Construction and/or acquisition of land, buildings and works

The following statement presents the total amount spent in 1994-95 and details for contracts of \$250,000 or over (\$25,000 or over for cost plus contracts). This information is displayed by program under each ministry. Such details include the name and location of the contractor, a brief description and location of the project, the amount of the contract, the current year's expenditures (i.e. cash payments and accrual charges) and the total expenditures to date. Amounts reported include both internal and external expenditures. Whereas external expenditures result from transactions between the Government and outside parties, internal expenditures result from transactions involving organizations that are part of the Government of Canada as a reporting entity. In the following statement:

- one asterisk { * } adjacent to amounts in the expenditures to date column indicates that amounts reported in the previous year's Public Accounts, relating to expenditures to date, have been amended in the current year;
- two asterisks { ** } adjacent to the name and location of contractor indicate that the contracts have been awarded through Public Works and Government Services;
- three asterisks { *** } adjacent to amounts in the amount of contract column indicate cost plus contracts; and,
- an (f) adjacent to amounts in the expenditures to date column indicates the contracts that have been completed in the current year.

Section 6 of Volume II (Part II) of the 1994-95 Public Accounts presents the total amount spent for the construction and/or acquisition of land, buildings and works, allocated by department and agency under each ministry.
