Vancouver and Abbotsford CMAs

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: July 2013

Vancouver CMA New Construction

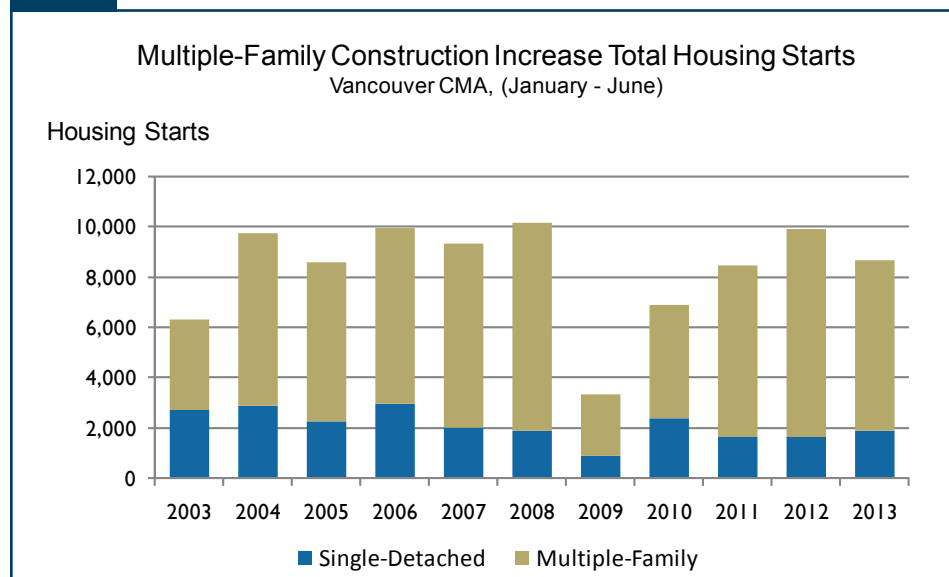

The Vancouver Census Metropolitan Area (CMA) recorded 1,928 housing starts in June 2013, compared to 2,252 units for the same month, prior year. However, total housing starts for June 2012 were unusually high, well above the 10 year June average of 1,439.

A rise in the number of apartment

condominium starts helped boost total housing starts with 15 apartment condominium structures started in June, totalling 1,120 units.

Higher than average multiple-family housing starts contributed to the total number of starts being above the 10 year average for the second quarter of 2,402 units. (Figure 1) Part of the contribution has been an increase in apartment rental starts, including

non-market rental units, throughout various municipalities in the Vancouver CMA. Coquitlam, Langley Township and Surrey have had significant increases in rental construction this year over 2012 totals.

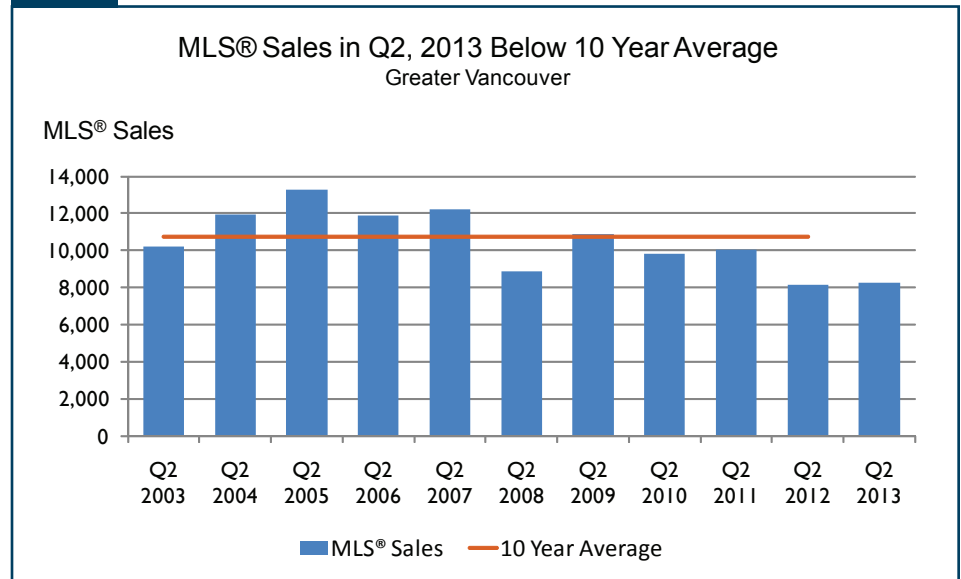

Single-detached housing starts rose in the Vancouver CMA in the second quarter.¹ The largest increase in year-to-date single-detached housing starts by volume compared to 2012 was recorded in the Eastside neighbourhood of Vancouver City at 131 units. In contrast, the largest decrease by volume during the same time period was in Surrey at 55 units. Overall, total single-detached housing starts for the first half of this year were up 10 per cent from 2012 levels.

Total housing starts for the first half of 2013 reached the second highest level since 2008. Comparisons with last year's housing starts can be misleading as the first half of 2012 recorded one of the highest levels in the past 20 years in the Vancouver CMA. Builders continue to add supply despite an increase in the number of new units that are completed and unabsorbed in the market. The number of homes available for immediate move-in has risen through the first six months of the year, ending 20 per cent above June 2012 totals.²

Abbotsford-Mission CMA New Construction

Greater multiple-family construction activity increased total housing starts in the Abbotsford-Mission CMA. There were 185 multiple-family

Figure 2

Source: Canadian Real Estate Association, Real Estate Board of Greater Vancouver

housing starts in the second quarter of 2013 compared to 49 in the same quarter last year. Rental housing has seen a boost in 2013 as all apartment units that have started this year are intended for rental purposes. All condominium construction activity in the CMA has been in the form of townhouse projects.³ For the first half of 2013, there were 400 total housing starts in the Abbotsford-Mission CMA compared to 222 in the same period in 2012.

Greater Vancouver MLS®⁴ Market

In areas covered by the Real Estate Board of Greater Vancouver, total MLS® sales in the second quarter of 2013 totalled 8,271 compared to 8,132 in the same period last year. Sales increases in the second quarter

can be attributed to greater sales in May and June, which outpaced sales during the same months in 2012. However, total MLS® sales were below the second quarter 10 year sales average of 10,722 units. (Figure 2) Ending the first half of 2013, total MLS® sales were nine per cent below last year's levels.

Second quarter MLS® single-detached sales tallied 3,397, up five per cent from the same quarter in 2012. Increased sales of single-detached homes were recorded in centres clustered around downtown Vancouver City: Vancouver Westside, Vancouver Eastside, Richmond, North Vancouver and West Vancouver. This increase also raised the market share for single-detached homes from 40 per cent in Q2, 2012 to 42 per cent in Q2, 2013.⁵

¹ Excludes single detached houses that are primarily intended for rental purposes, such as laneway homes in Vancouver City.

² Excludes all dwelling types primarily intended for rental purposes.

³ Townhouse are classified as row in the data tables.

⁴ MLS® is a registered certification mark of the Canadian Real Estate Association (CREA)

⁵ Market share of single detached houses refers to the ratio of single detached homes sold in comparison to total MLS® sales.

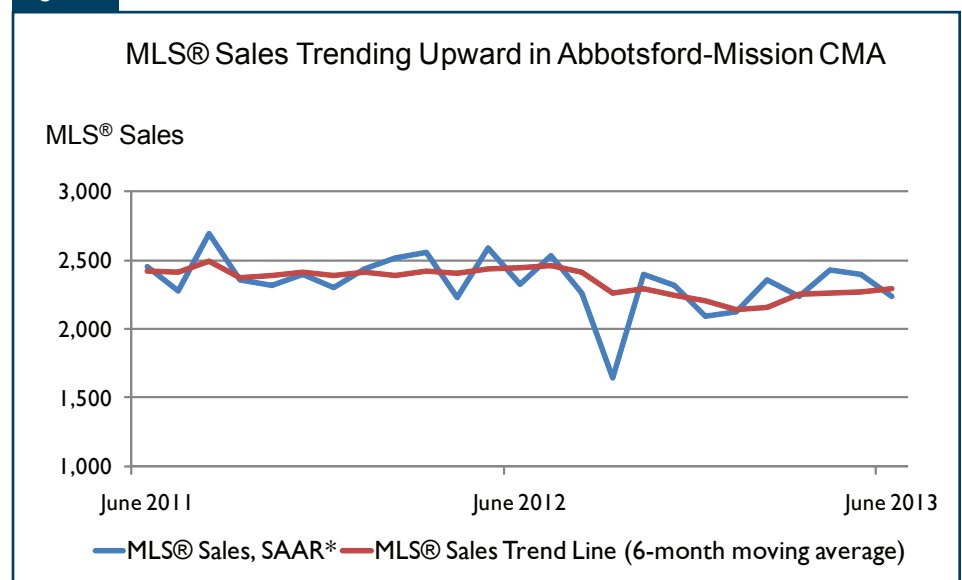

Higher demand for more expensive single-detached homes in the second quarter contributed to the total average MLS® price moving five per cent above last year's average price for the same period. This increase contributed to moving the year-to-date total average MLS® price two per cent above last year's average. Another factor that has supported prices is the decline in the number of homes listed for sale, especially for multiple-family homes (townhouses and apartments). The decline in new listings for all dwelling types in the first half of this year has outpaced the decrease in sales, limiting choice for buyers. So far, the average MLS® price for townhouses was one per cent below last year's average at \$560,906, while prices for apartment condominiums was even at \$447,820 in the same time frame.

Abbotsford-Mission MLS® CMA

Second quarter MLS® sales in the Abbotsford-Mission CMA were 721, the fourth consecutive quarterly decline in year-over-year comparisons. Home sales in the Abbotsford-Mission area were also below the 10 year sales average for the second quarter of 991. Despite the decline in total volume in the second quarter, sales for the past three months have slowly trended upward.⁶ (Figure 3)

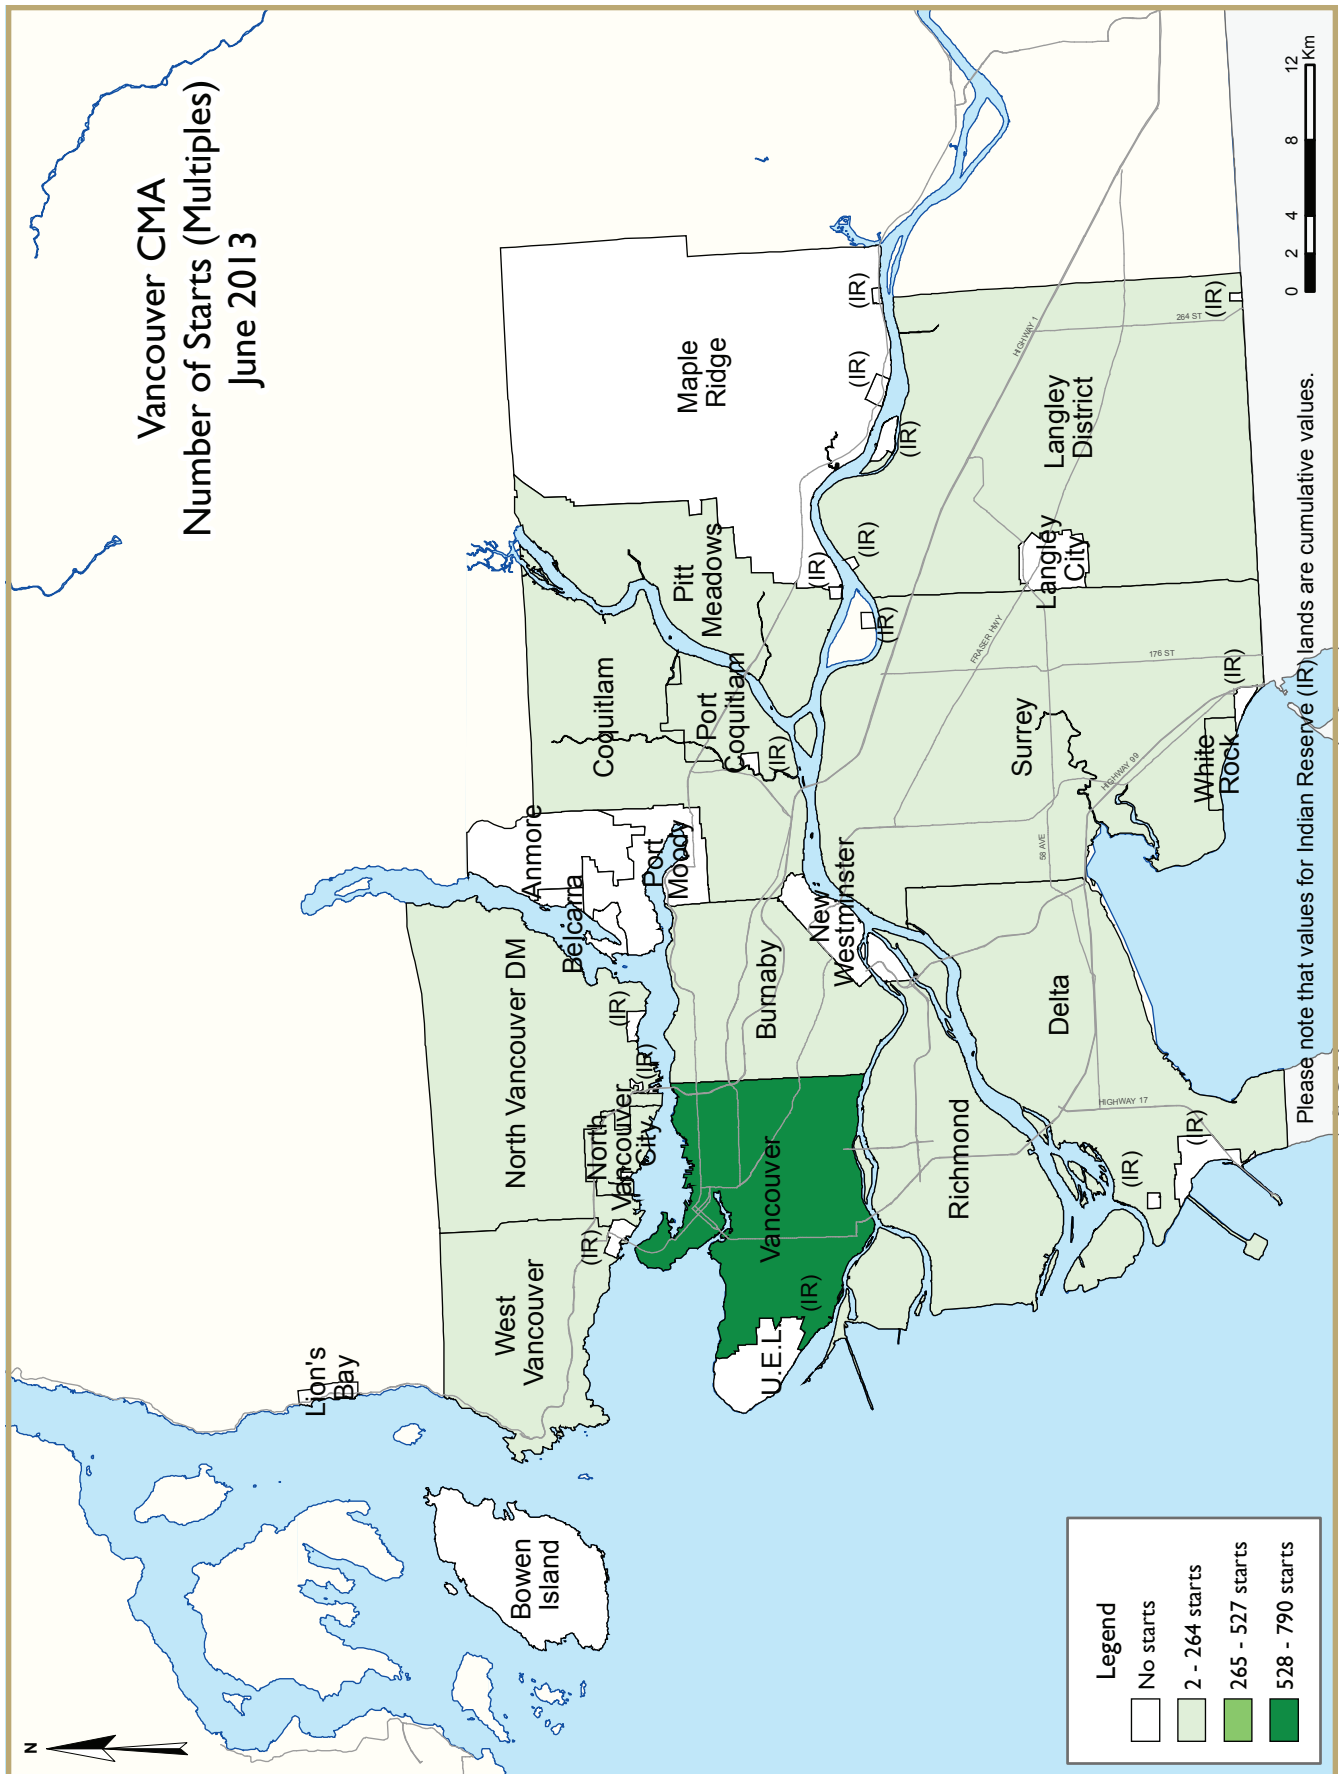

Despite the decline in sales volumes, the resale market maintained balanced conditions through the second quarter. Like Greater Vancouver, the decline in new listings has outpaced the decline in sales, limiting the number of homes for sale. Lower supply in the resale market has stabilized prices in the area. The average price for all sales during the first six months of 2013 in the CMA was \$341,696, similar to the price during the same period last year.

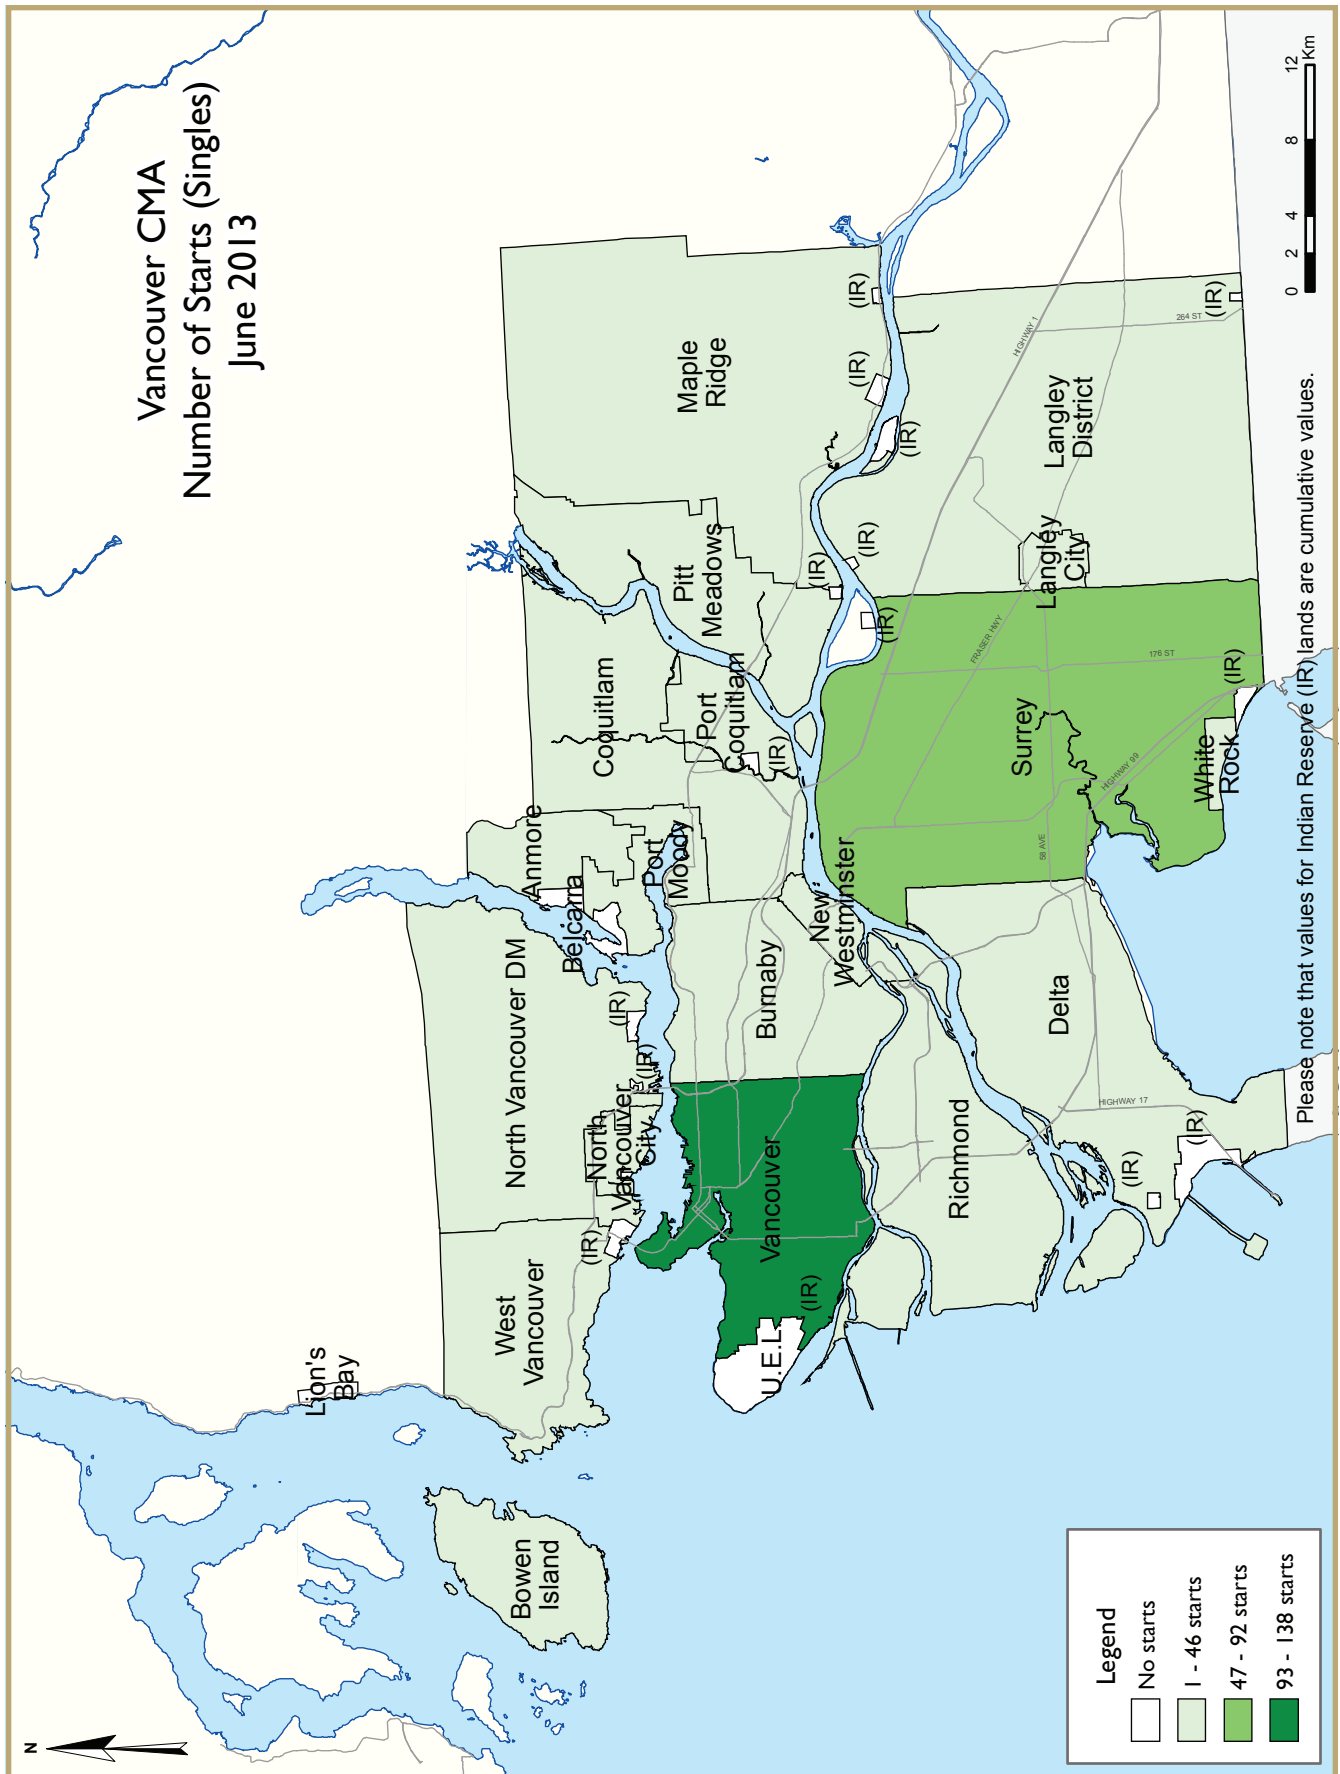

Figure 3

Effective January 2013, single-detached houses with an attached accessory suite are recorded as 1 unit "Ownership, Single" and the accessory suite as 1 unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as 2 units, "Ownership, Freehold, Apt + Other" in some markets, including Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency, but affects year-over-year comparisons in 2013 for select categories in this Table.

Effective January 2011, data includes market housing on First Nations reserve lands in urban areas

Source: CMHC (Starts and Completions Survey)

Effective January 2013, single-detached houses with an attached accessory suite are recorded as 1 unit "Ownership, Single" and the accessory suite as 1 unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as 2 units, "Ownership, Freehold, Apt + Other" in some markets, including Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency, but affects year-over-year comparisons in 2013 for select categories in this Table.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2011 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modeled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A **“Single-Detached”** dwelling (also referred to as **“Single”**) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A **“Semi-Detached (Double)”** dwelling (also referred to as **“Semi”**) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A **“Row (Townhouse)”** dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term **“Apartment and other”** includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The **“intended market”** is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A **“Rural”** area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
