Edmonton Housing Starts in April 2013

Housing starts in the Edmonton Census Metropolitan Area (CMA) continued to trend up in the fourth month of 2013. There were a total of 1,503 units started in April 2013, up from 967 starts in April 2012. Within the City of Edmonton, total housing

starts rose in April to 1,318 units from 569 units in 2012. During the first four month of 2013, total starts in the Edmonton CMA increased by 37 per cent from corresponding levels in 2012, reaching 4,352 units.

Single-detached starts in the Edmonton CMA increased by 14 per cent year-over-year in April, totalling 560 units. This represents the third consecutive month that single-

Source: CMHC

detached starts outperformed the previous year. Starts inside Edmonton City limits rose by 32 per cent from April 2012, totalling 412 units in April 2013. On a year-to-date basis, single-detached starts in the Edmonton CMA increased seven per cent over corresponding levels in 2012, reaching 1,685 units.

In the Edmonton CMA, there were 513 single-detached units completed in April 2013, a 32 per cent increase from the 390 units finished in 2012. The number of single-detached units under construction was at 3,731 in the fourth month of 2013, up 11 per cent from a year earlier. There were 485 single-detached units absorbed in April 2013, up seven per cent from the corresponding month in 2012. With completions surpassing absorptions, the inventory of complete and unabsorbed single-detached homes increased to 674 units in April 2013, up from 552 units in the same month a year earlier.

The average absorbed price of single-detached units in April moved up by four cent year-over-year to \$521,842.

The median price of absorbed single-detached homes, on the other hand, decreased one per cent to \$451,082. By comparison, data from Statistics Canada's New House Price Index (NHPI) in March 2013 remained stable for the Edmonton CMA. Contractor selling prices reported in the index increased by less than one per cent from the previous year. Within the city

of Edmonton, the average absorbed price for a single-detached home was \$514,956 in April 2013, up from the \$496,080 recorded in the same month in 2012.

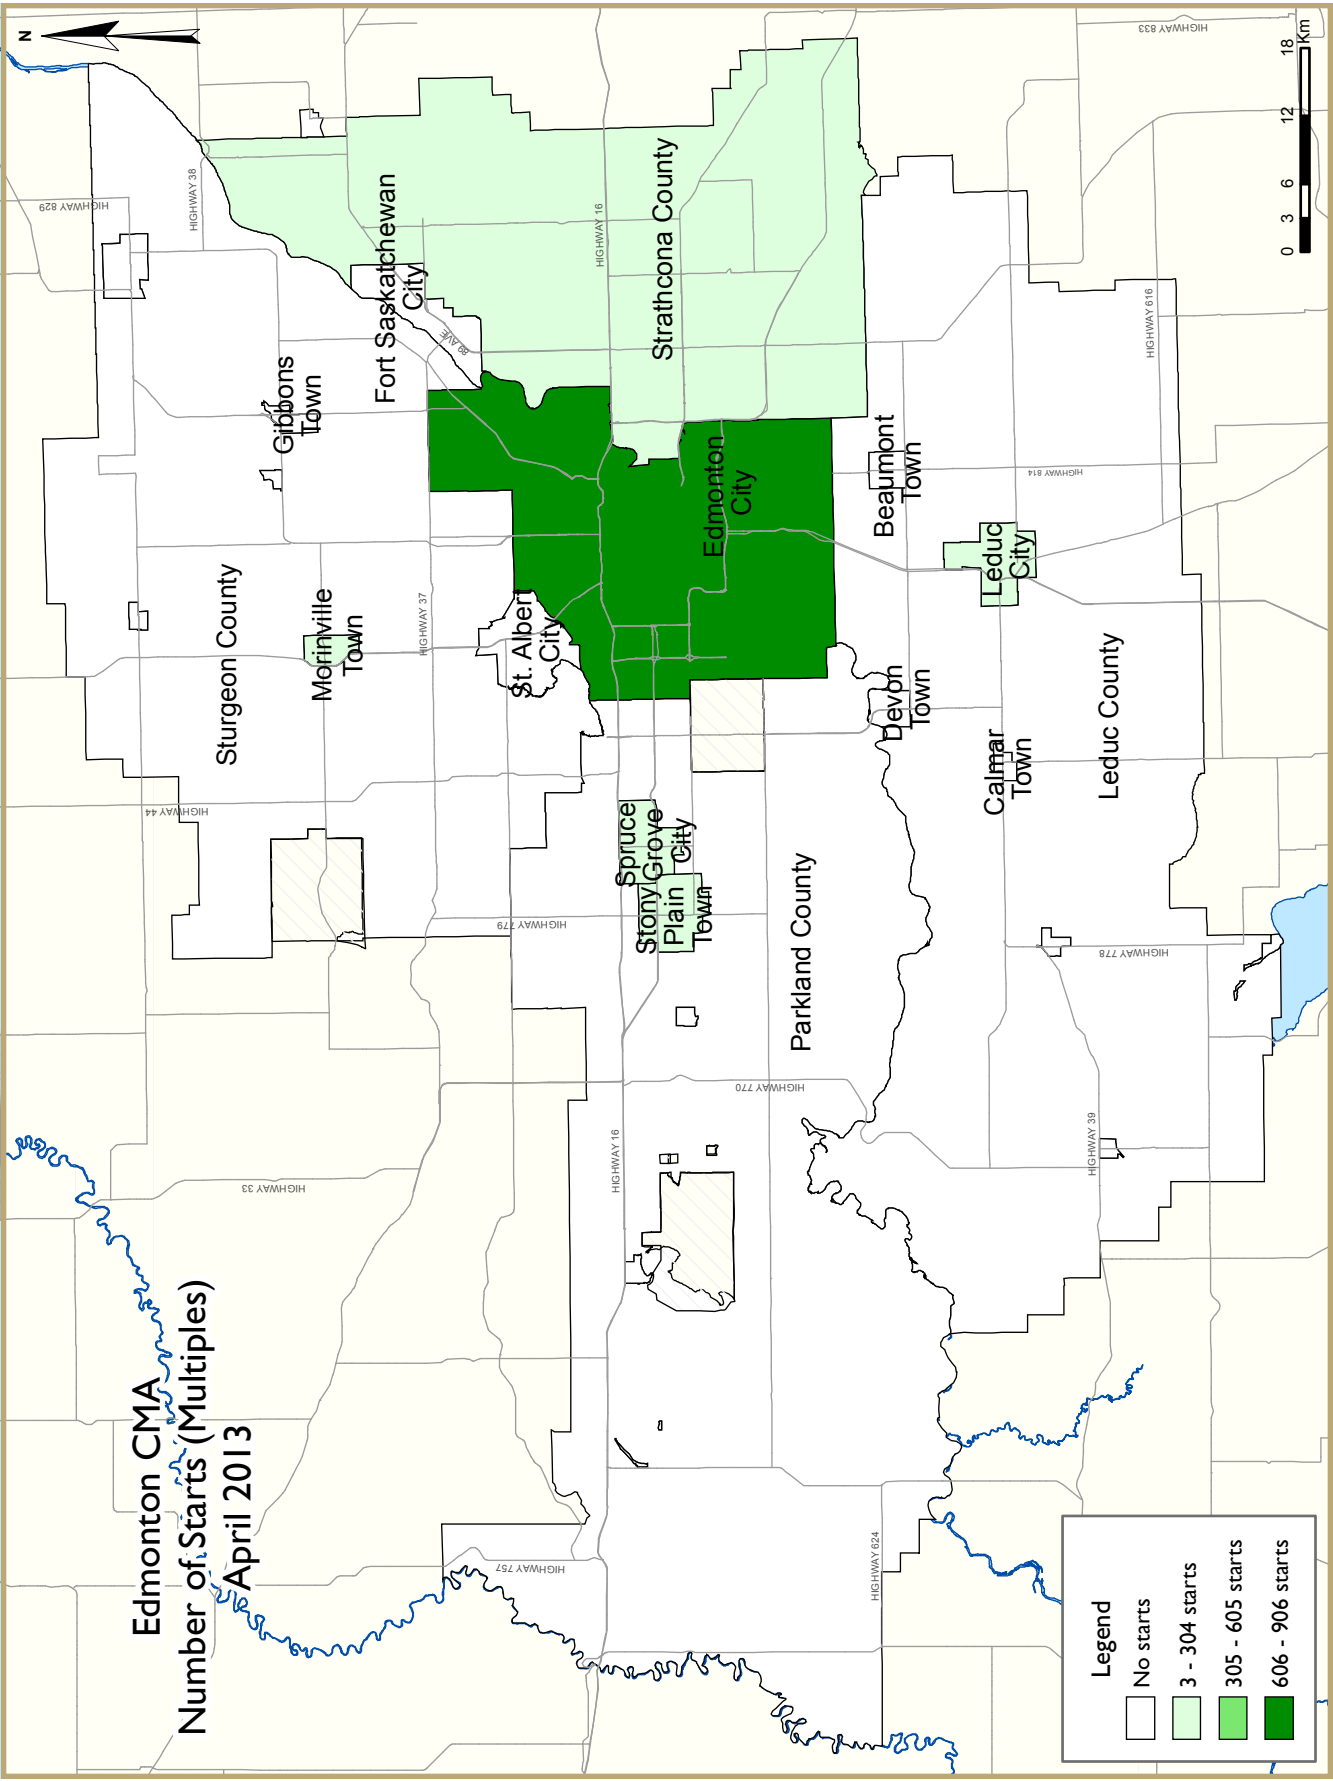

Multi-family starts in the Edmonton CMA, which consist of semi-detached units, rows, and apartments, totalled 943 units in April compared to the 474 units started in April 2012. The majority occurred within the City of Edmonton. Increases were seen across all segments in the multi-family category with the exception of semi-detached homes. Apartment starts totalled 670 units in April compared to 177 starts in April 2012, while row housing starts increased to 115 units from 101 units in 2012. Semi-detached starts, on the other hand, decreased to 158 units compared to 196 starts recorded in the same month in 2012. During the first four months of 2013, multi-family starts across the Edmonton CMA increased by 67 per cent from 2012 levels, totalling 2,667 units.

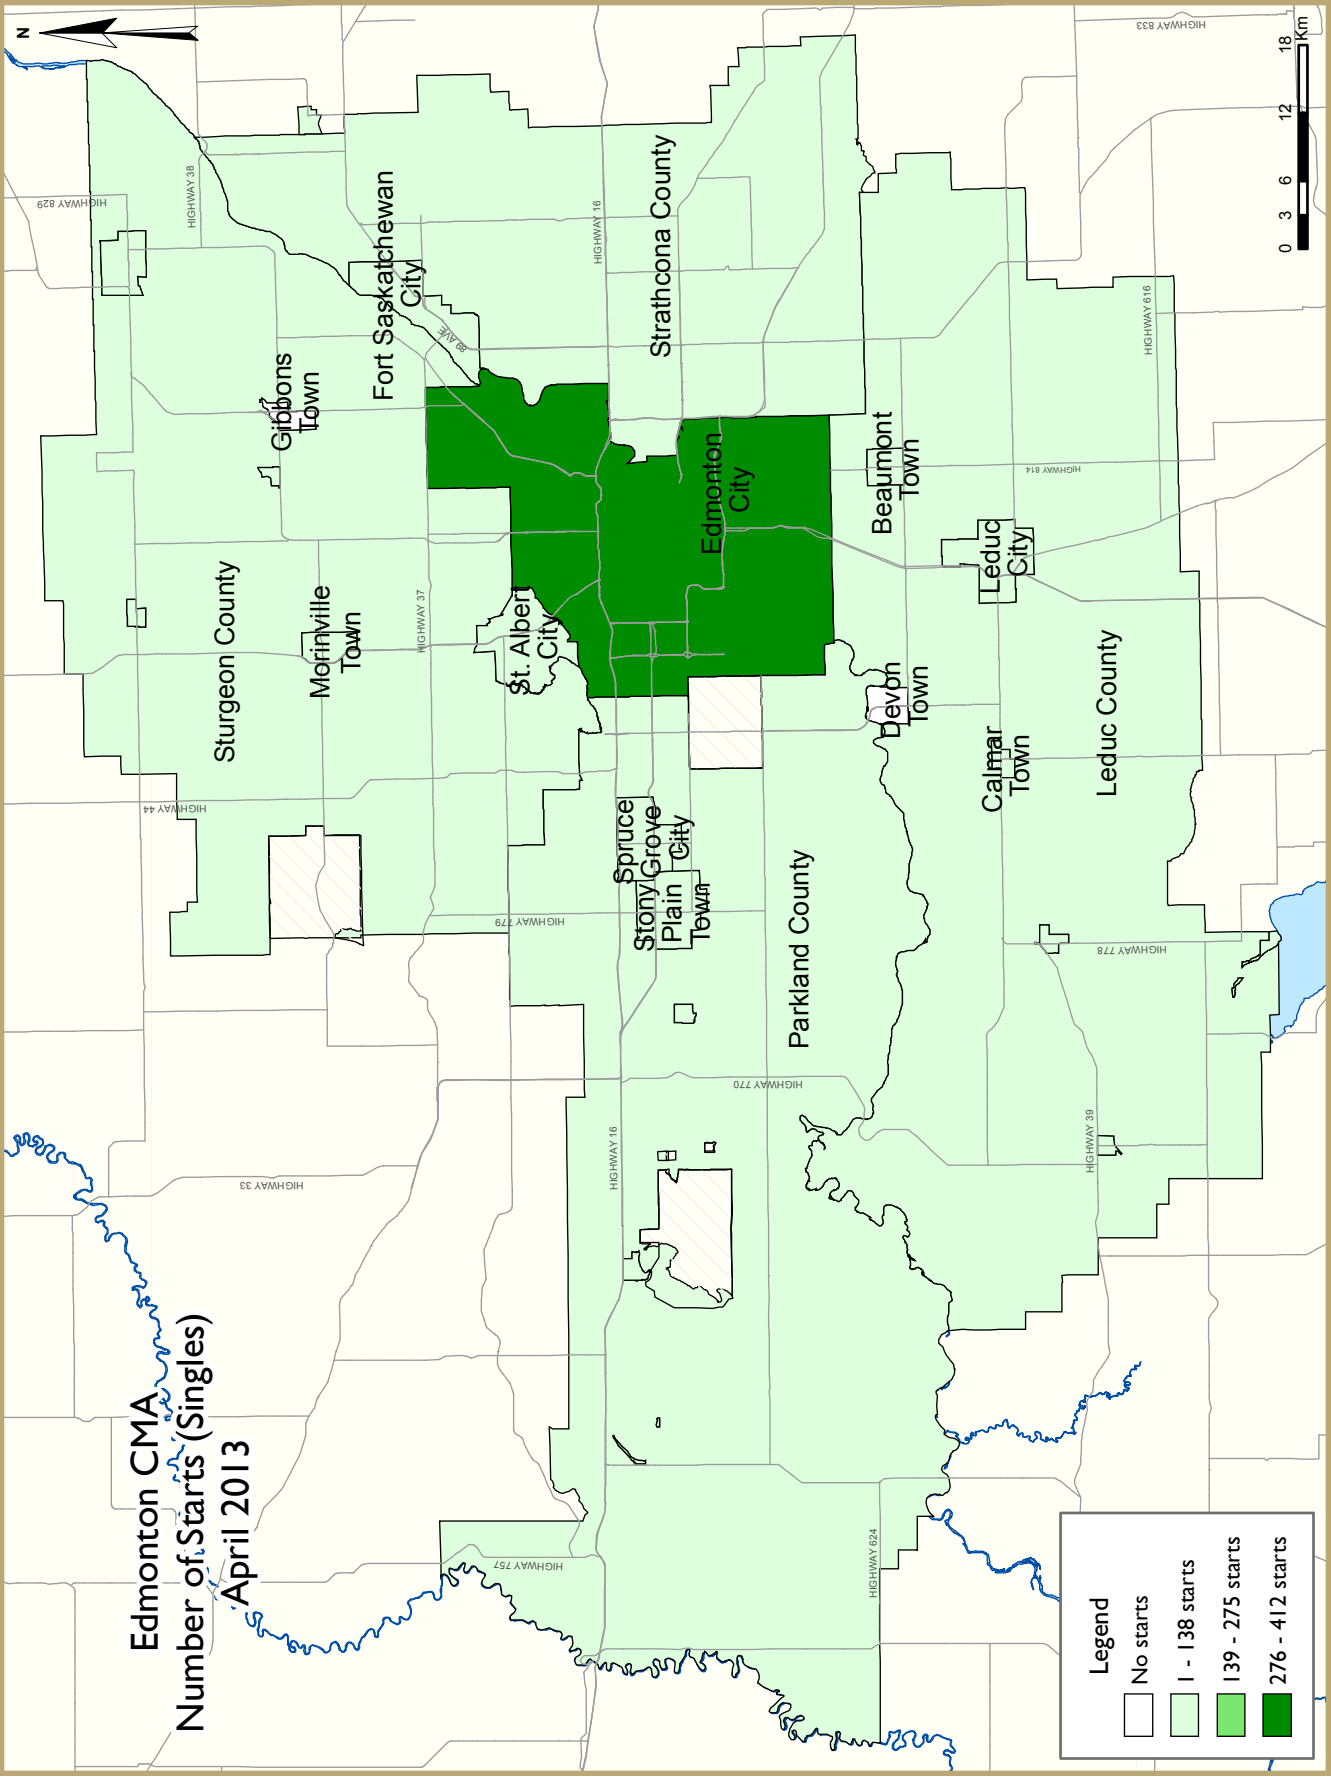

Figure 3

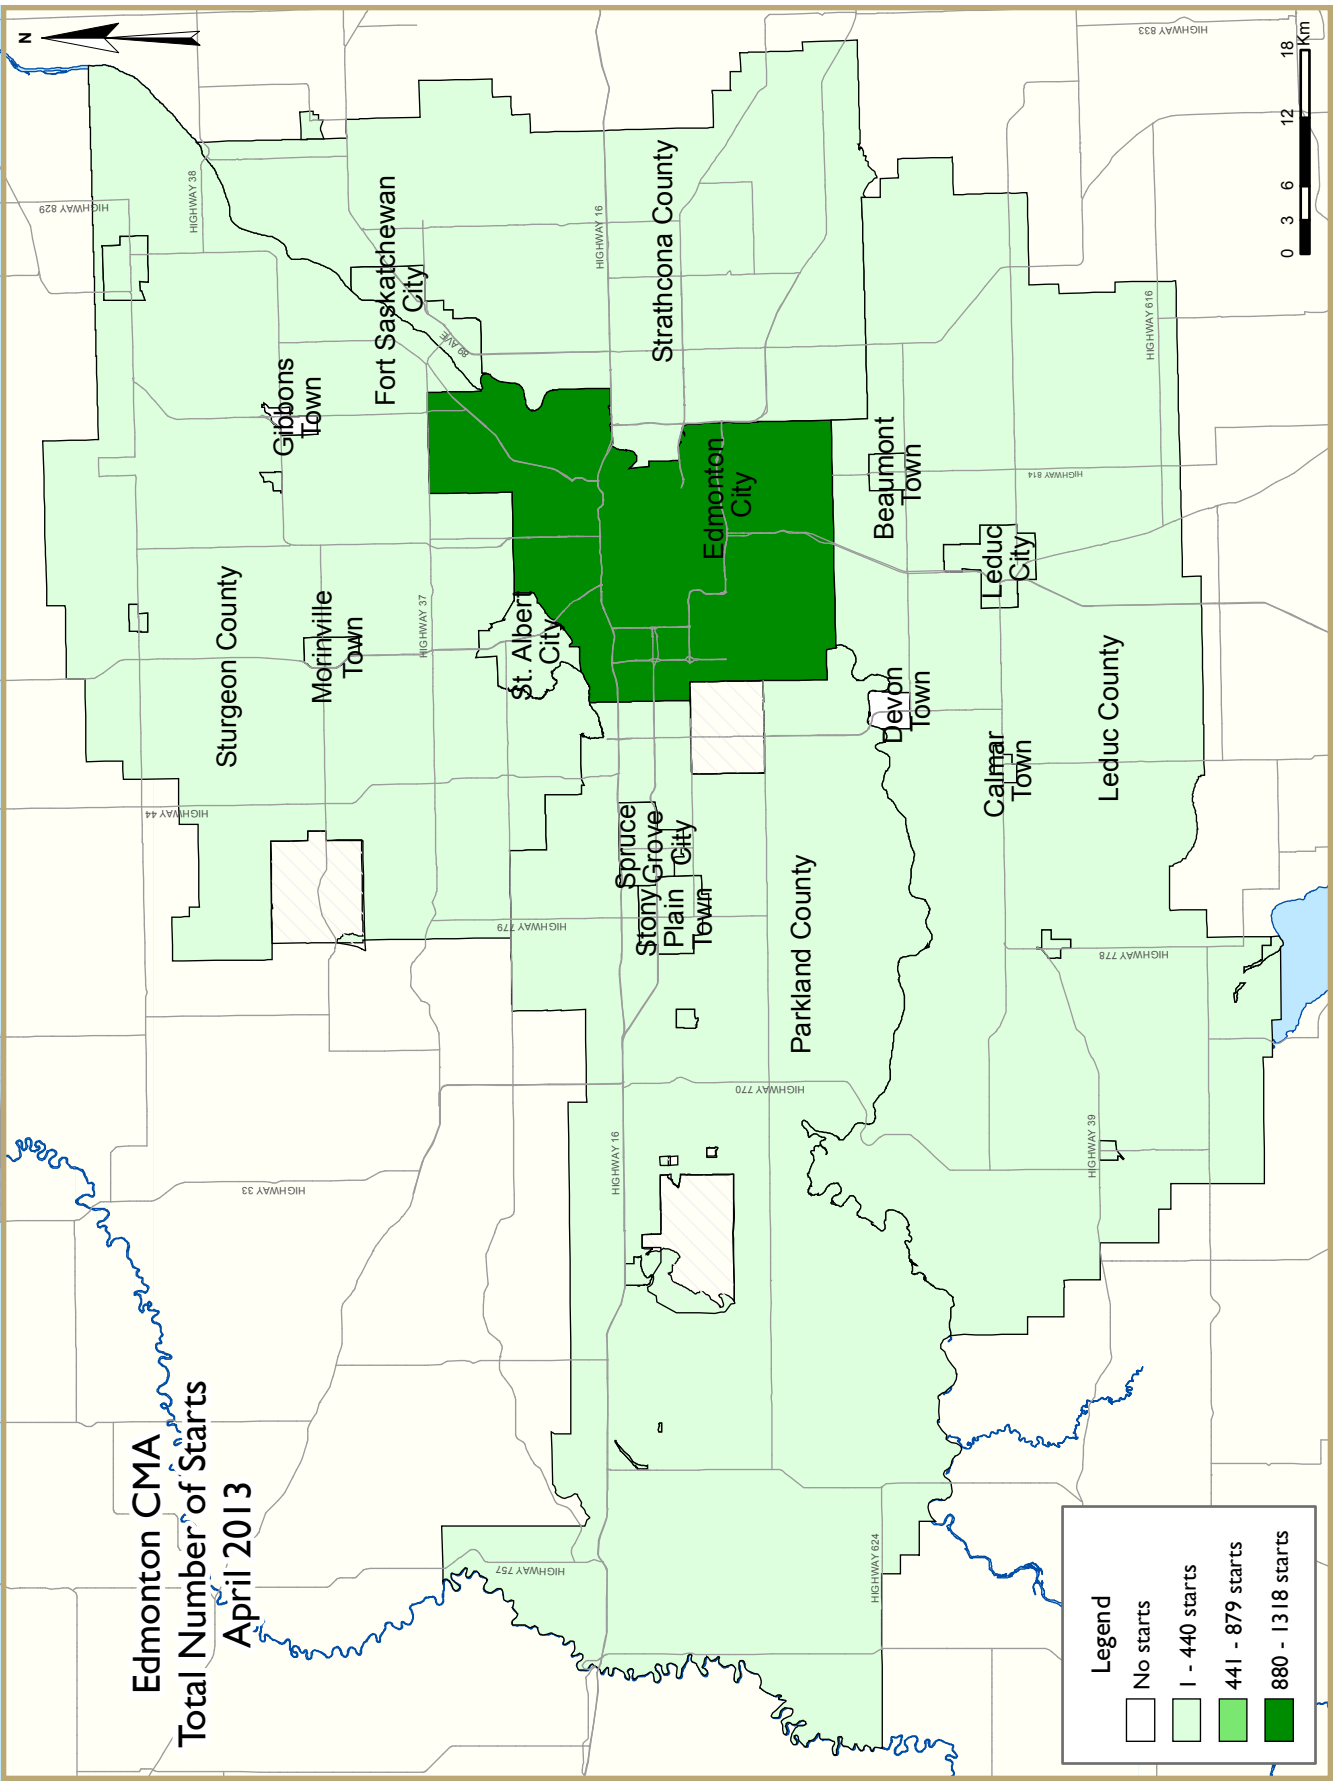

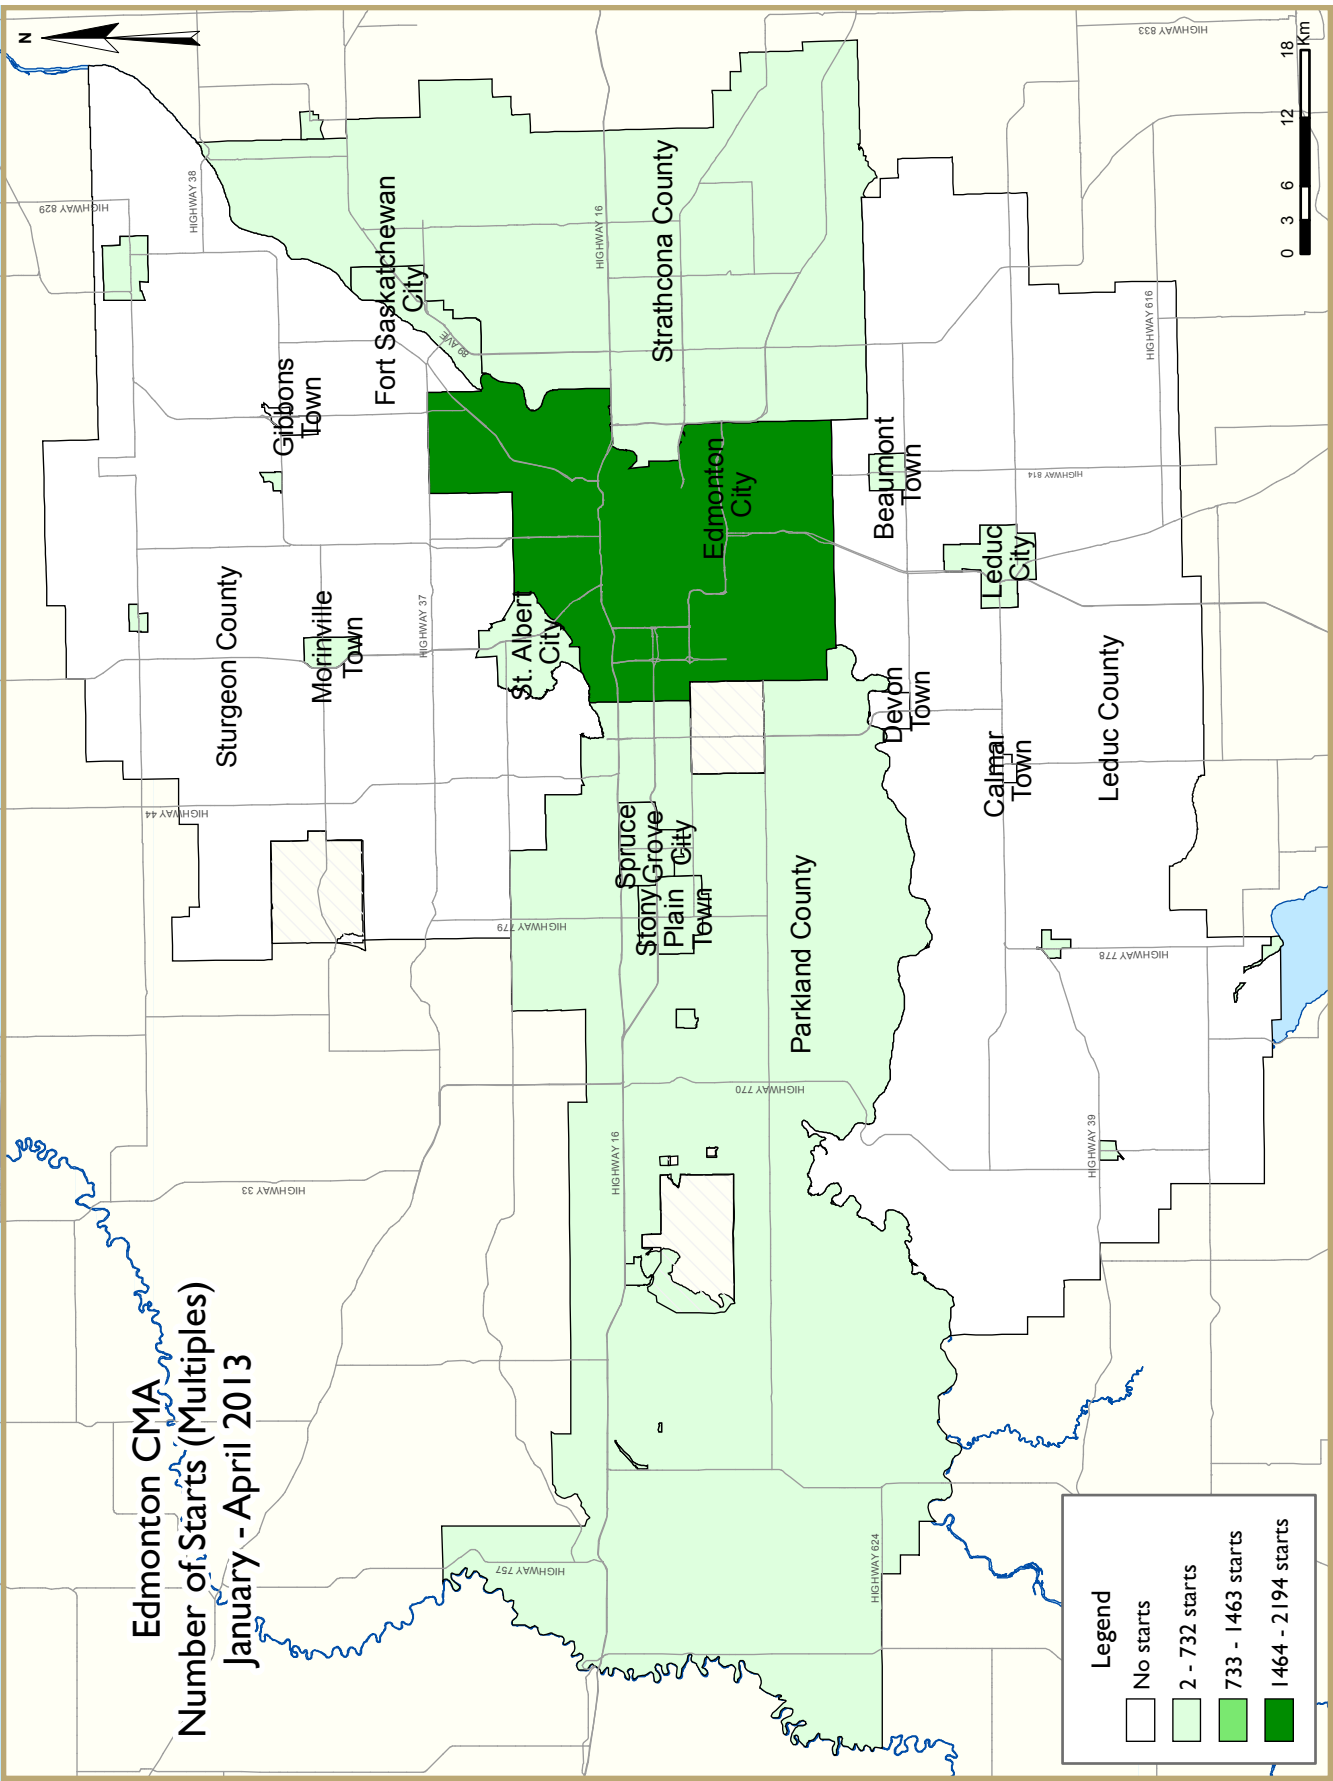

Source: CMHC

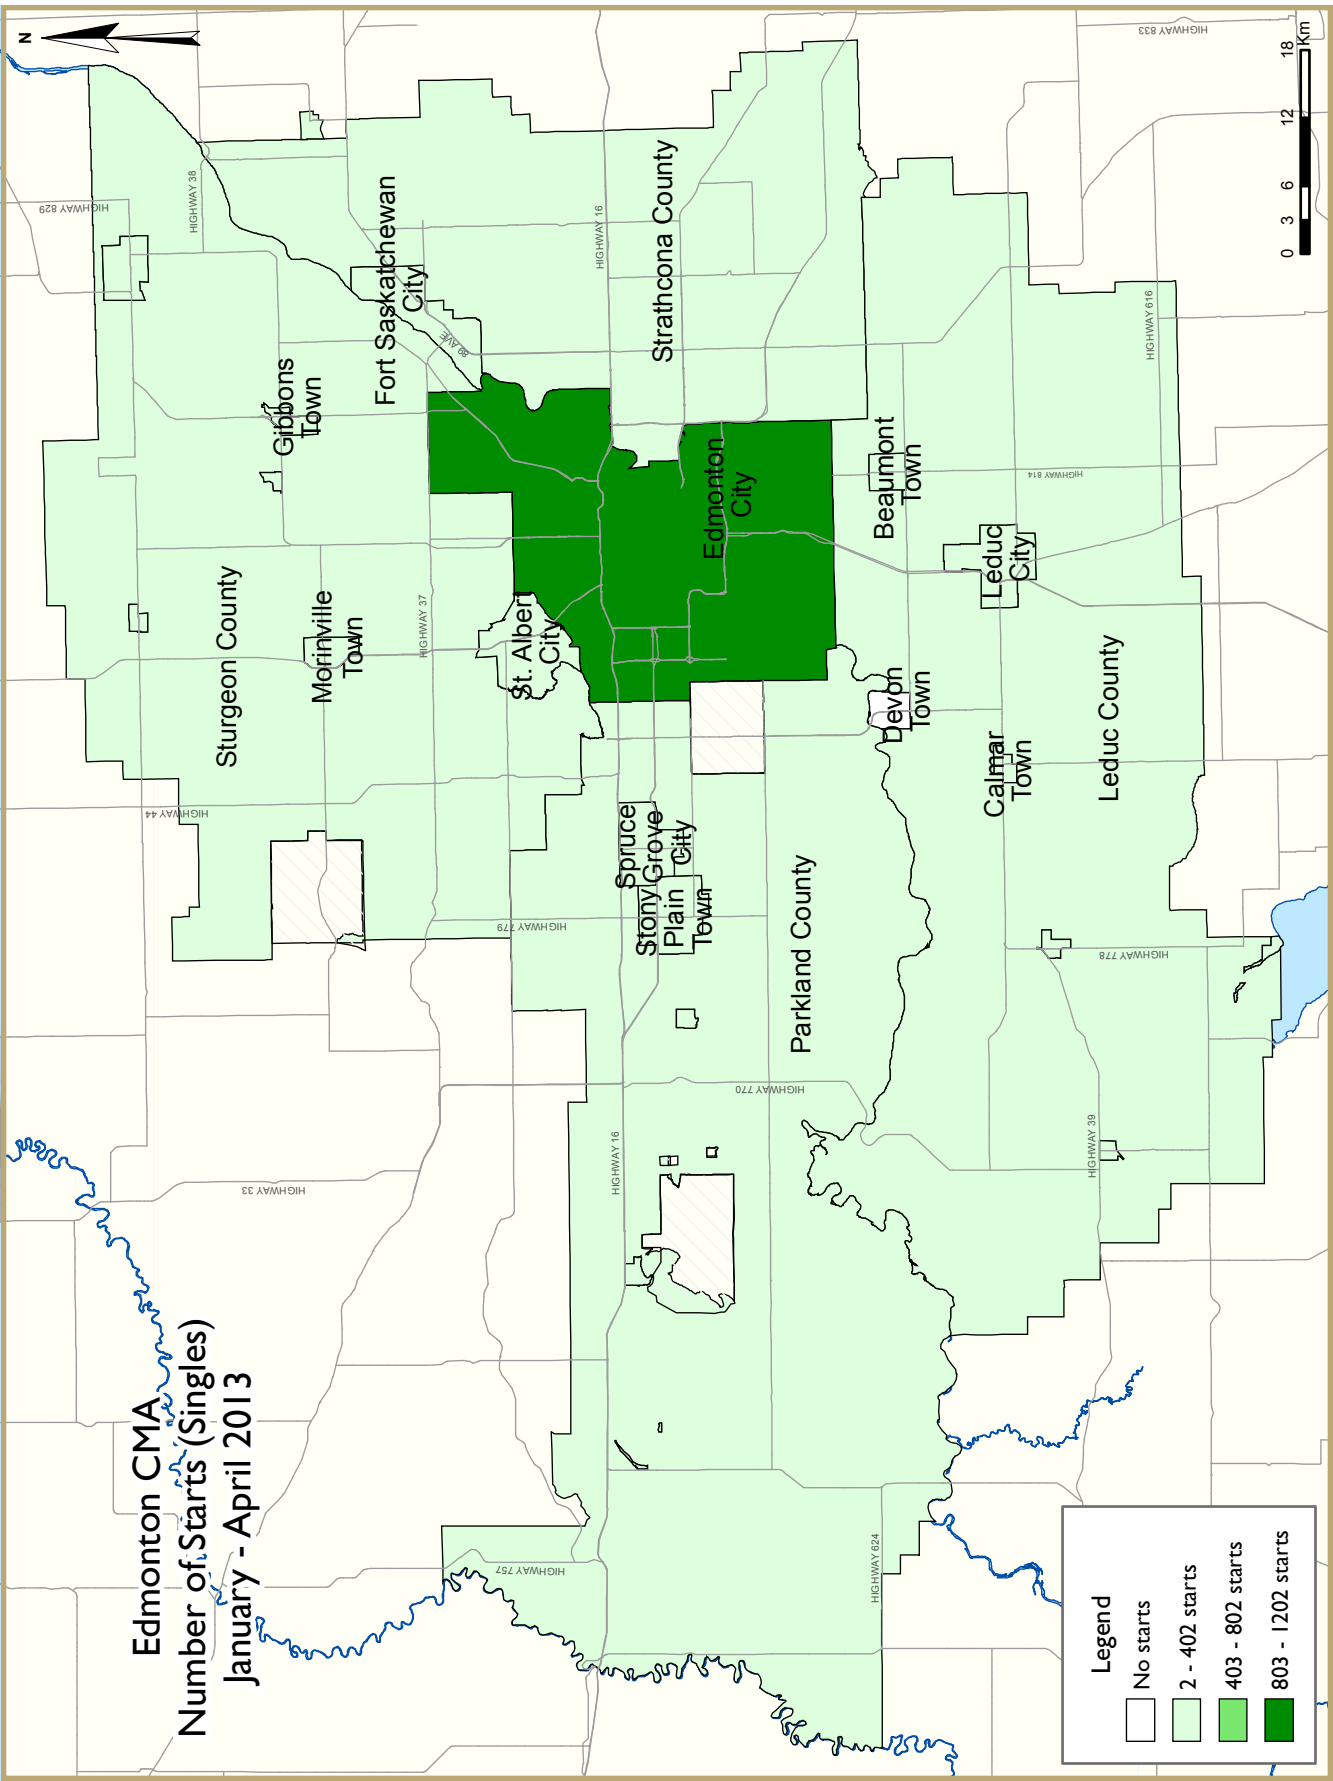

Due to a rise in multi-family starts in 2012, completions of multi-family units continued to increase on a year-over-year basis in April 2013. There were 570 completed units in Edmonton from the 179 units recorded in the same month in 2012. The number of multi-family units under construction moved up as well. A total of 8,566 multi-family units were under construction in April, up from the 6,111 units in 2012. This rise in units under construction has yet to put upward pressure on multi-family inventories, as the number of complete and unabsorbed units for ownership tenure remained lower than the previous year.

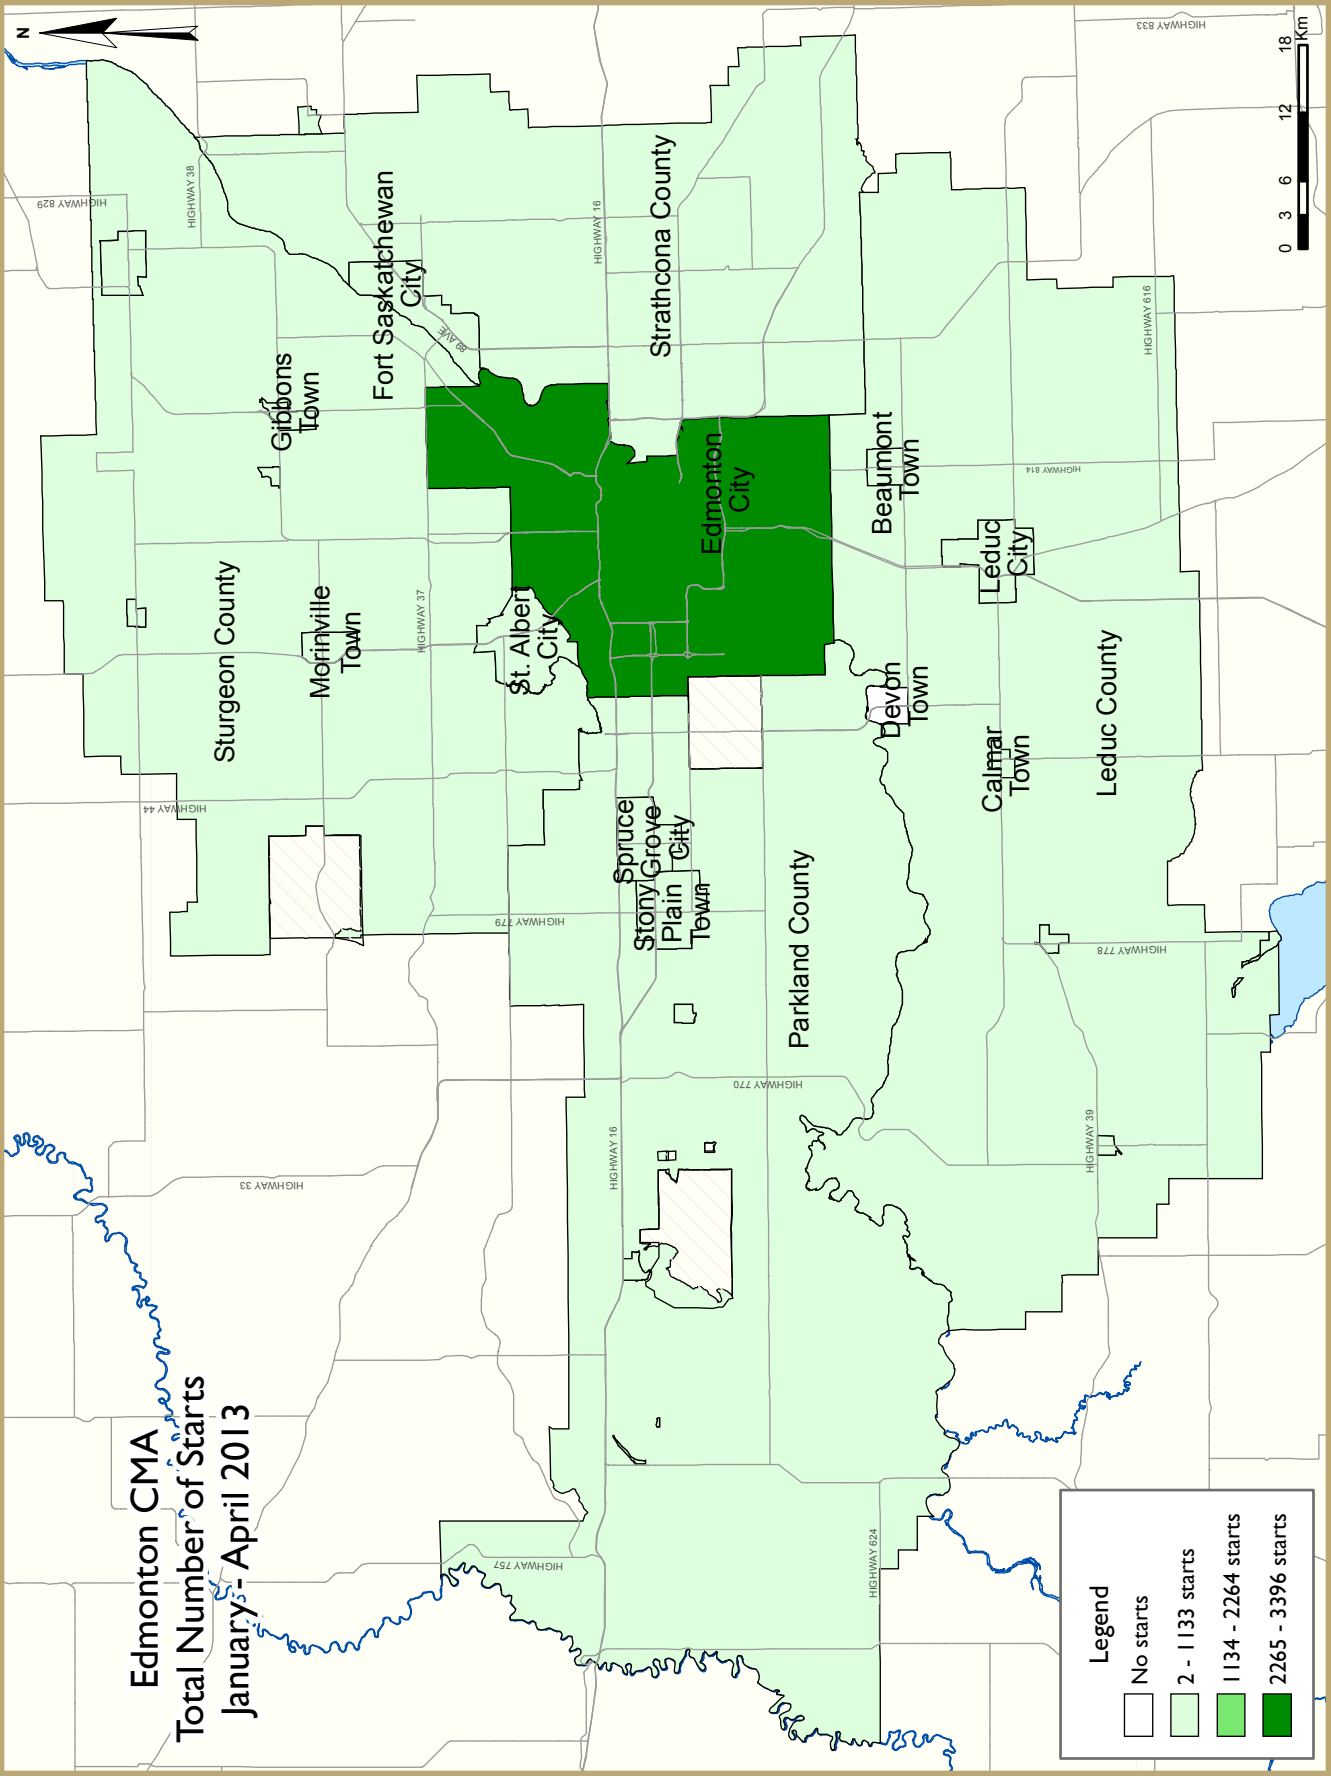

HOUSING NOW REPORT TABLES

Available in ALL reports:

- 1 Housing Activity Summary of CMA
- 2 Starts by Submarket and by Dwelling Type – Current Month or Quarter
- 2.1 Starts by Submarket and by Dwelling Type – Year-to-Date

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
