

HOUSING MARKET OUTLOOK

Atlantic Region Highlights

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: Fourth Quarter 2013

Residential Construction Down in Third Quarter

Figure 1

Source and Forecast: CMHC

Overview

Housing starts in Atlantic Canada decreased close to 32 per cent in the third quarter of 2013 compared to last year, as both single and multiple starts declined. Single starts were down 19 per cent and multiple starts were down close to 45 per cent.

The decrease in starts for the quarter was evident in all four provinces: Newfoundland and Labrador (NL), New Brunswick (NB), Prince Edward Island (PEI) and Nova Scotia (NS).

In NS, total starts in the third quarter were down close to 24 per cent as a result of a 20 per cent decrease in single starts and 28 per cent decrease in multiple starts.

Activity in NL was down close to 40 per cent due to a 70 per cent decline in multiple starts, whereas single starts declined less than 23 per cent in the quarter.

¹The outlook is subject to uncertainty. Although point forecasts are presented in this publication, CMHC also presents forecast ranges and risks where appropriate. The forecasts included in this document are based on information available as of October 16, 2013

In NB, total starts were down 25 per cent as a result of a nine per cent decline in single starts, whereas multiple starts were down close to 40 per cent in the quarter.

For PEI, starts were down close to 60 per cent due to a decline of close to 75 per cent in multiple starts. In the single-detached segment starts decreased close to 35 per cent in the quarter.

Housing Starts to Decline

Housing starts in Atlantic Canada are expected to fall 20 per cent in 2013 and a further three per cent in 2014. Multiple starts, including apartments, are forecast to decline close to 22 per cent to 4,540 units in 2013 and close to six per cent in 2014, to 4,285 units. Single-detached starts are also expected to decline about 18 per cent in 2013 to 5,615 units, followed by a further one per cent decline in 2014 to 5,570 units.

MLS® Outlook

MLS® Sales in the third quarter of 2013 were down marginally about three per cent. The full-year forecast for 2013 is for a decrease of 10 per cent. In 2014, expect a small rise of less than one per cent in sales.

The average price of an existing home was up close to three per cent in the third quarter. Existing prices for 2013 are forecast to rise less than one per cent, with a 1.4 per cent increase forecast for 2014.

Provincial Economic Outlook

Although aggregate GDP growth for Atlantic Canada will remain below two per cent in 2013 and 2014, growth is expected to improve in 2013 to 1.6 per cent, from less than

0.5 per cent in 2012. In 2014, GDP growth will report a small decline to 1.3 per cent.

NL will be the leader in economic growth in 2013 as GDP is expected to rise to four per cent, with growth expected to moderate to 1.8 per cent in 2014. The rise in growth in 2013 is due to a rebound in oil production and higher oil prices. The recovery in economic growth in 2013 has been supported by consumer spending and additional private sector energy investment activity. Recent news concerning new potential oil fields outside of the current production areas is also considered positive for the province's economic future.

In NL, the rate of growth in the labour market will slow in 2013 as employment is projected to rise 1.6 per cent compared to 2.3 per cent in 2012. In 2014, the rise in growth will be reduced to less than one per cent as private sector investment activity slows from levels experienced over the last three years and projects currently under construction reach the completion stage. A minimal rise in the labour force will result in the unemployment rate inching down slightly from 11.4 per cent in 2013 to 11.3 per cent in 2014.

PEI's economy is forecast to grow by 1.5 and 1.3 per cent in 2013 and 2014, respectively. The decline in the Canadian dollar favoured tourism and the manufacturing sector, including, aerospace, agriculture and seafood processing. During the first seven months of 2013, manufacturing was up close to four per cent and tourism has showed a turnaround in traffic after a slowdown earlier in the year.

Employment is forecasted to grow by 1.8 per cent in 2013, before slowing to 1.1 per cent in 2014, as economic activity softens. Labour force growth

is expected to outpace employment growth in 2014 resulting in the unemployment rate rising from 11.2 per cent in 2013, to 11.4 per cent in 2014.

NS is expected to record economic growth of close to one per cent in 2013 and 1.2 per cent in 2014. Economic conditions are expected to improve in 2014 as the manufacturing sector sees a return to positive growth as site development and pre-engineering work at the Halifax Shipyard continues. Furthermore, the completion of a second natural gas project should add to provincial production in late 2013 although continuing delays have prevented production from beginning since early 2012.

Employment growth is projected to be close to zero in 2013 compared to a rate of growth of 0.6 per cent in 2012. In 2014, total employment will grow by 0.4 per cent as a result of a moderate rise in private sector investment activity. A lower level of growth in employment in 2014 compared to labour force growth will result in the unemployment rate rising to 9.1 per cent which will be the highest level reported since 2010.

For NB, economic growth is expected to remain weak over the forecast period, with 0.2 per cent growth forecast for the province in 2013 and just under one per cent in 2014. The current economic weakness stems mainly from a reduction in capital investment. The natural resources sector, a key driver of economic growth for the province, is expected to post mixed results in both 2013 and 2014 as improvement in the forestry sector is expected to be offset by weakness in the mining sector.

Labour market conditions will remain weak for the fourth year in a row as employment growth is projected to

remain negative with a 0.6 per cent decline in 2013, before finally seeing some evidence of positive growth in 2014, with a small 0.7 per cent increase. A higher pace of growth in the labour force in 2013 will result in the unemployment rate rising to 10.8 per cent with the rate remaining the same in 2014.

Mortgage Rates to see Modest and Gradual Increases Late in the Forecast Horizon but will Remain Low by Historical Standards

Following the June meeting of the Federal Open Market Committee (FOMC) of the U.S. Federal Reserve Board, interest rates rose modestly and then remained steady in both the U.S. and Canada. According to the Federal Reserve Bank of New York, this reflected a change in the risk assessment of investors and not a change in the expected future path of interest rates.¹

CMHC's interest rate forecast mirrors this view. Hence, mortgage rates have been slightly revised up in the third quarter of 2013 but, thereafter, follow the same interest rate path as before. Nevertheless, this interest rate outlook will continue to be supportive of housing market activity over the forecast horizon, as mortgage rates will remain low by historical standards.

Mortgage rates are expected to increase gradually and steadily over the forecast horizon. By the end of 2014, mortgage rates are forecast to be somewhat higher than in the third quarter of 2013. According to CMHC's base case scenario for 2013, the average for the one-year posted

mortgage rate is forecast to be within 3.00 per cent to 3.50 per cent, while the average for the five-year posted mortgage rate is anticipated to be within 5.00 per cent to 5.50 per cent. For 2014, the average for the one-year posted mortgage rate is expected to rise and be in the 3.25 per cent to 3.75 per cent range, while the average for the five-year posted mortgage rate is forecast to be within 5.25 per cent to 6.00 per cent.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.

For more information, visit our website at www.cmhc.ca or follow us on [Twitter](#), [YouTube](#) and [Flickr](#).

You can also reach us by phone at 1-800-668-2642 or by fax at 1-800-245-9274.

Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call 1-800-668-2642.

The Market Analysis Centre's (MAC) electronic suite of national standardized products is available for free on CMHC's website. You can view, print, download or subscribe to future editions and get market information e-mailed automatically to you the same day it is released. It's quick and convenient! Go to www.cmhc.ca/housingmarketinformation

For more information on MAC and the wealth of housing market information available to you, visit us today at www.cmhc.ca/housingmarketinformation

To subscribe to priced, printed editions of MAC publications, call 1-800-668-2642.
