HOUSING MARKET INFORMATION

SENIORS' HOUSING REPORT Atlantic

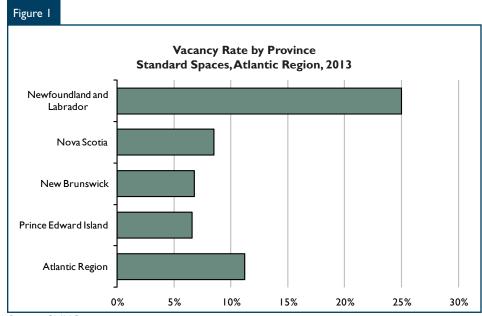

Date Released: 2013

Highlights

- The overall vacancy rate for standard spaces¹ in the Atlantic Region was 11.2 per cent in 2013 compared to 14.3 per cent in 2012.
- Vacancy rates were lowest in Prince Edward Island at 6.6 per cent, followed by New Brunswick at 6.8 per cent and Nova Scotia at 8.5 per cent. The vacancy rate in Newfoundland and Labrador remained higher than the rest of the region at 25 per cent in 2013, due to a higher concentration of nonstandard spaces² in the surveyed universe.
- The average rent for a standard space in the Atlantic Region was \$2,137 per month in 2013 compared to \$2,120 in 2012.

¹A standard space is a space that is occupied by a resident who receives a standard level of care of less than 1.5 hours per day.

²A non-standard space is defined as a space that provides heavy care, offers respite accommodation or offers below market or subsidized rents.

Nearly One-Third of Atlantic Standard Spaces in New Brunswick

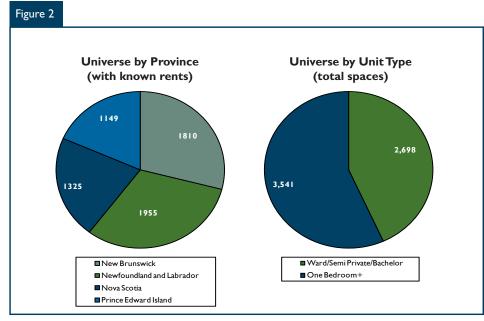

CMHC's 2013 Senior's Housing Survey included 127 residences housing 5,889 residents in 6,239 spaces. The majority of spaces, over 4,800, were identified as standard spaces. A standard space is a space that is occupied by a resident who receives a standard level of care (as opposed to heavy care) of less than 1.5 hours per day. The remaining 1,430 spaces surveyed were non-standard spaces. A non-standard space is defined as a space that provides heavy care, offers respite (temporary/short term) accommodation or offers below market or subsidized rents.

Nearly one-third of standard spaces surveyed in the Atlantic Region were located in New Brunswick. Standard spaces in New Brunswick accounted for 85 per cent of total spaces in the province. The largest universe of non-standard spaces was reported in Newfoundland and Labrador where 46 per cent of spaces surveyed were considered non-standard.

Among standard spaces in the Atlantic Region, one-bedroom plus units were most common at nearly 60 per cent of the total market. Non-standard spaces were more evenly divided with 48 per cent being one-bedroom plus units while the remaining 52 per cent classified as ward, semi-private or bachelor spaces.

Vacancy Rates in Retirement Homes Declined in 2013

CMHC's annual survey of retirement homes in Atlantic Canada found that vacancies for both total and standard

Source: CMHC

spaces declined in 2013.

An aging population in the Atlantic Region contributed to stimulating demand for retirement home living and pushed standard space vacancies down to 11.2 per cent this year from 14.3 per cent in 2012. Vacancies declined in three of four provinces with only Nova Scotia reporting an increase in 2013. Rates in Nova Scotia climbed 1.6 percentage points to 8.5 per cent this year.

Standard space vacancies were lowest in Prince Edward Island in 2013 at 6.6 per cent. In 2012, vacancies in PEI stood at 8.2 per cent. The second lowest vacancy rate was reported in New Brunswick where rates declined 0.9 percentage points to 6.8 per cent this year.

In Newfoundland, the vacancy rate for standard spaces declined from 38.7 per cent in 2012 to 25 per cent in 2013. Vacancies remained higher than in the rest of the region as a relatively higher number of total spaces in Newfoundland were non-

standard spaces (46 per cent were non-standard). The vast majority of non-standard spaces in Newfoundland receive government subsidies and/or provide additional levels of care. For these reasons, as in 2012, demand was higher for these non-standard spaces. Reduced levels of demand for the remaining (standard) spaces resulted in a relatively high vacancy rate in the province and impacted the overall vacancy rate for the Atlantic Region.

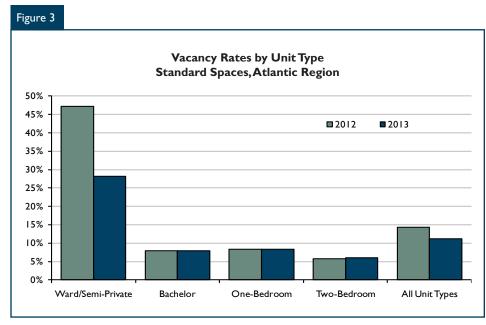

Vacancy rates by unit type were mixed in 2013. In the standard space ward and semi-private segment, a sharp decline in vacancies in Newfoundland and Labrador significantly impacted the regional vacancy rate, resulting in a 19 percentage point decline to 28 per cent. In the bachelor and studio segment, declining vacancies in Nova Scotia and Prince Edward Island were largely offset by a sharp increase in New Brunswick, resulting in little change regionally at 7.9 per cent in 2013.

In the one and two-bedroom plus segments, a significant number of

standard spaces in the Atlantic Region were in New Brunswick. As a result, changes to the vacancy rate in New Brunswick have a considerable impact on regional rates. In 2013, increasing one-bedroom vacancy rates in Newfoundland, Nova Scotia and Prince Edward Island were offset by a decline in New Brunswick, leaving the regional vacancy rate unchanged at 8.3 per cent. In the two-bedroom plus market, climbing vacancies in both New Brunswick and Nova Scotia pushed the regional vacancy rate up to six per cent this year.

Standard spaces in the Atlantic Region renting for less than \$1,500 per month reported the lowest vacancy rate for the second consecutive year at 4.6 per cent. In the \$2,500 plus segment, a sharp decline in vacancies in New Brunswick contributed to regional vacancies declining from 9.5 per cent last year to 7.5 per cent in 2013.

In terms of total spaces (standard plus non-standard), vacancies declined in each province this year with the exception of Nova Scotia. In

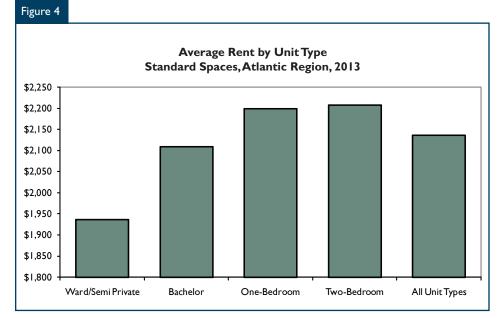

Source: CMHC

Newfoundland and Labrador, declining vacancies in Labrador, the Western Region and the Avalon Region resulted in the provincial vacancy rate falling to 14.9 per cent from 17 per cent in 2012. In Prince Edward Island, an overall increase in demand for senior's accommodations resulted in decreasing vacancies in Kings, Prince and Queens counties. The vacancy

rate for standard and non-standard spaces in PEI declined nearly two percentage points this year to 5.5 per cent.

In New Brunswick, three-quarters of surveyed spaces were located in the Southwest and Southeast regions where total vacancies declined to 4.3 per cent this year. As a result, the provincial vacancy rate decreased from 7.3 per cent to 6.1 per cent in 2013. In Nova Scotia, a decline in the vacancy rate in Halifax (where 42 per cent of surveyed spaces were located) to 1.6 per cent was more than offset by increasing vacancies in other parts of the province, which pushed the provincial vacancy rate for all spaces up 1.3 percentage points to 8.5 per cent.

Source: CMHC

Services and Amenities

A number of structures in the 2013 survey included services and amenities in rental fees. These services and amenities, which are generally not included in the purpose built rental market, included meals, on-site medical service, a registered nurse,

a pharmacy and recreational and entertainment activities and facilities.

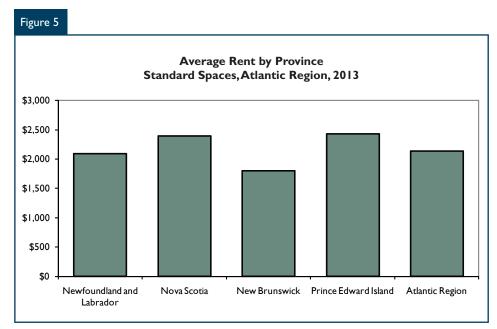

Three meals per day were included in 84 per cent of structures surveyed in the Atlantic in 2013. In less than three per cent of structures surveyed, residents had the choice whether to participate in the meal plan or not. The remaining 13 per cent of structures included either one or two meals per day in monthly rental fees.

A 24-hour bell service was offered in nearly 83 per cent of regional structures surveyed. The second most common amenity was transportation service, which was available in 75 per cent of structures. Internet access was offered in 56 per cent of structures while on-site medical care was available in nearly 46 per cent of surveyed structures in 2013. A registered nurse was available in 28 per cent of structures surveyed this year.

Little Change in Average Rents in 2013

The average rent for a standard space in the Atlantic Region was \$2,137 in 2013 compared to \$2,120 in 2012. At the provincial level, rents were mixed as Newfoundland and Labrador and Nova Scotia reported slight increases while Prince Edward Island recorded a small decline. In New Brunswick, the average rent of a standard space reported little change this year at \$1,807.

In Nova Scotia, 53 per cent of standard spaces surveyed rented for over \$2,500 per month. In Prince Edward Island, the province with the highest average rent in 2013 at \$2,433, over 25 per cent of spaces rented for more than \$2,500 a month. In New Brunswick, the province with the lowest average rent this year, half of all standard spaces were priced at \$1,500

Source: CMHC

or less.

The most expensive unit types in the 2013 survey were one-bedroom and two-bedroom plus units at \$2,200 and \$2,208, respectively. One-bedroom units were most expensive in Prince Edward Island at over \$2,900 per month.

Methodology

Canada Mortgage and Housing Corporation conducts the Seniors' Housing Survey in February and March. This annual survey became national in scope in 2009, covering all centres in each of the ten provinces. Both private and non-profit residences are included in the survey universe. Non-profit residences must have at least one unit that is not subsidized.

To be eligible for inclusion in the 2013 survey results, a residence must:

- ✓ Have been in operation for at least one year, i.e., before January 2012
- ✓ Have at least 10 rental units (Quebec, Ontario, Prairies) or 5 rental units (Atlantic provinces and B.C.)
- ✓ Offer an on-site meal plan
- ✓ Not provide high levels of healthcare (defined as 1.5 hours or more of care per day) to all of their residents. Nursing homes and long-term care homes are examples of residences that were not included in the survey.
- ✓ Offer rental units. Life lease units and owner-occupied units are excluded from this survey.
- ✓ Have at least 50% of residents who are 65 years of age or older.

The Seniors' Housing Survey is a census and not a sample survey, therefore, all seniors' residences in Canada meeting these criteria are included to be part of this survey.

Survey data were obtained through a combination of telephone interviews and fax and email responses. Information was obtained from the owner, manager, or residence administrator. Survey results reflect market conditions at the time of the survey. Survey results have been weighted to adjust for non-responses, to ensure that they are reflective of the universe. The level of statistical reliability is noted in the data tables. For more information on the reliability of the data please click here.

All statistics published, excluding information on new market supply, include only those residences that have been in operation for at least one year.

Definitions

Space: A space is a residential area that is rented out. Examples of spaces include: one half of a semi-private unit, a private or bachelor unit, a one-bedroom unit and a two-bedroom unit. In most cases a space is the same as a unit. The exception is the case where a unit has been divided to rent to multiple residents. Semi-private and ward units are an example of this. Unless otherwise indicated, data for spaces are for all unit types.

Standard Space: A space where the resident does not receive high-level care (i.e., the resident receives less than 1.5 hours of care per day.) or is not required to pay an extra amount to receive high-level care. Regional terms for this type of space may vary across the country.

Heavy Care Space: A space where the resident is paying an extra amount to receive high-level care (1.5 hours or more of care per day). Examples include Alzheimer, Dementia and mobility support residents.

Respite Space: A space used to provide temporary accommodation for a senior who normally lives in another place and not at the residence.

Non-market or Subsidy Space: A space where the rent received for the unit is less than market rent or where the resident occupying the unit is subsidized.

Rent: Refers to the actual amount a resident pays per month for their accommodation space and all mandatory services. For vacant spaces, the rent is the amount the owner is asking for the space.

Vacancy: A space is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

Capture Rate: The main age group living in seniors' residences are persons aged 75 years and older. Capture rate in a centre is the ratio of the total number of residents living in the survey universe divided by its estimated 75+ population, expressed as a percentage.

Acknowledgement

The Seniors' Housing Survey could not have been conducted without the cooperation of the residence owners and their staff. CMHC acknowledges their time and assistance in providing accurate information. As a result of their contribution, CMHC is able to provide data and analysis that benefits the entire industry.

Confidentiality

All information provide through this survey is kept strictly confidential and only used by CMHC to generate statistics and data sets that do not allow for the identification of individuals, households, businesses or buildings.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.

For more information, visit our website at www.cmhc.ca or follow us on Twitter, YouTube and Flickr.

You can also reach us by phone at I-800-668-2642 or by fax at I-800-245-9274. Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call I-800-668-2642.

The Market Analysis Centre's (MAC) electronic suite of national standardized products is available for free on CMHC's website.
