Vacancy

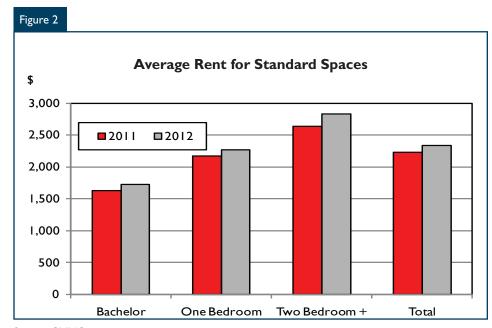

Vacancies move lower

According to Canada Mortgage and Housing Corporation's (CMHC) Senior's Housing Survey, the vacancy rate in senior's rental residences in the province of Manitoba was 4.8 per cent in 2012, compared to 7.1 per cent in 2011. The seniors' survey targeted only private and non-profit retirement structures where the majority of residents are age 65 and over and have access to additional services not offered in traditional rental structures such as meal service, housekeeping, and laundry.

The vacancy rate in Manitoba's seniors' rental residences in bachelor spaces was 7.5 per cent in 2012 compared to 5.5 per cent in 2011. This was also the highest vacancy rate by bedroom type this year. Vacancies declined the most in one bedroom spaces which had recorded the highest vacancy rate at 7.9 per cent in 2011, posted a vacancy rate of 4.6 per cent in 2012. The lowest vacancy rate continues to be in spaces with two bedrooms or more where the vacancy rate was 4.4 per cent in 2012, almost identical to the 4.5 per cent posted one year earlier.

Vacancy rate decreased in upper rent range

As was the case in 2011, the highest vacancy rates in the province this year were recorded among those spaces with the highest rents. This is also the category that saw the greatest decrease in vacancy. Spaces renting for more than \$2,500 per month recorded a vacancy rate of 6.0 per cent in 2012, down from 15.4 per cent in 2011. The lowest vacancies were recorded for spaces renting between \$1,500 and \$1,999, where the vacancy

Source: CMHC

rate of 2.5 per cent in 2011 moved to 2.3 per cent in 2012. This is less than half of the 4.8 per cent overall vacancy rate for Manitoba. Vacancy rates for spaces renting between \$2,000 and \$2,499 moved from 4.2 per cent in 2011 to 5.4 per cent in 2012.

Rents

Average monthly rents move higher

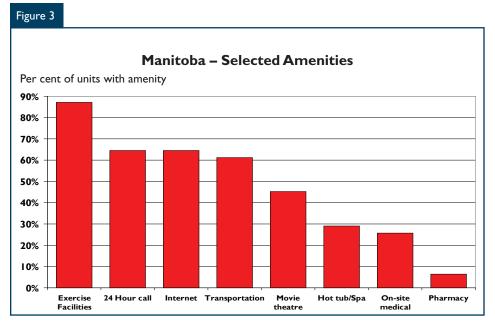

The average rent charged for seniors' Standard Spaces of all types on a province-wide basis in 2012 was \$2,338 per month, compared to \$2,227 in 2011. The largest change in average rent was in two bedroom + spaces where the rent advanced from \$2,638 in 2011 to \$2,834 in 2012. Bachelor spaces reported an average rent of \$1,730 in 2012 compared to a monthly average of \$1,630 in 2011.

Reviewing the universe of spaces by rent range, the largest share of spaces, at 42 per cent, rented for more than \$2,500 per month. By comparison, only 30 per cent of spaces in 2011 fell into this category. Spaces renting

between \$2,000 and \$2,499 per month represented 33.5 per cent of the total universe in 2012. Only 4.8 per cent of all seniors' rental spaces in the province charged less than \$1,500 per month in rent.

Variations in services and amenities

All seniors' facilities surveyed offered some form of meal plan included in the rent. The majority of structures provided three daily meals with rent. However, at 51.6 per cent in 2012, the proportion of structures providing three daily meals was less than the 54.3 per cent of all structures that offered the similar service in 2011. The remaining 48.4 per cent of structures included two meals per day, representing an increase from 37.1 per cent of structures in 2011. On site medical services were available in 25.8 per cent of all structures while 16.1 per cent had a registered nurse on-site. Both of these services increased from the proportion of structures that offered these services in 2011. The most prevalent service was a 24-hour call bell, which was

Source: CMHC

available in 64.5 per cent of all structures in the province, in 2011 this service was available in 60.0 per cent of all structures. A small number of structures (6.5 per cent) had an on-site pharmacy, in last year's survey, this number was 5.7 per cent.

A majority of structures, or 87.1 per cent, had access to an exercise facility. This was the most commonly available amenity. Internet access was the next most common amenity offered, with 64.5 per cent of all structures in the province offering this service. This was followed by transportation services, which were available in 61.3 per cent of structures. Other services provided include movie theatres (45.2 per cent), and spa or hot tub (29 per cent). In all cases, larger buildings were able to offer more amenities than the provincial average.

With respect to ancillary services, cable television was included in the rent of 51.6 per cent of residences in 2012, whereas telephone service was included in the rent in only 6.5 per cent of residences. In 83.9 per cent of residences surveyed in 2012,

telephone services had to be arranged by the tenant.

Universe

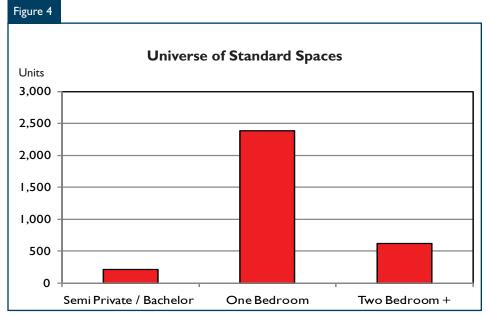

Survey coverage

The total number of seniors' residences surveyed across the province in 2012 was 31, which was down from 35 in 2011. This resulted in a 5 per cent decline in the total

number of spaces to 3,473 in this year's survey. These housed 3,753 residents, which represents the equivalent of 4.3 per cent of Manitoba's estimated population over 75 years of age.

The majority of spaces, 70 per cent, are one bedroom spaces, followed by two bedroom spaces at 18 per cent, with semi-private and bachelor spaces making up the remaining 12 per cent. Most of the structures, 74 per cent, are of wood frame construction with the remaining structures comprised of concrete frame.

There were 3,215 standard retirement senior's spaces surveyed by CMHC in 2012, down seven per cent from the 3,446 standard spaces that comprised the universe in 2011. Standard spaces are defined as those where the resident receives less than 1.5 hours of care per day.

Methodology

Canada Mortgage and Housing Corporation conducts the Seniors' Housing Survey in February and March. This annual survey became national in scope in 2009, covering all centres in each of the ten provinces. Both private and non-profit residences are included in the survey universe. Non-profit residences must have at least one unit that is not subsidized.

To be eligible for inclusion in the 2012 survey results, a residence must:

- ✓ Have been in operation for at least one year, i.e., before January 2011
- ✓ Have at least 10 rental units (Quebec, Ontario, Prairies) or 5 rental units (Atlantic provinces and B.C.)
- ✓ Offer an on-site meal plan
- ✓ Not provide high levels of healthcare (defined as 1.5 hours or more of care per day) to all of their residents. Nursing homes and long-term care homes are examples of residences that were not included in the survey.
- ✓ Offer rental units. Life lease units and owner-occupied units are excluded from this survey.
- √ Have at least 50% of residents who are 65 years of age or older.

The Seniors' Housing Survey is a census and not a sample survey, therefore, all seniors' residences in Canada meeting these criteria are included to be part of this survey.

Survey data were obtained through a combination of telephone interviews and fax and email responses. Information was obtained from the owner, manager, or residence administrator. Survey results reflect market conditions at the time of the survey. Survey results have been weighted to adjust for non-responses, to ensure that they are reflective of the universe. The level of statistical reliability is noted in the data tables. For more information on the reliability of the data please click <a href="https://example.com/here-emails-new-market-emails-

All statistics published, excluding information on new market supply, include only those residences that have been in operation for at least one year.

Definitions

Space: A space is a residential area that is rented out. Examples of spaces include: one half of a semi-private unit, a private or bachelor unit, a one-bedroom unit and a two-bedroom unit. In most cases a space is the same as a unit. The exception is the case where a unit has been divided to rent to multiple residents. Semi-private and ward units are an example of this. Unless otherwise indicated, data for spaces are for all unit types.

Standard Space: A space where the resident does not receive high-level care (i.e., the resident receives less than 1.5 hours of care per day.) or is not required to pay an extra amount to receive high-level care. Regional terms for this type of space may vary across the country.

Heavy Care Space: A space where the resident is paying an extra amount to receive high-level care (1.5 hours or more of care per day). Examples include Alzheimer, Dementia and mobility support residents.

Respite Space: A space used to provide temporary accommodation for a senior who normally lives in another place and not at the residence.

Non-market or Subsidy Space: A space where the rent received for the unit is less than market rent or where the resident occupying the unit is subsidized.

Rent: Refers to the actual amount a resident pays per month for their accommodation space and all mandatory services. For vacant spaces, the rent is the amount the owner is asking for the space.

Vacancy: A space is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

Capture Rate: The main age group living in seniors' residences are persons aged 75 years and older. Capture rate in a centre is the ratio of the total number of residents living in the survey universe divided by its estimated 75+ population, expressed as a percentage.

Acknowledgement

The Seniors' Housing Survey could not have been conducted without the cooperation of the residence owners and their staff. CMHC acknowledges their time and assistance in providing accurate information. As a result of their contribution, CMHC is able to provide data and analysis that benefits the entire industry.

Confidentiality

All information provide through this survey is kept strictly confidential and only used by CMHC to generate statistics and data sets that do not allow for the identification of individuals, households, businesses or buildings.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world.
