

# SENIORS' HOUSING REPORT

## Ontario

CANADA MORTGAGE AND HOUSING CORPORATION

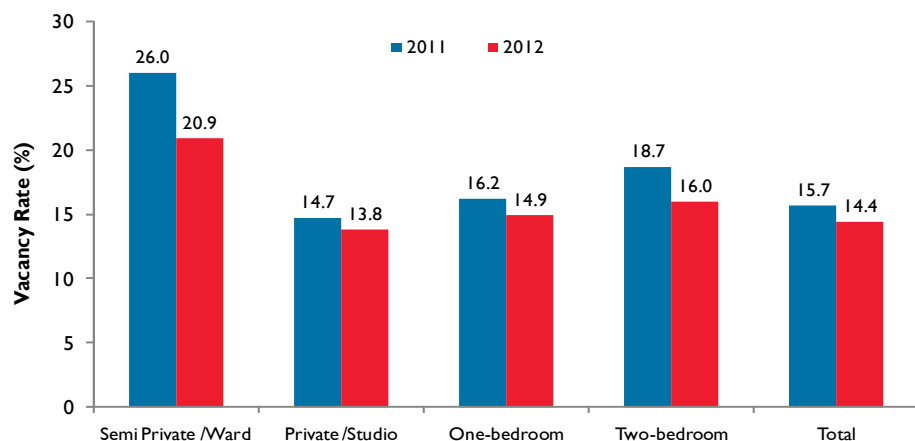

Date Released: 2012

### Highlights

- The vacancy rate for standard spaces declined for the second consecutive year to 14.4 per cent, down from 16.4 per cent in 2010 and 15.7 per cent in 2011. The vacancy rate declined across all unit types.
- Total seniors' housing supply grew by 3.5 per cent to 51,300 spaces in 2012.
- The capture rate rose to 5.2 per cent, up from 5.1 per cent in 2011.
- Fixed sample rents grew by 1.6 per cent. The average monthly rent was \$3,066.

## Vacancy Rate

### Vacancy rate declines due to strong demand for newer supply

The overall vacancy rate for seniors' housing in Ontario fell to 13.8 per cent from 15.0 per cent in 2011. Total vacancies declined for the first time in almost a decade, in spite of 3.5 per cent growth in total supply. The growth in the 75 years and older population as well as the rise in the capture rate boosted the demand for seniors housing. The capture rate rose to 5.2 per cent in 2012 from 5.1 per cent in 2011.

Newer seniors' housing developments continued to drive demand. All the increase in occupancies was captured by seniors' homes opened in 2000 or later. The vacancy rate declined the most in Ottawa and the Greater Toronto Area (GTA), where supply added in 2000 and later made up the largest share of total supply at 50 per cent. Vacancies in homes opened prior to 2000 declined as conversions and removals resulted in a reduction of 40 spaces in residences opened before 1990 and a decline of 400 spaces for those opened between 1990 and 1999.

Within the GTA, new seniors' housing development has been more active in York and Durham regions, and Toronto's North York and Etobicoke areas. These areas accounted for 71 per cent of the increase in occupancies in the GTA in 2012. Niagara and Simcoe are the most active areas for recent retirement home development in Central Ontario and gained two-thirds of the increase in occupancies in the area. Essex and Middlesex are the most active areas in Southwestern Ontario and accounted

Figure 2

Note: Vacancies numbers were rounded to the nearest hundred.

for more than half of the increase in demand.

### Vacancy rate falls across all unit types

The overall vacancy rate declined across all unit types with the biggest drop in the semi-private/ward and two-bedroom sectors. The decline in the vacancy rate of semi-private

and ward spaces was the result of a reduction of their spaces. Total occupancies of semi-private/ward spaces were actually lower in 2012 than in 2011. The increase in demand for both one- and two-bedroom suites matched the increase in supply, lowering the overall vacancy rates for both suite types. New demand for private/studio spaces outpaced the growth in supply, resulting in a lower

Figure 3

Figure 4

vacancy rate of 13.1 per cent, the lowest among all unit types.

### Priciest spaces experience the largest vacancy rate decline

The highest priced spaces, which charged rent over \$3,500 per month, experienced the biggest decline in vacancy rates in 2012 as demand for new supply, which had a large share of expensive suites, strengthened. Even though the share of spaces priced over \$3,500 grew to 29.4 per cent of total spaces from 27.8 per cent a year ago, the vacancy rate for these spaces dropped to 16.7 per cent from 18.6 per cent in 2011.

In the GTA spaces charging over

\$3,500 accounted for more than half of the total supply and captured all the increase in demand. Supply and occupancies of lower-priced spaces decreased.

In Central Ontario supply grew in spaces with rents over \$3,000 and declined in spaces in lower rent ranges. Spaces with rents over \$3,000 made up one-third of the total supply and netted all the increase in demand.

In Ottawa supply of spaces with rents below \$2,500 shrank. Seniors moved out of older and smaller spaces and into newer and larger spaces. The vacancy rate for spaces with rents over \$2,500 decreased with the most noticeable decline, an eight percentage

Total Spaces Breakdown	
Type	% of Total
Standard Units	94.2
Non-Standard Spaces	5.8
Heavy Care	1.4
Respite	1.7
Non-Market or Subsidized	2.6
<b>Total Sample</b>	<b>100.0</b>

% is based on those spaces where the type is known

point drop, for homes opened in 2000 and later.

In Eastern and Southwestern Ontario recently added supply, usually priced between \$2,500 and \$3,500, gained most of the increase in demand.

## Universe

### Larger-sized residences boost supply

There were 20 new homes opened in 2010 that became eligible for the 2012 survey. These new homes brought a total of 2,170 spaces, of which 1,950 were from the 15 new homes with 90 or more spaces each. The total number of eligible residences increased to 671 homes, supplying the Ontario market with a total of 51,300 spaces.

The level of amenities at homes with 90 or more spaces continued to improve and drew residents from smaller homes. As a consequence, conversion and removal activities

	Share of Total Spaces by Unit Type and Region							
	Semi Private & Ward		Private/Studio		One Bedroom		Two Bedroom	
	2011	2012	2011	2012	2011	2012	2011	2012
Greater Toronto Area	3.0%	2.8%	53.8%	51.8%	38.0%	39.7%	5.3%	5.7%
Central Ontario	7.2%	6.5%	67.3%	66.1%	22.7%	24.3%	2.8%	3.0%
Ottawa	3.1%	3.2%	61.8%	62.3%	30.5%	29.7%	4.6%	4.8%
Eastern Ontario	7.4%	5.9%	71.2%	70.6%	19.6%	21.3%	1.8%	2.2%
Southwestern Ontario	6.1%	5.0%	65.4%	61.9%	25.7%	29.0%	2.8%	4.0%
<b>Ontario</b>	<b>5.0%</b>	<b>4.5%</b>	<b>62.6%</b>	<b>61.2%</b>	<b>28.6%</b>	<b>30.3%</b>	<b>3.7%</b>	<b>4.1%</b>

continued to reduce residences with less than 90 spaces. Homes with 90 or more spaces made up 57 per cent of the total supply in Ontario, up from 54 per cent in 2011.

Ottawa had the largest share of spaces from homes with 90 or more spaces, 76 per cent, followed by a 72 per cent rate in the GTA. These two areas have been the most active markets for seniors' housing development in the past decade. Spaces added since 2000 accounted for half of total supply in these two areas. Eastern Ontario had the smallest share of spaces from homes with 90 or more spaces as homes added since 2000 represented one-third of the total supply.

### Couple residents drive demand

There were 47,200 seniors living in retirement homes in Ontario in 2012, 2,400 more residents than in 2011. Couple residents continued to grow strongly as they were attracted to the new supply, which is characterized as having more amenities and larger spaces. A quarter of the increase

Figure 5

in residents was couple residents. Couples comprised 12.7 per cent of total residents compared to 12.0 per cent a year ago.

The highest couple rate in Ontario was in the GTA at 13.4 per cent. High couple rates are usually in areas with a larger than average share of suites. In the GTA, suites make up 45 per cent of total supply, the highest among all major regions. In submarkets like

Frontenac, Northumberland and Middlesex, where the couple rates were among the highest in each region, suite spaces made up over half of total supply.

### Small centres outside Central Ontario underserved with suite spaces

One- and two-bedroom suites made up 17 per cent of the total supply in small centres with less than 50,000 population in Eastern, Southwestern and Northern Ontario compared to the 40 per cent rate in centres with more than 50,000 in these regions. The vacancy rates for suites were much lower in these smaller centres.

### Supply growth will moderate in 2013

Total supply is expected to move up by 2.7 per cent to 52,700 spaces due to the 14 homes with 1,350 spaces opened in 2011. This is the lowest growth rate since 2007. The area that will capture the largest number of these new spaces will be the GTA, 540 spaces. Northern Ontario will experience the largest percentage gain

Figure 6

in supply, 4.2 per cent, followed by Southwestern Ontario's 3.8 per cent gain.

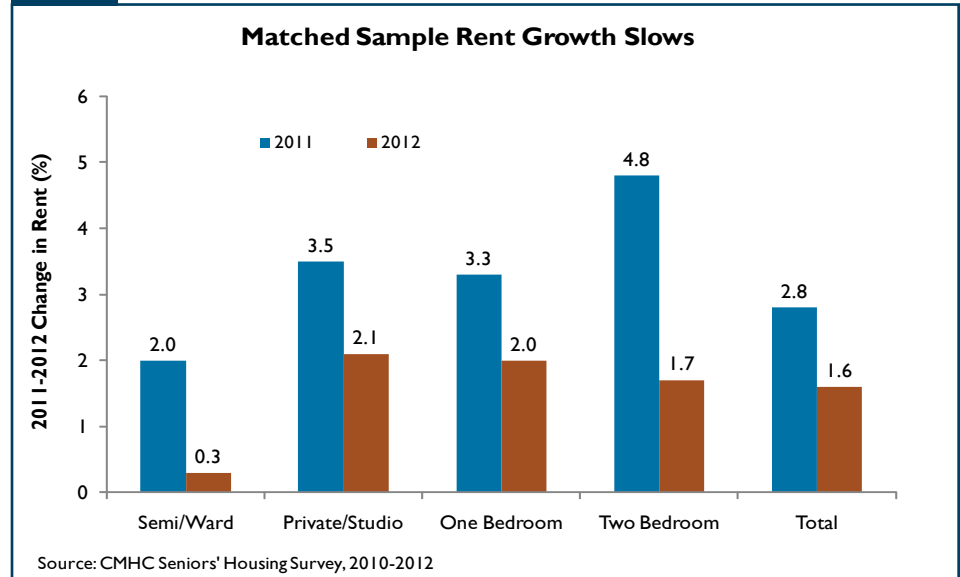

## Rent

### Rent growth slows

The average growth of rent for the matched samples in Ontario was 1.6 per cent from 2011 to 2012, lower than the general rate of inflation of 2.9 per cent during the same period and growth last year of 2.8 per cent. One of the causes of the slower growth is that the allowable rent increase in Ontario for 2011 was 0.7 per cent. Because retirement homes that opened prior to 1990, and are subject to guideline rent increases, made up a substantial share of the total supply at 35 per cent, overall rent growth slowed. Southwestern Ontario, where the universe opened prior to 1990 accounted for the highest share of the total supply in Ontario, registered no growth in total matched sample rent.

Another possible explanation for slower growth in rent relates to the especially strong growth of supply in 2010 and 2011. The average vacancy rate for new homes opened in 2010 was close to 40 per cent. The majority of the newly added homes were still in the lease up period and usually held down rent increases. The best example is Ottawa, where supply added in 2010 and 2011 accounted for more than half of the supply growth since 2000 and recorded no rent growth for spaces added since 2000. Thus the overall growth of rent in Ottawa was limited to 0.4 per cent in 2012. Looking forward, the

Figure 7

higher allowable rent growth rate for residences in Ontario in 2012 and the decrease in the vacancy rate of newly opened homes will bode well for stronger rent growth in 2013.

Similar to the matched samples, the average rent growth for all spaces was 2.1 per cent, lower than the general rate of inflation. The average cost of renting a seniors' housing space in Ontario was \$3,066 per month in 2012. It should be noted that rents in Ontario usually include the costs of three meals daily, utilities as well as on-site medical services and registered nurse, which differs from the rents charged in other regions in Canada where lower percentages of homes provide the above services. Furthermore, on average, retirement homes in Ontario offer a higher level of amenities.

The fastest rent growth, 4.2 per cent, was in the GTA, which captured the largest share of new supply in 2012 in

Ontario. The majority of the increase in supply was one- and two-bedroom spaces, pushing average rents up by four per cent for one-bedrooms and nine per cent for two-bedrooms. The highest average rent in Ontario was in Etobicoke, \$4,050.

Central Ontario recorded the second highest growth rate in rents, three per cent. This region accounted for the second highest share of new supply in Ontario. In the rest of Ontario, average rent growth was slower than the average in Ontario. Slower supply growth contributed to part of the lower rent growth. Ottawa and Northern Ontario experienced a half percentage point drop in total supply. These two areas also experienced declines in their average rents. Retirement home supply is the oldest in Southwestern Ontario, where the average rent dropped by 0.7 per cent in 2012.

## Spotlight on...

### Seniors' Population

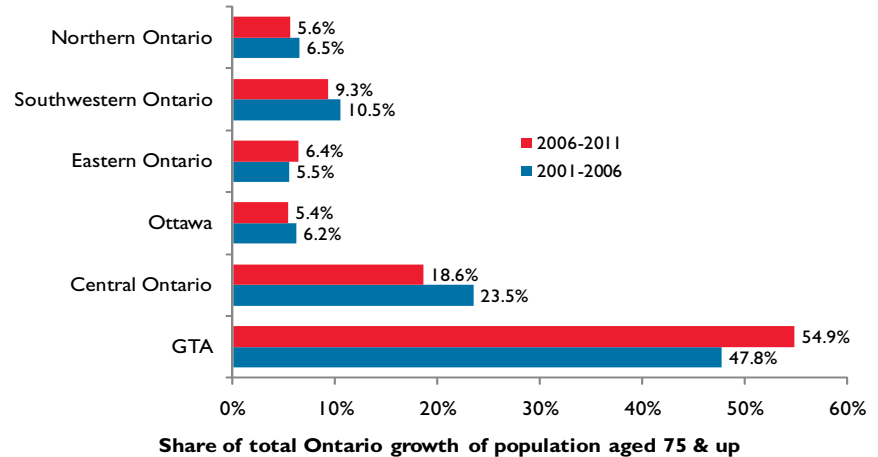

The population aged 75 and over grew at a slower pace of 11.9 per cent during the 2006-2011 census period compared to growth in the 2001-2006 period of 19.4 per cent, due to low birth rates in the 1930s. Total seniors aged 75 and over increased by 93,000 during 2006-2011 compared to the 127,000 growth during the previous five-year period. The growth of the population aged 75 and over is expected to pick up to 13.6 per cent, a total of 121,000 persons, during 2011-2016.

### GTA captures a larger share of senior population growth

The GTA gained an increasing share of the total growth of the population aged 75 and over in Ontario during 2006-2011. Meanwhile, the GTA accounted for 72 per cent of the total population growth in Ontario, up from 63 per cent in the previous census period. The GTA is projected to gain half of the increase in seniors

Figure 8

#### GTA Captures a Larger Share of Senior Population

Source: Statistics Canada, 2001, 2006 & 2011 Census

aged 75 and over in Ontario during 2011-2016.

All regions in the GTA, except City of Toronto, became more popular for seniors. Peel and York regions drew half of the growth of the population aged 75 and over in the GTA during 2006-2011.

Seniors key to population growth outside the GTA and Ottawa

In areas outside the GTA and Ottawa, the population aged 65 and over grew by six times the rate of the younger population. The growth of the population aged 65 and over in areas outside the GTA and Ottawa increased during

#### Seniors' population growth by region, 2006-2011

Population growth	GTA	Ottawa	Central Ontario	Southwestern Ontario	Eastern Ontario	Northern Ontario
Under 65 years	7.9%	7.8%	2.1%	-1.1%	0.8%	-3.3%
65 years & up	16.5%	15.6%	12.2%	11.5%	13.7%	8.5%
Under 75 years	8.5%	8.7%	3.2%	0.3%	2.3%	-2.2%
75 years & up	16.5%	10.2%	8.9%	7.8%	9.8%	9.3%

Source: Statistics Canada, 2006 and 2011 Census

## Spotlight on...

2006-2011 with a combined gain of 104,000, compared to the growth of 58,000 during 2001-2006. Eastern, Southwestern and Northern Ontario combined gained a total of 19,750 seniors aged 75 and over.

### Seniors' preferences for retirement home living vary

Relative to the senior population growth, seniors' housing supply has grown stronger in Ottawa, Southwestern and Central Ontario due to the higher capture rates in these areas. Ottawa, with a capture rate of 10 per cent, the highest in Ontario, accounted for 5.9 per cent of the increase in total population aged 75 and over in Ontario during 2001-2011 but made up a fifth of the total growth in supply during the same period. The capture rates in Southwestern and Central Ontario have improved over time to close to six per cent and above the average in Ontario. Supply in Eastern Ontario picked up strongly in the past five years as the capture rate moved up noticeably, from five per cent in the period of 2001-2006 to seven per cent in 2006-2011. The preference for retirement home living remained the lowest in Northern Ontario.

The following letter codes are used to indicate the reliability of the estimates:

a – Excellent, b – Very good, c – Good, d – Fair (Use with Caution)

\*\* Suppressed to protect confidentiality    ++ Not statistically reliable    -- No units exist in universe for this category

## Methodology

Canada Mortgage and Housing Corporation conducts the Seniors' Housing Survey in February and March. This annual survey became national in scope in 2009, covering all centres in each of the ten provinces. Both private and non-profit residences are included in the survey universe. Non-profit residences must have at least one unit that is not subsidized.

To be eligible for inclusion in the 2012 survey results, a residence must:

- ✓ Have been in operation for at least one year, i.e., before January 2011
- ✓ Have at least 10 rental units (Quebec, Ontario, Prairies) or 5 rental units (Atlantic provinces and B.C.)
- ✓ Offer an on-site meal plan
- ✓ Not provide high levels of healthcare (defined as 1.5 hours or more of care per day) to all of their residents. Nursing homes and long-term care homes are examples of residences that were not included in the survey.
- ✓ Offer rental units. Life lease units and owner-occupied units are excluded from this survey.
- ✓ Have at least 50% of residents who are 65 years of age or older.

The Seniors' Housing Survey is a census and not a sample survey, therefore, all seniors' residences in Canada meeting these criteria are included to be part of this survey.

Survey data were obtained through a combination of telephone interviews and fax and email responses. Information was obtained from the owner, manager, or residence administrator. Survey results reflect market conditions at the time of the survey. Survey results have been weighted to adjust for non-responses, to ensure that they are reflective of the universe. The level of statistical reliability is noted in the data tables. For more information on the reliability of the data please click [here](#).

All statistics published, excluding information on new market supply, include only those residences that have been in operation for at least one year.

## Definitions

**Space:** A space is a residential area that is rented out. Examples of spaces include: one half of a semi-private unit, a private or bachelor unit, a one-bedroom unit and a two-bedroom unit. In most cases a space is the same as a unit. The exception is the case where a unit has been divided to rent to multiple residents. Semi-private and ward units are an example of this. Unless otherwise indicated, data for spaces are for all unit types.

**Standard Space:** A space where the resident does not receive high-level care (i.e., the resident receives less than 1.5 hours of care per day.) or is not required to pay an extra amount to receive high-level care. Regional terms for this type of space may vary across the country.

**Heavy Care Space:** A space where the resident is paying an extra amount to receive high-level care (1.5 hours or more of care per day). Examples include Alzheimer, Dementia and mobility support residents.

**Respite Space:** A space used to provide temporary accommodation for a senior who normally lives in another place and not at the residence.

**Non-market or Subsidy Space:** A space where the rent received for the unit is less than market rent or where the resident occupying the unit is subsidized.

**Rent:** Refers to the actual amount a resident pays per month for their accommodation space and all mandatory services. For vacant spaces, the rent is the amount the owner is asking for the space.

**Vacancy:** A space is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

**Capture Rate:** The main age group living in seniors' residences are persons aged 75 years and older. Capture rate in a centre is the ratio of the total number of residents living in the survey universe divided by its estimated 75+ population, expressed as a percentage.

### **Acknowledgement**

The Seniors' Housing Survey could not have been conducted without the cooperation of the residence owners and their staff. CMHC acknowledges their time and assistance in providing accurate information. As a result of their contribution, CMHC is able to provide data and analysis that benefits the entire industry.

### **Confidentiality**

All information provide through this survey is kept strictly confidential and only used by CMHC to generate statistics and data sets that do not allow for the identification of individuals, households, businesses or buildings.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
