

HOUSING NOW

Ontario Region

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: Second Quarter 2012

Resale Market

Ontario home sales at a two year high in first quarter

First quarter Ontario existing home sales moved to the highest level since the second quarter of 2010. Provincial sales of pre-owned homes remained on par with strong fourth quarter levels. Despite the sluggish pace of job growth across the province, residential real estate remained remarkably

resilient. Repeat buyers are more active in the current housing market and are less impacted by less robust job markets. Meanwhile, interest rates remain a key story with fixed rate mortgages dropping to their lowest levels on record in the first quarter - helping support housing demand. In addition, unseasonably warm weather also pulled demand forward into the early part of 2012.

The pace of growth in listings has slowed in recent quarters after having grown strongly through 2011. Slower price gains later in 2011 dampened the growth in listings. Resale market conditions across the province remained on the cusp between a balanced and sellers market for most of 2011 and very little change was registered in the first quarter of 2012. This would support price growth generally in line with inflation. Home price growth however continues to exceed inflationary pressures early in 2012. A rising share of detached home sales likely supported stronger home prices as did more activity among more affluent repeat buyers (see sidebar). While the GTA was instrumental in pushing Ontario prices up in the first quarter, stronger price increases were also registered in some smaller CMAs as well.

Based on the balance between demand and supply, Hamilton, Thunder Bay and Toronto were the hottest markets in the first quarter. These are all markets challenged by a tight supply of new listings and lack of available land for new construction. Meanwhile, eastern and southwestern Ontario communities remained the coolest. Notable examples include: St Catharines-Niagara, London and Windsor centres which were well supplied early in 2012 as they were for most of 2011. Not surprisingly, these cooler markets are the most affordable across the province and most tightly linked to the US economy. Signs that the US economic recovery remains on track could spell good news for the more inexpensive markets across the province.

New Home Market

Housing starts grow in the first quarter

Ontario residential construction activity grew to its highest level since 2008 in the first quarter. Ontario all area home starts rose to 79,000 units in the first quarter, up over 18 per cent from the fourth quarter. This level of demand is currently above demographic requirements. All of the strength in construction, was in the more inexpensive multi-family home sector which includes semi detached, row and apartment housing. Meanwhile, single detached construction posted declines. Low interest rates, an active resale market and strong investor interest contributed to growing levels of activity in the first quarter.

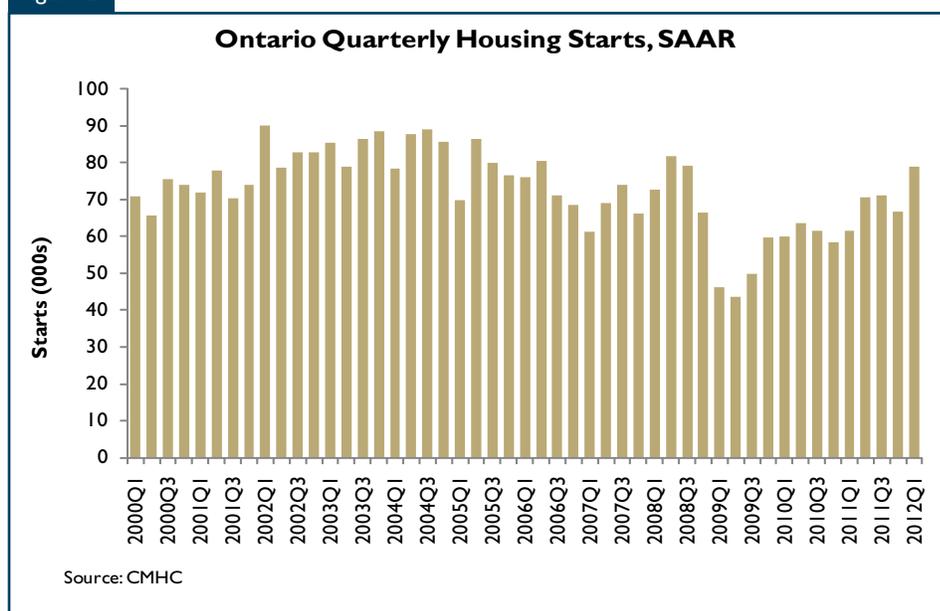

Construction of apartment units continue to drive multi-family construction activity in the first quarter, particularly in some larger CMAs. Rising home prices, and fewer lots available for low-rise construction supported demand

for less expensive higher density housing. In addition, lower rental vacancy rates and less purpose-built rental construction enticed more investors into the marketplace and boosted investment demand for apartment units in the past few years. These projects are now commencing construction

Single detached construction remained relatively stable in the first quarter. Single detached construction has been on a long term downtrend since 2003 owing to growth in less expensive housing options and less land available for residential development. Demographic trends over time suggest an ageing population and smaller households are less supportive of new detached construction. Land constraints, demographic trends and the rising cost of housing will likely temper any notable growth in single detached construction over the next few years.

The Ontario new home price index has been trending higher since the fourth quarter of 2009 due to both

Figure 2

demand and supply factors. In 2011, new home prices grew at a faster rate versus the prior year. In 2012, new home prices continue to grow in excess of inflation. On the demand

side, stronger housing starts, owing to lower interest rates and growing resale home prices enabled builders to raise prices. On the supply side, land costs and rising prices for

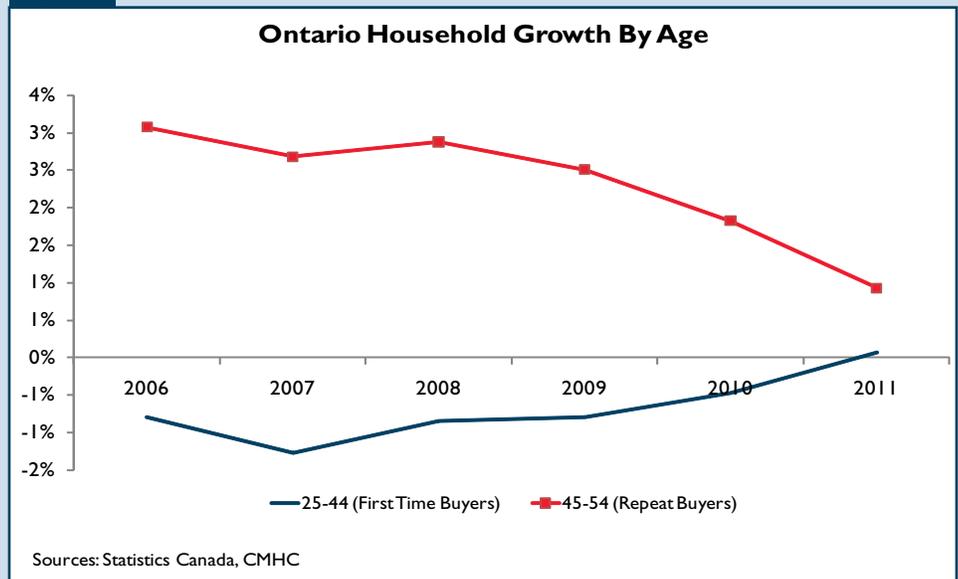

selected building materials have also contributed to rising new home prices across Ontario.

Repeat Buyers are Driving Housing Demand in Ontario Today

First time buyers were actively purchasing real estate in 2007 and 2009. Mortgage rules became more accommodating as did the cost of borrowing following the recession respectively. Since then it has really been a repeat buyer market in Ontario. A number of factors have contributed to more repeat buyer activity. First, the population is ageing and moving into repeat buyer age categories ranging between 45-54. Indeed, population growth is growing fastest for this group. Secondly, a rising share of workers over the age of 45 have been more successful landing jobs relative to younger adults under the age of 45. This helped support repeat buying activity. Lastly, economic conditions in Ontario have been less encouraging in the past year. Job growth has slowed and mortgage rules have been less accommodating over the past year. First time buyers are most sensitive

to changing economic conditions as they lack the income and savings to insulate themselves from a slow growing economy. Lower rental apartment vacancy rates over the past year is further evidence of fewer first time buyers in the market.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.

CMHC grants reasonable rights of use of this publication's content solely for personal, corporate or public policy research, and educational purposes. This permission consists of the right to use the content for general reference purposes in written analyses and in the reporting of results, conclusions, and forecasts including the citation of limited amounts of supporting data extracted from this publication. Reasonable and limited rights of use are also permitted in commercial publications subject to the above criteria, and CMHC's right to request that such use be discontinued for any reason.

Any use of the publication's content must include the source of the information, including statistical data, acknowledged as follows:

Source: CMHC (or "Adapted from CMHC," if appropriate), name of product, year and date of publication issue.

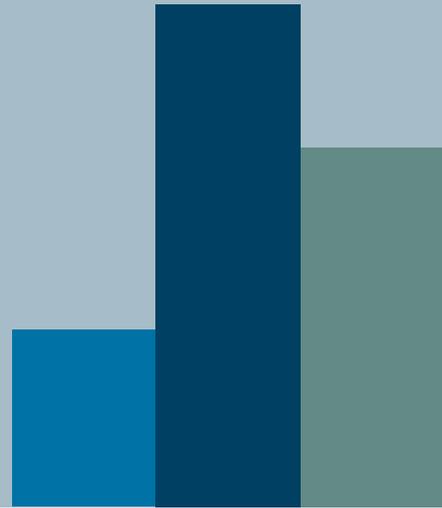

Other than as outlined above, the content of the publication cannot be reproduced or transmitted to any person or, if acquired by an organization, to users outside the organization. Placing the publication, in whole or part, on a website accessible to the public or on any website accessible to persons not directly employed by the organization is not permitted. To use the content of any CMHC Market Analysis publication for any purpose other than the general reference purposes set out above or to request permission to reproduce large portions of, or entire CMHC Market Analysis publications, please contact: the Canadian Housing Information Centre (CHIC) at chic@cmhc.ca; 613-748-2367 or 1-800-668-2642.

For permission, please provide CHIC with the following information:
Publication's name, year and date of issue.

Without limiting the generality of the foregoing, no portion of the content may be translated from English or French into any other language without the prior written permission of Canada Mortgage and Housing Corporation.

The information, analyses and opinions contained in this publication are based on various sources believed to be reliable, but their accuracy cannot be guaranteed. The information, analyses and opinions shall not be taken as representations for which Canada Mortgage and Housing Corporation or any of its employees shall incur responsibility.
