### HOUSING MARKET INFORMATION

# HOUSING NOW Edmonton CMA

Date Released: August 2012

### **New Home Market**

# Edmonton housing starts increased in July

Total housing starts in the Edmonton Census Metropolitan Area (CMA) increased in July to 1,435 units, up 39 per cent from 1,034 starts in July 2011. From January to July 2012, housing starts totalled 6,903 units, up from the 5,085 units recorded in the

first seven months of 2011. Housing starts in Edmonton continue to be supported by employment growth and net migration. A strengthening resale market also contributed to the higher level of housing starts in July.

Single-detached housing starts in the Edmonton CMA increased 22 per cent in July to 582 units, up from 479 units a year earlier. Within the City of Edmonton, 341 single-detached units

were started, representing an increase from the 289 units that started in July 2011. Year-to-date, 3,177 single-detached units began construction in the CMA, up 17 per cent from 2,705 units during the same period in 2011.

There were 424 single-detached units completed in July, up from 420 units a year earlier. With the exception of May and July, monthly completions had declined on a year-over-year basis during the past 12 months. Absorptions of single-detached units also rose in July, increasing 14 per cent year-over-year to 447 units. The rise in absorptions compared to completions had pushed down inventories on both a month-over-month and year-overyear basis. There were 524 units of single-detached homes in inventory in July 2012, down nine per cent from the same month in 2011.

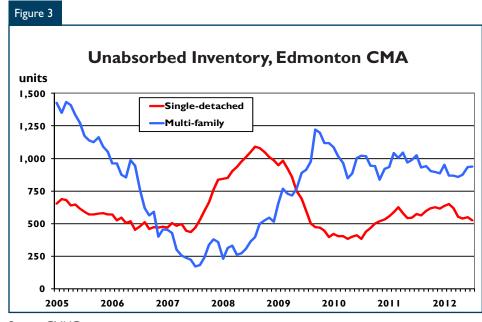

The average price of absorbed single-detached units in July declined five per cent year-over-year to \$528,152. The median price, on the other hand, showed little movement compared to last year's level and remained at \$481,000. The narrowing gap between

the average and median price is a result of fewer upper-end homes absorbed in July. Readers should note that absorbed prices reflect units absorbed at or after completion in a given month, which is not necessarily the month when the price was negotiated. By comparison, Statistics Canada's latest New House Price Index (NHPI) for Edmonton increased

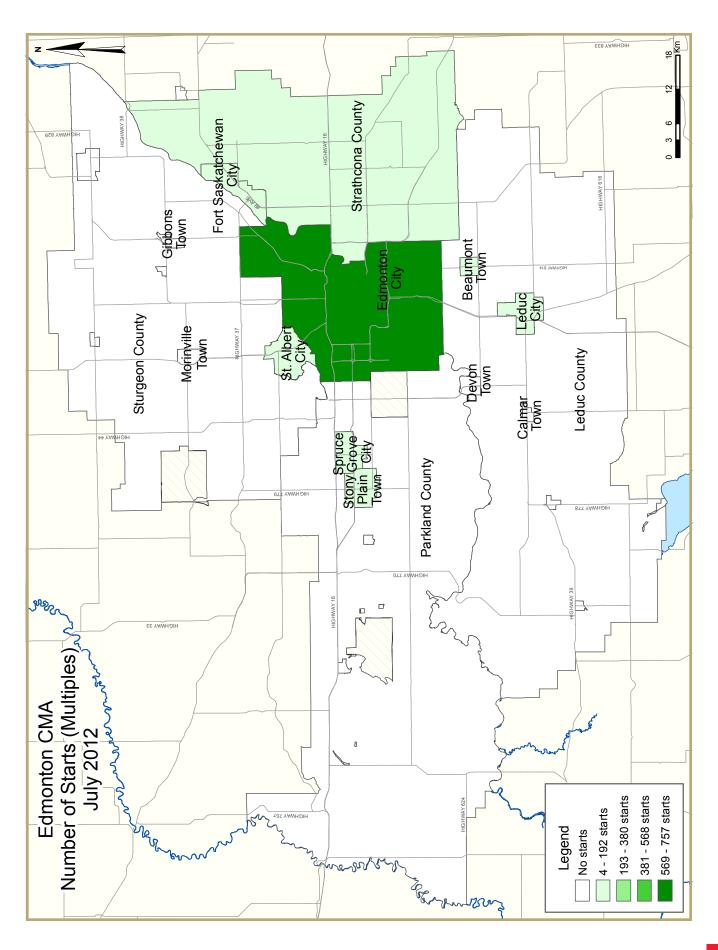

by 0.8 per cent in June 2012 relative to June 2011.

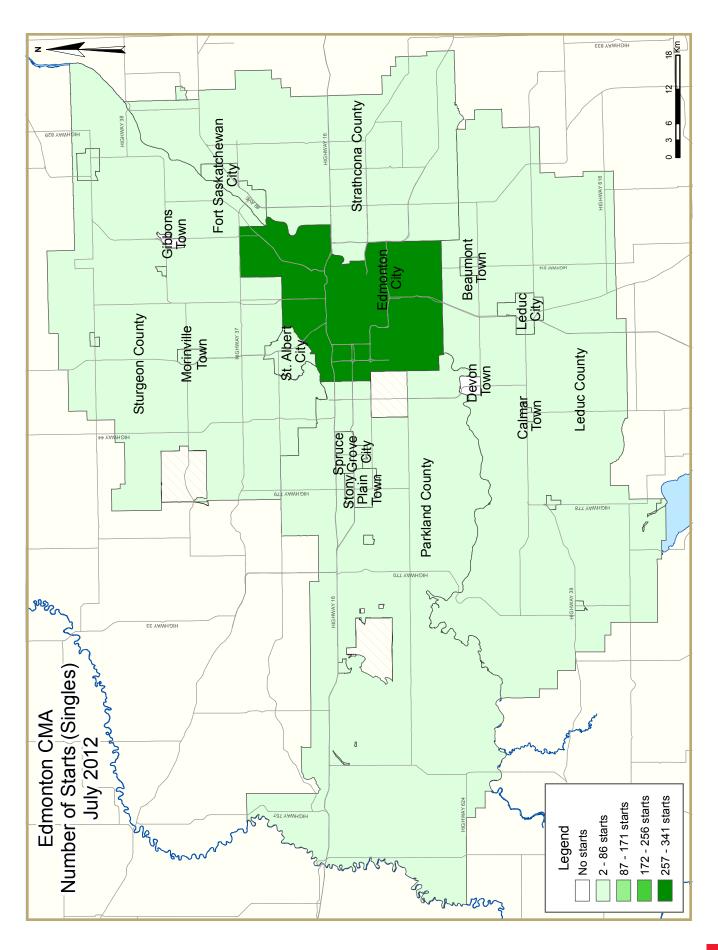

Multi-family starts, which consist of semi-detached units, rows, and apartments, totalled 853 units in July, compared to 555 units a year earlier. On a year-to-date basis, multi-family housing starts in the Edmonton CMA reached 3,726 units, compared to 2,380 units in the corresponding period in 2011. Row units reported the strongest year-over-year gain after seven months, though semi-detached and apartment starts also reported stronger performances.

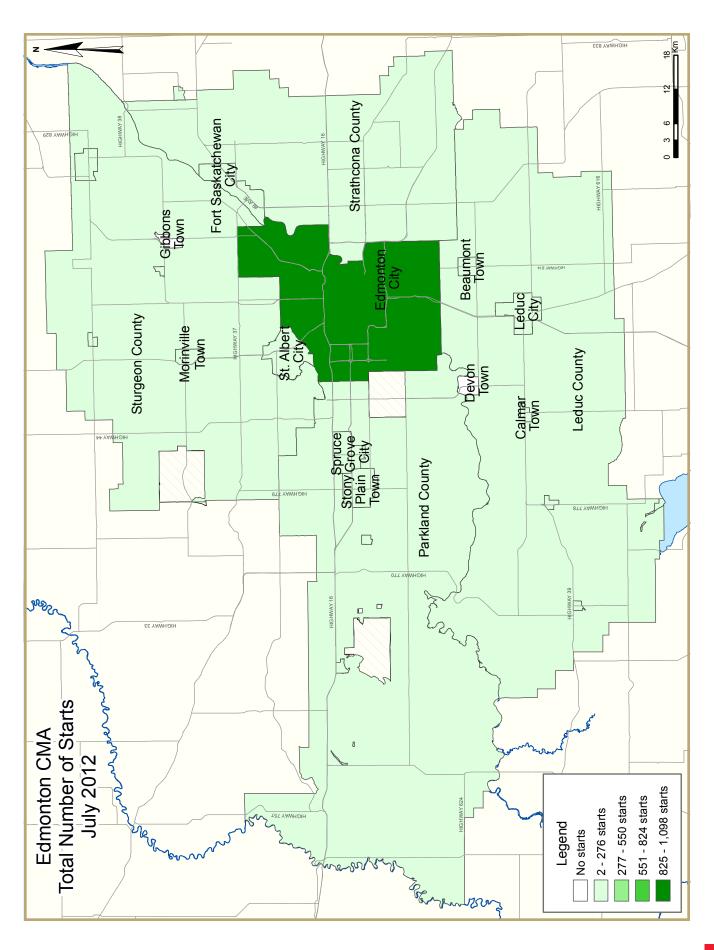

Completions of multi-family units totalled 491 in July, up 42 per cent from the same month in 2011. Absorptions were also higher at 418 units in July, compared to 302 units a year earlier. The number of multi-family units in inventory declined nine per cent year-over-year to 936 units. However, inventory levels may rise in the months ahead as the number of units under construction has increased 23 per cent from the previous year, reaching 6,826 units in July.

<sup>&</sup>quot;P & I" means Principal and Interest (assumes \$100,000 mortgage amortized over 25 years using current 5 year interest rate)

 $Source: CMHC, adapted from Statistics \ Canada \ (CANSIM), \ Statistics \ Canada \ (CANSIM)$ 

<sup>&</sup>quot;NHPI" means New Housing Price Index

<sup>&</sup>quot;CPI" means Consumer Price Index

<sup>&</sup>quot;SA" means Seasonally Adjusted

### **METHODOLOGY**

### **Starts & Completions Survey Methodology**

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### **Market Absorption Survey Methodology**

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "under construction" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

### **DWELLING TYPES:**

A "Single-Detached" dwelling (also referred to as "Single") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "Semi-Detached (Double)" dwelling (also referred to as "Semi") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "Row (Townhouse)" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "Apartment and other" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

### INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

### **GEOGRAPHICAL TERMS:**

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions.

### CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
