Canadian Data Report of Fisheries and Aquatic Sciences

Data reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of data reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Data reports are not intended for general distribution and the contents must not be referred to in other publications without prior written authorization from the issuing establishment. The correct citation appears above the abstract of each report. Data reports are abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1-25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26-160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was introduced with the publication of report number 161.

Data reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

Rapport statistique canadien des sciences halieutiques et aquatiques

Les rapports statistiques servent à classer et à archiver les compilations de données pour lesquelles il y a peu ou point d'analyse. Ces compilations auront d'ordinaire été préparées à l'appui d'autres publications ou rapports. Les sujets des rapports statistiques reflètent la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports statistiques ne sont pas destinés à une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports statistiques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1 à 25 de cette série ont été publiés à titre de relevés statistiques, Services des pêches et de la mer. Les numéros 26 à 160 ont été publiés à titre de rapports statistiques du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 161.

Les rapports statistiques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

ABSTRACT

Spilsted, B.P. 1994. Coho catch data from northern B.C. commercial fisheries for the years 1980 to 1992. *Can. Data Rep. Fish. Aquat. Sci.* 943: 140 p.

Sales slip catch data of coho salmon (*Oncorhynchus kisutch*) harvested from northern B.C. commercial gillnet, seine and troll fisheries operating in statistical areas 1 to 10 are reported by statistical week for the years 1980 to 1992. 5-year catch averages for the period from 1970 to 1989, and a 3-year average for the years 1990 to 1992 are also presented.

RÉSUMÉ

Spilsted, B.P. 1994. Coho catch data from northern B.C. commercial fisheries for the years 1980 to 1992. *Can. Data Rep. Fish. Aquat. Sci.* 943: 140 p.

Les données de capture obtenues à partir de bordereaux de vente du saumon coho (*Oncorhynchus kisutch*) pêché commercialement dans le nord de la Colombie-Britannique au filet maillant, à la senne coulissante et à la traîne, dans les zones statistiques 1 à 10, sont déclarées par semaine statistique, pour la période de 1980 à 1992. De plus, les moyennes de captures établies sur cinq ans sont présentées pour les années 1970 à 1989, tandis qu'une moyenne de trois ans est donnée pour les années 1990 à 1992.

INTRODUCTION

Coho catch information for northern B.C. was previously summarized to 1989 as part of a Pacific Salmon Commission, Coho Technical Committee report (Anonymous, 1991). This document summarizes coho salmon (*Oncorhynchus kisutch*) sales slip catch data to 1992, from gillnet, seine and troll fisheries in the North Coast areas of British Columbia (Figure 1). The information was obtained from the Department of Fisheries and Oceans (DFO) Pacific Commercial Salmon Catch Spreadsheet Program maintained at the Pacific Biological Station in Nanaimo. Harvest information from these fisheries is formally collected via a sales slip reporting system (Holmes and Whitfield, 1991). Each time a commercial vessel sells its catch, a sales slip is completed and a copy sent to DFO. Information recorded on the sales slip includes gear type, number of each species, date of sale (or landing), number of days fished and statistical area of catch.

METHODS

Holmes and Whitfield (1991) have provided an introduction to the salmon catch data spreadsheet program, and outline procedures for using the program to select data and produce reports. Commercial salmon catch data summarized in this report provides catch information from fisheries selected for year, gear type, species, DFO statistical area and DFO statistical week.

Commercial gillnet, seine, net (gillnet + seine) and troll catch data of coho salmon is provided for DFO statistical areas 1 to 10. The data is reported as number of fish landed (pieces) by statistical week for the years 1980 to 1992, with 5-year catch averages for the period from 1970 to 1989 and a 3-year average for the years 1990 to 1992. Catch data summarizing harvests from the Queen Charlotte Islands (QCI) (statistical areas 1, 2E and 2W), North Coast (statistical areas 3, 4, 5) and Central Coast (statistical areas 6, 7, 8, 9, 10) is also provided.

It should be noted that the data contained in this report has not been corrected to reflect actual dates of harvest. Sales slip data, as previously indicated in the introduction, reflects date of sale or landing, not the actual date of catch. Gillnet and seine sales slip data is generally considered to be closer to the actual catch date than troll sales slip data due to the nature of the fisheries.
