

# HOUSING NOW

## Montréal CMA

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: July 2012

### Montréal Metropolitan Area Housing Starts in June 2012

The results of the latest starts survey conducted by Canada Mortgage and Housing Corporation (CMHC) in June 2012 show that 1,599 dwellings were started in the Montréal census

metropolitan area (CMA), compared to 1,810 in June 2011.

With more and more choice on the resale market, buyers are not turning to the new home market as much to meet their housing needs. According to our forecasts, this should result in a moderate decrease in activity in all segments of the new home market this year.

Activity in the different market segments slowed down in relation to the same month last year. Condominium construction fell by 10 per cent but accounted for more than half of all housing starts enumerated in the area this past June. The freehold home segment, which includes single-detached, semi-detached and row houses, registered a 4-per-cent decrease in activity. Rental housing starts, for their part, declined by 52 per cent.

From a geographic standpoint, residential construction slowed down in most large sectors of the metropolitan area. The decreases observed on the Island of Montréal (-11 per cent) and in the South Crown (-27 per cent) were due in part to a drop in condominium starts. In the North Crown, the decline recorded (-9 per cent) resulted instead from decreases in single-detached home building and rental housing construction. Vaudreuil-Soulanges was the exception, as activity there rose by 33 per cent, thanks to increases in starts in the rental and freehold housing segments.

In the first half of 2012, total starts were down by 7 per cent from the corresponding period in 2011. Condominium construction partly made up for the declines registered in the other market segments. In fact, activity in this segment posted a gain of 8 per cent. In the freehold home segment, starts sustained decreases of 15 per cent for single-detached homes and 13 per cent for semi-detached and row houses. Lastly, rental housing activity was down by 36 per cent.

### Resale market: MLS® sales rise in the second quarter of 2012

According to data from the Quebec Federation of Real Estate Boards (QFREB), 13,350 MLS® sales were registered in the first quarter of 2012, for a gain of 10.3 per cent over the same period last year. The strongest increase was recorded in the single-family home segment where MLS® sales grew by 12.5 per cent. MLS® sales rose by 8 per cent for condominiums and 4.7 per cent for plexes.

The supply of resale units continued the upward trend that began more

than a year ago. In fact, active listings increased by 9.1 per cent thanks to the rise in new listings (+3.3 per cent). As was the case in the previous quarter, this rise was attributable to the condominium segment, where new listings grew by 12.7 per cent. Meanwhile new listings decreased by 7.1 per cent in the plex segment and remained relatively stable in the single-family home segment (-0.1 per cent).

Overall, these supply and demand trends resulted in market conditions remaining favourable to sellers, but close to balanced market territory. Condominiums were the only segment where market conditions were balanced.

Resale market prices climbed moderately in the second quarter. The average MLS® price reached \$328,694, for an increase of 3.4 per cent. Price increases were notable for plexes (+5.9 per cent), but more modest in the case of condominiums (+3.9 per cent) and single-family homes (+1.9 per cent).

## METHODOLOGY

### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

## DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

## INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

**Freehold:** A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

**Rental:** Dwelling constructed for rental purposes regardless of who finances the structure.

## GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
