Date Released: March 2012

New Home Market

Housing Starts in Edmonton Increase in February

Total housing starts in the Edmonton Census Metropolitan Area (CMA) increased in February by 22 per cent to 597 units from 489 starts in February 2011. For the year-to-date,

housing starts totalled 1,175 units, up 38 per cent from 852 units during the first two months of 2011.

Single-detached starts increased by five per cent year-over-year in February to 378 units compared with 360 in February of last year. Following a strong increase in January, single-detached starts inside Edmonton City decreased in February by eight per cent from a year prior to 223 units.

Source: CMHC

So far this year, builders have started work on 692 single-detached units across the Capital region, representing a 22 per cent increase from January and February 2011. While 2012 is off to a strong start, the gap between this year and 2011 should narrow somewhat in the months ahead as 2011 began at a relatively slow pace.

Single-detached completions decreased in February to 451 units compared with 560 completions a year prior. Absorptions also declined year-over-year to 438 units, down 17 per cent from 529 absorptions in February 2011. This caused unabsorbed inventories (including show homes) to move upward on a month-over-month basis to 650 units

in February, representing the highest level since June 2009.

The average price of single-detached units absorbed in February increased by 4.3 per cent from the same month in 2011 to \$515,331. This increase was caused by an uptick in absorptions of higher-priced homes. The median price, which is less impacted by extreme values, was largely unchanged year-over-year in February at \$449,985. Meanwhile, contractor selling prices reported by Statistics Canada's latest New House Price Index (NHPI) for January increased in Edmonton by 1.3 per cent from the first month of 2011.

Multi-family starts, which consist

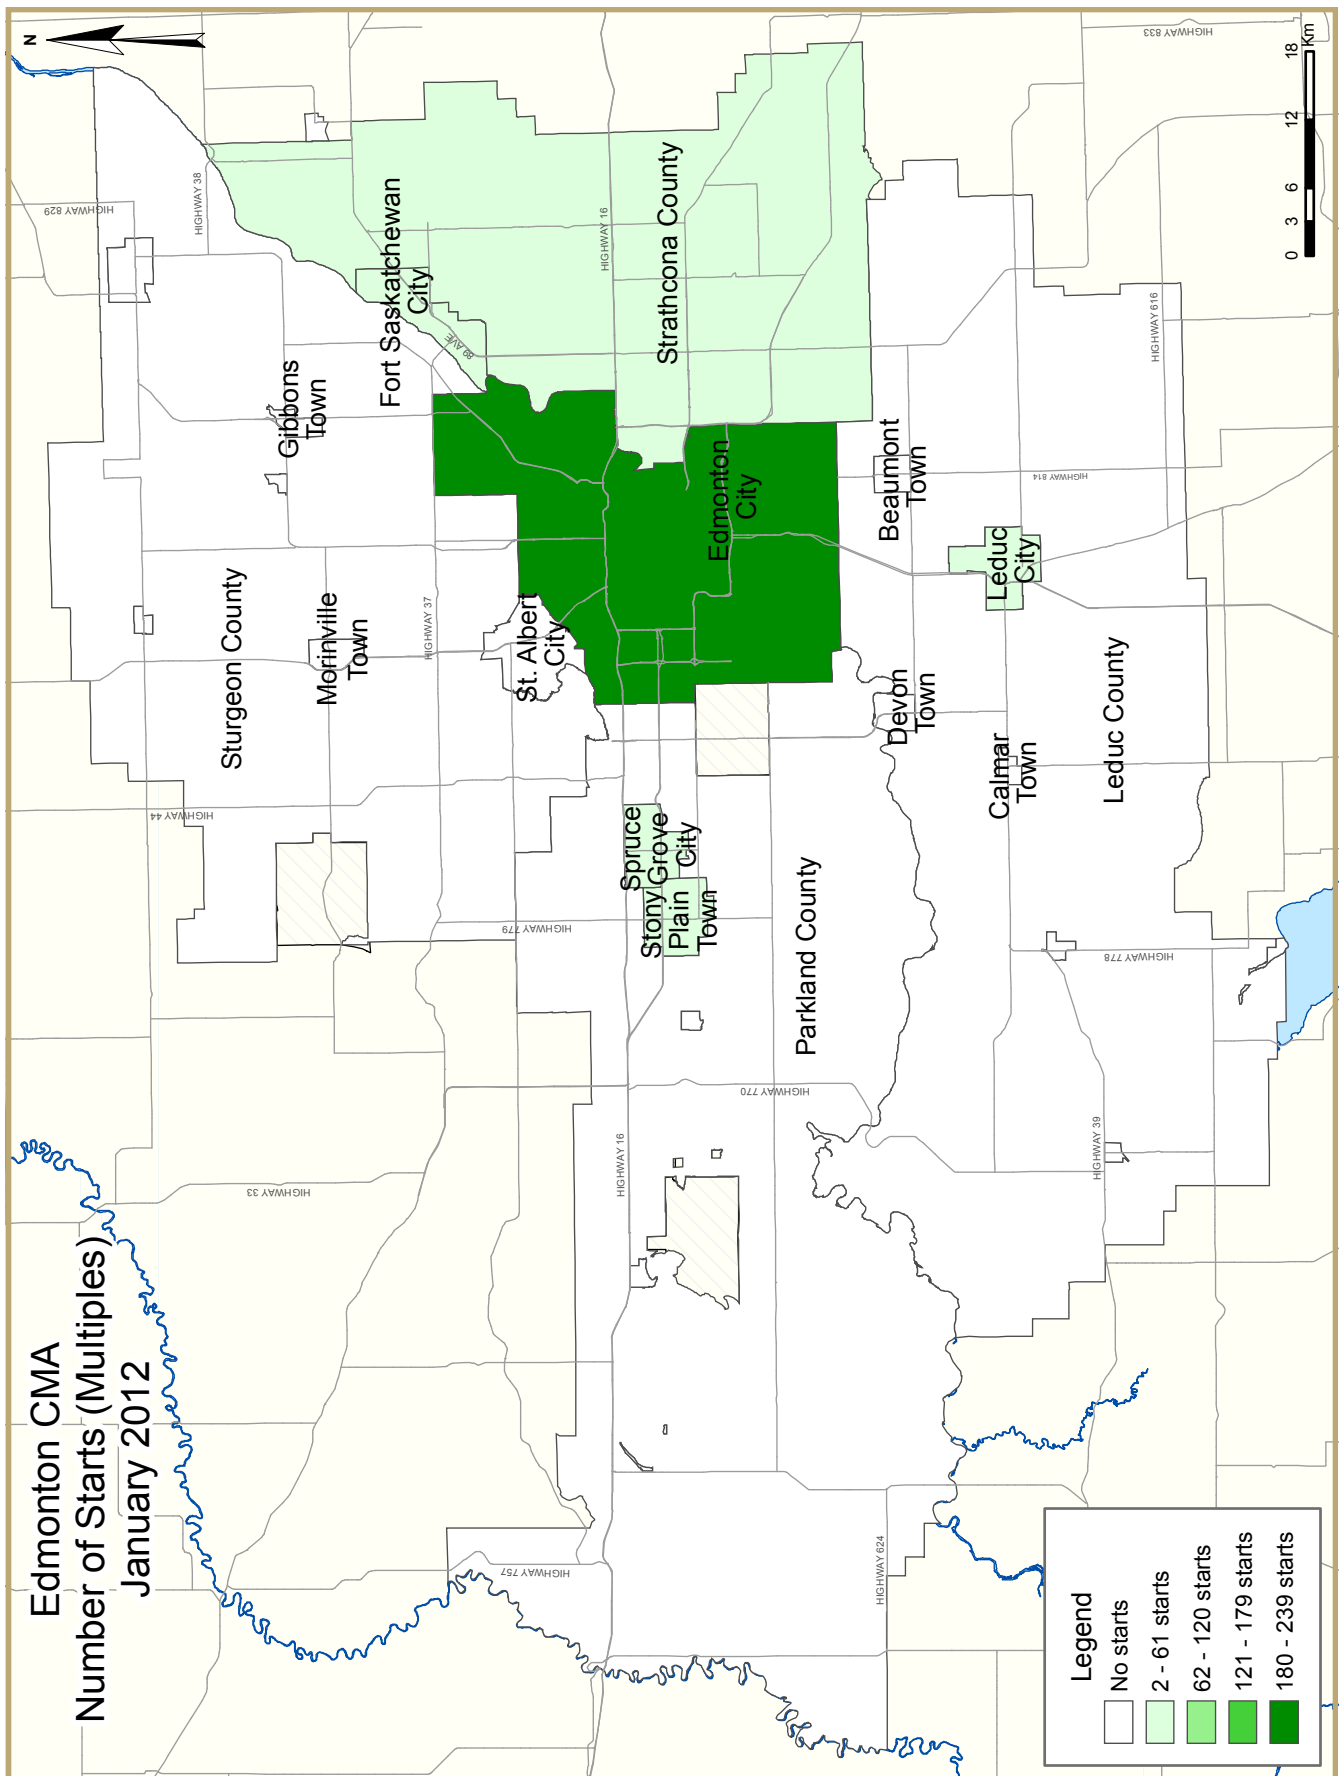

of semi-detached units, rows, and apartments, increased in February by 70 per cent year-over-year to 219 units. A strong gain in row (townhouse) starts more than offset a decline in apartment activity. Meanwhile, semi-detached starts rose by 29 per cent from last February to 126 units. All of February's multiple unit starts were destined for either the homeowner or condominium markets, with no rental starts reported. Over two-thirds of the region's multi-unit starts in February occurred inside Edmonton City, totalling 149 units. For the year-to-date, multi-family starts across the Edmonton CMA were up by 68 per cent to 483 units.

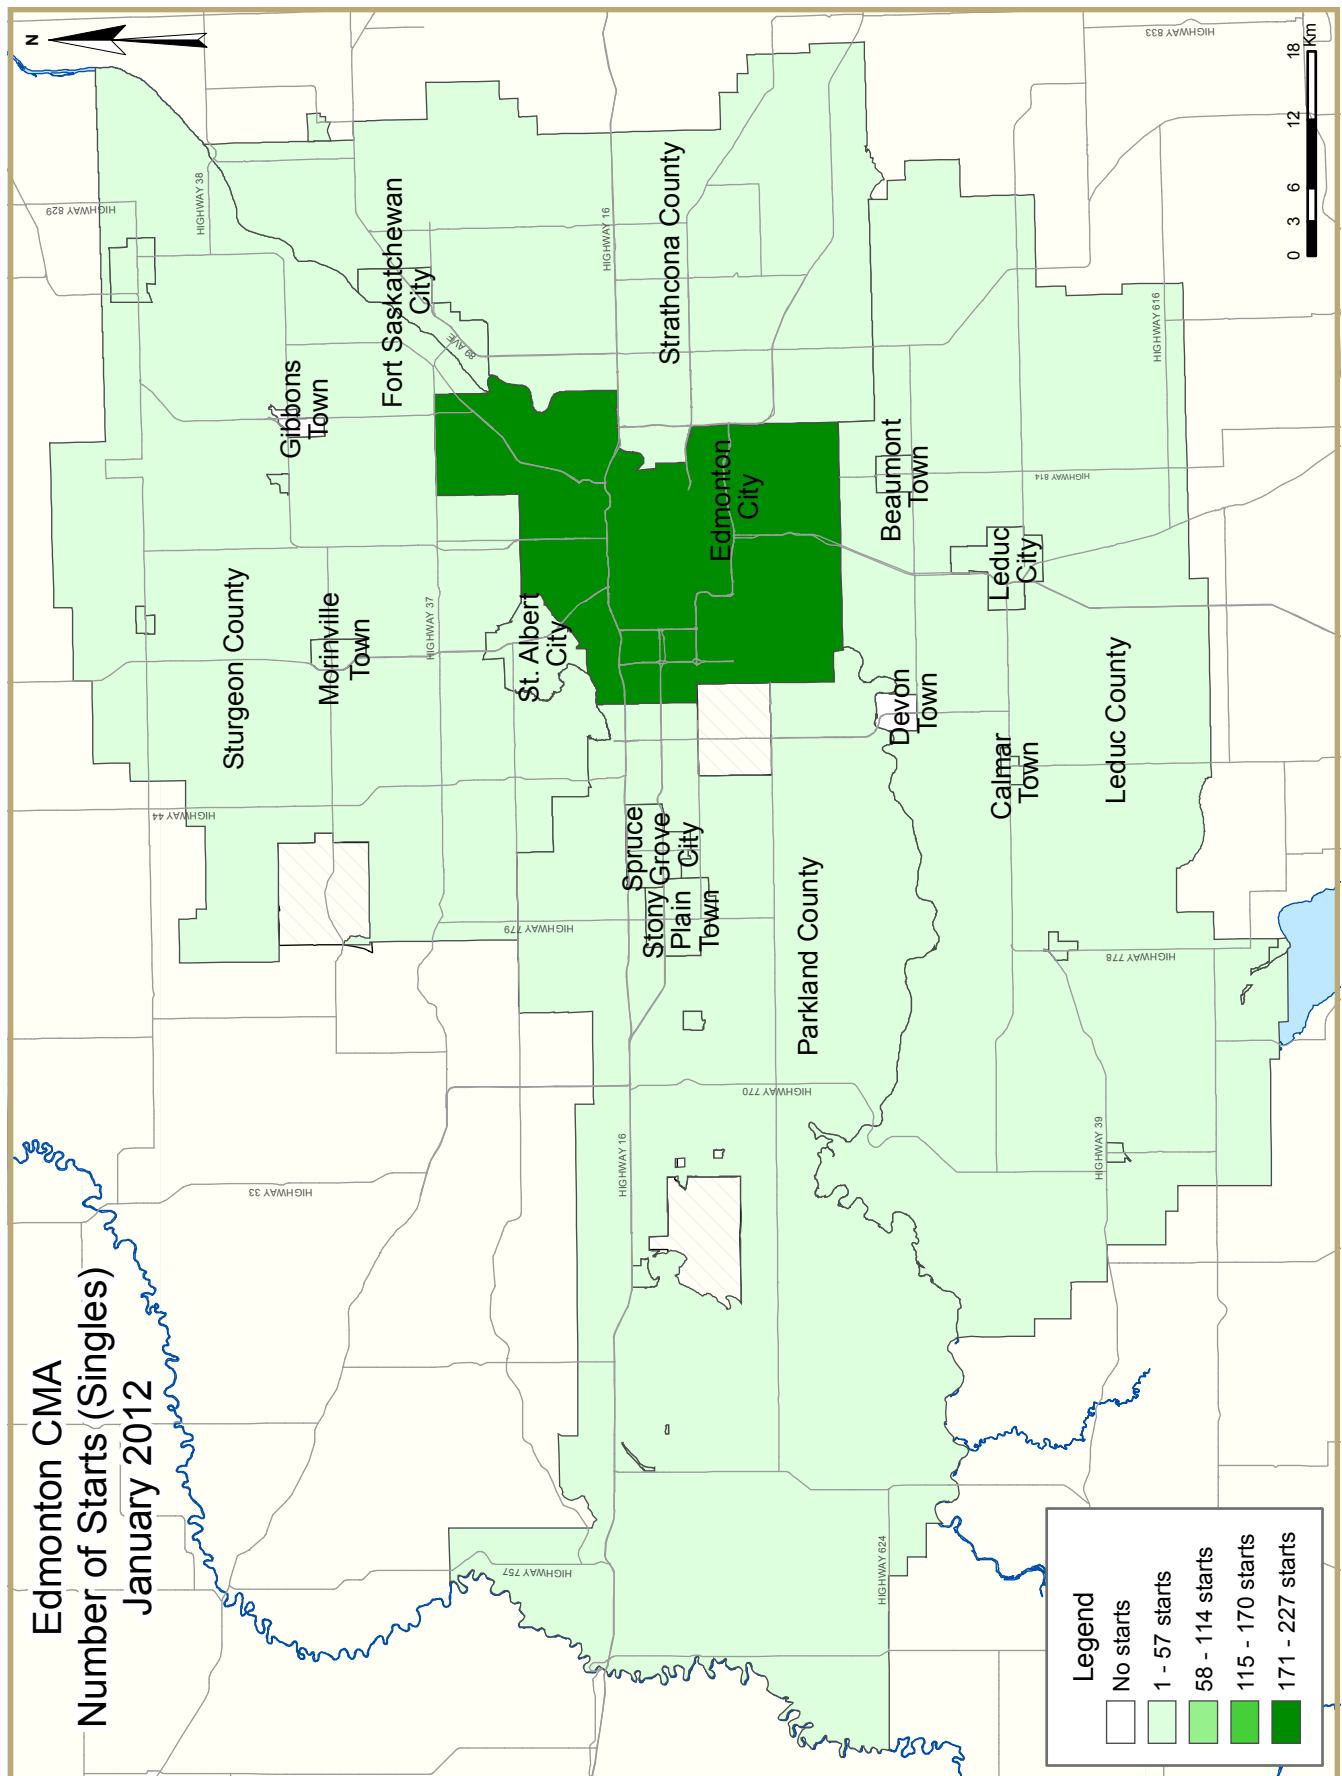

Multiple unit inventories across Greater Edmonton stood at 868 units in February, representing a 17 per cent decrease from the second month of last year and the lowest level since November 2010. However, units under construction were up 24 per cent year-over-year in February to 5,576 units. Total new multi-family supply, which includes unabsorbed inventory plus units under construction, stood at 6,444 units in February compared with 5,533 units a year prior. Multiple unit supply hit a cyclical peak of 6,860 units in October of last year and has been moving downward in the past four months.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
