## Acknowledgements

The Aboriginal Peoples Output Program of the 1986 Census has been a special program designed to meet the data needs of aboriginal peoples. The following persons made a contribution to the program: Andrew J. Siggner who served as project manager; Mary Jane Norris, Jeff Kennedy, Judy Huard, Connie Blakey, Jonathan Ellison, and all the Advisory Services staff in the regional offices who worked on the output consultation phase; Wendy Wright, Heather Tait (summer student from the University of Western Ontario), Kimberly Thompson and Elisabeth Moore who worked on the design and production of the data products; technical staff, Steve James, Carol Maclean, Mike Crew, and Nicole Charbonneau. Much thanks are due to Mr. Alex Martin, Dr. Edward T. Pryor and especially, Doug Norris, all of whom, as senior managers for the 1986 Census, provided continuous support for this program. Finally, special thanks are given to the seventy native organizations, tribal councils and communities whose input during the consultation phase gave direction to the design of the output products.

## Introduction

This data book, prepared by the 1986 Census Aboriginal Peoples Output Program, presents a set of ten tables that provide an overview of selected demographic and socio-economic characteristics of the Canadian aboriginal population. These data are shown at the Canada, provincial and territorial levels. The types of characteristics of the aboriginal population included are: age and sex composition, marital status, mother tongue, home language, official language, geographic mobility, education attainment, labour force activity, occupation and income.

The aboriginal population in these tables is based on respondents' answers to the following ethnic or cultural origin question in the 1986 Census: "To which ethnic or cultural group(s) do you or did your ancestors belong? (Mark as many as apply)"

As indicated, respondents were asked to identify their ancestral origins and persons with aboriginal origins could check the following groups: North American Indian, Métis or Inuit, or they could write in their ancestry (see Appendix 3 for a full presentation of the question). In this report, the total aboriginal population count consists of anyone who reported one or more aboriginal origins including persons who reported themselves as having both aboriginal origins and non-aboriginal origins.

Each of the ten tables in this report has two parts. The first part of the table (for example, Table 1.1) shows the total aboriginal population divided into those reporting aboriginal origins only (single or multiple responses), and those reporting mixed aboriginal and non-aboriginal origins. Also included are bench-mark data for the relevant total provincial or territorial population and for Canada, as a whole. The second part of the table (for example, Table 1.2) shows the aboriginal population according to the following more detailed breakdown of aboriginal origins:

- North American Indian only
- North American Indian and Non-Aboriginal origins
- Métis only
- Métis \& Non-Aboriginal origins
- Inuit only
- Inuit \& Non-Aboriginal origins
- Other Multiple Aboriginal origins

## Cautionary Notes

Two cautionary notes need to be made to persons using the data in this report:

1) A number of Indian reserves (136) representing approximately 45,000 people were incompletely enumerated in the 1986 Census (see Appendices 1 and 2). The characteristics of the population living on these reserves have not been estimated and are not included in this report. The unenumerated reserve population represents about $6 \%$ of the overall population reporting aboriginal origins.
2) For the first time, the 1986 Census questionnaire actually encouraged respondents to mark as many origins as apply. As a consequence, the number of multiple origin responses was significantly higher than in the 1981 Census where there was no such instruction (see Appendix 3). For example, the total aboriginal population reported in 1981 was 491,460 but, in 1986, it was 711,720 , an increase of about $45 \%$ in five years. Such a five-year increase is much larger than would be expected from normal demographic change which might account for a growth of around $10 \%$. Thus, the reader should be aware that many more people in the 1986 Census decided to identify their aboriginal roots than in the previous census. (Readers who have further interest in the historical comparability issue should see the report by Pamela White listed in Appendix 4.)

## Selected Highlights at the Canada level

The following highlights are drawn from Tables 1 to 10 at the Canada level only. They are intended to illustrate the range of information contained in the tables.

- In 1986, 711,720 persons reported having aboriginal origins, representing about $3 \%$ of the total population in Canada. Of these, $53 \%$ reported only aboriginal origins, while the remaining $47 \%$ said that they had a mix of both aboriginal and non-aboriginal origins.
- Among the population reporting aboriginal origins, $36.5 \%$ were below age 15 years in 1986 as compared to only $21.5 \%$ for all of Canada.
- Forty percent of persons reporting Inuit as their only origin were younger than age 15. This compares to $35 \%$ and $33 \%$ for those reporting only North American Indian and Métis origins, respectively.
- In the total Canadian population aged 15 years and over $61 \%$ reported being married in contrast to $51 \%$ for those reporting aboriginal origins. Among those reporting only aboriginal origins about $49 \%$ were married versus $53 \%$ among those with mixed aboriginal and non-aboriginal origins.
- Among those reporting aboriginal origins, about $19 \%$ said they had an aboriginal mother tongue. For those reporting aboriginal origins only, $33 \%$ reported having an aboriginal mother tongue. The Inuit had the highest share of their population with an aboriginal mother tongue ( $75 \%$ ), North American Indians were at $34 \%$ and Métis at about $12 \%$.
- In terms of language spoken at home, $24 \%$ of those with only aboriginal origins reported speaking an aboriginal language at home. The majority of this group said that they spoke English at home ( $58 \%$ ). The Inuit had the highest share of their population reporting an aboriginal home language (64\%).
- Almost $83 \%$ of the population reporting aboriginal origins said they could speak English as an official language; 5\% said they could speak French; and about $9 \%$ said they could speak both. For those who reported Métis and non-aboriginal origins, almost $15 \%$ said that they could speak both French and English, compared to $8 \%$ of those reporting Métis only who said that they could speak both official languages.
- While only about $19 \%$ of the Canadian population in 1986 had migrated from a different community in 1981, $23 \%$ of the total aboriginal population had. Those of mixed aboriginal and non-aboriginal origins had the largest share of migrants at $28 \%$.
- Among those aged 15 years and over reporting aboriginal origins, better than one in four had less than Grade 9 education. For those of aboriginal origins only, the share with less than Grade 9 rises to $38 \%$. This contrasts with only $17 \%$ in the Canadian population as a whole.
- For those with aboriginal origins only, just over $5 \%$ had at least some university education. For those of mixed aboriginal and non-aboriginal origins, the percentage rises to over $15 \%$. For all Canadians, the share is just over $18 \%$.
- In terms of labour force activity, about $35 \%$ of those with aboriginal origins only reported being employed. This contrasts with $60 \%$ in both the mixed aboriginal and non-aboriginal population and in the general population of Canada.
- The three top occupation groups in which persons of aboriginal origins reported themselves were: service occupations ( $16 \%$ ), clerical and related ( $15 \%$ ) and construction trades (9\%). These same occupation groups tended to predominate among those who were of aboriginal origins only.
- Almost $36 \%$ of the population aged 15 years and over reporting aboriginal origins had less than $\$ 3,000$ annual total income from all sources. This compares to only about $23 \%$ in the general population. For those of aboriginal origins only, the percentage rises to $41 \%$ with less than $\$ 3,000$.
- The average total income for the population aged 15 years and over reporting aboriginal origins is $\$ 12,899$ compared to $\$ 18,188$ in the general population. Those of aboriginal origins only had an average total income of $\$ 10,678$.

## Confidentiality and Random Rounding

All figures in this profile have been subject to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures, including totals, are randomly rounded (either up or down) to a multiple of " 5 ". Consequently, minor differences can be expected between totals and the sum of cell values in various tables. Similarly, percentages which are calculated on rounded figures also do not necessarily add up to 100. Percentage distributions and rates for the most part are based on rounded data, while averages are based on unrounded data.

## Definitions and Special Notes

Definitions for the various characteristics in each of the tables and relevant special notes of which the reader should be aware appear following the footnote section of this report.

## Reference Products

Users who may require additional detail in understanding and interpreting data and geographic concepts appearing in this report, should refer to the 1986 Census Dictionary (Catalogue No. 99-101E or F). Other data products from the 1986 Census pertaining to the aboriginal population are listed in Appendix 4. Further details on the products and services available from the census are provided in the 1986 Census Products and Services-Final Edition (Catalogue No. 99-103E or F).

All users wishing to obtain more information about the range of census products available to serve their needs are invited to contact their nearest Statistics Canada Regional Office. Addresses and phone numbers are listed in Appendix 5.

Table 1.1
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Aboriginal Origins Only - is the sum of persons reporting an aboriginal origin as a single response, and those reporting two or more aboriginal origins (e.g., North American Indian and Metis).
(5) Aboriginal and Non-aboriginal Origins - refers to persons reporting an aboriginal origin (North American Indian, Metis or Inuit) and one or more non-aboriginal origins (e.g., British, French).
(6) Total Canada and Total Province or Territory (Columns 4 and 5) - refer to the total populations of Canada and of the relevant province or territory, excluding the institutional population.

Table 1.2
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Non-aboriginal in these columns - refers to persons who report one or more non-aboriginal origins such as British, French, etc., in combination with one of the aboriginal origins such as North American Indian.
(5) Other Multiple Aboriginal Origins - refer to the sum of those persons reporting two or more aboriginal origins with or without a non-aboriginal origin.

Table 2.1
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Aboriginal Origins Only - is the sum of persons reporting an aboriginal origin as a single response, and those reporting two or more aboriginal origins (e.g., North American Indian and Metis).
(5) Aboriginal and Non-aboriginal Origins - refers to persons reporting an aboriginal origin (North American Indian, Metis or Inuit) and one or more non-aboriginal origins (e.g., British, French).
(6) Total Canada and Total Province or Territory (Columns 4 and 5) - refer to the total populations of Canada and of the relevant province or territory, excluding the institutional population.

Table 2.2
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Non-aboriginal in these columns - refers to persons who report one or more non-aboriginal origins such as British, French, etc., in combination with one of the aboriginal origins such as North American Indian.
(5) Other Multiple Aboriginal Origins - refer to the sum of those persons reporting two or more aboriginal origins with or without a non-aboriginal origin.

Table 3.1
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Aboriginal Origins Only - is the sum of persons reporting an aboriginal origin as a single response, and those reporting two or more aboriginal origins (e.g., North American Indian and Metis).
(5) Aboriginal and Non-aboriginal Origins - refers to persons reporting an aboriginal origin (North American Indian, Metis or Inuit) and one or more non-aboriginal origins (e.g., British, French).
(6) Total Canada and Total Province or Territory (Columns 4 and 5) - refer to the total populations of Canada and of the relevant province or territory, excluding the institutional population.
(7) Aboriginal only - refers to persons reporting only one aboriginal language (e.g. Cree) as their mother tongue.
(8) Other language - refers to persons reporting only one non-aboriginal language, which is not English or French, as their mother tongue.
(9) Multiple languages - refers to persons reporting more than one aboriginal and/or non-aboriginal language as their mother tongue.

Table 3.2
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Non-aboriginal in these columns - refers to persons who report one or more non-aboriginal origins such as British, French, etc., in combination with one of the aboriginal origins such as North American Indian.
(5) Other Multiple Aboriginal Origins - refer to the sum of those persons reporting two or more aboriginal origins with or without a non-aboriginal origin.
(6) Aboriginal only - refers to persons reporting only one aboriginal language (e.g. Cree) as their mother tongue.
(7) Other language - refers to persons reporting only one non-aboriginal language, which is not English or French, as their mother tongue.
(8) Multiple languages - refers to persons reporting more than one aboriginal and/or non-aboriginal language as their mother tongue.

Table 4.1
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Aboriginal Origins Only - is the sum of persons reporting an aboriginal origin as a single response, and those reporting two or more aboriginal origins (e.g., North American Indian and Metis).
(5) Aboriginal and Non-aboriginal Origins - refers to persons reporting an aboriginal origin (North American Indian, Metis or Inuit) and one or more non-aboriginal origins (e.g., British, French).
(6) Total Canada and Total Province or Territory (Columns 4 and 5) - refer to the total populations of Canada and of the relevant province or territory, excluding the institutional population.
(7) Aboriginal only - refers to persons reporting only one aboriginal language (e.g. Cree) as the language spoken most often at home.
(8) Other language - refers to persons reporting only one non-aboriginal language, which is not English or French, as their home language.
(9) Multiple languages - refers to persons reporting more than one aboriginal and/or non-aboriginal language as their home language.

Table 4.2
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Non-aboriginal in these columns - refers to persons who report one or more non-aboriginal origins such as British, French, etc., in combination with one of the aboriginal origins such as North American Indian.
(5) Other Multiple Aboriginal Origins - refer to the sum of those persons reporting two or more aboriginal origins with or without a non-aboriginal origin.
(6) Aboriginal only - refers to persons reporting only one aboriginal language (e.g. Cree) as the language spoken most often at home.
(7) Other language - refers to persons reporting only one non-aboriginal language, which is not English or French, as their home language.
(8) Multiple languages - refers to persons reporting more than one aboriginal and/or non-aboriginal language as their home language.

Table 5.1
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Aboriginal Origins Only - is the sum of persons reporting an aboriginal origin as a single response, and those reporting two or more aboriginal origins (e.g., North American Indian and Metis).
(5) Aboriginal and Non-aboriginal Origins - refers to persons reporting an aboriginal origin (North American Indian, Metis or Inuit) and one or more non-aboriginal origins (e.g., British, French).
(6) Total Canada and Total Province or Territory (Columns 4 and 5) - refer to the total populations of Canada and of the relevant province or territory, excluding the institutional population.

Table 5.2
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Non-aboriginal in these columns - refers to persons who report one or more non-aboriginal origins such as British, French, etc., in combination with one of the aboriginal origins such as North American Indian.
(5) Other Multiple Aboriginal Origins - refer to the sum of those persons reporting two or more aboriginal origins with or without a non-aboriginal origin.

Table 6.1
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Aboriginal Origins Only - is the sum of persons reporting an aboriginal origin as a single response, and those reporting two or more aboriginal origins (e.g., North American Indian and Metis).
(5) Aboriginal and Non-aboriginal Origins - refers to persons reporting an aboriginal origin (North American Indian, Metis or Inuit) and one or more non-aboriginal origins (e.g., British, French).
(6) Total Canada and Total Province or Territory (Columns 4 and 5) - refer to the total populations of Canada and of the relevant province or territory, excluding the institutional population.
(7) Non-migrants - refer to persons who on Census Day were living in the same Census Subdivision (or community) as they did five years earlier, even though they may have changed dwellings. Non-migrants are the sum of non-movers and movers.
(8) Non-movers - refer to persons who lived in the same dwelling on Census Day as the one they occupied five years earlier.
(9) Movers - refer to persons who on Census Day occupied a different dwelling five years earlier, but did not change Census Subdivisions, that is, they did not move from their community.
(10) Total Migrants - refer to persons who on Census Day were living in a different Census Subdivision (or community) from the one they were living in five years earlier.
(11) Migrants - Same province or territory - refer to persons who, on Census Day, were living in a different Census Subdivision (or community) from the one they were living in five years earlier, but had not changed their province or territory.
(12) Migrants - From different province, territory or outside Canada - refer to persons who five years earlier were living either in a different province or territory, or outside Canada.

Table 6.2
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely, enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Non-aboriginal in these columns - refers to persons who report one or more non-aboriginal origins such as British, French, etc., in combination with one of the aboriginal origins such as North American Indian.
(5) Other Multiple Aboriginal Origins - refer to the sum of those persons reporting two or more aboriginal origins with or without a non-aboriginal origin.
(6) Non-migrants - refer to persons who on Census Day were living in the same Census Subdivision (or community) as they did five years earlier, even though they may have changed dwellings. Non-migrants are the sum of non-movers and movers.
(7) Non-movers - refer to persons who lived in the same dwelling on Census Day as the one they occupied five years earlier.
(8) Movers - refer to persons who on Census Day occupied a different dwelling five years earlier, but did not change Census Subdivisions, that is, they did not move from their community.
(9) Total Migrants - refer to persons who on Census Day were living in a different Census Subdivision (or community) from the one they were living in five years earlier.
(10) Migrants - Same province or territory - refer to persons who, on Census Day, were living in a different Census Subdivision (or community) from the one they were living in five years earlier, but had not changed their province or territory.
(11) Migrants - From different province, territory or outside Canada - refer to persons who five years earlier were living either in a different province or territory, or outside Canada.

Table 7.1
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Aboriginal Origins Only - is the sum of persons reporting an aboriginal origin as a single response, and those reporting two or more aboriginal origins (e.g., North American Indian and Metis).
(5) Aboriginal and Non-aboriginal Origins - refers to persons reporting an aboriginal origin (North American Indian, Metis or Inuit) and one or more non-aboriginal origins (e.g., British, French).
(6) Total Canada and Total Province or Territory (Columns 4 and 5) - refer to the total populations of Canada and of the relevant province or territory, excluding the institutional population.
(7) Includes "no schooling or kindergarten only".
(8) Includes both post-secondary non-university courses requiring secondary school graduation such as community colleges or CEGEPs, and courses taken in other institutions such as trade schools or vocational centres which may not require secondary school graduation.
(9) Includes those with both university and other non-university education, as well as those with university only.

Table 7.2
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Non-aboriginal in these columns - refers to persons who report one or more non-aboriginal origins such as British, French, etc., in combination with one of the aboriginal origins such as North American Indian.
(5) Other Multiple Aboriginal Origins - refer to the sum of those persons reporting two or more aboriginal origins with or without a non-aboriginal origin.
(6) Includes "no schooling or kindergarten only".
(7) Includes both post-secondary non-university courses requiring secondary school graduation such as community colleges or CEGEPs, and courses taken in other institutions such as trade schools or vocational centres which may not require secondary school graduation.
(8) Includes those with both university and other non-university education, as well as those with university only.

Table 8.1
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Aboriginal Origins Only - is the sum of persons reporting an aboriginal origin as a single response, and those reporting two or more aboriginal origins (e.g., North American Indian and Metis).
(5) Aboriginal and Non-aboriginal Origins - refers to persons reporting an aboriginal origin (North American Indian, Metis or Inuit) and one or more non-aboriginal origins (e.g., British, French).
(6) Total Canada and Total Province or Territory (Columns 4 and 5) - refer to the total populations of Canada and of the relevant province or territory, excluding the institutional population.
(7) Employed - refers to persons 15 years of age and over who, during the week prior to June 3, 1986:
(a) did any work at all excluding housework or other maintenance or repairs around the home and volunteer work; or
(b) were absent from their job or business because of own temporary illness or disability, vacation, labour dispute at their place of work, or were absent for other reasons. .
(8) Unemployed - refers to persons 15 years of age and over who, during the week prior to enumeration:
(a) were without work, had actively looked for work in the past four weeks and were available for work; or
(b) had been on lay-off and expected to return to their job; or
(c) had definite arrangements to start a new job in four weeks or less.
(9) Total in Labour Force (in reference week) - refers to persons who were either employed or unemployed during the week prior to enumeration (June 3, 1986).
(10) Not in labour force - refers to those persons 15 years of age and over who, in the week prior to enumeration, were unwilling or unable to offer or supply their labour services under conditions existing in the labour market. It includes persons who looked for work during the last four weeks but who were not available to work in the reference week, as well as persons who did not work, did not have a new job to start in four weeks or less, were not on temporary layoff or did not look for work in the four weeks prior to enumeration.
(11) Unemployment Rate - refers to the unemployed labour force expressed as a percentage of the total labour force (in reference week) in an area, group, or category.
(12) Participation Rate - refers to the total labour force (in reference week) expressed as a percentage of the total population 15 years of age and over, excluding institutional residents, in an area, group or category.

Table 8.2
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Non-aboriginal in these columns - refers to persons who report one or more non-aboriginal origins such as British, French, etc., in combination with one of the aboriginal origins such as North American Indian.
(5) Other Multiple Aboriginal Origins - refer to the sum of those persons reporting two or more aboriginal origins with or without a non-aboriginal origin.
(6) Employed - refers to persons 15 years of age and over who, during the week prior to June 3, 1986:
(a) did any work at all excluding housework or other maintenance or repairs around the home and volunteer work; or
(b) were absent from their job or business because of own temporary illness or disability, vacation, labour dispute at their place of work, or were absent for other reasons.
(7) Unemployed - refers to persons 15 years of age and over who, during the week prior to enumeration:
(a) were without work, had actively looked for work in the past four weeks and were available for work; or
(b) had been on lay-off and expected to return to their job ; or
(c) had definite arrangements to start a new job in four weeks or less.
(8) Total in Labour Force (in reference week) - refers to persons 15 years of age and over who were either employed or unemployed during the week prior to enumeration (June 3, 1986).
(9) Not in labour force - refers to those persons 15 years of age and over who, in the week prior to enumeration, were unwilling or unable to offer or supply their labour services under conditions existing in the labour market. It includes persons who looked for work during the last four weeks but who were not available to work in the reference week, as well as persons who did not work, did not have a new job to start in four weeks or less, were not on temporary layoff or did not look for work in the four weeks prior to enumeration.
(10) Unemployment Rate - refers to the unemployed labour force expressed as a percentage of the total labour force (in reference week) in an area, group, or category.
(11) Participation Rate - refers to the total labour force (in reference week) expressed as a percentage of the total population 15 years of age and over, excluding institutional residents, in an area, group or category.

Table 9.1
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Aboriginal Origins Only - is the sum of persons reporting an aboriginal origin as a single response, and those reporting two or more aboriginal origins (e.g., North American Indian and Metis).
(5) Aboriginal and Non-aboriginal Origins - refers to persons reporting an aboriginal origin (North American Indian, Metis or Inuit) and one or more non-aboriginal origins (e.g., British, French).
(6) Total Canada and Total Province or Territory (Columns 4 and 5) - refer to the total populations of Canada and of the relevant province or territory, excluding the institutional population.
(7) See Definitions and Special Notes Section.
(8) Occupation - not applicable - refers to unemployed persons who had never worked or who had last worked prior to January 1, 1985.

Table 9.2
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Non-aboriginal in these columns - refers to persons who report one or more non-aboriginal origins such as British, French, etc., in combination with one of the aboriginal origins such as North American Indian.
(5) Other Multiple Aboriginal Origins - refer to the sum of those persons reporting two or more aboriginal origins with or without a non-aboriginal origin.
(6) See Definitions and Special Notes Section.
(7) Occupation - not applicable - refers to unemployed persons who had never worked or who had last worked prior to January 1, 1985.

Table 10.1
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Aboriginal Origins Only - is the sum of persons reporting an aboriginal origin as a single response, and those reporting two or more aboriginal origins (e.g., North American Indian and Metis).
(5) Aboriginal and Non-aboriginal Origins - refers to persons reporting an aboriginal origin (North American Indian, Metis or Inuit) and one or more non-aboriginal origins (e.g., British, French).
(6) Total Canada and Total Province or Territory (Columns 4 and 5) - refer to the total populations of Canada and of the relevant province or territory, excluding the institutional population.
(7) Total income - refers to income from all sources such as total wages and salaries, net non-farm self-employed income, net farm self-employed income, family allowances, federal child tax credits, Old Age Security Pension Plan and Guaranteed Income Supplement, benefits from Unemployment Insurance, other income from government sources, dividends and interest on bonds, deposits, savings certificates and other investment income, retirement pensions, superannuation and annuities, and other money income. Also shown in the table is a category for "No Income" which refers to the population aged 15 years and over who did not receive any income in 1985.
(8) Average income - refers to the average of total income from all sources (e.g.,total wages and salaries net nonfarm self-employed income, net farm self-employed income, family allowances, federal child tax credits, Old Age Security Pension Plan and Guaranteed Income Supplement, benefits from Unemployment Insurance, other income from government sources, dividends and interest on bonds, deposits, savings certificates and other investment income, retirement pensions, superannuation and annuities, and other money income). Average income excludes persons with no income in 1985.

Table 10.2
(1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Metis or Inuit.
(2) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For an estimate of the unenumerated population and list of incompletely enumerated reserves in each affected province, see Appendix 1 and 2.
(3) Total Aboriginal Origins - are the sum of persons who reported:
(a) a single aboriginal (e.g., North American Indian, Metis or Inuit) and,
(b) multiple aboriginal origins, that is those who reported:

- at least one aboriginal origin with any other non-aboriginal (e.g., Metis and French), or
- two or more aboriginal origins only.
(4) Non-aboriginal in these columns - refers to persons who report one or more non-aboriginal origins such as British, French, etc., in combination with one of the aboriginal origins such as North American Indian.
(5) Other Multiple Aboriginal Origins - refer to the sum of those persons reporting two or more aboriginal origins with or without a non-aboriginal origin.
(6) Total income - refers to income from all sources such as total wages and salaries, net non-farm self-employed income, net farm self-employed income, family allowances, federal child tax credits, Old Age Security Pension Plan and Guaranteed Income Supplement, benefits from Unemployment Insurance, other income from government sources, dividends and interest on bonds, deposits, savings certificates and other investment income, retirement pensions, superannuation and annuities, and other money income. Also shown in the table is a category for "No Income" which refers to the population aged 15 and over who did not receive any income during 1985.
(7) Average income - refers to the average of total income from all sources (e.g.,total wages and salaries net nonfarm self-employed income, net farm self-employed income, family allowances, federal child tax credits, Old Age Security Pension Plan and Guaranteed Income Supplement, benefits from Unemployment Insurance, other income from government sources, dividends and interest on bonds, deposits, savings certificates and other investment income, retirement pensions, superannuation and annuities, and other money income). Average income excludes persons with no income in 1985.

## DEFINITIONS

## AGE

Refers to the age at last birthday (as of the census reference date, June 3, 1986). This variable is derived from the date of birth question which asks day, month and year of birth. Persons who were unable to give the exact date of birth were asked to give the best possible estimate.

## AVERAGE INCOME OF INDIVIDUALS

Average income of individuals refers to the weighted mean total income of individuals 15 years of age and over who reported income for 1985. Average income is calculated from unrounded data by dividing the aggregate income of a specified group of individuals (e.g., males, 4554 years of age) by the number of individuals with income in that group.

## EMPLOYED

Refers to persons who, during the week prior to June 3, 1986:
(a) did any work at all excluding housework or other maintenance or repairs around the home and volunteer work; or
(b) were absent from their job or business because of own temporary illness or disability, vacation, labour dispute at their place of work, or were absent for other reasons.

Data are available for persons 15 years of age and over, excluding institutional residents.

## ETHNIC ORIGIN

Refers to the ethnic or cultural group(s) to which the respondent or the respondent's ancestors belong. Ethnic or cultural group refers to the "roots" or ancestral origin of the population and should not be confused with citizenship or nationality.

It should be noted that prior to the 1981 Census, only the respondent's paternal ancestry was to be reported. If multiple ethnic origins were reported, only one origin was captured, resulting in one ethnic origin per respondent. In 1981, this restriction was removed, allowing for multiple ethnic origins. One write-in was provided on the 1981 questionnaire, in addition to the mark boxes.

The 1986 Census questionnaire allows respondents to write in up to three ethnic origins not included in the mark boxes. This increases the number of multiple response possibilities.

The 1986 question was changed slightly from that asked in the 1981 Census. In 1981, respondents were asked, "To which ethnic or cultural group did you or your ancestors belong on first coming to this continent?" The phrase "on first coming to this continent" was removed from the 1986 question. The 1986 ethnic origin question was: "To which ethnic or cultural group(s) do you or did your ancestors belong?"

## HOME LANGUAGE

Refers to the language spoken at home by the individual at the time of the census. If more than one language was spoken, the language spoken most often by the individual was to be reported.

In 1986, the following instructions were provided to respondents:
"You should report the language you yourself speak most often at home. If you are answering for someone else, report the language that he/she speaks most often.

If you speak two languages equally often, report both.

For a child who has not yet learned a language, report the language spoken most often at home. If two languages are used equally often, report both.

If you are mute, report the language you use most often at home to make yourself understood.

If you live alone, report the language in which you feel most comfortable.

Persons who speak an Indian language (from India) should not report Indian but rather Hindi, Urdu, Punjabi or some other language as applicable. Persons who speak an Amerindian language (North American Indian) should report Cree, Ojibway or some other Amerindian language as applicable."

## INDIAN RESERVE

Refers to land, the legal title to which is vested in Her Majesty, that has been set apart for the use and benefit of an Indian band and that is subject to
the terms of the Indian Act. Since it is generally excluded from local jurisdiction and is administered by the Federal Department of Indian and Northern Affairs Canada (INAC), it is classified as a census subdivision (CSD) by Statistics Canada.

## INDIAN SETTLEMENT

Refers to places, identified by the Federal Department of Indian and Northern Affairs Canada (INAC) for statistical purposes only, where a self-contained group of at least 10 Indian people reside more or less permanently. Indian settlements are usually located on Crown lands under federal or provincial jurisdiction. They have not been set apart for the use and benefit of an Indian band as is the case with Indian reserves.

## LABOUR FORCE ACTIVITY

Refers to the labour market activity of the working age population who, in the week prior to June 3, 1986, were emploved or unemployed. The remainder of the working age population is classified as not in labour force. Data are available for persons 15 years of age and over, excluding institutional residents.

## MARITAL STATUS

Refers to the conjugal status of a person.

## Now married (excluding separated)

Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained. Persons living common-law are considered as "Now married".

## Separated

Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce.

## Divorced

Persons who have obtained a legal divorce and who have not remarried.

## Widowed

Persons who have lost their spouse through death and who have not remarried.

## Never married (single)

Persons who have never married (including all persons less than 15 years of age) and persons whose marriage was annulled.

## MOBILITY STATUS

Refers to the relationship between a person's usual place of residence on Census Day and his/her usual place of residence five years earlier. On the basis of this relationship, the population is classified as non-movers and movers (mobility status). Within the category movers, a further distinction is made between non-migrants and migrants (migration status).

Non-movers are persons who, on Census Day, were living in the same dwelling they occupied five years earlier.

Movers are persons who, on Census Day, were living in a different dwelling than the one they occupied five years earlier.

Non-migrants are movers who, on Census Day, were living within the same census subdivision (CSD) they resided in five years earlier.

Migrants are movers who, on Census Day, were residing in a different CSD within Canada five years earlier (internal migrants) or who were living outside Canada five years earlier (external migrants).

## MOTHER TONGUE

Refers to the first language learned in childhood and still understood by the individual at the time of the census.

In 1986, the following instructions were provided to respondents:
"You should report the first language you learned in childhood, that is, before you went to school. If you no longer understand that language, report the second language you learned. If you are answering for someone else, report the first language that he/she learned in childhood.

If you understand more than one language, report the one you learned first. If you learned two languages at the same time, report the language you yourself spoke most often at home. If you used the two languages equally often, report both.

For a child who has not yet learned a language, report the language he/she will first be learning at home. If he/she is learning two languages at the same time, report the one in which he/she is spoken to most often. If the two languages are used equally often, report both.

Persons who speak an Indian language (from India) should not report Indian but rather Hindi, Urdu, Punjabi or some other language as applicable. Persons who speak an Amerindian language (North American Indian) should report Cree, Ojibway or some other Amerindian language as applicable."

## NOT IN LABOUR FORCE

The Not in Labour Force classification refers to those persons, who, in the week prior to enumeration, were unwilling or unable to offer or supply their labour services under conditions existing in the labour market. It includes persons who looked for work during the last four weeks but who were not available to start work in the reference week, as well as persons who did not work, did not have a new job to start in four weeks or less, were not on temporary lay-off or did not look for work in the four weeks prior to enumeration. Data are available for persons 15 years of age and over, excluding institutional residents.

## OCCUPATION (BASED ON 1980 CLASSIFICATION)

Refers to the kind of work persons were doing during the reference week, as determined by their reporting of their kind of work and the description of the most important duties in their job. Data are available for persons 15 years of age and over, excluding institutional residents. If the person did not have a job during the week prior to enumeration, the data relate to the job of longest duration since January 1, 1985. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Occupation data are based on a classification structure composed of three levels of aggregation. There are 22 major groups which are subdivided into 80 minor groups. These, in turn, contain a total of 514 detailed occupations.

## OFFICIAL LANGUAGE

Refers to the ability to conduct a conversation in English and French, the official languages of Canada.

It should be emphasized that the official language question data are based on the individual's own assessment of his or her abilities.

In 1986, the following instructions were provided to respondents:

#### Abstract

"Do not report French or English learned at school unless you can conduct a conversation of some length on various topics in that language.

For a child who has not yet learned a language, report the language spoken most often at home if it is either English or French. If the two languages are used equally often, report "English and French". If neither language is used often, mark "Neither English nor French".

If you are mute, report English, French or both provided you are able to make yourself understood in one or both of these languages."

## PARTICIPATION RATE

Refers to the total labour force (in reference week) expressed as a percentage of the total population 15 years of age and over, excluding institutional residents, in an area, group or category.

## SCHOOLING: HIGHEST LEVEL OF

Refers to the highest grade or year of elementary or secondary school attended, or the highest year of university or other non-university completed. University education is considered to be above other non-university. Also, the attainment of a degree, certificate or diploma is considered to be at a higher level than years completed or attended without an educational qualification.

## UNEMPLOYED

Refers to persons who, during the week prior to enumeration:
(a) were without work, had actively looked for work in the past four weeks and were available for work; or
(b) had been on lay-off and expected to return to their job; or
(c) had definite arrangements to start a new job in four weeks or less.

Data are available for persons 15 years of age and over, excluding institutional residents.

## UNEMPLOYMENT RATE

Refers to the unemployed labour force expressed as a percentage of the total labour force (in reference week) in an area, group, or category. Data are available for persons 15 years of age and over, excluding institutional residents.

## SPECIAL NOTES

## POPULATION COUNTS BASED ON USUAL RESIDENCE

The population counts shown here for a particular area represent the number of Canadians whose usual place of residence is in that area, regardless of where they happened to be on Census Day. Also included are any Canadians staying in a dwelling in that area on Census Day and having no usual place of residence elsewhere in Canada. In most areas, there is little difference between the number of usual residents and the number of people staying in the area on Census Day. For certain places, however, such as tourist or vacation areas, or those including large work camps, the number of people staying in the area at any particular time could significantly exceed the number of usual residents shown here.

## INCOMPLETELY ENUMERATED INDIAN RESERVES AND INDIAN SETTLEMENTS

On some Indian reserves and Indian settlements in the 1986 Census, enumeration was not permitted or was interrupted before it could be completed.

Data for 1986 are therefore not available for the incompletely enumerated reserves and settlements and are not included in tabulations. Data for geographic areas containing one or more of these reserves or settlements are therefore noted accordingly. Because of the missing data, users are cautioned that for affected geographic areas, comparisons (e.g., percentage change) between 1981 and 1986 are not exact. While for higher level geographic areas (Canada, provinces, census metropolitan areas and census agglomerations) the impact of the missing data is very small, the impact can increase for smaller areas containing a larger proportion of affected reserves and settlements.

While it is not possible to estimate the population of each incompletely enumerated reserve, estimates of the missed total population and total occupied dwellings at the provincial level have been made and are shown in Appendix 1.

Note, however, that it was not possible to estimate any characteristics of the missed population, even at the provincial level.

Additional information on this subject can be obtained by referring to the User Information Bulletin, Number 1, "Summary of the Methodology for Estimating the Population and Occupied Private Dwellings on Incompletely Enumerated Indian Reserves".

A list of incompletely enumerated Indian reserves and Indian settlements is shown in Appendix 2 together with the province and associated subprovincial area(s).

## COMPARABILITY AND QUALITY OF DATA ON HOME LANGUAGE AND OFFICIAL LANGUAGE

Comparison between 1981 and 1986
Home language - The question on home language was the same in the last two censuses, but the instructions to the respondents were modified. In 1981, the respondents were asked to indicate only one language; nevertheless, 535,735 persons ( $2.2 \%$ of the population) reported more than one.

To better reflect the linguistic reality in Canada, this instruction was dropped from the 1986 Census. Under the new guidelines, individuals could report more than one home language if they were now speaking them equally often at home.

The number of multiple responses given in the 1986 Census was significantly higher than in the 1981 Census. In 1986, 1,159,675 persons or $4.6 \%$ of the population indicated more than one home language.

This increase was the result either of the changes made in the questionnaire, of changes in the way in which the population answers language questions or of an increase in the number of persons who spoke more than one language at home. A combination of these factors may also explain the increase in multiple responses.

When the 1981 data were processed, only one language was retained for publication, even in cases where the respondent reported more than one. In 1986, responses indicating more than one language were accepted.

In order to facilitate the determination of the trends between the two censuses, the 1986 Census results have been adjusted. In cases where more than one language was reported, the multiple responses were distributed among the component languages in the same proportions as in the 1981 Census. The results, for Canada, the provinces, the territories and selected census metropolitan areas, have been published in two special documents entitled "Adjusted Language Data", April (1988). Also, data from the 1981 Census have been adjusted to show the multiple responses reported at that time. These adjustments to the home language figures make it easier to relate the 1986 data to the 1981 data, but do not make the results of the two censuses entirely comparable. Consequently, considerable care must be exercised in the interpretation of changes between 1981 and 1986.

The 1986 Classification of languages differs from that used in 1981, especially with regard to aboriginal languages. Appendix B of the 1986 Census Dictionary (Catalogue No. 99-101E) provides a description of the changes.

Official language - Some respondents report speaking English or French or both at home, while on the other hand they indicate in the official language question, that they cannot carry on a conversation in these languages.

In such cases, in the 1981 Census, the answer to the official language question was considered erroneous. Consequently, during data processing, this answer was changed to show that the person could speak the official language(s) they had reported to the home language question.

In the 1986 Census, not all of these responses were considered erroneous. If the respondent indicated being able to speak only one official language - either English or French - and this language matched the person's mother tongue, no correction was made during processing. Consequently, these response patterns appear as such in the 1986 tabulations.

Aboriginal languages - Users should be aware that the data for some Indian reserves and Indian settlements are not available (see special note "Incompletely Enumerated Indian Reserves and Indian Settlements"). Among the population who participated in the 1986 Census, 97,000 persons reported a single aboriginal language as home language. Respondents who reported "Indian" as a language were classified in the "Amerindian languages, not included elsewhere (n.i.e.)" category. This category consists of 5,500 persons. It is included in the total for aboriginal languages. Users should note that approximately one-half of the $\mathbf{5 , 5 0 0}$ responses classified in this category, at the Canada level, were provided by respondents of Asian origin. The proportion is also about one-half in Quebec. Approximately 2 out of 3 respondents were of Asian origin in British Columbia and 4 out of 5 in Alberta and Ontario. The proportion was below $5 \%$ for Manitoba. In the remaining provinces and territories very few persons reported "Indian" as their home language.

For further information regarding data on language, please contact the Housing, Family and Social Statistics Division, Statistics Canada, Ottawa, Canada K1A 0T6.

## COMPARABILITY OF DATA ON ETHNIC ORIGIN

Comparison between 1981 and 1986. The 1981 and 1986 ethnic origin data are not directly comparable.

The 1981 ethnic origin question: To which ethnic or cultural group did you or your ancestors belong on first coming to this continent?, was modified for the 1986 Census. The phrase "on first coming to this continent" was removed from the 1986 version as it was viewed as being inappropriate for persons of aboriginal origin. The 1986 question was: To which ethnic or cultural group(s) do you or did your ancestors belong?

In 1986, respondents were instructed to mark or specify as many groups as apply. This instruction along with the addition of two more write-in spaces contributed significantly to an increase in multiple ethnic origin responses.

As well, the mark boxes in the question were ordered on the basis of 1981 incidence reporting of single ethnic origins. This changed the relative position of the mark boxes Chinese and Polish.

In light of the recommendations of a Parliamentary Commission on Visible Minorities in Canadian Society in the report Equality Now and the Abella Commission on Equality in Employment, the mark box Black was added to the 1986 ethnic origin question.

The mark boxes for aboriginal peoples were also changed. In 1986, status and non-status Indian categories which had been part of the 1981 ethnic origin question were replaced by North American Indian. It should be noted that persons of nonaboriginal cultural origin but status Indian under the Indian Act of Canada, for example, persons who obtained Indian status at marriage, could have been included in 1981 data for aboriginal peoples. These persons may not have identified their ethnic origin to be North American Indian in 1986 and thus would not be included in the 1986 count of aboriginal peoples. Also, in 1986, an undetermined number of persons of Métis origin could have indicated their ethnic origin as being the multiple response North American Indian and some other ethnic or cultural origin(s).

## Single and Multiple Response

A Single Response occurs when the respondent provides only one origin. For example, for Canada, 709,585 gave Italian as their only ethnic origin.

A Multiple Response occurs when the respondent provides more than one origin. Some 297,325 Canadians gave a response which included Italian and one or more ethnic or cultural origin(s). For example, 31,495 provided the multiple response combination: Italian and French.

In the ethnic origin legend for this profile, the single origins are shown as unique groups. The multiple origins are shown as one group: multiple origins. In the case of the 31,495 Italian and French multiple response combination, it would be included in the multiple origins count $(6,986,345$ for Canada).

For further information regarding the data on ethnic origin, please contact the Housing, Family and Social Statistics Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 9512574.

## Appendix 1

APPENDIX 1: Population and Occupied Private Dwellings, Showing Estimates for Incompletely Enumerated Indian Reserves and Indian Settlements, for Canada, Provinces and Territories, 1986

## Appendix 4

## Appendix 4

## 1986 Census Products and Services

The 1986 Census product line is designed to serve the diverse needs of our users. Using as a base the most demanded publications of past censuses, a full series of data, reference and analytical publications will be offered.

In addition to the tabulations shown in publications, census data are available in machine-readable form. In particular, there is a set of 44 basic summary tabulations for small geographic areas including enumeration areas, census tracts and census subdivisions. The data contained in the published profiles for census subdivisions and census divisions, census tracts, federal electoral districts, census metropolitan areas and census agglomerations are also available in machine-readable form.

While many tabulations are available from the planned output program, census tabulations can also be customized to individual users' needs. A range of products is offered, from predetermined basic data tabulations available for user-selected geographic areas, to complete custom tabulations which are developed to the exact requirements of the client. The products thus offer, on a cost-recovery basis, varying levels of flexibility in content, geography and medium.

## Reference Products

Users, who may require assistance in understanding and interpreting the data and geographic concepts appearing in this set of tabulations, should refer to the 1986 Census Dictionary (Catalogue No. 99-101E or F). The Dictionary provides definitions for all variables and terms used in 1986 Census data products.

Further details on the products and services available from the census are provided in the 1986 Census Products and Services - Final Edition (Catalogue No. 99-103E or F).

All users wishing to obtain more information about the range of census products available to serve their needs are invited to contact their nearest Statistics Canada Regional Office. They will be glad to help. Addresses and phone numbers are listed in Appendix 5.

## Additional Data Products and Reports

1. "Summary Tabulations of Ethnic and Aboriginal Origins, Canada, Provinces, Territories and Census Metropolitan Areas" - December 1987. Available from the nearest Statistics Canada Regional Office (see Appendix 5 for addresses).
2. Demographic Characteristics of the Total Population Residing on Selected Census Subdivisions (Indian Reserves, Settlements or Communities) - February 1988. Available from the nearest Statistics Canada Regional Office (see Appendix 5 for addresses).
3. "Socio-Economic Characteristics of the Total Population Residing on Selected Census Subdivisions (Indian Reserves, Settlements, or Communities)" - March, 1989. Available from the nearest Statistics Canada Regional Office (see Appendix 5 for addresses).
4. "Canada's Aboriginal Population by Census Subdivision for the 1986 Census" March, 1989. Available from the nearest Statistics Canada Regional Office (see Appendix 5 for addresses).
5. "1986 Census- Ethnic Origin: Note on Comparability, Single and Multiple Responses", by Pamela M. White, November 1987. Available from Housing, Families and Social Statistics Division, Statistics Canada, Ottawa, Ontario, KIA 0T6.

## ACCESSIBLE FROM COAST TO COAST

Statistics Canada's regional reference centres provide a full range of the census products and services. Each reference centre is equipped with a library and a sales counter where users can consult or purchase census publications, microcomputer diskettes, microfiche, maps and more. Each centre has facilities to retrieve information from Statistics Canada's computerized data retrieval systems - CANSIM and TELICHART. A telephone inquiry service is also available with toll-free numbers for regional clients outside local calling areas. Many other services - from seminars to consultations - are offered. Call or write your regional reference centre for information.
