National Physician Database, 2010–2011

The National Physician Database (NPDB) provides information on the demographic characteristics of physicians and their level of activity within the Canadian medical care system. It is used by governments, professional associations, consulting firms, pharmaceutical companies, researchers and the media for medical human resource planning and utilization analysis.

For the first time, an average gross clinical payment per physician is presented based on both fee-for-service and alternative payments. Payments to physicians are also presented by average gross clinical payment per physician and average gross clinical payment per full-time-equivalent (FTE) physician, both based on fee-for-service payments. Aggregate-level clinical payments to physicians from sources other than fee-for-service are also presented. Service utilization is presented by looking at the number of services, dollar amounts and costs per service for services reimbursed by the provincial medical insurance plans on a fee-for-service basis.

Highlights

How much are physicians paid for services in Canada?

- In 2010–2011, total clinical payments to physicians increased 6.0% over the previous year to more than \$20 billion. This was a smaller increase than in the previous two years (9.7% and 7.9%).
- An average gross clinical payment per physician using both fee-for-service and alternative payments combined is presented for the first time; five years of data are shown. The average gross clinical payment per physician in 2010–2011 was more than \$307,000, an increase of 3.1% over the previous year. This was the smallest year-over-year increase for the five years presented.
- In 2010–2011, the average gross clinical payment per physician ranged from \$236,000 in Prince Edward Island and \$250,000 in Nova Scotia to \$340,000 in Ontario and \$350,000 in Alberta.
- Alternative clinical payments to physicians as a proportion of total clinical payments continued to grow. In 2010–2011, the proportion rose 0.7 percentage points to 27.4% of total clinical payments. The proportion has grown 16.8 percentage points since 1999–2000, when it was 10.6%. Fee-for-service payments accounted for 72.6% of total clinical payments in 2010–2011.
- In 2010–2011, the proportion of payments made through alternative clinical payment programs varied considerably across jurisdictions, ranging from 14.8% in Alberta to 46.6% in Nova Scotia and 93.8% in the Northwest Territories.

Are there differences in workload patterns by type of physician?

- Of the 64,893 physicians across the 10 provinces in 2010ⁱ (excluding imaging and laboratory specialists), 63,259 billed for at least one fee-for-service clinical payment in 2010–2011. Based on fee-for-service payments only, there were 45,376 FTE physicians (excluding anesthesia specialists).
- Of the 63,259 physicians who billed fee-for-service, 14,694 (23%) billed for less than \$60,000. There were 9,477 (28%) family medicine physicians and 5,217 (18%) specialists who billed for less than \$60,000.

What is the makeup of physician fee-for-service utilization in Canada?

- In 2010–2011, total fee-for-service payments to physicians were approximately \$13.2 billion; approximately 245.3 million standardized services were delivered (excluding reciprocal billing, imaging and laboratory services, anesthesia services and anesthesiologists). Service counts were standardized for interprovincial comparability.
- Consultations and visits made up two-thirds (66.8%) of total fee-for-service payments to physicians, and services delivered for consultations and visits represented just less than three-quarters (73.8%) of total services provided in 2010–2011.
- In 2010–2011, the average cost per service paid to physicians was \$53.95.
 - Family physicians billed an average cost per service of \$39.85, while specialists received an average of \$74.17 per service.

1 Methodological Notes

1.1 Background

The National Physician Database (NPDB) was established in 1987 by the deputy ministers of health and in 1995 transferred to the Canadian Institute for Health Information (CIHI). CIHI is guided by the Advisory Group on Physician Databases on data quality, methodology and product development.

1.2 Data Sources and Collection

Data

NPDB data is derived from physicians' billings, including fee codes, which provincial and territorial medicare programs submit. Claims data and associated physician and patient demographic data are submitted in five separate files, usually within six months of the end of the quarter. Files that do not conform to standards defined in the *NPDB Data Submission Specifications Manual* are returned to the provinces and territories to be corrected and resubmitted.

CIHI gathers alternative payment information from a variety of sources, including provincial and territorial representatives on the advisory group. Missing alternative payment data for Ontario for 2001–2002 and Manitoba for 2001–2002 to 2003–2004 was estimated using the National Health Expenditure Database (NHEX). For more information on national health expenditures please see the report *National Health Expenditure Trends, 1975 to 2012*, released in October 2012.

A complete description of NPDB record layouts is available in the *NPDB Data Submission Specifications Manual*, at www.cihi.ca. For further information on the NPDB, contact the program lead, NPDB, CIHI.

Type of Data

There are two fee-for-service data categories: billing data and payment data. Billing data reflects the full amount the physician billed the province for a particular fee-code item. Payment data is what was actually paid to the physician. The two can vary as the billed amount is adjusted for billing thresholds, income capping or clawbacks. All jurisdictions, except Quebec, submit payment data.

All jurisdictions, except Nunavut, provide aggregate alternative payment data. All jurisdictions except Alberta, Yukon and Nunavut provide alternative payment data at the physician specialty level.

Population Data

The Canadian population figures used are compiled by the Demography Division of Statistics Canada, which also prepares estimates of the covered population used with the NPDB data. The covered population consists of people who are eligible for medical services paid for by provincial and territorial medicare programs and is the total population less members of the Canadian Forces and the Royal Canadian Mounted Police and inmates in federal and provincial prisons, whose medical services are covered by a federal medical insurance program. Estimates are for October 1 in the fiscal year and are revised annually. See Appendix A for net population data.

1.3 Data Quality

Error/Validation Routines

NPDB files are derived from provincial and territorial administrative systems. The data is checked by the jurisdiction before the NPDB files are submitted. Because CIHI has no control over the checks, all the files are processed through the NPDB error/validation routines. These are limited in scope because the data cannot be confirmed against the source, but they include reviewing total record counts, service counts and dollar amounts for each file, checking each value in the fields against acceptable values, checking for invalid fee codes, checking for unique physician identifier (UPI) numbers in illogical formats and logical review of the processed data. Time trending on service counts, dollar amounts and record counts is another method used to highlight potential issues with data quality. Any data that does not pass the error/validation routines is returned for correction and resubmission.

The provinces and territories are invited to review their own data for validity and consistency before publication. This data release was authorized by most provincial and territorial medical insurance plan officials.

1.4 Data Definitions

Unique Physician Identifier (UPI)

To preserve anonymity, data providers submit an encrypted physician identifier that is unique to a physician.

Province or Territory of Practice

Province or territory of practice is the place of registration and the source of the physician's medicare payments. Some physicians practise in more than one jurisdiction in a given year because they move or work in more than one province (such as a physician who works near a provincial border). These physicians are captured in multiple jurisdictions and only once in the national counts.

Specialty

Physician specialty designations are assigned by the provinces and territories; the NPDB groups them with their national equivalents. Although there are two ways of defining specialties—by latest certification and by payment plan specialty—CIHI uses the latter for this report.

Internal medicine includes subspecialties such as cardiology, gastroenterology, hematology, rheumatology and medical oncology. Psychiatry includes neuropsychiatry. Neurology includes electro-encephalogram (EEG) specialists, and physical medicine includes specialists in electromyography. Physicians in the double specialty of ophthalmology/otolaryngology are included with ophthalmologists.

There are variations in how jurisdictions group certain specialists for reporting:

- Nova Scotia, Quebec and British Columbia report data for public health specialists with family medicine.
- In Newfoundland and Labrador, New Brunswick, Saskatchewan and British Columbia, non-certified specialists are reported under their respective non-certified specialties.
All other jurisdictions count them with family medicine.

For a complete listing of the specialty designations and their groupings, please see Appendix B.

Physician Full-Time Equivalent

Full-time equivalent (FTE) is the measure used to estimate whether a physician is working full time. It is a weighted count, based on total fee-for-service payments received.

A physician's FTE value is calculated using his or her total payments in relation to upper and lower payment benchmarks for that specialty in that jurisdiction:

$$FTE_i = \begin{cases} \frac{\text{total payments}_i}{\text{lower benchmark}_j} & \text{If physician } i \text{ earns less than the} \\ & \text{lower benchmark value } j \\ 1 & \text{If physician } i \text{ earns an amount} \\ & \text{equal to or within the} \\ & \text{benchmark values} \\ 1 + \ln(\frac{\text{total payments}_i}{\text{upper benchmark}_j}) & \text{If physician } i \text{ earns more than} \\ & \text{the upper benchmark value } j \end{cases}$$

Where

- FTE_i is the FTE value assigned to the i th physician;
- Total payments_i is the sum of all payments made to the i th physician;
- Lower benchmark_j is the lower benchmark value set for the j th physician specialty group within the province or territory of practice of the i th physician; and
- Upper benchmark_j is the upper benchmark value set for the j th physician specialty group within the province or territory of practice of the i th physician.

Appendix C explains the measurement of FTE physicians, including historical measures.

Average Gross Payment per Physician

Average payment calculations are gross payments to physicians. They do not represent physicians' net incomes (gross payments less practice costs and other deductions).

Clinical Alternative Payment Programs

Alternative payment programs are arrangements to pay physicians directly by methods other than fee-for-service. Classifications vary across jurisdictions. Below are the different alternative payment program classifications. For province-/territory-specific definitions see Appendix D.

Salary: A compensation method by which physicians are paid based on annual scales, either part time or full time. The deduction of income tax at source and fringe benefits such as vacation are distinguishing features.

Sessional: Payments on an hourly or daily basis (set span of time). Used by some jurisdictions to fund services such as, but not limited to, hospital emergency departments, psychiatry clinics and clinics in rural areas.

Capitation: A model of compensation in which physician practices are paid a fixed sum of money for each patient rostered with the practice. Payment rates may be adjusted based on the age/sex status of registered enrollees. Capitation may fund a range of services, including prevention and medical care.

Block funding: Funding to practice plans or groups in which physicians have a range of responsibilities that usually span clinical service, teaching, research and administration.

Contract: Provides negotiated funding for physicians providing defined services to a defined population; the compensation arrangement usually specifies services to be provided or time commitments.

Blended: Mainly these are instances where physicians are compensated through fee-for-service along with some other form of remuneration. Province-specific variations exist.

Psychiatry: Some jurisdictions pay for psychiatric services by salary, sessional or contract payments.

Northern and under-serviced areas: Compensation for the provision of clinical services in rural or remote settings. Allowances may be paid as fee-for-service premiums over normal fees or as flat rate amounts paid periodically.

Emergency and on call: Programs provide amounts of funding to groups of physicians who agree to provide on-call services to hospitals.

Non-Clinical Payments

Rural incentives: Payments in addition to earnings for clinical work to encourage physicians to work in under-serviced areas and locum programs. They include moving expenses, recruitment or retention bonuses and so on.

Hospital-based physicians: Regions and hospitals may pay some physicians part or all of their earnings by salary; they include imaging specialists, pathologists, clinical chiefs of staff, medical health officers and those working in cancer and tuberculosis programs in some jurisdictions.

Benefits: Provinces and territories contribute to the costs of liability insurance and continuing medical education. Some also pay for disability insurance, contributions to retirement funds or maternity benefits.

National Grouping System Counts

The National Grouping System (NGS) service counts and dollar amounts are created with data from the utilization file, which contains payments for fee-for-service claims by physicians, laboratories and diagnostic facilities as well as services received by people out of province or territory not processed through the reciprocal billing system—usually they are abroad or not covered by reciprocal billing.

Strata

Because all the medicare plans evolved separately in Canada, CIHI has to make adjustments to the data it receives to allow for comparisons across jurisdictions. Fees for services are paid according to payment schedules (or schedules of medical benefits), which set the amounts paid for each service. The schedules are different in every jurisdiction, because different fees have

been negotiated, and each has its own terminology and ways of organizing the information. To allow for all the variations, CIHI groups the data into 120 categories of service. Data in 16 categories that pertains to imaging and laboratory services is not included (it is included in the reciprocal billing data). There is a complete list of CIHI's NGS categories in Appendix E.

Reciprocal Billing Data

Reciprocal billing—payment for out-of-province or out-of-territory services, billed through a special provincial/territorial agreement—accounts for less than 1% of total fee-for-service payments and less than 1% of total services.

1.5 Computations

Age

The age of physicians receiving fee-for-service payments is calculated as of the end of the fiscal year, March 31, 2011.

Counts

All provincial counts are based on the number of physicians receiving payments from each provincial medical care plan. Totals are the sum of the provincial numbers, except in the case of the average gross payment per physician for physicians earning at least \$60,000. For this indicator physicians are not double-counted in total because physician counts are not based on province or territory of practice.

Specialty

Two different specialty calculations are used in the associated data series.

1. Multiple specialties within the jurisdiction: If a jurisdiction reported more than one plan payment specialty for a physician during the year, the NPDB reports on the specialty with the most payments.
2. Multiple specialties within Canada: If a physician works in more than one province under different payment plan specialties, his or her reported specialty for Canada would be the one with the most payments. This calculation applies only to the average gross payment per physician who received at least \$60,000 in payments data series.

Average Gross Payment

Three different average payment calculations are produced from the NPDB: average gross clinical payment per physician; average gross fee-for-service payment per physician who received at least \$60,000 in fee-for-service payments; and average gross fee-for-service payment per FTE.

Average gross clinical payment per physician

Average gross clinical payment amounts are reported at the provincial level. Average gross payment amounts are calculated as the sum of all gross payments (fee-for-service and alternative payments) made to physicians divided by the total number of physicians reported to CIHI by the jurisdictions less the number of imaging and laboratory specialists. This was done, where needed and/or possible, to ensure that the count of physicians used in the calculation contributed to the money in the numerator, which excludes imaging and laboratory specialists. Three methodologies were used to identify imaging and laboratory specialists, depending on the level of detail in the data submitted:

1. For jurisdictions that provided *physician-level APP* data that was used to calculate the aggregate figure in Table A.1.3 (Newfoundland and Labrador and P.E.I.), CIHI was able to identify the imaging and laboratory specialists and remove both their payments and head counts from the calculation.
2. For jurisdictions that provided *aggregate-level APP* data by specialty (payments and head counts) (New Brunswick, Quebec, Ontario and Manitoba), CIHI was able to remove (if needed) the imaging and laboratory specialists' information.
3. For jurisdictions that provided only *aggregate-level APP data without specialty detail* (Nova Scotia, Saskatchewan, Alberta and B.C.), CIHI adjusted the reported head count (if needed) using the number of imaging and laboratory specialists found in these provinces' fee-for-service data.

For national-level calculations, the sum of payments is divided by the sum of the estimated number of physicians. This approach may result in physicians being counted more than once if they practise in more than one province.

Average gross fee-for-service payment per physician who received at least \$60,000 in payments

Average payment amounts are reported by medical specialty group for each province. Average gross fee-for-service payment amounts are calculated as the sum of all gross fee-for-service payments made to physicians who received at least \$60,000, divided by the number of physicians who received at least \$60,000.

For national-level calculations, physicians paid under more than one specialty designation, possibly in multiple provinces, are assigned to the specialty in which most of their payments were made and counted only once.

Average gross fee-for-service payment per FTE physician

Average payment amounts are reported by medical specialty group for each province. Average gross fee-for-service payments per FTE are the sum of all gross fee-for-service payments made to physicians divided by the sum of all physician FTE values.

Physicians paid by more than one jurisdiction are included in the average payment calculations for each. To calculate national-level average gross fee-for-service payment per FTE, payments are summed for each physician who works in multiple jurisdictions. For example, a physician who earns \$50,000 in one province and \$50,000 in another will be included in the average payment calculations for each. He or she will contribute \$50,000 to the numerator of each provincial equation and his or her province-specific FTE value to the denominator. For national-level calculations, this doctor would contribute \$100,000 to the numerator and the sum of his or her province-specific FTE values to the denominator.

Adjustments

Differences among provincial and territorial fee schedules and assessment rules make it difficult to calculate comparisons between jurisdictions. In general, the data tends to be less comparable for visit services than for well-established and distinct surgical procedures. To compensate, CIHI adjusts service counts for certain procedures, visits and diagnostic/therapeutic procedures to improve the comparability of the data. Appendix F gives a complete list of adjustments.

1.6 Data Limitations

Data Exclusions

Medical services covered by third parties, such as hospital insurance and workers' compensation plans, are not included in this report. As well, members of the Canadian Forces and the RCMP and inmates of federal and provincial prisons (less than half of one percent of the population) are covered under other programs.

Certain payments made directly by patients are also omitted, for example, amounts extra-billed or balance-billed by physicians for cosmetic surgery.

Because of concerns with comparability among jurisdictions, all anesthesia data is excluded from service counts and cost-per-service indicators, and anesthesiologists are excluded from FTE indicators, which are calculated in part using service counts.

Negative Numbers

Because of adjustments or corrections applied by the provinces or territories, data submitted to the NPDB may contain negative payment values. CIHI includes both negative and positive payment amounts when calculating average gross payments, but if a physician's total billings sum to a negative number, they are excluded.

Gross and Net Payments

Because overhead expenses vary across jurisdictions and specialties and are not clearly reported, CIHI does not adjust payment figures to account for them. All average payment figures are based on gross payments.

Average Gross Clinical Payments

The average payment is based on a head count. Each physician receiving clinical payments was counted equally regardless of level of activity (that is, full time or less than full time).

Specialty Designations

Provinces and territories are requested to provide two types of specialty information: latest acquired certified specialty and payment-plan specialty. The former must be designated by the Royal College of Physicians and Surgeons of Canada, the Collège des médecins du Québec or the College of Family Physicians of Canada.

The payment-plan specialty may be different, because it shows the area in which the physician was paid for his or her services. Latest certified specialty is not provided by all provinces and territories.

CIHI FTE physician statistics and average gross payment per physician statistics may vary from provincial and territorial annual statistics because of differences in the way specialties are grouped. Appendix B gives CIHI specialty groupings.

Imaging and Laboratory Physicians

Radiologists and pathologists along with other imaging and laboratory physicians are excluded from most of the NPDB data tables to improve interprovincial comparability, although payments for imaging and laboratory services performed by physicians who are not specialists in those areas are included. Medicare fee payments to radiologists or pathologists are nil or very small in the four Atlantic provinces, relatively small in Quebec, but substantial in other jurisdictions. See Appendix G for information on the extent of fee-for-service payments for imaging and laboratory services that are included in the NPDB data files but excluded from NPDB data tables. Radiologists and pathologists are included in reciprocal billing data. Payments to radiologists and pathologists may be included in alternative clinical payments.

Insured and De-Insured or De-Listed Services

All provinces and territories across Canada insure core medically necessary services through provincial/territorial medical care plans, as guided by the *Canada Health Act*. However, some services that are covered in one province or territory may not necessarily be covered in all of them. Each jurisdiction has an independent schedule of medical benefits that outlines what services are insured (or not insured) within that specific jurisdiction.

From time to time, provinces and territories stop covering a service they once did, described as de-insuring, or reassign a certain service to another fee code, described as de-listing. These services may differ across jurisdictions or from year to year and may explain some minor fluctuations over years or minor differences between jurisdictions.

Beginning in 2010–2011, the province of Quebec covers the cost of in vitro fertilization (IVF) services under certain circumstances (please see Quebec's schedule of medical benefits for details). To maintain comparability of service groupings in the NGS, all services and payments for IVF in Quebec have been allocated to the NGS category “Miscellaneous Services—Other Identified.”

For further information on de-insured and de-listed services please contact the program lead, NPDB, CIHI.

1.7 Privacy and Confidentiality

CIHI employs a variety of safeguards to protect the privacy and confidentiality of physician data.

Unique Physician Identifier (UPI)

CIHI uses encrypted physician identifiers created by data suppliers to protect the privacy and confidentiality of physicians. They allow tracking of physicians throughout their careers in Canada while maintaining anonymity.

Data Suppression

CIHI suppresses data where there are four or fewer members of a medical specialty group in a jurisdiction. Suppressed data is excluded from both FTE and head counts by jurisdiction and in total. CIHI also suppresses data if the selection criterion (that is, physicians with earnings greater than \$60,000) produces a physician group between one and four. Some physicians who work in more than one place may have their information suppressed in one jurisdiction (where physician counts are low) but not in another. If a physician works in multiple jurisdictions and has payments included in the average payment results for at least one of them, all the payments are included in the total of average gross payment of at least \$60,000.

CIHI is committed to protecting confidential health information. Although the level of aggregation in this report prevents identification of single individuals in large jurisdictions, such as Ontario or B.C., it might be possible in some smaller jurisdictions, such as Prince Edward Island. To ensure patient anonymity, cell counts with one to four services are suppressed. To do this, CIHI examined the service count summaries and excluded very low-volume services from provincial and territorial data columns and from aggregate-level row and column totals to avoid identification of individuals through subtraction or other methods of imputation.

The asterisk symbol (*) is used within data tables to identify cells where information was suppressed as a result of the methodology described above and is explained with a footnote to each table:

* Service value was between 1 and 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

Please note that in some cases the * symbol may appear in the “total” column even though the service count is greater than four. This occurs when rows contain only zeros and * symbols. For example, if in one row all provinces and territories reported they had done three of a particular service, the unsuppressed total service count would be 33, but CIHI suppresses the totals as well to avoid revealing the underlying numbers.

CIHI applies the same standards to avoid disclosure when it releases data through ad hoc queries and special analytical studies.

NPDB Data Access/Release Policy

The Privacy and Legal Services Secretariat at CIHI developed a set of guidelines to safeguard the privacy and confidentiality of data received by CIHI. The document *Privacy Policy on the Collection, Use, Disclosure and Retention of Health Workforce Personal Information and De-Identified Data, 2011*, may be obtained from the CIHI website (www.cihi.ca).

Notes

— Data was not applicable for a given category.

NR: not reported.

Blank cells for Yukon, the Northwest Territories and Nunavut indicate years when data was not submitted. Columns may not add to total due to rounding.

Total clinical payments are the total sum of the physicians' clinical payments from fee-for-service and alternative payments.

Fee-for-service payments are based on data submitted to the National Physician Database, with the exception of the Northwest Territories for 2003–2004 to 2010–2011, Yukon for 2007–2008, Newfoundland and Labrador for 2010–2011, and Prince Edward Island for 2008–2009 to 2010–2011, which submitted fee-for-service information with alternative clinical payment data collection. Alternative clinical payment information is gathered through provincial and territorial ministries of health, with the exception of Ontario for 2001–2002 and Manitoba for 2001–2002 to 2003–2004. CIHI's National Health Expenditure Database was used as a source of estimates in those instances.

Notes

--- Data was not applicable for a given category.

n/a: not applicable.

NR: not reported.

Blank cells for Yukon, the Northwest Territories and Nunavut indicate years when data was not submitted. Columns may not add to total due to rounding.

Total clinical payments are the total sum of the physicians' clinical payments from fee-for-service and alternative payments. Fee-for-service payments are based on data submitted to the National Physician Database, with the exception of Island for 2008–2009 to 2010–2011, which submitted fee-for-service information with alternative clinical payment data collection. Alternative clinical payment information is gathered through provincial and territorial ministries of health, with the exception of Ontario for 2001–2002 and Manitoba for 2001–2002 to 2003–2004. CIHI's National Health Expenditure Database was used as a source of estimates in those instances.

Notes

— Data was not applicable for a given category.
 Imaging and laboratory specialists are not included.

The above indicator is the sum of each province's expenditure for clinical payments to physicians divided by the total number of physicians as reported by each province, less imaging and laboratory specialists.
 Each physician receiving clinical payments was counted equally regardless of the amount of money they received or their level of activity (e.g. full time, part time, or casual).
 Based on gross payments.

Notes

* Data was suppressed—please see the Methodological Notes, Data Suppression section, for details.
† Column does not add up to total as B.C. Rural Retention Program payments were included (\$68.1 million in 2010–2011). This information was not provided at the specialty level.

APP: alternative physician payments.

% Clin.: percentage that alternative payment programs are of total physician clinical payments.

n/a: not available.

NR: not reported.

Radiology and laboratory specialists are not included in this table.

Nova Scotia may contain retroactive fee-for-service payments.

B.C. contract payments (\$220.1 million in 2010–2011) are assigned to a specialty based on the nature of the majority of the services in the contract, not the specialty of the practitioner(s) performing the work.

Fee-for-service payments data was not available for the Northwest Territories, and alternative payment data may include rural incentives.

Notes

† Payments are counted as fee-for-service because they were reported as fee-for-service in their provincial NPDB data submissions.
 n/a: not available/applicable.

NR: not reported.

Data reported in this table may include payments to radiology and laboratory specialists in New Brunswick, Ontario, Saskatchewan, Alberta and British Columbia.

Only the daily payments portion is shown in the above table.

Contract/Unspecified includes

i. Service agreements in British Columbia

ii. Payments that were not broken down by program

Data was not available for Nunavut.

Nova Scotia may contain retroactive fee-for-service payments.

Northwest Territories data may include rural incentives.

Notes

n/a: not available.

NR: not reported.

The number of physicians paid through alternative modes refers to physicians who received any clinical payments other than fee-for-service.

The number of physicians paid mainly through alternative modes refers to physicians who received at least 50% of their income through alternative modes of payment.

The number of physicians reported usually reflects the total number of physicians registered with provincial/territorial medicare plans and may exceed the number actually paid.

The number of physicians in Newfoundland and Labrador, Prince Edward Island and New Brunswick excludes radiology and laboratory specialists.

The number of physicians paid through alternative modes may double-count physicians in some jurisdictions who participate in more than one form of alternative payment.

The number of physicians who received 50% or more of income through alternative modes was not reported by some provinces.

Primary health care blended model physicians in Ontario were included in the number of physicians paid through alternative modes.

Data was not available for Nunavut.

Notes

FFS: fee-for-service.

% Clin.: percentage that fee-for-service payments are of total physician clinical payments.

n/a: not applicable—unable to perform calculation because alternative payments were not provided at this level of detail.

Radiology and pathology specialties were excluded.

Notes

Due to the variation in the role that fee-for-service payment plays in physician compensation across jurisdictions, comparisons across jurisdictions of the NPDB indicators should be made with caution.

Anesthesia specialists are excluded.

Unknown gender values are included in the total columns.

Base year 2000–2001 adjusted to fiscal year 2010–2011.

Based on gross payments.

Fee-for-service payments only. Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Data was suppressed—please see the Methodological Notes, Data Suppression section, for details.

n/a: not applicable—there were no physicians for this specialty for this province.

Due to the variation in the proportion that fee-for-service payment is of total physician compensation in each jurisdiction, comparisons across jurisdictions and specialties should be made with caution. See Table A.3 to better understand the variations.

Based on gross payments.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitalization, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement. Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capital, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement. Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitalization, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement. Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitalization, are not included.

Notes

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitalization, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitalization, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitalization, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitalization, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.
 ** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes												5,760,013,670

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement. Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement. Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.
 ** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.
 Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.
** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.
Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Based on gross direct payments. Reciprocal billing payments are not included.

Alternative forms of reimbursement, such as salary and capitation, are not included.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

n/a: not applicable—there were no physician payments reported for this type of service for this jurisdiction.

NR: not reported.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Totals include nine provinces. Yukon, the Northwest Territories, Nunavut and Quebec did not submit data to CIHI.

Notes

* Service value was from 1 to 4 for this cell. Data was suppressed within the cell and is not included in aggregate-level row and column totals.

** Anesthesia services and anesthesia specialists are excluded.

Payment amounts for Newfoundland and Labrador do not include increases that were outlined in the 2009–2013 Memorandum of Agreement.

Prince Edward Island data is excluded due to a data quality review of data quality issues with service utilization information.

Appendix A: Population Estimates

Table A.1: Statistics Canada Net Population Estimates (in Thousands), 2009–2010 to 2010–2011

Year	N.L.	P.E.I.	N.S.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.	Total
2009–2010	508.4	141.3	931.5	743.4	7,835.8	13,080.7	1,218.9	1,030.4	3,670.0	4,469.4	33,629.8
2010–2011	509.9	144.1	936.0	747.1	7,911.1	13,250.7	1,233.7	1,044.8	3,721.3	4,534.5	34,033.3

Notes

Net population estimates are produced by excluding from total estimates the members of the Royal Canadian Mounted Police, Canadian Forces personnel and the number of inmates in federal and provincial institutions.

Estimates are updated postcensal estimates. The estimates are based on 2006 census counts, adjusted for net census under-coverage.

These figures have been rounded independently to the nearest hundred.

Appendix B: Physician Specialty Categories

Physician specialty categories as used in the NPDB.

Specialty of Family Medicine

01 Family Medicine

- 010 Residency
- 011 General Practice
- 012 Family Practice
- 013 Community Medicine/Public Health
- 014 Emergency Medicine

Medical Specialists

02 Internal Medicine

- 020 General Internal Medicine
- 021 Cardiology
- 022 Gastroenterology
- 023 Respiratory Medicine
- 024 Endocrinology
- 025 Nephrology
- 026 Hematology
- 027 Rheumatology
- 028 Clinical Immunology and Allergy
- 030 Oncology
- 031 Geriatrics
- 032 Tropical Medicine
- 035 Genetics

04 Neurology

- 040 Neurology and EEG
- 041 Neurology
- 042 EEG

05 Psychiatry

- 050 Psychiatry and Neuropsychiatry
- 051 Psychiatry
- 052 Neuropsychiatry

06 Pediatrics

- 060 Pediatrics

- 07 Dermatology**
 - 065 Dermatology
- 08 Physical Medicine/Rehabilitation**
 - 070 Physical Medicine and Rehabilitation
 - 071 Electromyography
- 09 Anesthesia**
 - 075 Anesthesia

Surgical Specialists

- 10 General Surgery**
 - 080 General Surgery
- 11 Thoracic/Cardiovascular Surgery**
 - 086 Thoracic Surgery
 - 087 Cardiovascular Surgery
 - 088 Cardiovascular/Thoracic Surgery
- 12 Urology**
 - 090 Urology
- 13 Orthopedic Surgery**
 - 095 Orthopedic Surgery
- 14 Plastic Surgery**
 - 100 Plastic Surgery
- 15 Neurosurgery**
 - 110 Neurosurgery
- 16 Ophthalmology**
 - 115 Ophthalmology
 - 116 Ophthalmology/Otolaryngology
- 17 Otolaryngology**
 - 120 Otolaryngology
- 18 Obstetrics/Gynecology**
 - 126 Obstetrics
 - 127 Gynecology
 - 128 Obstetrics/Gynecology

Technical Specialists

26 Imaging Specialties (reported in reciprocal billing only)

- 250 Diagnostic Radiology
- 251 Therapeutic Radiology
- 252 Therapeutic Radiology and Nuclear Medicine

27 Laboratory Specialties (reported in reciprocal billing only)

- 260 Nuclear Medicine
- 261 Bacteriology
- 262 Biochemistry
- 263 Microbiology
- 264 Pathology
- 265 Anatomo-Pathology
- 266 General Laboratory

Note: Although genetics is no longer a subspecialty of internal medicine, it is included in the internal medicine category because the number of physician records assigned to this specialty is relatively small.

Appendix C: Measurement of a Full-Time-Equivalent Physician

Historical Measures

In Canada, physician supply has historically been measured in terms of the number of physicians available. This data is often used in physician-to-population ratios and has been used for planning and assessing policy. The number of physicians is considered an important health economic indicator because of the gatekeeper role that physicians play in the health care delivery system. Knowing how many physicians there are helps people understand increases in the cost of medical care, determine how many physicians are needed and follow trends in physician remuneration.

However, using simple head counts implies that all physicians have equal capacity to provide patient care. This is clearly not plausible; many physicians work part time, some are semi-retired and others who are licensed do no clinical work. To try to produce a more meaningful measurement of physician supply, the concept of counting both full-time and full-time-equivalent (FTE) physicians was adopted.

One method of defining full-time physicians involves the use of income thresholds.ⁱⁱ A dollar amount was specified and any practitioner whose income met or exceeded it was counted as one full-time physician. Physicians who billed less were excluded from the count. The system was flawed because, depending on the choice of threshold, statistics could be generated that indicated anything from a serious lack of physician resources to a complete oversupply of all practitioner specialties. Later it was slightly improved by counting part-time physicians as fractions of full-time physicians.

Apart from the problems caused by the arbitrary choice of income threshold, the statistics are not suitable for any time-series analysis, because the subset of earnings above the benchmark will be affected over time by increases in fees. National comparisons are also questionable because the provinces and territories may pay different amounts for the same services.

To get better jurisdictional, inter-specialty and time-series comparisons, a new approach defines a full-time practitioner as one billing among the top 70% of physicians. Percentile thresholds are better than dollar values because they implicitly adjust for changes over time, including fee increases and changes in service use or volume per physician. They also improve comparability among jurisdictions, although because fees still differ there is no guarantee the full-time benchmark in one province or territory reflects the same intensity of work as the benchmark anywhere else. FTE methods based on average or median earnings are variations on this methodology.

ii. It should be noted that the term “income” used in this report refers to physicians’ gross payments for fee-for-service claims only. These payments do not include alternative payments such as salary or sessional payments.

Development of an Improved Measure of Full-Time Equivalence

A national working group started developing a way to measure full-time equivalence in 1984. Its objectives were to

- Provide a consistent basis for physician-supply comparisons within and across provinces and territories;
- Provide a consistent basis for measuring changes through time in physician supply; and
- Recognize workload differences among individual specialties.

Conceptual Model

All FTE measures are to some degree arbitrary, because there is no best measure to be derived through statistical techniques. The working group's choice was determined by the objectives and data availability. It was based on the following conceptual model:

Figure C.1: Conceptual Model of Supply, Utilization and Expenditures

In an economic context, physicians and hours of work are seen as measures of supply. Services produced by physicians are the most basic measure of utilization, while expenditure is the product of services and fees. The relationship between these three variables is illustrated in Figure C.1. The realistic choices for estimation of full-time equivalence were hours of work, services provided and payments.

An internal study indicated a high degree of variability in income per hour worked by fee-for-service physicians, after standardizing for specialty, which meant an FTE measure based on hours of work would not provide accurate estimates of the *potential output* (in terms of clinical services) of the physician population. As FTE measures are used most often in a context where output or expenditure is important, measuring output rather than hours of work (essentially an input measure) seemed preferable.

Services are measures of output, but they are not weighted for intensity or value. Expenditure, on the other hand, measures services weighted by fees—more difficult services are better paid. Payments to physicians were therefore chosen as the most appropriate measure of output for determining full-time equivalence.

Rationale

In the model adopted, gross income per physician is used to measure output or workload. But even in the same specialty, the amount of work doctors do can vary widely, so rather than using a single cut-off for full-time equivalence, the working group decided to use a range that would be realistic for a typical full-time physician. Because the range had to be statistically defined, the 40th and 60th percentiles of nationally adjusted payments were chosen as benchmarks to measure full-time equivalence.

Simulations of alternative percentiles showed the FTE counts were relatively insensitive to different benchmark ranges, as long as they were symmetric (for example, the 30th to 70th percentiles yielded approximately the same total counts as the 40th to 60th percentiles).

Comprehensiveness

CIHI's full-time equivalence methodology is designed to provide a weighted count of all physicians providing fee-for-service care paid for by medicare. Physicians with payments less than the lower benchmark are counted as fractions of an FTE, physicians within or equal to the benchmarks are counted as one and physicians above the benchmark are counted as more than one FTE. The decision to count physicians above the benchmark as more than one FTE was based on a recognition that many physicians have large workloads, which should be reflected.

At the same time, an algorithm incorporating logarithms was used to prevent high-income physicians from having a very large FTE (for example, a physician whose income is three times the upper benchmark will have an FTE of 2.1, while a physician whose income is four times the upper benchmark will have an FTE of 2.4). The relationship between income and FTE count is illustrated in Figure C.2.

Figure C.2: Relationship Between Income and FTE Values

Consistency

For consistency across provinces and through time, the methodology removed the effects of different fee levels on physician income. It allows payments to each physician to be standardized for interprovincial fee differences in order to compute national benchmarks for a base year. The national benchmarks are then converted to provincial values. Each year, the provincial benchmarks are indexed by specialty-specific fee increases or decreases.

Benchmark values and FTE physician counts vary depending on the base year used for analysis. Physician reports for data years 1989–1990 to 1995–1996 were based on FTE benchmarks that were set using a 1985–1986 base year. Physician reports for 1996–1997 to 2001–2002 were updated and based on benchmarks using 1995–1996 NPDB data. In 2004, CIHI re-engineered the NPDB system, focusing on the application of payment source selection criteria at various stages of FTE data processing. Starting with the 2002–2003 data year, FTE physician reports were produced using a 2000–2001 base year. For a detailed discussion of base year changes and the potential impact on FTE results, please see *Full-Time Equivalent Physicians Report, Canada, 2002–2003*—Appendix A.

Step-by-Step Calculation

FTE values are calculated as follows:

$$\text{FTE}_i = \begin{cases} \frac{\text{total payments}_i}{\text{lower benchmark}_j} & \text{If physician } i \text{ earns less than the lower benchmark value } j \\ 1 & \text{If physician } i \text{ earns an amount equal to or within the benchmark values} \\ 1 + \ln \left(\frac{\text{total payments}_i}{\text{upper benchmark}_j} \right) & \text{If physician } i \text{ earns more than the upper benchmark value } j \end{cases}$$

Where

- FTE_i is the FTE value assigned to the i th physician;
- Total payments_i is the sum of all payments made to the i th physician;
- Lower benchmark_j is the lower benchmark value set for the physician specialty group within the province or territory of practice of the i th physician; and
- Upper benchmark_j is the upper benchmark value set for the physician specialty group within the jurisdiction of practice of the i th physician.

1. Select a base year for estimation.

- Starting with the 2002–2003 data year, physician reports are produced using a 2000–2001 base year.

2. Create a national base year FTE database.

- Select from the NPDB all the records for physicians who received at least one fee-for-service payment during each quarter of the base year, in one or more jurisdictions.
- To eliminate the interprovincial differences in payments, adjust the gross income of each physician by the relevant physician services benefit rates (PSBR) index.
- Create 17 national-level medical specialty files corresponding to the medical specialty groups regularly reported in CIHI physician reports. Physicians are assigned to the single national medical specialty file that accounts for the majority of their payments. The national medical specialty data files contain each physician's total payments in the base year.

Note: FTE statistics are not calculated for specialties in imaging or laboratory medicine.

3. Calculate base-year lower and upper benchmarks.

- Within each specialty, rank payments and establish the distribution of physicians by payment levels.
- Label the payment value corresponding to the 40th percentile rank as the national lower benchmark and the 60th percentile as the national upper benchmark.
- To calculate the provincial lower and upper benchmarks, adjust the national benchmarks by the PSBR index.

4. Calculate the benchmarks for years other than the base year.

- Inflate or deflate provincial benchmarks for each specialty using specialty-specific annual fee increase/decrease percentages.

5. Create an FTE database for estimation.

- From the NPDB, select all the records for physicians who received at least one fee payment during a fiscal year for services provided within the physician's province of practice to in-province patients.
- For each province and each specialty, create a data set that includes each physician's total billing in the fiscal year.

6. Calculate the FTE statistics.

- Count physicians with payments within or equal to the benchmarks as one FTE.
- Count physicians with payments below the lower benchmark as a fraction of an FTE equal to the ratio of their payments to the lower benchmark.
- Count physicians with payments above the upper benchmark using a log-linear relationship—that is, as one FTE plus the natural logarithm of the ratio of their payments to the upper benchmark.

Appendix D: Alternative Payment Programs in Each Jurisdiction

The provinces and territories have unique approaches to alternative payment programs; the following section gives details. This information was provided by each jurisdiction and reviewed by it in the preparation of this report.

Newfoundland and Labrador

Salary: Approximately 40% of salaried physicians are general practitioners (GPs), and the remaining 60% are specialist physicians. GPs affiliated with rural community hospitals, largely outside of the Avalon Peninsula, commonly practise on a salaried basis. Salaried physicians are employed by a regional health authority (RHA) and funded by the Medical Care Plan (MCP). While movement between fee-for-service and salaried payment modes is generally unrestricted, a request must be submitted by the RHA and approved by the Department of Health and Community Services. In addition, physicians can convert to a salaried status from fee-for-service by making application through their RHA.

Salary has been the predominant model for rural physicians for two reasons: 1) relatively small practice populations make alternative payment modes more desirable, particularly for specialist physicians; and 2) many physicians in rural areas are international medical graduates (IMGs) who are not fully licensed in Canada. To bill fee-for-service, IMGs must obtain sponsorship from a regional health authority or another physician (the sponsorship must be approved by the College of Physicians and Surgeons of Newfoundland and Labrador), and the IMG must also complete a billing tutorial.

Sessional: These payments are an option for fee-for-service physicians who staff hospital emergency departments, where they are the favoured method of payment. They are also used to pay for specialized care such as diabetes clinics, cystic fibrosis clinics and genetic counselling.

Block funding: Block funding arrangements exist for a number of programs, such as cardiac surgery, pediatric anesthesia, pediatric surgery, vascular surgery and adult hematology. These arrangements define set dollar amounts for prescribed services within physician specialty groups. Block funding arrangements are increasing in popularity, with a number of additional service areas now interested in exploring this modality of payment.

Population-based funding: Capitation is not used as a form of remuneration at present.

Prince Edward Island

Salary: Salaried physicians are employed by Health PEI and paid according to the negotiated terms of the Master Agreement; they also receive the Clinical Work Incentive, a method of additional compensation that is based upon the total value of an eligible physician's submitted and approved shadow billing claims. In addition to salary payments, physicians are permitted to bill fee-for-service, for example, for after-hours work, walk-in clinics, on-call services and emergency room coverage. Physicians may also enter contractual agreements to provide coverage in areas such as long-term care or addictions.

Sessional: Visiting specialists are paid a sessional per clinical hour rate for professional services, in accordance with the Master Agreement.

Contract: All physicians on contract are considered independent contractors and are paid an hourly rate by Health PEI, in accordance with the Master Agreement. Contract physicians also receive the Clinical Work Incentive, a method of additional compensation that is based upon the total value of an eligible physician's submitted and approved shadow billing claims. In addition to contract payments, physicians are permitted to bill fee-for-service, for example, for after-hours work, walk-in clinics, on-call services and emergency room coverage. Included in this category are all payments made to all physicians under the Clinical Work Incentive. The Clinical Work Incentive is an incentive amount applied to the value of a physician's approved shadow billings, subject to predetermined criteria, such as a billing threshold. It is applied to salary-and contract-approved shadow billings as well as to emergency department physicians' shadow billings.

Northern and underserviced areas: General practitioners who are willing to maintain active medical staff privileges and who participate in the provision of inpatient care receive an annual retention payment, paid in bi-weekly installments.

On-call: Physicians have a choice of payment options for providing on-call services: 1) an on-call retainer plus fee-for-service; or 2) an on-call per diem. This on-call category includes only the per diem payments made to physicians.

Information collection: Shadow billing is used with most salaried and sessional physicians.

Nova Scotia

Alternative funding contracts: The number of physicians paid by alternatives to fee-for-service is increasing. There are several contract options, and the Department of Health is receptive to other proposals that enhance patient care within the province. There are regional specialist contracts for anesthesiology, geriatrics, neonatology, pediatrics, obstetrics/gynecology and palliative care. There are also contract arrangements for GPs in certain rural areas and general practitioner/nurse practitioner contracts that support collaborative practice teams in designated areas. All physicians on contract are considered independent contractors and not employees. Few physicians are remunerated through salary.

Rural emergency and on-call payments: During the late 1990s, the province agreed to provide lump-sum payments to physicians who staff emergency departments in rural areas or provide on-call services where emergency departments do not exist. The emergency funding is based on the Murray Formula (for levels 1 and 2) and data is submitted annually. Money is also available for specialty on-call services and family physician on-call services.

Sessional: Sessional reimbursement is available for pre-approved services based on time. Most physicians who provide services in provincial mental health centres are on contract for hourly payments. Many of these physicians also have fee-for-service practices in their communities. There are sessional arrangements for care in jails, detoxification centres, well-women's clinics and teen health centres and for the provision of care to hospital inpatients without a family physician.

Block funding: Typically associated with academic centres, block funding is used by the Capital District Health Authority and the IWK Health Sciences Centre for surgery, family medicine, otolaryngology, radiation oncology, pathology, gynecology, critical care, psychiatry and diagnostic imaging. In 2006, blended funding was introduced and is being used by the departments of medicine, anesthesia, neurosurgery and emergency medicine. This new framework incorporates deliverables as well as billing targets.

Population-based funding and primary care: Capitation is not used.

Information collection: Shadow billing is used to collect information on services provided under block funding and other contract payment arrangements.

New Brunswick

Salary/contract: Some general physicians and specialists doing clinical work in New Brunswick are remunerated through a salary based on the Medical Pay Plan (MPP) and some clauses under parts I and III of the public service of New Brunswick. The MPP has four levels: general physician, uncertified specialists, specialists and department heads. In some instances certain GPs and specialists can be paid only through a salary. For example, community health centre physicians can be remunerated only through salary. Similarly, physicians working with a restricted licence, which does not permit a fee-for-service practice, are salaried. Salaried physicians can be found in specialties such as anesthesia, geriatrics, infectious diseases, internal medicine, rheumatology, neonatology, pediatrics, physical medicine, psychiatry, radiation and medical oncology, general surgery and general practice.

Sessional: Emergency departments in the province's eight regional hospital facilities use sessional compensation on a 24/7 basis. Non-regional hospital facilities operate their emergency departments using a variety of payment options, including fee-for-service, availability stipends, a sessional rate or a combination of the three. Sessional funding arrangements are also created to remunerate physicians for services provided in nursing homes, jails, detox centres, mental health centres, pediatric clinics and reproductive health clinics.

Population-based funding and primary care: Capitation is not used.

Contracts/alternative payments: Some physicians have an all-inclusive contract with remuneration, which is outside the scales of the Medical Pay Plan. It may include the possibility to do some fee-for-service. A few physicians have a guaranteed yearly income based on a set of deliverables (APP).

Guaranteed income: A few physicians have a guaranteed yearly income based on fee-for-service earnings. The physicians bill fee-for-service and the department pays them the balance if they haven't reached their guaranteed income.

Alternate Funding Plan: Some physicians are participating in one or more alternative funding plans where the health authority is given a lump sum payment in exchange for a program deliverable. Physicians are paid on an hourly or sessional basis. For the purpose of FTE calculation, these monies are treated as sessional dollars.

Information collection: Information is collected through shadow billing for some physicians who have moved from fee-for-service to an alternative payment contract. New Brunswick is currently working with the regional health authorities to implement a process to collect patient data for all non-fee-for-service physicians.

Quebec

Salary: Sessional payments (among GPs) and blended payments (among specialists) have become more popular. Fewer doctors are choosing to be paid a salary. This method of payment is found primarily among GPs employed in local community service centres (CLSCs) or among GPs who work in psychiatric settings.

Sessional: Sessional reimbursement is used mainly for GPs who practise in community health programs, in long-term geriatric units, in some psychiatric institutions and/or in remote areas.

Blended: This was introduced in late 1999 as an alternative form of payment for specialists. Physicians are paid a flat daily rate plus a percentage of the fee-for-service rates for each service provided. Approximately 4,300 specialists were paid this way in 2010–2011. For that year, the flat rate portion of blended payments accounted for approximately 95% of alternative payments and about 20% of total payments to specialists.

Block funding: This is not used.

Population-based funding and primary care: An annual fixed amount is paid to physicians by the Régie de l'assurance maladie du Québec (RAMQ) for each patient considered to be actively registered on January 1 of the calendar year. No invoice is required for the physician to receive the annual amount. A supplement is added if the patient is a member of a vulnerable population. The amount varies according to the population; there are five vulnerable population groups. The RAMQ calculates the payment for the physician and sends him or her that amount. This amount is payable on a quarterly basis and is only for GPs. The payment is found in the capitation category.

Information collection: All programs are administered by the RAMQ.

Ontario

Salary: Community health centres (CHCs) in Ontario have community boards and compensate physicians on salary. Currently, CHCs are managed by their respective local health integration networks; thus their payments are not included in the 2010–2011 NPDB distribution of payments. Some of the other alternative funding plans may pay physicians on salary once they receive funding from the ministry.

Sessional: Sessional reimbursement is paid to fee-for-service physicians who provide psychiatry, anesthesia and non-billable geriatric physician services to under-serviced areas and high-risk populations. Compensation is an hourly or sessional (multi-hour) rate for treating patients, often outside physicians' normal office practice. For emergency room payments, there are still a few hospitals paying physicians by the Scott Sessional payments in lieu of fee-for-service payments recommended by the 1995 Scott report on physician services in small and/or rural hospital emergency departments.

Block funding: The majority of alternative payment plan funding for emergency departments, neonatal intensive care units, pediatric services and gynecological oncology physician services is block funding. The funding is paid to a group or association of physicians, which must create a formal structure guiding how the physicians are paid for the services covered in its contract with the province.

Population-based funding and primary care: There are three primary health care physician compensation models using population-based funding: family health networks (FHNs), family health groups (FHGs) and family health organizations (FHOs). These pay by capitation payment for a set number of services but allow fee-for-service billing for services outside that core.

Contractual: All Ontario alternative payment programs are arranged through a contractual agreement. The current preference for the ministry is to first centrally negotiate a template agreement with the Ontario Medical Association and offer it to eligible physician groups. Where this is not possible, contracts are usually negotiated with physician groups, the Ontario Medical Association and the Ministry of Health and Long-Term Care. Participating physicians receive a pre-determined amount of funding to provide the list of in-scope services outlined in the negotiated contract. There is ongoing monitoring and evaluation of all contracts to ensure adequate service levels and that expectations are met.

Information collection: Reporting expectations are clearly outlined in all payment-plan contracts. The most common form, shadow billing, counts services according to fee-for-service codes. In agreements where there is no shadow billing, other reporting methods are instituted to ensure adequate service levels and accountability. In addition, some contracts require shadow billing and other forms of reporting, depending on the deliverables. For example, the Emergency Department Alternative Funding Agreements report on Canadian Triage Acuity Scale scores, volumes, shadow billing and hours of coverage.

Manitoba

Salary: Physicians in Winnipeg community hospitals are compensated on salary. Physicians in Winnipeg teaching hospitals (Health Sciences Centre and St. Boniface General Hospital) are compensated through a blend of fee-for-service and alternative funding. Emergency services provided outside of Winnipeg are compensated entirely through alternative funding. Physicians in mental health centres in Brandon and Selkirk are compensated on a salaried basis, as are hospital-based pathologists in Winnipeg and Brandon. Some physicians (primarily family practitioners) in remote areas receive salary through the medicare plan or the Northern Medical Unit.

Sessional: Sessional reimbursement is used in special circumstances, such as where itinerant physicians serve rural areas and personal care homes, or for some psychiatric and specialist diagnostic services in hospital.

Blended funding: The oncologists at CancerCare Manitoba are paid with a combination of fee-for-service and alternative funding. The oncologists must bill a minimum amount of fee-for-service care to qualify for the alternative funding top-up.

Population-based funding and primary care: Capitation is not used.

Information collection: Encounter-level data is collected by the medicare program for salaried GPs in rural and northern areas. Each paying agency is responsible for information from other modalities. Encounter-level data is not available from these paying agencies.

Saskatchewan

Salary: A relatively small percentage of Saskatchewan physicians is compensated through salaried arrangements. Regional health authorities provide options for salaried employment in some areas (emergency, mental health services, house officers), but the predominant arrangements are service contracts or sessional arrangements. The majority of physicians working in Saskatchewan's community clinics work on a salaried basis. A Northern Medical Services agreement with the University of Saskatchewan provides salaried reimbursement for family physicians working in remote northern communities. The Student Health Centre at the University of Saskatchewan also employs family physicians to provide services on campus. Block funding provided to the Saskatchewan Cancer Agency provides salaried reimbursement for physicians working in the cancer clinics.

Sessional: Regional health authorities contract a number of physicians to provide services on a sessional basis, including (but not limited to) contract psychiatrists, some emergency physicians and family physicians at the provincial geriatric assessment unit.

Service contracts: The large majority of alternative payment plan physicians have service agreements. These include most physicians on contract to regional health authorities, including emergency physicians, pathologists and primary care physicians. Some physicians who work at the College of Medicine are on service contracts or clinical stipends.

Regional health authority fee-for-service: Some regions contract physicians to provide clinical services on a regionally administered fee-for-service basis using a fee schedule that resembles the Medical Services Branch Payment Schedule. This is the predominant model for hospital-based diagnostic imaging.

Blended: Anesthetists in Regina and Saskatoon for the most part are paid on a fee-for-service basis. However, the provision of obstetrical anesthesia is funded through an alternative payment service contract. Transplant nephrologists are paid fee-for-service with an additional stipend for administration, donor searches and family consultations associated with each renal implant. Most alternative contracts allow fee-for-service billing for services to out-of-province patients.

General practice rural emergency and on-call payments: The Emergency Room Coverage Program, implemented in December 1997, is administered through the Medical Services Branch using the claims processing system with fee codes defined as time-based items. A family physician on-call program for regional and rural hospitals was established in 2007.

Specialist emergency coverage program: Implemented in July 2001, this program is jointly administered by regional health authorities, the Department of Health and the Saskatchewan Medical Association. Specialists on prescribed call rotation receive a daily stipend for being available for new emergency (unassigned) patients.

Information collection: All alternative payment contracts require submission of encounter-level data, but compliance varies. Claims are typically submitted through a shadow billing process that uses provincial fee schedule codes. Encounter-level data is submitted through this manner from the community clinics. Encounter data is not available for services provided through the Clinical Services Fund, services provided by most hospital-based physicians (emergency, critical care associates, house officers and radiologists), Northern Medical Services physicians, contract psychiatrists and salaried cancer clinic physicians, and pathologists.

Alberta

During 2010–2011, 47 clinical alternative relationship plans were in place that used three working models for funding physician services, as follows:

Capitation Alternative Relationship Plan: The capitation model compensates a physician or physician group based on an annual amount per rostered patient. Capitation rates are developed using a defined basket of insured health service codes that are adjusted for age group and gender risk factors associated with the patient roster. Rosters may be composed of enrolled patients or all patients within a defined geographic area. There were two Capitation Alternative Relationship Plans in Alberta in 2010–2011.

Contractual Alternative Relationship Plans: The model compensates a physician or physician group for a specified service delivery model based on insured health services per FTE physician per annum. Funding under the contractual model is physician-based, and it increases as the number of physician FTEs within the Clinical Alternative Relationship Plan increases. This model was used in 29 contractual funding projects in Alberta in 2010–2011.

Sessional Alternative Relationship Plan: Under the Sessional Alternative Relationship Plan, the physician is paid a predetermined rate (usually an hourly rate) for providing defined insured health services within an organized program to a defined patient group over a specified period. There were 16 sessional alternative relationship plans in Alberta in 2010–2011.

Academic Alternative Relationship Plans: These plans are pooled funding arrangements that amalgamate the various sources of funding, to provide compensation to academic physicians for their clinical practice, teaching, administrative and research roles. These agreements have been successful in attracting and retaining needed specialists to the province, supporting innovative clinical practice and enhancing the quality of Alberta's medical education and research. Academic Alternative Relationship Plans involve universities and faculties of medicine, participating physicians, Alberta Health and Wellness, Alberta Health Services, the Alberta Medical Association, other funding bodies and related ministries, such as Advanced Education and Technology. There were 10 Academic Alternative Relationship Plans in Alberta in 2010–2011.

Collection of Service Event Reporting (Shadow Billing Information): Alternative relationship plan service event reporting is currently being collected using the existing fee-for-service codes.

British Columbia

B.C.'s alternative payments program (APP) provides funds to the five regional health authorities and the provincial health authority, which in turn contract with physicians to deliver health care services.

Service contracts: The health authorities may apply to the APP for funding dedicated to the delivery of a specific program of health care services. The health authority and APP establish a funding contract with each other, and the health authority subsequently contracts with or employs physicians to deliver services within the APP envelope of program-specific funding. Service deliverables and physician payments are specified in the physician contracts, and these are aligned with the terms and conditions of the health authority's funding agreement with the APP and the recent Physician Master Agreement (PMA). The PMA incorporates and replaces previous physician agreements between the government, the Medical Services Commission and the British Columbia Medical Association (BCMA).

Sessions: In addition to service contract arrangements, health authorities may apply to the APP for funding to pay physicians on a sessional arrangement, where a session equals 3.5 hours of physician time and may be broken into 15-minute increments. The health authority and APP negotiate the number of sessions required to deliver a particular health program, and the APP commits funding for these sessions to the health authority. As sessions are provided, the health authority submits claims with supporting records of physician services to the APP for release of funding equal to the number of sessions used. The PMA outlines the terms and conditions for sessional payments.

Blended funding program—Population-Based Primary Health Care: A population-based blended funding model for primary health care is also administered through the Medical Services Commission. Contracts for services are negotiated between the ministry and health authorities for the delivery of a fixed basket of core services to a defined population. Health authorities then provide the service directly or contract with private practices for the delivery of care. Compensation of individual physicians is determined entirely within the health authority and/or private practice. Funding for the services is blended: a combination of population-based funding for core services to the defined population plus fee-for-service for all other services. The population-based component of service funding uses a risk-adjusted capitation model that recognizes the impact of comorbidity on the utilization of resources. Funding and payment under the model are directly linked to timely and accurate submission of encounter and claims data, so compliance with reporting requirements under this model is high.

Information provision: Reporting is a condition of APP funding and is required to meet expectations for accountability. Along with reporting captured within the APP payment system, reporting from health authorities includes patient encounter information to support the data collection necessary for contract monitoring and evaluation and health service planning.

Yukon

The majority of Yukon physicians bill fee-for-service. Because the small population does not warrant many resident specialists, many services are provided by visiting specialists and locum physicians. They usually bill the Yukon Health Care Insurance Plan fees for their services. Fewer than five visiting physicians are paid a sessional rate.

Alternative payment plans: A small number of resident physicians is on contract with the Health Services Branch. The contracts are negotiated by individual physicians, subject to the provisions outlined in the memorandum of understanding between the Yukon Medical Association and the Health Services Branch.

Information collection: Shadow billing is done to collect information on the number and dollar amount of services provided by contract physicians.

Northwest Territories

Salary: Hospital-based physicians in the specialties of anesthesiology, general surgery, internal medicine, obstetrics/gynecology, orthopedics, otolaryngology, respiratory medicine, psychiatry and pediatrics are paid salaries. There are also salaried family doctors working in clinics and emergency rooms and as hospitalists.

Sessional: Used to fill vacancies in specialties and general practice, sessional physicians are employed as independent contractors and paid a daily rate for services. In addition, travel costs are reimbursed and accommodations are provided.

Information collection: Data for salaried and sessional physicians is taken from the Health Authorities Trial Balance and Physician Data collection information.

Appendix E: National Grouping System

Categories and Strata

1. Consultations

Major, initial, ordinary, minor, repeat, regional and operative consultations performed in offices, hospitals, chronic care and convalescent hospitals and nursing homes, as well as psychiatric and obstetrical consultations where no special call is involved

- Major Consultations
- Other Consultations

2. Major Assessments

General and specific assessments, reassessments, initial visits with a complete exam, new condition seen for first time and including complete history and exam, complete specific exam depending upon the physician specialty, annual exams, newborn/premature care and special eye exams performed in any location where no special call is involved

- Office
- Hospital Inpatient: Newborn
- Hospital Inpatient: Other
- Hospital Outpatient
- Hospital Unspecified
- Unspecified
- Special Eye

3. Other Assessments

Partial or minor assessments, regional exams, first or subsequent or repeat exams, ordinary, pre- and post-natal care, well-baby care in any location, chronic and convalescent care, outpatient visits and other visits when physician is in the hospital, intermediate and minor assessments, partial assessments, follow-up exams and regional exams, additional patients seen during a special call and detention

- Office
- Hospital Inpatient
- Hospital Outpatient
- Hospital Unspecified
- Unspecified—Location
- Special Calls—Add
- Detention

4. Hospital Care Days

Regular visits up to 28/30/31 or 35/42 days, more than 28/30/31 or 35/42 days, inpatient supportive care, continuing care, concurrent care, directive care, convalescent care, palliative care and daily management

- Up to 28/30/31 or 35/42 Days
- More Than 28/30/31 or 35/42 Days
- Other

5. Special Calls

Visits at night, on Saturdays, Sundays and holidays, requiring travel to offices, homes, nursing homes, outpatient and emergency departments; also includes special visits, consultations, specific assessments and reassessments, general reassessments, ordinary home visits, home summary and specific exams

- Out-of-Hours/Emergency
- Other Regular Hours

6. Psychotherapy/Counselling

Individual psychotherapy, hypnotherapy, narco-analysis, diagnostic/therapeutic interviews, group and family psychotherapy and interviews, interviews for physical medicine and counselling for drugs, family, genetic, marriage and contraception, and case conferences on behalf of patients with allied workers, teachers, clergy, etc.

- Individual Psychotherapy
- Group/Family Psychotherapy
- Counselling

7. Major Surgery

Based on the 1988 Ontario Schedule of Benefits, these procedures have a fee of more than \$75.

Mastectomy

Simple, radical or modified radical; unilateral or bilateral; female or male

Breast Tumour Excision/Biopsy

Tumour or tissue for biopsy and/or treatment; partial mastectomy or wedge resection

Other Integumentary System

All other major surgery procedures performed on the integumentary system not listed above; for example, excisions, lesions, tumours, cysts, burn and skin grafts, pedicle and free island flaps, plastic planing, plastic surgery procedures, breast reconstruction, mammoplasties and surgical debridement.

Fractures

Bone and joint fractures, including dislocations

Disc Surgery

Procedures for disc removal and fusion

Arthroplasty—Hip

Total hip replacement, unipolar and bipolar arthroplasty and revisions

Arthroplasty—Knee

Knee arthroplasty and revisions

Other Musculoskeletal System

All other major surgery performed on the musculoskeletal system not listed above, including bone grafts, arthrodesis, amputation, arthrotomy, bone, joint, muscle and tendon excision, reconstruction, orbito-cranial surgery and instrumentation

Sub-Mucous Resection

Septoplasty and resection

Rhinoplasty

Correction of nasal deformity

Other Respiratory System

All other major surgery performed on the respiratory system not listed above, including excisions and repairs

Coronary Artery Bypass

Coronary artery repair single, double, triple or more

Coronary Angioplasty

Percutaneous transluminal coronary angioplasty

Insertion of Pacemaker

Insertion of permanent endocardial electrode and implantation of pack, replacement and repair

Other Heart/Pericardium

All other major surgery procedures performed on the heart and pericardium system not listed above

Varicose Veins

Ligation and stripping of varicose veins but excluding injection of varicose veins

Carotid Endarterectomy

Endarterectomy, body tumour and bypass graft of the carotid artery

Other Cardiovascular

All other major surgery performed on the cardiovascular system not listed above

Appendectomy

Excision of the appendix

Laparotomy

Any laparotomy performed as a surgical procedure

Cholecystectomy

All cholecystectomies and any additional payments made for other procedures performed at the same time, such as choledochotomy, sphincterotomy, vagotomy

Tonsillectomy

Both adult and child tonsillectomies and payments for adenoidectomies performed at the same time

Inguinal/Femoral Hernia

Inguinal and/or femoral hernias performed on infants, children, adolescents and adults

Colectomy

Total and hemi-colectomies and payments for other procedures performed at the same time

Hemorrhoidectomy

The surgical procedure only; hemorrhoidectomies by cryotherapy or banding are excluded

Other Digestive

All other major surgery performed on the digestive system not listed above

Urinary System

All urinary system operations, including renal transplant, nephrotomy, nephrectomy, bladder, ureter and stress incontinence operations (male or female)

Prostatectomy

All forms of prostate surgery, such as perineal, suprapubic, retropubic, transpubic and transurethral resection

Vasectomy

Unilateral or bilateral ligation

Other Urinary/Male

All other major surgery performed on the male genital and urinary systems

Prolapse

All forms of prolapse repair surgery

Hysterectomy

Total, subtotal, abdominal or vaginal or radical hysterectomies

Sterilization

Tubal occlusion/interruption/removal by any method or approach

Other Female

All other major surgery performed on the female genital system not listed above

Cataract Surgery

All forms of cataract surgery, dislocated lens extraction and insertion of intra-ocular lens when paid in addition to the above

Light Coagulation

Photocoagulation and cryopexy

Tympanoplasty

Tympanoplasty, myringoplasty, tympanomastoidectomy and payments for other procedures performed at the same time

Other Eye/Ear

All other major surgery performed on the organs of special senses not listed above

Other Major Surgery

All other major surgery not listed above, such as operations on the nervous system, on the hemic and lymphatic systems and on the endocrine system

8. Minor Surgery

Incision, Abscess, etc.

Incision of abscesses or hematomas under local or general anesthesia

Removal of Foreign Body

Foreign body removal under local or general anesthesia

Excision, Tumour, etc.

Excision of verruca, papilloma, keratosis, pyogenic granuloma, moles, etc.

Suture Wound

Repair, debridement and dressing

Excision of Nail

Excision and/or destruction of fingernail or toenail

Chalazion

Single or multiple under local or general anesthesia

Myringotomy

Unilateral myringotomy with insertion of ventilation tubes

Minor Fractures

Fractures with a fee less than \$75

Other Minor Surgery

All other minor surgery not listed above

9. Surgical Assistance

All services and payments for surgical assistance

10. Anesthesia

Nerve Blocks

All forms of nerve blocks

Other Anesthesia

All services and payments for anesthesia, excluding nerve blocks

11. Obstetrical Services

Service at Delivery

Attendance at delivery or Caesarean section, repair of third-degree/vaginal/cervical laceration, removal of retained placenta, scalp sampling, fetal monitoring and induction of labour

Delivery (Excluding Caesarean Section)

Delivery and multiple births, excluding Caesarean sections

Caesarean Section

The procedure only

Therapeutic Abortion

Therapeutic abortions only

Other Obstetrical Services

Fetoscopy, stress test, hypertension, fetal transfusion, toxemia of pregnancy, oxytocin challenge test, abortions (missed, threatened, without dilatation and curettage, incomplete, menstrual extraction and spontaneous), amniocentesis, ectopic pregnancy, suture for incomplete cervix during pregnancy, uterine inversion and emergency removal of sutures

12. Diagnostic/Therapeutic Services

ICU/Resuscitation

Intensive care and resuscitation services

Allergy/Hyposensitization

Tests for allergies and hyposensitization

Injection/Aspiration of Joint

Injection and/or aspiration of joints

Electrocardiogram

Services and payments for the professional component of electrocardiograms and the payments for the technical component

Esophagoscopy/Gastroscopy

Services and payments for both these endoscopies as well as payments for procedures performed at the same time as the endoscopy

Laryngoscopy/Bronchoscopy

Services and payments for both these endoscopies as well as payments for procedures performed at the same time as the endoscopy

Colonoscopy

Services and payments for this endoscopy as well as payments for procedures performed at the same time as the colonoscopy

Cystoscopy

Services and payments for this endoscopy as well as payments for procedures performed at the same time as the cystoscopy

Sigmoidoscopy

Services and payments for this endoscopy as well as payments for procedures performed at the same time as the sigmoidoscopy

Other Endoscopy

All other endoscopies not listed above

Coronary Angiography

Coronary angiography only

Procedures Associated With Imaging

Therapeutic radiology and radioisotopes

Dilatation and Curettage

Dilatation and curettage and payments for procedures performed at the same time

Electroencephalography

Services and payments for the professional component of electrocardiograms and payments for the technical component

Cryotherapy

Any cryotherapy identified in the payment schedules

Cardiac Catheterization

Left heart, right heart and selective coronary catheterization

Biopsy

All non-surgical biopsies

Other Diagnostic/Therapeutic Services

All other diagnostic/therapeutic services not listed above

13. Special Services

Injections and Immunizations

Injections (subcutaneous, intramuscular and for varicose veins) and immunizations regularly performed by nursing personnel. In some jurisdictions these are treated as separate services, while in others they are included in visit fees. Not included are intra-vascular injections performed by physicians and lumbar myelograms, which are included in diagnostic/therapeutic services.

Papanicolaou Smear

As with injections, this procedure is not always considered to be a separate service and is sometimes included in a visit fee

Insertion of Intrauterine Device

As with injections, this procedure is not always considered to be a separate service and is sometimes included in a visit fee

14. Miscellaneous Services

Other Identified

These are services that are not listed as fee items by a majority of the provinces and territories. Examples include sessional and standby fees (where identified by a fee code), mileage, telephone consultations, sexual assault exam for investigation and/or confirmation of alleged sexual assault and other services.

Unidentified

Most provinces and territories have coding errors or list codes that are unidentifiable. These include all services that are unidentified or are identified but paid for by social services, the attorney general, workers' compensation, etc. Examples include services related to impaired driving, to rape victims and as a result of injuries sustained at work.

Appendix F: Fee Code Adjustments for Services

Not only are provincial and territorial fee schedules different, but periodic changes to definitions, fees or assessment rules make it difficult to compare jurisdictions. In general, visit services and minor procedures have more differences and are less comparable than well-established and distinct major surgical procedures. As a result CIHI adjusts service counts for certain types of services, visit services and diagnostic/therapeutic procedures to improve the comparability of the data. A description of each adjustment follows.

Adjustment A

Sometimes what would be considered one service is billed with more than one fee code—for example, when two or more surgical procedures are performed at the same time. To minimize the double counting of services, an Adjustment A is attached to the fee service code (FSC); this excludes the service count for the additional part of the procedure but keeps the payments.

Example

FSC 1—pyloroplasty (surgery to widen the lower portion of the stomach, so that stomach contents can empty into the small intestine)

FSC 2—with suture of bleeding peptic ulcer, additional amount

The service count is retained only for FSC 1, while the payments for FSC 1 and FSC 2 are retained.

Adjustment B

While some types of care, such as setting a broken bone, are clearly comparable, others can be defined very differently in each jurisdiction. Adjustment B is designed to make these variable services more comparable. They include services such as psychotherapy, hospital visits, resuscitation, intensive care, pre- and post-natal care, stand-by fees and diagnostic or therapeutic tests. CIHI adjusts the service count by dividing the total payment for the FSC by the calculated fee for the standardized service. In other words, CIHI looks at how much was paid for the service and sees how many standard services could be had for that much money. Then it assigns this calculated number of standard services instead of the original count.

These are the Adjustment B criteria:

- Psychotherapy—the average duration for all psychotherapy services is assumed to be 30 minutes, and group therapy sessions comprise four persons.
- Allergy tests—CIHI looks at the cost of a standard office visit for the jurisdiction and assumes that however many allergy tests could be billed for that amount of money is the number of tests performed. This is most often used for patch and hypersensitivity tests.

- Detention—detention is payable when a physician spends considerable extra time in the treatment of a patient to the exclusion of other work. CIHI assumes the duration of a detention service is a quarter-hour. Service counts are adjusted for jurisdictions that pay for either half an hour or one hour.
- Intensive care—the duration of one intensive-care service or one intensive-care per diem is assumed to be one hour.
- CIHI converts monthly rates to daily rates assuming 20 working days per month.

Adjustment C

This adjustment is used when a fee code is redefined during the year and the definitions apply to different categories—for instance, when laboratory surcharges apply to different procedures. This adjustment allows the services and payments for a specific FSC to be divided between two categories.

Adjustment D

This is the same as Adjustment B, except the service counts are revised on the basis of whether they were performed by a GP or other specialist, with a different fee for each.

Example

Fee Schedule	Calculated Fees
General Practitioner	\$14 per $\frac{1}{4}$ hour
Other Specialist	\$18 per $\frac{1}{4}$ hour

Adjustment E

In many jurisdictions, physicians are entitled to premiums or additional fees for visits or procedures provided during off-hours such as evenings, nights, Saturdays, Sundays and statutory holidays, or if the visit or procedure is provided in an emergency. To eliminate double counting, these premium codes are dropped and the payment for them is added to the primary code for the visit or service.

Example

FSC 1—surcharge for a consultation

The special charge for out-of-hours care is subtracted from the primary count, which is under Category 1, Consultations. The subtracted payments are calculated by multiplying the service count of FSC 1 by the fee for a consultation. In CIHI reports, Category 20, Out-of-Hours/Emergency, contains the services and payments for FSC 1 plus the payments removed from Category 1.

Adjustment F

Payment for obstetrical care may be all-inclusive fees (payment for delivery or Caesarean section and for all pre- and post-natal care) or by separate fees for delivery or Caesarean section and fees for associated pre- and post-natal services. To minimize the effect of these changes on comparisons among jurisdictions and over time, all-inclusive fees are separated into pre- and post-natal visits and deliveries or Caesarean sections.

Adjustment G

There are some fee service codes that can only be billed in addition to or in association with many other different codes. These particular codes are proportionally distributed to the NGS categories where the codes they are billed with are categorized.

Example

FSC 1—surcharge for a consultation

The FSC 1 can only be billed with codes FSC 4, FSC 5 and FSC 6. Each of FSC 4, 5 and 6 is mapped to three different NGS categories. The percentage distribution among FSC 4, 5 and 6 is calculated, and then FSC 1 is proportionally distributed between the respective NGS categories for each of the three FSC codes 4, 5 and 6.

Jurisdiction-Specific Adjustments

For various reasons, several adjustments to the data are also made that do not apply consistently to each province or territory. For example, premium fees for off-hour visits and procedures are claimed in several jurisdictions. To maintain consistency, the dollar amounts for such premiums are included, but the service counts are dropped to eliminate double-counting the services.

Special Calls Adjustment

A special call is an assessment rendered following travel to attend to a patient. This will normally be initiated by someone other than the physician outside a hospital, including visits to a first patient at home, in a nursing home, rest home or other setting. A home visit will usually occur in an emergency or because of the patient's condition.

In Quebec, Atlantic Canada, Alberta and Yukon, a consultation or assessment done normally has a different fee code from one that is a special call. In the other jurisdictions—Ontario, Manitoba, Saskatchewan and B.C.—the same fee code is used in both circumstances, but an extra surcharge with its own fee code is added in the case of a special call. So, for example, in Nova Scotia all the payments and services would fall into the special call strata, but in Ontario the payments and services would be split between consultations or assessments and special calls. This adjustment moves payments from consultations and assessments to special calls. It also deletes services in consultations and assessments there as a result of special calls.

As of 2004, only FSCs 01200, 01201 and 01202 are used in the special calls adjustment for B.C.

The special calls adjustment is done at the National Grouping System strata level and not at the detailed fee-code level.

Appendix G: Fee-for-Service Imaging and Laboratory Coverage

Imaging and laboratory services supplied to CIHI for use in the NPDB are not uniform or complete. For this reason the data is not routinely used in NPDB publications. The following notes were provided by the provincial medical insurance plans regarding the imaging and laboratory services included in the NPDB file submissions.

Newfoundland and Labrador

- No laboratory services data is supplied to the NPDB, as these services are paid for through hospital funding.
- Physicians can be paid on a fee-for-service basis for interpretation services on certain diagnostic services, such as EEGs and ECGs. These services would be included in the NPDB file submissions.

Prince Edward Island

- No laboratory services data is supplied to the NPDB, as these services are paid for through hospital funding.
- Radiologists' interpretation fees are included in the NPDB file submissions.

Nova Scotia

- No laboratory services data is supplied to the NPDB, as these services are paid for through hospital funding.
- The majority of imaging billings are not included in NPDB file submissions or in fee-for-service earnings.

New Brunswick

- No laboratory services data is supplied to the NPDB, as these services are paid for through hospital funding.
- All imaging services are excluded from the NPDB file submissions.

Quebec

- No laboratory services are included.
- Imaging services provided by physicians in private practice are included in the NPDB file submissions.

Ontario

- Ontario's most current lab data indicates that approximately 53% of all lab services are provided in community labs. The remaining 47% are provided by hospital labs (45%) and public health labs (2%).
- All imaging services are excluded from the NPDB data submission.

Manitoba

- Laboratory services provided in the NPDB file submissions are those provided by privately owned fee-for-service laboratories. Laboratory services provided in urban/rural facilities are not included in the NPDB file submissions.
- Imaging services submitted include all private imaging services and all urban facility imaging services. Rural facility imaging services—approximately 11% of the total dollar value for imaging services—are not included in the NPDB file submissions.

Saskatchewan

- Since 1993–1994, the only laboratory services included in the NPDB file submissions are common in-office laboratory services provided by physicians other than pathologists. Responsibility for private laboratory services provided by specialists in pathology was transferred to the health regions in October 1993 and is no longer funded on a fee-for-service basis.
- Facility-based imaging services that are funded through the health regions are excluded from the NPDB file submissions, as are imaging services provided through the screening program for breast cancer.

Alberta

- Up to July 1, 1995, only non-hospital-based laboratory services were included.
- Only non-facility based imaging services are included in NPDB file submissions.

British Columbia

- Laboratory and imaging services when performed on a fee-for-service outpatient basis are included in NPDB file submissions, but inpatient services are not included.

Yukon

- Only non-hospital based laboratory services were included in the NPDB file submissions.
- Only non-hospital based X-ray services were included in the NPDB file submission.
