Oak, and includes the areas: Kerrisdale, Mackenzie Heights, Dunbar, Shaughnessy and Oakridge.
Zone 7	Marpole is an area in South Vancouver that borders south of 57th Avenue between Cambie Street to the east and MacDonald Street to the west, and extends south down to the Fraser River.
Zone 8	Mount Pleasant/Renfrew Heights is the area that extends from the Mount Pleasant area to the west to Renfrew Heights to the east, and includes the neighbourhoods of Fraser and Knight. The area boundary to the north is Great Northern Way and Broadway, and roughly 33rd Avenue to the South.
Zone 9	East Hastings is the northeast area of Vancouver City, and includes the Downtown Eastside.
Zone 10	Southeast Vancouver includes the areas: Killarney, Fraserview, Collingwood and Champlain Heights.
Zones 1-10	Vancouver City
Zone 11	University Endowment Lands includes both the municipality and University of British Columbia. Note: the Rental Survey does not include student housing.
Zone 12	Central Park/Metrotown is the area between Boundary Road to the west and Royal Oak Avenue to the east, Moscrop Street and Gilpin Street to the north and Marine Drive to the south.
Zone 13	Southeast Burnaby extends to the border of New Westminster and includes the areas: Edmonds, Middlegate, Buckingham Heights, Deer Lake and Burnaby Lake.
Zone 14	North Burnaby is the northern half of Burnaby and includes the areas: Willingdon Heights, Brentwood Park, Capitol Hill, Sperling, Simon Fraser and Lougheed.
Zones 12-14	Burnaby City
Zone 15	New Westminster is the city boundaries.
Zone 16	North Vancouver City is the city boundaries.
Zone 17	North Vancouver DM is the district boundaries.
Zone 18	West Vancouver is the district boundaries.
Zone 19	Richmond is the city boundaries.
Zone 20	Delta is the corporation boundaries.
Zone 21	Surrey is the city boundaries.
Zone 22	White Rock is the city boundaries.
Zone 23	Langley City and Langley DM includes both the city and township boundaries.
Zone 24	Tri-Cities consists of Coquitlam, Port Coquitlam and Port Moody.
Zone 25	Pitt Meadows/Maple Ridge is the district boundaries for both municipalities.
Zones 1-25	Vancouver CMA

RMS ZONE DESCRIPTIONS - ABBOTSFORD CMA	
Zone 1	Abbotsford City - Includes census tracts 0001.00, 0002.00, 0003.00, 0004.00, 0005.01, 0005.02, 0006.00, 0007.01, 0007.02, 0008.01, 0008.02, 0009.01, 0009.02, 0010.00, 0011.00, 0012.00, 0013.00, 0014.00, 0100.00, 0101.00, 0102.00, 0103.00, 0104.00, 0105.00, 0106.01, 0106.02 and 0106.03.
Zone 2	Mission - Includes census tracts 0200.00, 0201.00, 0202.00, 0203.00, 0204.00, 0205.00, 0206.00 and 0207.00.

¹The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b- Very good, c - Good, d - Fair (Use with Caution)

** Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

¹The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b- Very good, c - Good, d - Fair (Use with Caution)

** Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

¹The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b- Very good, c - Good, d - Fair (Use with Caution)

** Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

TECHNICAL NOTE:

Difference between Percentage Change of Average Rents (Existing and New Structures) AND Percentage Change of Average Rents from Fixed Sample (Existing Structures Only):

Percentage Change of Average Rents (New and Existing Structures): The increase/decrease obtained from the calculation of percentage change of average rents between two years (example: \$500 in the previous year vs. \$550 in current survey represents an increase of 10 percent) is impacted by changes in the composition of the rental universe (e.g. the inclusion of newly built luxury rental buildings in the survey, rental units renovated/upgraded or changing tenants could put upward pressure on average rents in comparison to the previous year) as well as by the rent level movement (e.g. increase/decrease in the level of rents that landlords charge their tenants).

Percentage Change of Average Rents from Fixed Sample (Existing Structures Only): This is a measure that estimates the rent level movement. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. However, some composition effects still remain e.g. rental units renovated/upgraded or changing tenants because the survey does not collect data to such level of details.

METHODOLOGY FOR RENTAL MARKET SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts the **Rental Market Survey (RMS)** every year in April and October to estimate the relative strengths in the rental market. The survey is conducted on a sample basis in all urban areas with populations of 10,000 and more. The survey targets only privately initiated structures with at least three rental units, which have been on the market for at least three months. The survey collects market rent, available and vacant unit data for all sampled structures.

The survey is conducted by a combination of telephone interviews and site visits, and information is obtained from the owner, manager, or building superintendent. The survey is conducted during the first two weeks of April/October, and the results reflect market conditions at that time.

CMHC's Rental Market Survey provides a snapshot of vacancy and availability rates, and average rents in both new and existing structures. There also exists a measure for the change in rent that is calculated based on existing structures only. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. The change in rent in existing structures is an estimate of the change in rent that the landlords charge and removes compositional effects on the rent level movement due to new buildings, conversions, and survey sample rotation. The estimate of per cent change in rent is available in all Canada and Provincial Highlights publications, and also in the CMA reports (fall survey only). The rent levels in new and existing structures are also published. While the per cent change in rents in existing structures published in the reports are statistically significant, changes in rents that one might calculate based on rent levels in new and existing structures may or may not be statistically significant.

METHODOLOGY FOR SECONDARY RENTAL MARKET SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts a survey of the **Secondary Rental Market (SRMS)** in September and October to estimate the relative strengths in the secondary rental market which is defined as those dwellings not covered by the regular RMS. CMHC has identified the following dwelling components to be included in SRMS:

- Rented single-detached houses.
- Rented double (semi-detached) houses (i.e.. Two units of approximate equal size and under one roof that are situated either side-by-side or front-to-back).
- Rented freehold row/town homes.
- Rented duplex apartments (i.e.. one-above-other).
- Rented accessory apartments (separate dwelling units that are located within the structure of another dwelling type).
- Rented condominiums (can be any dwelling type but are primarily apartments).
- One or two apartments which are part of a commercial or other type of structure.

The SRMS has three components which are conducted in selected CMAs:

- A Household Rent Survey of all households to collect information about rents.
- A Condominium Apartment Rent Survey of households living in condominium apartments to collect information about rents.
- A Condominium Apartment Vacancy Survey of condominium apartment owners to collect vacancy information.

All three surveys are conducted by telephone interviews. For the condominium apartment vacancy survey, information is obtained from the owner, manager, or building superintendent and can be supplemented by site visits if no telephone contact is made. For the other two surveys, information is collected from an adult living in the household. All surveys are conducted in September and October, and the results reflect market conditions at that time.

CMHC publishes the number of units rented and vacancy rates for the condominium vacancy survey. For the condominium rent and household rent surveys, the average rent is published. A letter code representing the statistical reliability (i.e., the coefficient of variation (CV)) for each estimate is provided to indicate the data reliability. Rented condominium apartments were surveyed in the following CMAs: Vancouver, Victoria, Calgary, Edmonton, Regina, Saskatoon, Winnipeg, Toronto, Ottawa, Montréal and Québec (NOTE: Condo rent data was not collected for Regina and Saskatoon). Other secondary rental market units were surveyed in Abbotsford, Barrie, Calgary, Edmonton, Halifax, Montreal, Ottawa, Quebec, St. John's, Toronto, Winnipeg, Regina, Saskatoon, Kelowna, Vancouver and Victoria.

Every year CMHC reviews the method of estimation for Household Rent Survey, which may result in some changes to previously published estimates. All statistics in this report are reflective of the new method of estimation.

DEFINITIONS

Availability: A rental unit is considered available if the existing tenant has given, or has received, notice to move, and a new tenant has not signed a lease; or the unit is vacant (see definition of vacancy below).

Rent: The rent refers to the actual amount tenants pay for their unit. No adjustments are made for the inclusion or exclusion of amenities and services such as heat, hydro, parking, and hot water. For available and vacant units, the rent is the amount the owner is asking for the unit.

It should be noted that the average rents reported in this publication provide a sound indication of the amounts paid by unit size and geographical sector. Utilities such as heating, electricity and hot water may or may not be included in the rent.

Rental Apartment Structure: Any building containing three or more rental units, of which at least one unit is not ground oriented. Owner-occupied units are not included in the rental building unit count.

Rental Row (Townhouse) Structure: Any building containing three or more rental units, all of which are ground oriented with vertical divisions. Owner-occupied units are not included in the rental building unit count. These row units in some centres are commonly referred to as townhouses.

Vacancy: A unit is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

Definitions of Census Areas referred to in this publication are as follows:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

October 2011 data presented is based on Statistics Canada's 2006 Census area definitions. October 2012 data presented is based on Statistics Canada's 2011 Census area definitions.

Acknowledgement

The Rental Market Survey and the Secondary Rental Market Survey could not have been conducted without the cooperation of the rental property owners, managers, building superintendents and household members throughout Canada. CMHC acknowledges their hard work and assistance in providing timely and accurate information. As a result of their contribution, CMHC is able to provide information that benefits the entire housing industry.

Rental Affordability Indicators

CMHC no longer reports on its rental affordability indicators (i.e. average rent compared to average renter income) given significant variability of underlying renter income data.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
