

HOUSING NOW

Vancouver and Abbotsford CMAs

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: January 2013

Vancouver CMA New Construction

Residential housing starts in the Vancouver Census Metropolitan Area (CMA) totalled 1,187 units in December 2012, bringing the annual total in 2012 to 19,027 starts, nearly seven per cent higher than their 2011 level. Vancouver CMA housing starts surpassed the ten-year average

of 16,762 starts per year. Growth in 2012 was driven by multiple-family construction, which includes apartments, semi-detached homes, and townhouses. Single-detached construction, on the other hand, decreased compared to the previous year (Figure 1).

Most of the housing starts in 2012 were concentrated in the cities of Vancouver, Surrey, and Coquitlam.

These three cities, having the most multiple family starts, together contributed more than half of the new housing activity in the Vancouver CMA. The composition of multiple family housing starts, however, was very different across the three cities. In the City of Vancouver, 95 per cent of multiple family housing starts were apartment units, 69 per cent of which were in high-rise structures. In the City of Coquitlam, apartment units accounted for about 83 per cent of multiple family housing starts but the majority of these were in low-rise structures. In contrast, townhouse and semi-detached units accounted for 59 per cent of the multiple family housing starts in the City of Surrey (Figure 2).

An increase in the completed and unsold inventory of single-detached properties in the Vancouver CMA may have played a part in the lower level of single-detached housing starts in 2012. Sales of completed single-detached homes declined about eight per cent and pushed the number of completed and unsold single-detached homes to 1,058 units by year-end 2012 from 743 units in December 2011. Comparing the median and average prices of sold new units with those of the unsold inventory, demand seems to have shifted to lower priced houses. Such seeming fiscal prudence may also explain the steady demand for freehold single-detached properties with laneway homes – about 91 per cent of these home types in the completed inventory were sold in 2012 compared to 87 per cent in 2011.

Greater Vancouver Resale Market

The Greater Vancouver resale market ended 2012 in buyers' market territory due to slowing sales and listing activity. Fourth quarter MLS®

Figure 2

Source: CMHC

Figure 3

Source: CMHC, adapted from REBGV

* Listings that were cancelled, expired, or terminated

sales were almost 25 per cent lower compared the same period a year ago. The decline in MLS® sales was evident among all housing types and across all municipalities. This rounded 2012 out with an annual total of 25,445 MLS® sales, below the ten-year average of 35,507 MLS® sales per year.

Housing market conditions remained in favour of potential buyers during

the fourth quarter of 2012. With the slowdown in MLS® sales outpacing the decline in the number of new MLS® listings, potential buyers had plenty to choose from and, theoretically, a better edge in price negotiations. However, the number of sellers who were willing to transact at less than their asking price were out-numbered by those who preferred to withdraw

their properties from the market than sell at a lower than asking price (Figure 3). This partly explains the decline in MLS® sales as well as the limited drop in MLS® prices observed during the fourth quarter of 2012.

MLS® prices pointed to a softer fourth quarter in 2012 compared to the fourth quarter of 2011. Average MLS® prices in the Greater Vancouver resale market edged down 3.8 per cent, mainly due to a change in the composition of sales. During the fourth quarter of 2012, the share of luxury home sales¹ dropped as did the share of single-detached home sales compared to the same period a year earlier. Both single-detached and condominium apartment homes registered an average MLS® price decline of 3.7 and 3.3 per cent, respectively. The average MLS® price of townhouses edged up 1.6 per cent during the same period. Sales of townhouses represent a relatively small portion – about 17.5 per cent – of overall MLS® sales.

Average MLS® prices tend to be skewed by data extremes. In this case, median MLS® prices may be more representative of the market norm. Year-over-year comparison of median MLS® prices during the fourth quarter of 2012 showed a similar trend as average MLS® prices – single-detached and condominium apartments were lower by 3.3 and 4.6 per cent respectively, whereas townhouses stayed flat (Figure 4.) Within the Greater Vancouver Real Estate Board area, lower median MLS® prices were observed in nearly all municipalities, including Vancouver West, Vancouver East, and Richmond.

Despite slower market conditions, there have been signs of stabilization in the resale market. Since the second quarter of 2012, the number of new

Figure 4

Source: CMHC, adapted from REBGV

listings has begun to show year-over-year declines. As well, shifts in average and median MLS® listing prices have also started to mirror those of sold prices, which suggests that the gap between sellers' and buyers' expectations are narrowing.

Abbotsford-Mission CMA

New Home Construction

New home construction activity slowed in the Abbotsford-Mission CMA in 2012. Higher inventory of completed but unsold new housing and lower resale housing activity partly explain this reduction in housing starts. This slowdown was reported in all housing types but more so for the multiple-family sector. Single-detached housing starts fell 19 per cent to 198 units from 245 units in 2011. Townhouse and semi-detached housing starts fell 34 per cent and apartment housing starts bore the brunt of the decline falling 46 per cent in 2012. Sales of completed new homes in the Abbotsford-

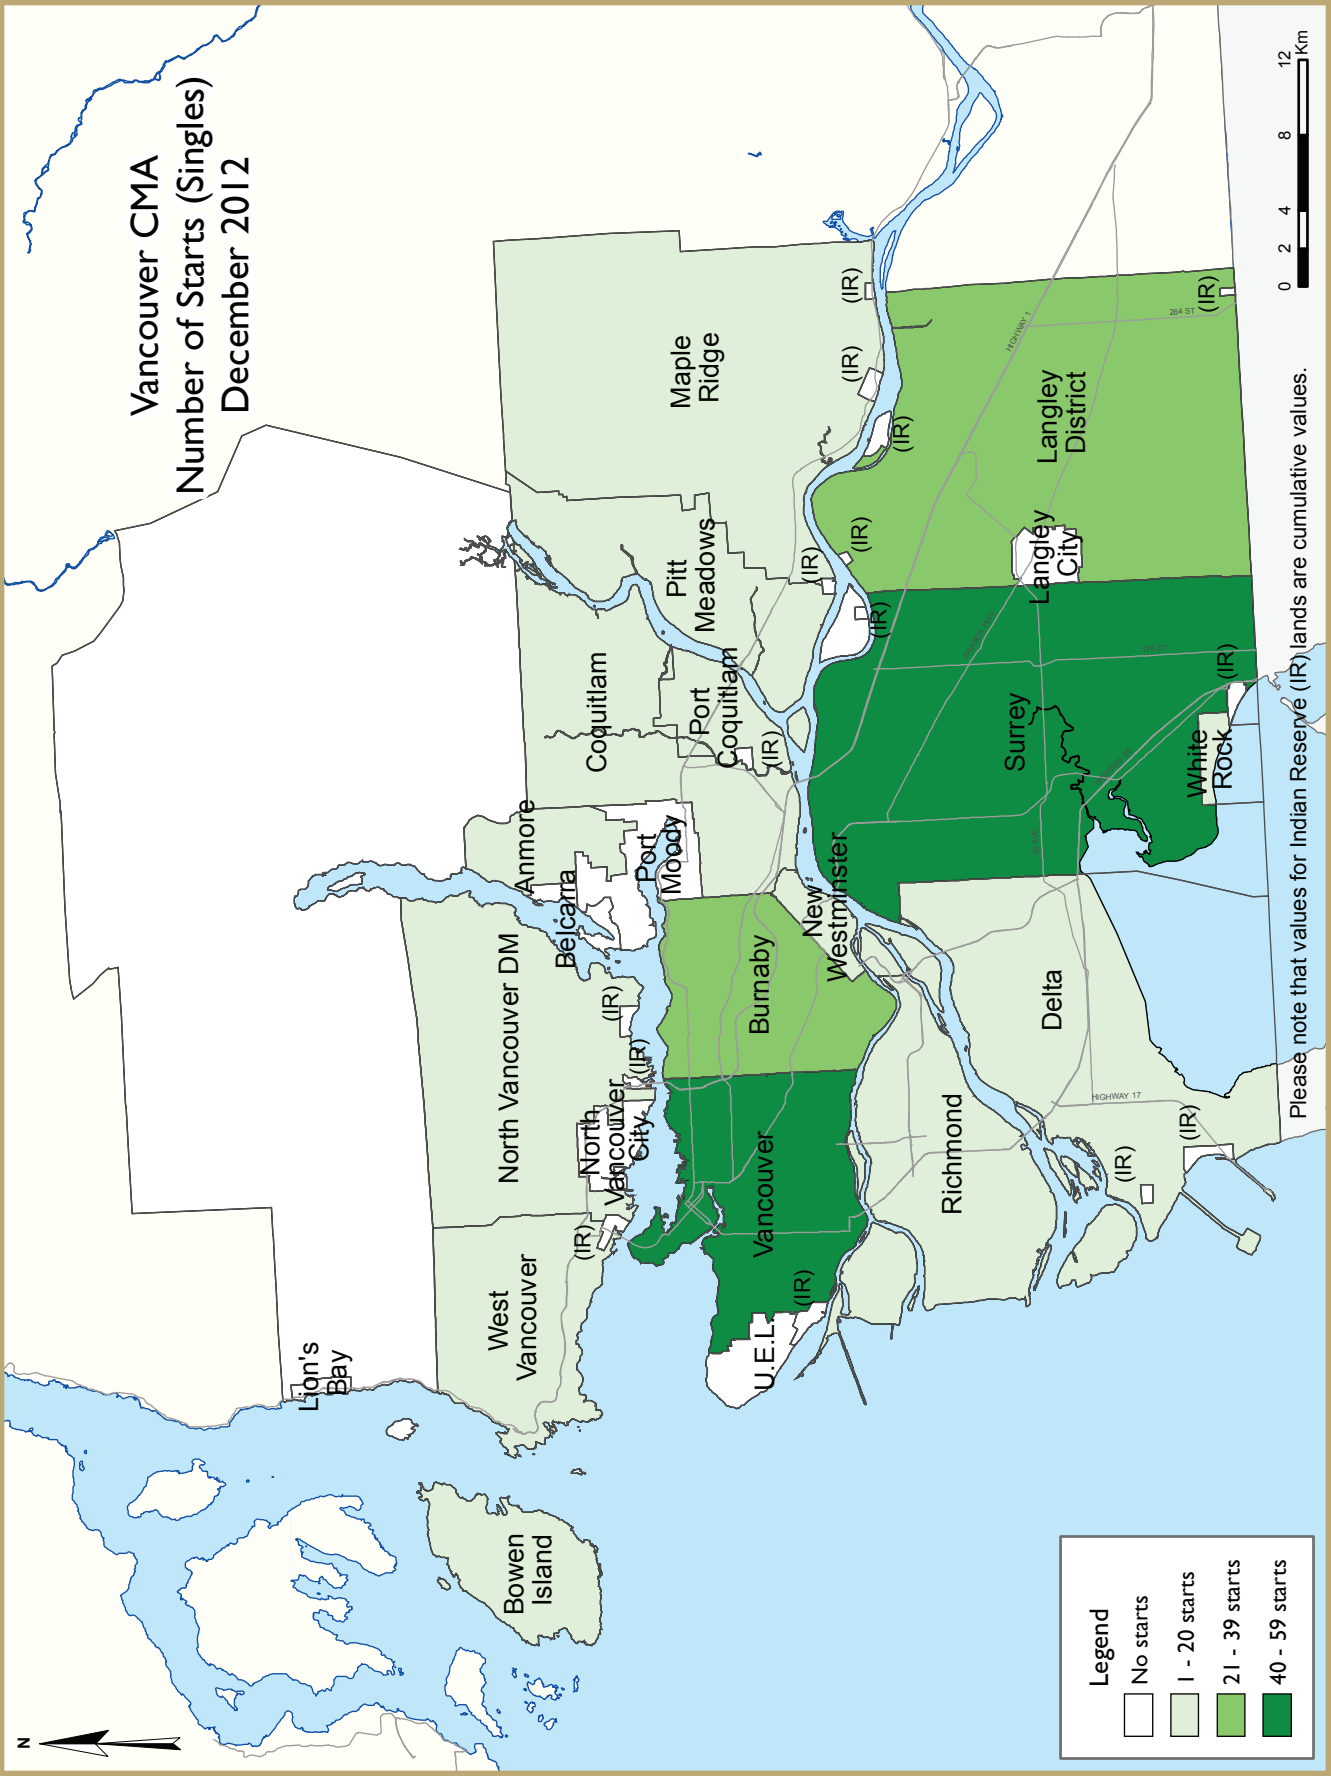

Mission CMA fell as well, pushing the inventory of completed but unsold units higher to 201 units in December 2012 from 123 units in December 2011.

Resale Market

Resale market conditions remained in balanced territory in the fourth quarter of 2012 in the Fraser Valley Real Estate Board area. Both sales and prices fell, 18 and five per cent, respectively, in the last quarter compared to the fourth quarter of 2011. For the year, however, the Fraser Valley Real Estate Board area gained market share in terms of the number of MLS® sales – from 31 per cent in 2011 to 34 per cent in 2012 – at the expense of the Greater Vancouver Real Estate Board area.

¹ Single detached homes sold for \$3 million or more, and condominium apartments sold for \$1 million or more.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
