

# HOUSING NOW

## Edmonton CMA

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: February 2012

## New Home Market

### Housing Starts in Edmonton Strengthen in January

Housing starts in the Edmonton Census Metropolitan Area (CMA) increased year-over-year in January by 59 per cent to 578 units compared with 363 in January 2011. The increase

occurred in both the single-detached and multi-family sectors. Starts within Edmonton City in January were more than double the volume recorded a year prior, while the suburban areas witnessed a 37 per cent decrease during the same time frame. Total housing units under construction across Metro in January were up by nine per cent year-over-year to 9,036 units.

Single-detached starts in January increased by 53 per cent year-over-year to 314 units, up from 205 in January 2011. The gain represents a strong start to the year for Edmonton's single-detached builders. However, it should be noted that last year's starts were hampered by heavy snow and cold temperatures which delayed production across the Capital region. Inside Edmonton City, single-detached starts rose by over 92 per cent from January 2011 to 227 units while the suburban areas were unchanged from the first month of 2011 at 87 units.

Single-detached completions in January decreased year-over-year for the seventh consecutive month, reaching 374 units. Absorptions did

not keep pace with completions in January, thus inventories moved upward from the previous month of December. The region's 351 single-detached absorptions represented an 18 per cent decline from the same month in 2011. Inventories of completed and unoccupied units, including show homes, stood at 637 units in January, up 15 per cent from this time last year.

The average price of single-detached units absorbed in January increased by 2.5 per cent from the same month in 2011 to \$520,598. By comparison, contractor selling prices reported by Statistics Canada's latest New House Price Index (NHPI) for December 2011 increased in Edmonton by 1.2

per cent on a year-over-year basis.

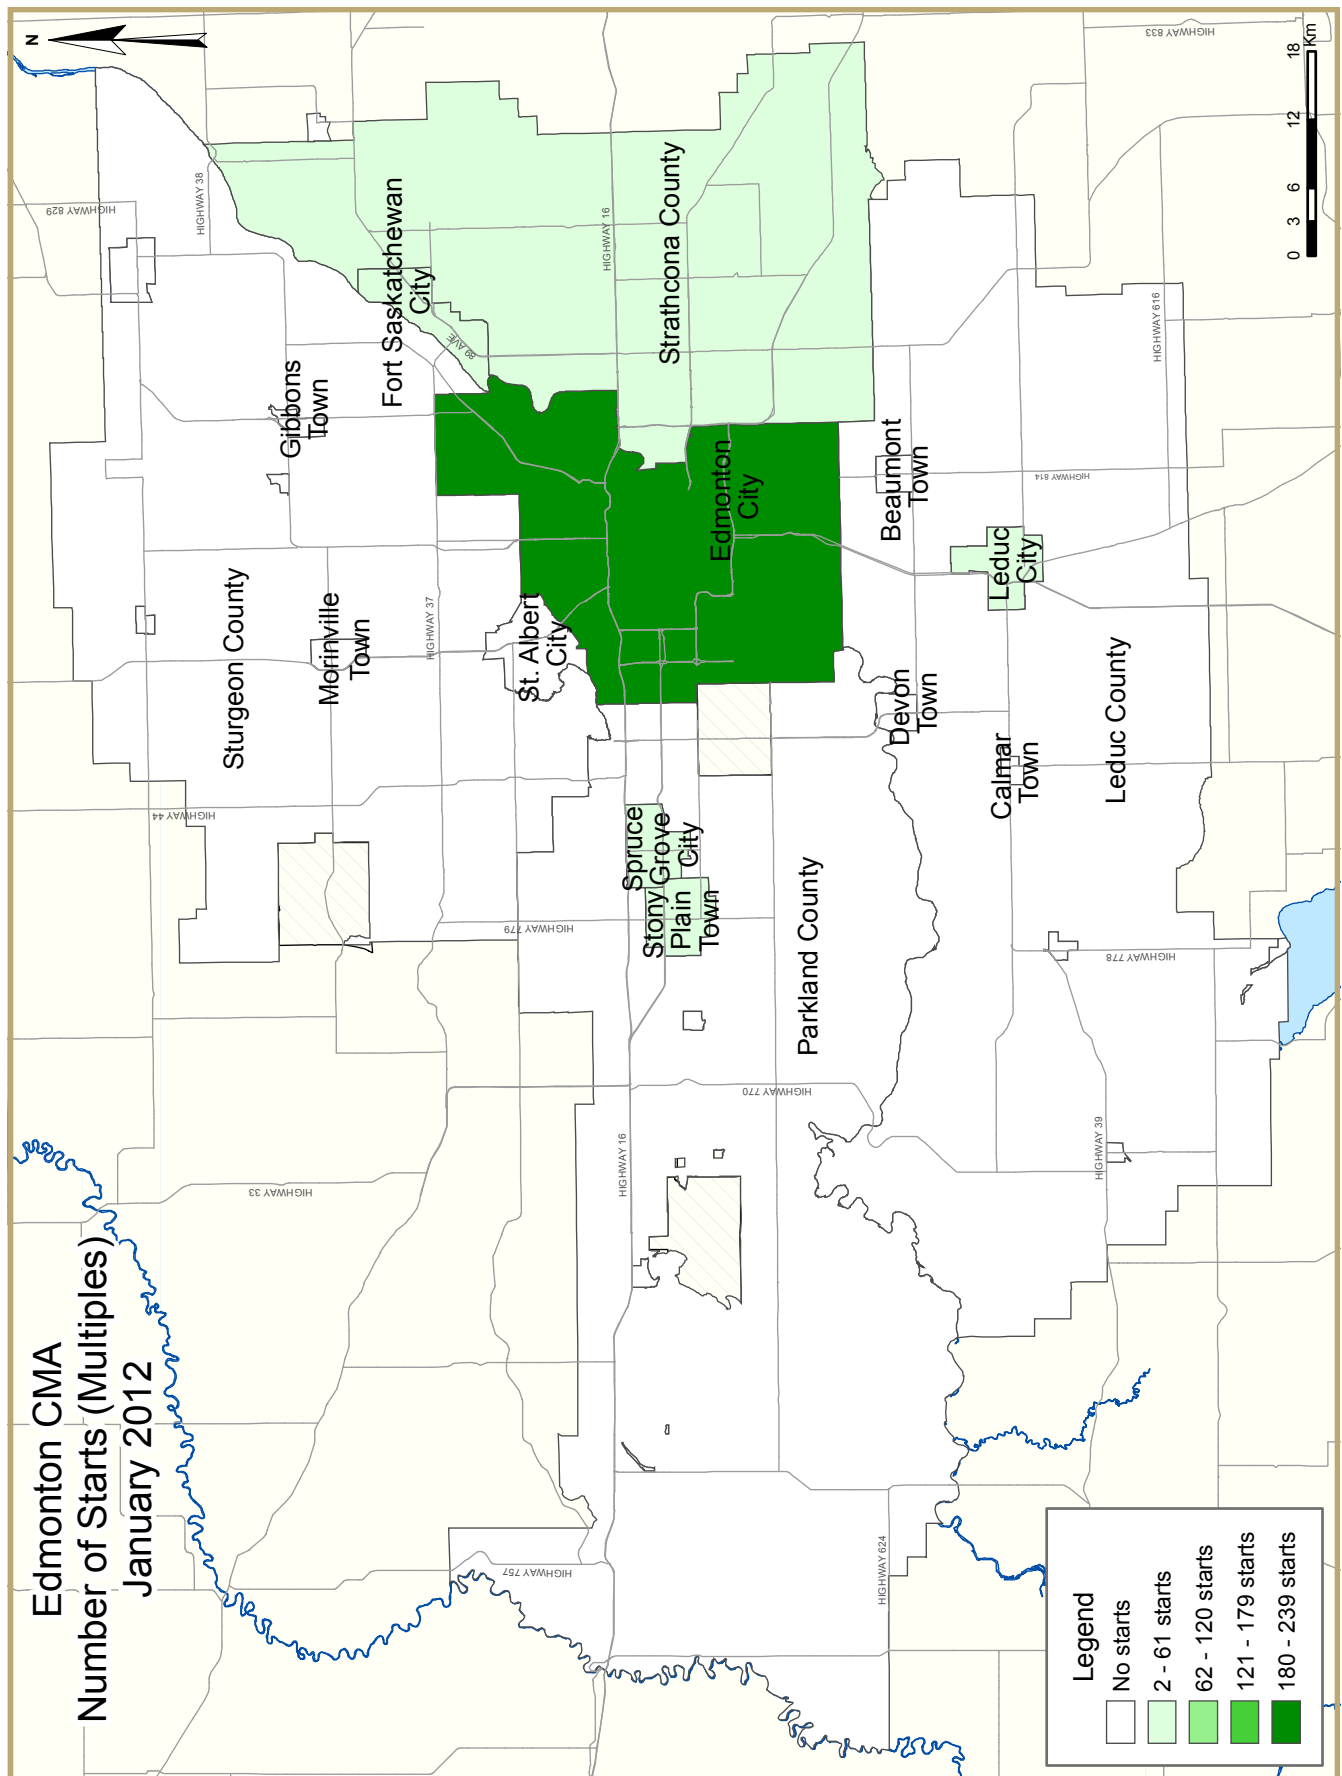

Multi-family starts, which consist of semi-detached units, rows, and apartments, increased by 67 per cent year-over-year in January to 264 units. Semi-detached starts in January, at 96 units, were double the tally a year prior. Row (townhouse) and apartment starts, meanwhile, increased from January of last year by 27 and 63 per cent, respectively. The 130 apartment units recorded in January were located in Edmonton City and were intended for the rental market. The Edmonton City multi-family starts totalled 239 units compared with 66 in January 2011. Outside of City limits, multi-family starts decreased by 73 per cent from last January to 25 units.

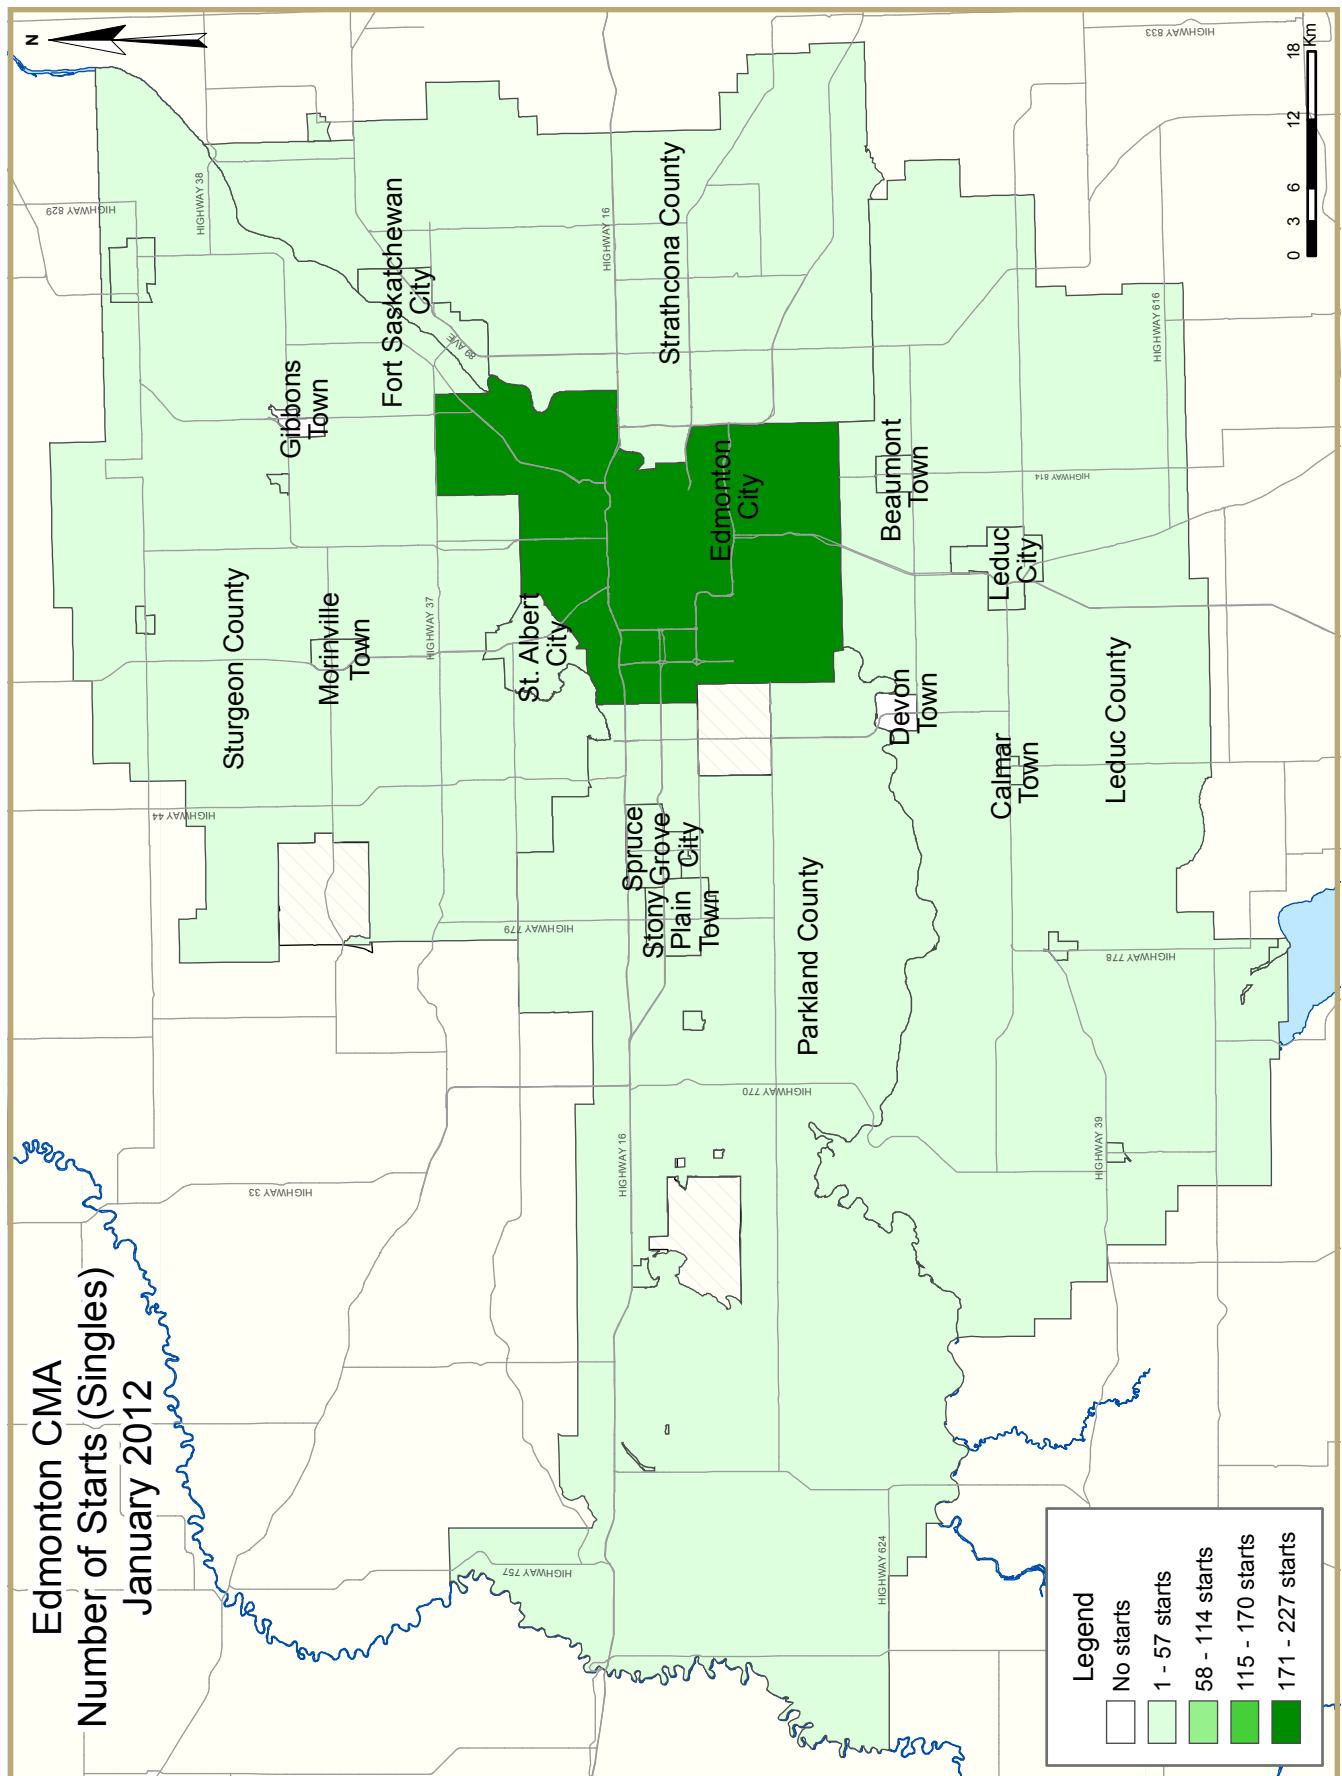

Multi-family completions in January rose by 44 per cent from this time last year to 338 units. Absorptions also advanced in January by double-digit percentages from the first month of 2011. However, at 272 units, absorptions were considerably outpaced by completion levels. This resulted in the first month-over-month uptick in multi-family inventory since September of last year. Total multiple dwellings that were completed and unoccupied stood at 950 units in January, nearly two per cent more than the inventory on hand at the end of January 2011.

## METHODOLOGY

### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

## DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

## INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

**Freehold:** A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

**Rental:** Dwelling constructed for rental purposes regardless of who finances the structure.

## GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
