Montréal CMA

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: April 2013

Montréal metropolitan area housing starts in March 2013

According to the results of the latest starts survey conducted by Canada Mortgage and Housing Corporation (CMHC), 1,159 dwellings were started in the Montréal census metropolitan

area (CMA) in March 2013, compared to 1,339 during the same month in 2012.

The slowdown in housing starts was observed for both homeowner housing (-37 per cent) and condominiums (-10 per cent). Rental housing¹ was the only segment that posted a gain in starts (+49 per cent). The slowdown in activity was due, in particular, to the more balanced

conditions on the resale market.

In the different geographic sectors of the CMA, the results revealed that, in March, housing starts fell on the Island of Montréal (-34 per cent), on the North Shore (-22 per cent), on the South Shore (-9 per cent) and in Vaudreuil-Soulanges (-18 per cent). Only the Laval sector registered an increase, as starts more than doubled there.

During the first quarter of 2013, total housing starts decreased by 21 per cent compared to the same period in 2012. The greatest drop in activity was recorded for homeowner housing (-41 per cent), but condominiums were also hit (-18 per cent). Rental housing construction, for its part, rose by 85 per cent but still remained at a historically low level.

Resale market balanced in the first quarter of 2013

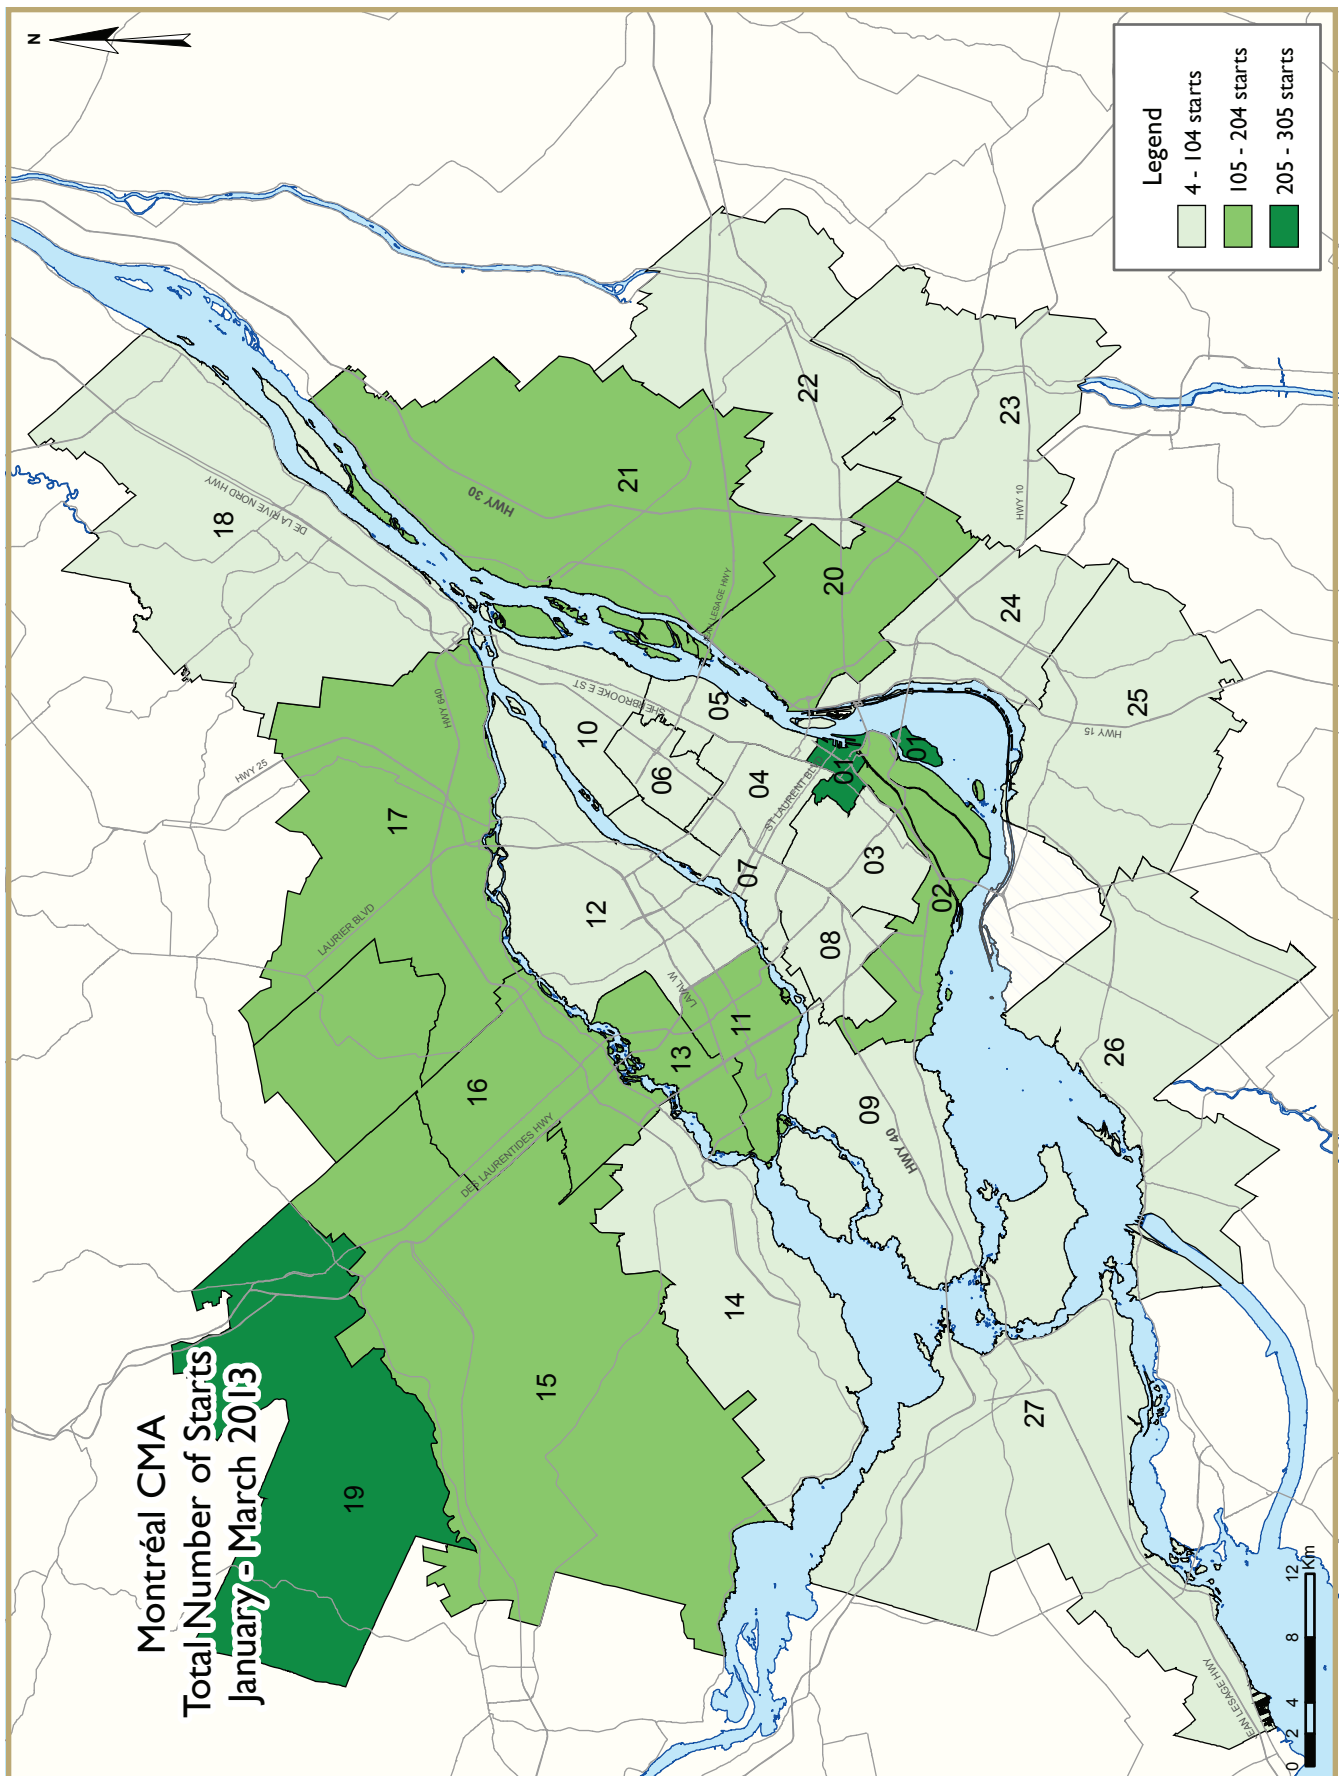

According to the latest Centris® housing statistics from the Quebec Federation of Real Estate Boards (QFREB), 9,927 Centris® sales were registered in the Montréal CMA during the first quarter of 2013, for a decrease of 18 per cent from the same period last year. Demand for existing homes therefore declined for a third straight quarter. The drop extended to all market segments, as Centris® sales fell by 17 per cent for single-family homes, by 19 per cent for condominiums and by 23 per cent in the case of plexes.

Centris® transactions decreased once again, but the supply of existing homes continued to grow in the CMA. In fact, overall active Centris® listings increased by 10 per cent, mainly on account of the hike in active listings of condominiums (+25 per cent). Active Centris® listings of single-family

houses and plexes went up more moderately, as they rose by 2 per cent and 8 per cent, respectively.

The resale market therefore continued to ease but remained balanced overall. The easing extended to all market segments, especially condominiums, for which conditions have now become favourable to buyers. The single-family home and plex segments, for their part, have now become balanced.

Softer market conditions resulted in smaller resale price increases. In the first quarter, the overall average Centris® price reached \$324,482, up by 2.2 per cent over a year earlier. The growth in the average Centris® price was greater for plexes (+3.6 per cent) than for single-family houses (+1.1 per cent), while the average Centris® price fell slightly in the case of condominiums (-0.3 per cent).

ZONE DESCRIPTIONS - MONTRÉAL CMA	
Zone 1	Downtown Montréal (bordered on the east by Amherst Street, on the west by Guy Street and on the north by Chemin Remembrance and Des Pins Avenue), Île-des-Soeurs.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.

For more information, visit our website at www.cmhc.ca or follow us on [Twitter](#), [YouTube](#) and [Flickr](#).

You can also reach us by phone at 1-800-668-2642 or by fax at 1-800-245-9274.
Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call 1-800-668-2642.
