Date Released: Third Quarter 2013

Housing Market Forecast

Figure 1

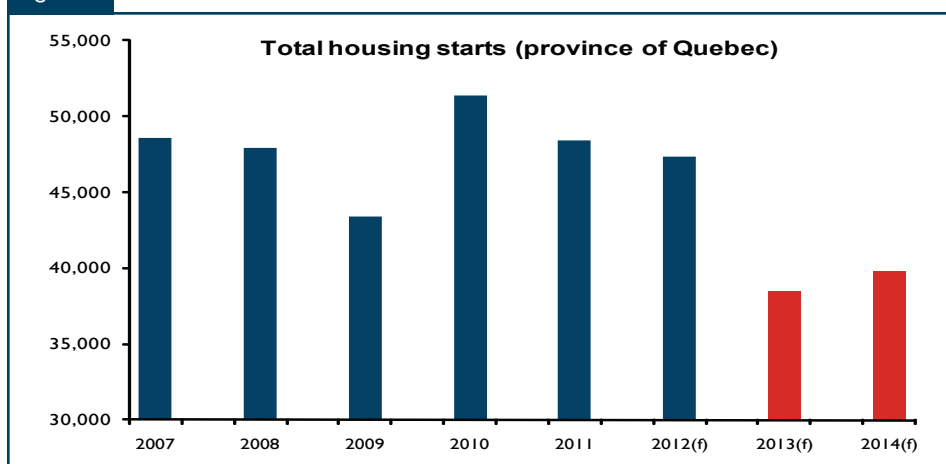

Figure 2

Source: CMHC

Overview

In Quebec, relatively slow economic and employment growth will reduce demand of existing and new homes this year. Easing resale markets and relatively high inventories of new dwellings will significantly lower housing starts in 2013. Nonetheless, demographic trends will support housing demand into 2014, at which time a strengthening economy and tightening resale markets will energize both the resale and new housing markets.

On the economic front, Quebec's labour markets still feel the impacts of a slow recovery south of the border and of more favourable employment prospects in western Canada. While business investment has increased solidly, firms have focused on fixed capital rather than on hiring. For this reason, employment will progress at a relatively slow pace in 2013 and 2014 (1.4 per cent each year). Meanwhile, public and consumer spending have increased moderately, while export levels remained stable. GDP growth of between 1.5 and 2.2 per cent growth is expected during the forecast horizon.

Demographic trends will continue to support the province's housing markets in the next two years. Sustained immigration to the province will still have a positive impact on demand in the rental market, as flows are expected to remain stable over the forecast horizon. Total net migration is expected to reach, respectively, 44,700 and 45,300 persons in 2013 and 2014. While moderating demand from younger households cools first-time buying, population aging will prompt some older households to re-enter the market in response to their evolving housing needs.

Mortgage rates to see modest and gradual increases late in the forecast horizon, but will remain low by historical standards

In line with the consensus among private-sector forecasters, increases in the Target Overnight Rate by the Bank of Canada are not anticipated before mid-2014. This interest rate outlook has not changed from the 2013 second quarter Housing Market Outlook and will continue to be supportive of housing market activity over the forecast horizon.

Mortgage rates are expected to increase gradually and steadily over the forecast horizon. By the end of 2014, mortgage rates are forecast to be somewhat higher than in the second quarter of 2013. However, these rates will remain low, by historical standards.

According to CMHC's base case scenario for 2013, the one-year mortgage rate is forecast to be within 3.00 per cent to 3.50 per cent, with an average of 3.12 per cent, while

the five-year posted mortgage rate is anticipated to be within 5.00 per cent to 5.50 per cent, with an average of 5.25 per cent. For 2014, the one-year posted mortgage rate is expected to rise and be in the 3.25 per cent to 3.75 per cent range, with an average of 3.44 per cent, while the five-year posted mortgage rate is forecast to be within 5.25 per cent to 6.00 per cent, with an average of 5.62 per cent, consistent with higher economic growth prospects in 2014.

Mortgage rates		
1 Year	Q2 2013	3.05
	Change from Q2 2012	-0.15
	2013 (F)	3.00 - 3.25
	2014 (F)	3.25 - 3.75
5 Year	Q2 2013	5.14
	Change from Q2 2012	-0.20
	2013 (F)	5.00 - 5.50
	2014 (F)	5.25 - 6.00

NOTE: Mortgage rate forecast is based on Q2 2013 data

In Detail

Single Starts

In 2013, moderate job growth, the continued easing of the resale market, which is expected to attract a greater part of housing demand, and the trend toward multifamily dwelling will contribute to reduce single starts and translate into a total of 13,700 single-detached homes started. In 2014, a tighter resale market will bring some support to the new housing market segment, which is expected to result in 14,100 single starts.

Multiple Starts

The trend toward the multi-family market segment is explained by its relative affordability, the changing needs of an aging population and by densification trends. Fuelled by

the popularity of condominium apartments, supply in this market segment has increased significantly. As a result of three years of sustained construction from 2010 to 2012, market conditions in this market have eased significantly. Starts of multi-family dwellings will thus decrease considerably this year. Multiple starts will descend below the 25,000 level in 2013 and rise to the 25,700 mark in 2014.

Resales

While holding steady in 2012, sales recorded by Centris® have been recently declining as a result of the overall economic context discussed previously. Despite a certain rebound expected in the second half of this year, resales will come in at a lower level this year. For 2013, 73,000 such transactions are forecast. As buying conditions improve, total resales will be back in growth mode next year. In total, 75,700 Centris® sales are forecast for 2014.

Prices

Relatively lower demand for resale homes, combined with rising supply, has taken pressure off price growth in recent quarters and should continue to do so throughout this coming year. With a return to more balanced conditions, price growth in the resale market will continue to moderate in 2013. The average price recorded by Centris® will reach \$269,100 in 2013 and \$272,000 next year.
