Fisheries and Aquatic Sciences  
No. 554**

## **Canadian Data Report of Fisheries and Aquatic Sciences**

Data reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of data reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Data reports are not intended for general distribution and the contents must not be referred to in other publications without prior written authorization from the issuing establishment. The correct citation appears above the abstract of each report. Data reports are abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1-25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26-160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was introduced with the publication of report number 161.

Data reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

## **Rapport statistique canadien des sciences halieutiques et aquatiques**

Les rapports statistiques servent à classer et à archiver les compilations de données pour lesquelles il y a peu ou point d'analyse. Ces compilations auront d'ordinaire été préparées à l'appui d'autres publications ou rapports. Les sujets des rapports statistiques reflètent la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports statistiques ne sont pas destinés à une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports statistiques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1 à 25 de cette série ont été publiés à titre de relevés statistiques, Services des pêches et de la mer. Les numéros 26 à 160 ont été publiés à titre de rapports statistiques du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 161.

Les rapports statistiques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

ABSTRACT

Brown, T. J., M. Kotyk, B. A. Kask, C. D. Levings, C. D. McAllister, and J. S. Macdonald. 1985. Salmonid catch-data from Campbell River and Discovery Passage, 1985. Can. Data Rep. Fish. Aquat. Sci. 554: 77 p.

The salmonid catch data was obtained by beach seining at 42 sites during 13 trips to Campbell River from January to August 1985. During the 1985 season, 924 sets were made and 108,317 salmonids were identified and counted. This report presents the data in order sorted by trip.

RESUME

Brown, T. J., M. Kotyk, B. A. Kask, C. D. Levings, C. D. McAllister, and J. S. Macdonald. 1985. Salmonid catch-data from Campbell River and Discovery Passage, 1985. Can. Data Rep. Fish. Aquat. Sci. 554: 77 p.

Des données sur les prises de saumons ont été obtenues par pêche à la senne de rivage à 42 endroits dans le cadre de 13 expéditions à la rivière Campbell, de janvier à août 1985. Au cours de la saison de 1985, il y a eu 924 mises à l'eau et 108 317 saumons ont été identifiés et comptés. Ce rapport présente les données classées en ordre, par expédition.

## INTRODUCTION

The data on the 1985 catches of juvenile salmonids from the Campbell River estuary and Discovery Passage are reported here. This study was initiated in March of 1982 to assess the utilization by juvenile salmonids of the 4 intertidal islands constructed in the Campbell River estuary. These islands were constructed by British Columbia Forest Products in exchange for a dry land log sort facility (Brownlee et al. 1984). The islands were planted with marsh grasses (Juncus arcticus and Carex lyngbei) to augment the marsh input to the estuarine food webs.

The beach seine surveys were also used to provide data on the dispersal of marked hatchery chinook released into the river, estuary, transition and marine zones. These experiments were designed to compare the survival of juvenile chinook salmon released into different habitats (Levings et al. 1984). The beach seine surveys have been conducted yearly since 1982 and are reported in Brown et al. 1983, 1984a, b.

## MATERIALS AND METHODS

The sampling was carried out in 3 zones. The estuarine zone was defined as the area bounded by Tyee Spit. The transition zone included an area of Discovery Passage which is influenced by the Campbell River and the marine zone included the rest of Discovery Passage and Seymour Narrows.

Thirteen trips to the Campbell River estuary and Discovery Passage were made from January to August 1985 (Table 1). The fish were caught using a 13.7 m beach seine with 4.6 m wings (1 cm stretched mesh), 4.6 m bunt (0.6 cm stretched mesh) and 3 m depth.

There were 18 stations in the estuary, 6 in the transition and 18 in the marine zones (Figs. 1, 2; Table 2). Duplicate sets were made at each station with the use of a 5 m inflatable boat except for the stations on islands 1 and 3. These were sites where grooves were seined and replicates were not required.

The catches were held in the bunt of the net where counting and subsampling occurred. The salmon species and groups (hatchery, wild, marked and unknown) (Table 3) were identified and counted. If the catch was too large then a subsample was placed in a floating pen and the appropriate correction factor applied to the counts. The sampled fish were preserved in 10% formalin for length, weight and stomach analysis. The coded wire tags were read to determine the release origin, residency and growth rate of hatchery fish (Kotyk et al. a, b, in prep.).

The temperature and salinity were taken using a Beckman RS-5 salinometer. The minutes to nearest slack water and tide heights were calculated for each set using the "Canadian Tide and Current Tables" for Campbell River.

## RESULTS

There were 924 sets made during the 13 sampling trips to Campbell River in 1985. These sets caught 108,317 salmonids of which 42,853 were juvenile chinook. The 1985 catch data is presented in Table 4.

Table 2. Station descriptions and habitat types.

Station designation (number, vernacular)	Description, habitat
1 (M. Ramp)	Beside Coval Air seaplane ramp, west side of Tyee Spit; sand, marsh at high elevation; moderate slope.
2 (Nunns Is.)	Southeast tip of Nunns Island; sand/mud, marsh at high elevation; moderate slope.
3 (Nunns Creek)	Southwest side of Nunns Creek mouth; marsh; very steep drop-off.
4 (Spit)	Northwest tip of Tyee Spit; gravel; very steep drop-off.
5 (Bar)	Sand/gravel bar on north side of river mouth channel; eelgrass at lower elevations; moderate drop-off. Exposed when tide levels <est. 2 m.
6 (Bulkhead)	Gravel beach by wooden bulkhead, west side of Campbell River; moderate drop-off.
7 (NBM)	South shore of north arm of Baikie's Slough at confluence with Campbell River; marsh at higher elevations, eelgrass at lower elevations; moderate drop-off.
8 (NBS)	North shore of north arm of Baikie's Slough at confluence with channel leading to Freshwater Marina; marsh at higher elevations, mud-wood debris at lower elevations; moderate drop-off.
10 (SBM)	South shore of south arm of Baikie's Slough at confluence with Campbell River sand, moderate drop-off.
11 (Is. No. 1)	Bay on island no. 1; transplanted marsh at higher elevations; mud/wood debris at lower elevations; shallow slope.
111 (Grass Is.)	North side of Natural island south of island no. 1; sand/mud marsh at higher elevation; steep drop for 1 m then moderate slope.
14 (Is. No. 3, M.R.)	Experimental tidal groove in Is. no. 3; middle groove on river side; transplanted marsh at higher elevations; gravel, mud/wood/ algae at lower elevations; moderate slope.

Table 2 (cont'd)

Station designation (number, vernacular)	Description, habitat
141 (Is. No. 3, U.R.)	Experimental tidal groove on Is. No. 3; upstream groove on river side; transplanted marsh at higher elevations; gravel, mud/wood/algae at lower elevations; steep slope.
15 (Is. No. 3, M.S.)	Experimental tidal groove on Is. No. 3; middle groove on Spit side; transplanted marsh at higher elevations; gravel, mud/wood/algae at lower elevations; moderate slope.
151 (Is. No. 3, U.S.)	Experimental tidal groove on Is. No. 3; upstream groove on Spit side transplanted marsh at higher elevations; gravel, mud/wood/algae at lower elevations; moderate slope.
16 (Is. No. 3, L.R.)	Experimental tidal groove on Is. No. 3; downstream groove, river side; mud/wood/algae at lower elevations; moderate shallow slope.
17 (Is. No. 3, L.S.)	Experimental tidal groove on Is. No. 3; downstream groove, Spit side; gravel, mud/wood/algae at lower elevations, moderate shallow slope.
18	Southwest side of Is. No. 4; gravel; mud/wood debris at lower elevations; shallow slope.
20 (Boat Ramp)	Next to boat launch ramp on east side of Tyee Spit; gravel/cobble beach; moderate slope.
21 (McDonald's)	Est. 200 m north of ferry dock; Campbell River, gravel/cobble; moderate slope. Exposed on tide levels <2 m; adjacent to rip-rap.
23 (Middle Point)	Est. 700 m south of Middle Point; sand with boulders in lower elevations; inside a kelp bed; shallow slope.
24 (Nymphe Cove)	Small cove in west side of southern entrance to Seymour Narrows; gravel with boulders in lower elevations; inside a kelp bed; steep slope; sand flat with eelgrass on west beach.
241 (Menzies II)	Northeast corner of Menzies Bay, cobble beach, shallow slope with log booms adjacent.

Table 2 (Cont'd)

Station designation (number, vernacular)	Description, habitat
25 (Maude Beach)	Beach est. 1.5 km southeast of entrance to Saltwater Lagoon; gravel in higher elevations, mud, eelgrass in lower elevation, kelp bed; shallow slope.
26 (Quadra)	Beach in front of Walcan Cannery; cobble/boulder; eelgrass, kelp beds; moderate to steep slope.
27 (Outer Gowlland)	Beach on southwest side of Gowlland Island; cobble/boulder; kelp beds; moderate slope.
28 (Inner Gowlland)	Beach in small cove at south entrance to Gowlland Harbour; cobble, with some boulders; high sea cucumber/sea urchin populations; moderate to shallow slope with steep drop-off.
292 (Unkak Cove)	Cove at north end of Quathiaski Cove; sand/mud; eelgrass patches; shallow slope.
30 (Brown Bay)	Small bay at northwest entrance to Seymour Narrows; approximately 500 m south of Browns Bay; high density kelp bed; cobble with boulders at low elevations; moderate to steep slope.
31 (Plumper Bay)	Beach immediately southeast of rocky cliffs on north side of Plumper Bay; gravel in higher elevation, mud, eelgrass in lower elevation, kelp bed; moderate slope.
32 (Deepwater Bay)	Beach in southeast corner of Deepwater Bay; gravel/sand beach with small freshwater drainage; shallow slope.
34 (Painter's Channel)	Eastern shore on a channel near Painter's Lodge exposed on tides <2 m; mud/sand with eelgrass in lower elevation; shallow slope.
35 (Outer Bar)	Beach approximately 100 m north of Station 5; sand/gravel bar, eelgrass at lower elevation; moderate slope with steep drop-off. Exposed on tides <2 m.
37 (Log Sort)	Within bay of B.C. Forest Products log sorting area; log booms; rip-rap; steep slope.
47 (Fred's Slough)	Small beach on channel south of Baikie's Slough; overgrown with willows; wood debris, backing onto Raven Lumber sorting yard; shallow slope.

Table 2 (cont'd)

Station designation (number, vernacular)	Description, habitat
321 (Old DWB)	Beach at old log dump site on east side of Deepwater Bay, sand/cobble; moderate slope.
322 (Sea Lion Cove)	Beach in southwest corner of Deepwater Bay; gravel/sand beach; shallow slope; eelgrass at lower elevation.
324 (Station C)	A small sand beach at Bodega point; moderate slope.
326 (Station F)	A cobble beach 100 m north of McMullen Point, moderate slope.
327 (Station G)	A sand beach 1.25 km south of McMullen Point with a small freshwater drainage; moderate slope.
328 (Station H)	A cobble beach 2 km north of Browns Bay; small freshwater drainage, kelp bed and moderate slope.
329 (Station D)	A small cobble beach on the Chained Islands in Kanish Bay; moderate slope.

Table 3. Table abbreviations.

Trip number	-corresponds to the consecutive sampling trips from January to August 1985 (see Table 1)
Date (year, month, day)	-the catch data are arranged in chronological order except for trip 4 when two beach seines were used.
Time-PST	-the time each set was made in Pacific Standard Time
SN	-station number (see Fig. 1, 2 and Table 2)
Haul	-each set is progressively numbered by station for each trip
Total sets	-the maximum number of hauls for each station on each trip
Tide type	-1 = ebb; 2 = flood
Min to slack	-minutes to nearest slack water
Temp.	-temperature (°C)
Sal.	-salinity (°/oo)
Species code	<ul style="list-style-type: none"><li>-1 - pink salmon</li><li>2 - chum salmon</li><li>3 - coho salmon</li><li>4 - sockeye salmon</li><li>5 - chinook salmon</li><li>6 - cutthroat trout</li><li>7 - steelhead trout</li><li>8 - unidentified</li></ul>
Group code	<ul style="list-style-type: none"><li>-1 - marked (CWT) - adipose fin clip</li><li>2 - unmarked hatchery - distinguished from the wild population early in the year by size</li><li>3 - wild - distinguished from the hatchery fish by size</li><li>4 - not specified. This group is used when the wild fish and unmarked hatchery fish are non-distinguishable by size</li></ul>
Stage code	<ul style="list-style-type: none"><li>-1 - alevin</li><li>2 - fingerling</li><li>3 - fry</li><li>4 - smolt</li><li>5 - grilse</li><li>6 - adult</li><li>(blank) missing data</li></ul>

Table 3 (cont'd)

---

Catch	-the total catch by species and group
Tide height meters	-the tide height in meters at the time of each set
