Surveying and Mapping Services

2011

Highlights

- Operating revenues in the surveying and mapping industry increased by 16.2% to \$2.6 billion in 2011 from 2010.
- Operating expenses also grew in 2011, but at a slower rate of 7.2%. As a result, the operating profit margin of the industry grew from 5.2% in 2010 to 12.7% in 2011.
- More than half (51.9%) of the industry's operating revenues were generated in Alberta, followed by Ontario (14.6%), Quebec (12.7%) and British Columbia (10.7%).
- Among the provinces with the largest revenue shares, Alberta's operating revenues grew by 24.3%, while British Columbia increased by 16.7%, Ontario by 9.8%, and Quebec by 2.2%.
- In 2011, the share of industry sales derived from surveying and mapping of the earth's surface accounted for 50.3% of total industry sales down from a high of 57.2% in 2010. Geophysical surveying and mapping, characterized by locating and measuring the extent of subsurface resources, accounted for 41.4% of the industry's sales in 2011, up from a low of 37.4% in 2010. The share of industry sales generated from the provision of other goods and services, which includes Geographic Information System (GIS) development and customization, increased to 8.3% in 2011.

Statistical tables

Table 1

Summary statistics for the surveying and mapping services industry, by province and territory, 2009 to 2011

	Operating revenue	Operating expenses	Salaries, wages and benefits	Operating profit margin
	millions of dollars			percent
2011 ^p				
Newfoundland and Labrador	34.3	28.3	14.0	17.3
Prince Edward Island	x	x	x	x
Nova Scotia	37.7	33.9	13.8	10.0
New Brunswick	13.6	11.8	6.5	13.0
Quebec	336.7	271.4	141.8	19.4
Ontario	385.5	338.3	168.2	12.2
Manitoba	33.5	27.7	9.7	17.2
Saskatchewan	118.0	97.1	46.0	17.7
Alberta	1,371.6	1,239.0	515.9	9.7
British Columbia	282.4	234.0	99.8	17.2
Territories ¹	x	x	x	x
Canada	2,642.0	2,307.5	1,028.0	12.7
2010 ^r				
Newfoundland and Labrador	39.7	33.0	18.7	16.8
Prince Edward Island	x	x	x	x
Nova Scotia	44.5	42.0	17.7	5.5
New Brunswick	14.0	12.6	7.0	9.7
Quebec	329.4	264.5	133.7	19.7
Ontario	351.2	329.1	162.8	6.3
Manitoba	28.2	24.3	9.7	13.7
Saskatchewan	90.7	79.0	37.5	12.9
Alberta	1,103.6	1,139.4	433.4	-3.2
British Columbia	241.9	204.7	94.5	15.4
Territories ¹	x	x	x	x
Canada	2,272.7	2,153.5	927.1	5.2
2009 ^r				
Newfoundland and Labrador	37.9	35.1	19.8	7.5
Prince Edward Island	x	x	x	x
Nova Scotia	39.1	32.5	20.0	16.9
New Brunswick	17.8	15.1	8.5	14.9

Manitoba	28.2	24.6	7.4	12.9
Saskatchewan	83.1	68.2	31.9	18.0
Alberta	1,145.6	1,149.1	451.7	-0.3
British Columbia	223.9	190.4	86.0	15.0
Territories ¹	x	x	x	x
Canada	2,263.3	2,150.6	921.9	5.0

1. Territories include: Yukon, Northwest Territories and Nunavut.

Note(s): The results in this table are for firms classified under the North American Industry Classification System (NAICS) categories 541360 and 541370. See "Data sources, definitions and methodology" at the end of tables for definition of terms. Due to rounding, components may not add to total.

Table 2
Detailed expenditures as a percentage of total operating expenses for the surveying and mapping services industry, Canada, 2009 to 2011

	2009 ^r	2010 ^r	2011 ^p
	percent		
Total operating expenses	100.0	100.0	100.0
Salaries, wages and benefits of employees	44.2	43.6	45.1
Commissions paid to non-employees	F	F	x
Professional and business services fees	2.4	2.3	2.4
Subcontract expenses	6.0	4.6	5.6
Charges for services provided by head offices	1.6	1.3	1.4
Cost of goods sold	10.2	10.9	13.2
Office supplies	1.6	1.6	1.5
Rental and leasing	4.6	5.4	4.9
Repair and maintenance	2.8	3.7	3.8
Insurance	1.2	1.1	1.1
Advertising, marketing and promotions	F	F	1.0
Travel, meals and entertainment	2.4	2.3	3.1
Utilities and telecommunications expenses	1.2	1.2	1.0
Property and business taxes, licences and permits	F	F	F
Royalties, rights, licensing and franchise fees	F	F	x
Delivery, warehousing, postage and courier	F	F	F
Financial services fees	F	F	F
Amortization and depreciation of tangible and intangible assets	11.3	12.4	8.5
Bad debts	F	F	F
All other expenses	7.9	6.5	5.4

Note(s): The results in this table are for firms classified under the North American Industry Classification System (NAICS) categories 541360 and 541370. See "Data sources, definitions and methodology" at the end of tables for definition of terms. Data presented in this table are from the surveyed portion only. The survey portion excludes the smallest firms in terms of revenues earned. These firms account for a relatively small portion of total industry revenues and are not included in the estimates of this table.

Data presented in this table are from the surveyed portion only. The survey portion excludes the smallest firms in terms of revenues earned. These firms account for a relatively small portion of total industry revenues and are not included in the estimates of this table.

Data sources, definitions and methodology

Description

This annual sample survey collects data required to produce economic statistics for the Surveying and Mapping Services industry in Canada.

Data collected from businesses are aggregated with information from other sources to produce official estimates of national and provincial economic production for this industry.

Survey estimates are made available to businesses, governments, investors, associations, and the public. The data are used to monitor industry growth, measure performance, and make comparisons to other data sources to better understand this industry.

Target population

The target population consists of all establishments classified to the Surveying and Mapping Services industry (NAICS 541360 and 541370) according to the North American Industry Classification System (NAICS) during the reference year. This industry comprises establishments primarily engaged in gathering, interpreting and mapping geophysical data. These establishments often specialize in locating and measuring the extent of subsurface resources such as oil, gas and minerals. These establishments are also engaged in providing surveying and mapping services of the surface of the earth, including sea floor.

Industry structure

Under the North American Industrial Classification System (NAICS), the Surveying and Mapping Services industry consists of Geophysical Surveying and Mapping Services (541360) and Surveying and Mapping (except Geophysical) Services (541370).

Geophysical surveying and mapping services – 541360

This industry group comprises establishments primarily engaged in gathering, interpreting and mapping geophysical data. These establishments often specialize in locating and measuring the extent of subsurface resources, such as oil, gas and minerals, but they may also conduct surveys for engineering purposes. A variety of surveying techniques are used, including seismic, magnetic, gravity, electrical and electromagnetic, radioactive and remote sensing, depending on the purpose of the survey.

Surveying and mapping (except geophysical) services – 541370

This industry group comprises establishments primarily engaged in providing surveying and mapping services of the surface of the earth, including the sea floor. These services may include surveying and mapping of areas above or below the surface of the earth, such as the creation of view easements or segregating rights in parcels of land by creating underground utility easements. Examples of activities are: cadastral and topographic surveying and mapping services; control surveying services, such as geodesy and Global Positioning System (GPS) surveying; cartographic surveying services, including photogrammetric mapping; geographic information system (GIS) base mapping and quality control services; and geospatial mapping services.

Data users who wish to learn more about NAICS, its underlying principles, and many of the other statistical concepts discussed in this brief summary, are referred to the Introduction section of the Statistics Canada publication “North American Industry Classification System: Canada 2007” (catalogue no. 12-501-X).

Sampling

This is a sample survey with a cross-sectional design.

The frame is the list of establishments from which the portion eligible for sampling is determined and the sample is taken. The frame provides basic information about each firm including address, industry classification, and information from administrative data sources. The frame is maintained by Statistics Canada's Business Register Division and is updated using administrative data.

The basic objective of the survey is to produce estimates for the whole industry — incorporated and unincorporated businesses. The data come from two different sources: a sample of all businesses with revenue above or equal to a certain threshold (note: the threshold varies between surveys and sometimes between industries and provinces in the same survey) for which either survey or administrative data may be used; and administrative data only for businesses with revenue below the specified threshold. It should be noted that only financial information is available from businesses below the threshold; e.g., revenue, and expenses such as depreciation and salaries, wages and benefits. Detailed characteristics are collected only for surveyed establishments.

Prior to the selection of a random sample, establishments are classified into homogeneous groups (i.e., groups with the same NAICS codes and same geography). Quality requirements are targeted, and then each group is divided into sub-groups called strata: take-all, must-take, and take-some.

The take-all stratum represents the largest firms in terms of performance (based on revenue) in an industry. The must-take stratum is comprised of units selected based on complex structural characteristics (multi-establishment, multi-legal, multi-NAICS, or multi-province enterprises). All take-all and must-take firms are selected to the sample. Units in the take-some strata are subject to simple random sampling.

The effective sample size for reference year 2011 was 579 collection entities.

Definitions

Estimates for the most recent year are preliminary. Preliminary data are subject to revision.

Operating revenue excludes investment income, capital gains, extraordinary gains and other non-recurring items.

Operating expenses exclude write-offs, capital losses, extraordinary losses, interest on borrowing, and other non-recurring items.

Operating profit margin is derived as follows: operating revenue minus operating expenses, expressed as a percentage of operating revenue. The derived figure excludes corporation income tax paid by incorporated businesses and individual income tax paid by unincorporated businesses. For unincorporated businesses, operating profit margin includes unpaid remuneration to partners and proprietors, which is not recorded as salaries, wages and benefits. Therefore the profit estimate will be higher in industries where unincorporated proprietorships and partnerships are significant contributors.

Salaries, wages and benefits include vacation pay and commissions for all employees for whom a T4 slip was completed. This category also includes the employer portion of employee benefits for items such as Canada/Québec Pension Plan or Employment Insurance premiums. Salaries and wages do not include working owners' dividends nor do they include the remuneration of owners of unincorporated business. Therefore the relative level of salaries, wages and benefits will be lower in industries where unincorporated businesses are significant contributors.

Quality evaluation

Prior to dissemination, combined survey results are analyzed for comparability; in general, this includes a detailed review of individual responses (especially for the largest companies), general economic conditions, historic trends, and comparisons with other data sources.

Disclosure control

Statistics Canada is prohibited by law from releasing any data which would divulge information obtained under the Statistics Act that relates to any identifiable person, business or organization without the prior knowledge or the consent in writing of that person, business or organization. Various confidentiality rules are applied to all data that are released or published to prevent the publication or disclosure of any information deemed confidential. If necessary, data are suppressed to prevent direct or residual disclosure of identifiable data.

Data accuracy

Of the units contributing to the estimate, the (weighted) response rate was 93.6%. CVs were calculated for each estimate and are available upon request.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, Statistics Canada has developed *standards of service* that its employees observe.

To obtain a copy of these service standards, please contact Statistics Canada toll-free at 1-800-263-1136. The service standards are also published on www.statcan.gc.ca under "About us" > "The agency" > "Providing services to Canadians."

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.
