## INTRODUCTION

This data book, prepared by the 1986 Census Aboriginal Peoples Output Program, presents the population by aboriginal origins for census subdivisions. A census subdivision (CSD) is the general term applying to municipalities, Indian reserves, Indian settlements or unorganized territories. In Newfoundland, Nova Scotia and British Columbia, the term also describes geostatistical areas that have been created by Statistics Canada in co-operation with the provincial governments as equivalents for municipalities. Within this report, the census subdivisions are organized by province or territory. The reader should note that, in the tables beside the CSD name, if it is an Indian reserve, an (R) is shown and for an Indian settlement an (S-E) is shown. To protect individual confidentiality, CSDs with a total aboriginal population of less than 40 are not shown.

The aboriginal population in these tables is based on respondents' answers to the following ethnic or cultural origin question in the 1986 Census:

"To which ethnic or cultural group(s) do you or did your ancestors belong? (Mark as many as apply)"

Respondents were asked to identify their ancestral origins according to the following aboriginal categories: North American Indian, Métis or Inuit, or they could write in their ancestry. In this report, the total aboriginal population count consists of anyone who reported one or more aboriginal origins including persons who reported themselves as having both aboriginal origins and non-aboriginal origins.

The tables for each province and territory and their respective census subdivisions show the total non-institutional population, as well as counts of the non-aboriginal population and the total aboriginal population which is further broken down as follows:

- North American Indian only;
- North American Indian and non-aboriginal origins;
- Métis only;
- Métis and non-aboriginal origins;
- Inuit only;
- Inuit and non-aboriginal origins;
- Other multiple aboriginal origins.

THE UNIVERSITY OF CHICAGO

## **Cautionary Notes**

A number of cautionary notes need to be made to persons using the data in this report:

- (1) A number of Indian reserves (136) representing approximately 45,000 people were incompletely enumerated in the 1986 Census (see Appendices 1 and 2). The population living on these specific reserves has not been estimated and is not included in this report. The non-enumerated reserve population represents about 6% of the overall population reporting aboriginal origins. An estimate of the total population living on such reserves in each affected province along with a list of the non-enumerated reserves is shown in Appendices 1 and 2.
- (2) For the first time, the 1986 Census question on ethnic/cultural origins actually encouraged respondents to mark as many origins as apply. As a consequence, the number of multiple origin responses was significantly higher than in the 1981 Census where there was no such instruction (see Appendix 3). For example, the total aboriginal population reported in 1981 was 491,460 but, in 1986, it was 711,720, an increase of about 45% in five years. Such a five-year increase is much larger than would be expected from normal demographic change which might account for a growth of around 10%. Thus, the reader should be aware that many more people in the 1986 Census decided to identify their aboriginal roots than in the previous census. (Readers who have further interest should see the report by Pamela White listed in Appendix 4 of this report.)

## **Confidentiality and Random Rounding**

All figures in these tables have been subject to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures, including totals, are randomly rounded (either up or down) to a multiple of "5". Consequently, minor differences can be expected between totals and the sum of cell values in various tables. Similarly, percentages which are calculated on rounded figures also do not necessarily add up to 100.

## **Definitions and Special Notes**

Definitions for the various characteristics in each of the tables and relevant special notes of which the reader should be aware appear after the footnote section of this report.

## **Reference Products**

Users who may require additional detail in understanding and interpreting data and geographic concepts appearing in this report, should refer to the **1986 Census Dictionary** (Catalogue No. 99-101E or F). Other data products from the 1986 Census pertaining to the aboriginal population are listed in Appendix 4. Further details on the products and services available from the census are provided in the **1986 Census Products and Services - Final Edition** (Catalogue No. 99-103E or F).

All users wishing to obtain more information about the range of census products available to serve their needs are invited to contact their nearest Statistics Canada Regional Office. Addresses and phone numbers are listed in Appendix 5.

## Footnotes

Faint, illegible text at the top of the page, possibly a header or title.

**FOOTNOTES:**

- (1) Aboriginal origins are derived from the ethnic origin question which asks whether respondents are North American Indian, Métis or Inuit.
- (2) Census subdivisions refers to the general term applying to municipalities, Indian reserves, Indian settlements or unorganized territories. In Newfoundland, Nova Scotia and British Columbia, the term also describes geostatistical areas that have been created by Statistics Canada in co-operation with the provinces as equivalents for municipalities.
- (3) All 1986 figures exclude the population estimated at about 45,000 on 136 incompletely enumerated Indian reserves and settlements throughout Canada. For the number of estimated population and list of incompletely enumerated reserves, see Appendices 1 and 2.
- (4) Total population refers to the total population of the relevant geographic area (e.g., province or census subdivision), excluding the population residing in institutions such as prisons, etc.
- (5) Non-aboriginal refers to persons who report one or more non-aboriginal origins such as British or French.
- (6) Total aboriginal origins are the sum of persons reporting:
  - (a) a single aboriginal (e.g., North American Indian, Métis or Inuit)
  - (b) multiple aboriginal origins, that is, those reporting:
    - at least one aboriginal origin with any other non-aboriginal (e.g., Métis and French); or
    - two or more aboriginal origins only.
- (7) Non-aboriginal in these columns refers to persons who report one or more non-aboriginal origins, such as British or French, in combination with one aboriginal origin, such as North American Indian.
- (8) Other multiple aboriginal origins refer to the sum of persons reporting two or more aboriginal origins with or without a non-aboriginal origin.

**Definitions  
&  
Special Notes**

## DEFINITIONS

### CENSUS SUBDIVISION (CSD)

Refers to the general term applying to municipalities, Indian reserves, Indian settlements and unorganized territories.

In Newfoundland, Nova Scotia and British Columbia, the term also describes geostatistical areas that have been created by Statistics Canada in co-operation with the provinces as equivalents for municipalities.

### CENSUS SUBDIVISION TYPE

Census subdivisions are classified into various types, according to official designations adopted by provincial or federal authorities. With the exception of unorganized territories, Indian reserves and Indian settlements, hamlets in the Northwest Territories and settlements in the Yukon Territory, the type indicates the municipal status of a CSD. The following list indicates the abbreviations used for the most common CSD types:

BOR	Borough
C	City - Cité
CM	County (Municipality)
COM	Community
CT	Canton (Municipalité de)
CU	Cantons unis (Municipalité de)
DM	District (Municipality)
HAM	Hamlet
ID	Improvement District
LGD	Local Government District
LOT	Township and Royalty
MD	Municipal District
NH	Northern Hamlet
NV	Northern Village
P	Paroisse (Municipalité de)
PAR	Parish
R	Indian Reserve - Réserve indienne
RM	Rural Municipality
RV	Resort Village
SA	Special Area
SCM	Subdivision of County Municipality
SD	Sans désignation (Municipalité)
S-E	Indian Settlement - Établissement indien
SET	Settlement
SRD	Subdivision of Regional District
SUN	Subdivision of Unorganized
SV	Summer Village

T	Town
TP	Township
UNO	Unorganized - Non organisé
V	Ville
VC	Village Cri
VK	Village Naskapi
VL	Village
VN	Village Nordique

### ETHNIC ORIGIN

Refers to the ethnic or cultural group(s) to which the respondent or the respondent's ancestors belong. Ethnic or cultural group refers to the "roots" or ancestral origin of the population and should not be confused with citizenship or nationality.

It should be noted that prior to the 1981 Census, only the respondent's paternal ancestry was to be reported. If multiple ethnic origins were reported, only one origin was captured, resulting in one ethnic origin per respondent. In 1981, this restriction was removed, allowing for multiple ethnic origins. One write-in was provided on the 1981 questionnaire, in addition to the mark boxes. The 1986 Census questionnaire allows respondents to write in up to three ethnic origins not included in the mark boxes. This increases the number of multiple response possibilities.

The 1986 question was changed slightly from that asked in the 1981 Census. In 1981, respondents were asked, "To which ethnic or cultural group did you or your ancestors belong on first coming to this continent?" The phrase "on first coming to this continent" was removed from the 1986 question. The 1986 ethnic origin question was: "To which ethnic or cultural group(s) do you or did your ancestors belong?"

### INDIAN RESERVE

Refers to land, the legal title to which is vested in Her Majesty, that has been set apart for the use and benefit of an Indian band and that is subject to the terms of the Indian Act. Since it is generally excluded from local jurisdiction and is administered by the Federal Department of Indian and Northern Affairs Canada (INAC), it is classified as a census subdivision (CSD) by Statistics Canada.

## **INDIAN SETTLEMENT**

Refers to places, identified by the Federal Department of Indian and Northern Affairs Canada (INAC) for statistical purposes only, where a self-contained group of at least 10 Indian people reside more or less permanently. Indian settlements are usually located on Crown lands under federal or provincial jurisdiction. They have not been set apart for the use and benefit of an Indian band as is the case with Indian reserves.

## **PROVINCE**

Refers to the major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. In census publications, provincial tables include the Yukon Territory and the Northwest Territories.

## **UNINCORPORATED PLACE**

Refers to any cluster of five or more permanently occupied dwellings, in rural areas, locally known by a specific name but not having a local government or legal limits. Unincorporated places are not reported if located in areas defined by the census as being urban.

## **SPECIAL NOTES**

### **POPULATION COUNTS BASED ON USUAL RESIDENCE**

The population counts shown here for a particular area represent the number of Canadians whose usual place of residence is in that area, regardless of where they happened to be on Census Day. Also included are any Canadians staying in a dwelling in that area on Census Day and having no usual place of residence elsewhere in Canada. In most areas, there is little difference between the number of usual residents and the number of people staying in the area on Census Day. For certain places, however, such as tourist or vacation areas, or those including large work camps, the number of people staying in the area at any particular time could significantly exceed the number of usual residents shown here.

## **INCOMPLETELY ENUMERATED INDIAN RESERVES AND INDIAN SETTLEMENTS**

On some Indian reserves and Indian settlements in the 1986 Census, enumeration was not permitted or was interrupted before it could be completed.

Data for 1986 are therefore not available for the incompletely enumerated reserves and settlements and are not included in tabulations. Data for geographic areas containing one or more of these reserves or settlements are therefore noted accordingly. Because of the missing data, users are cautioned that for affected geographic areas, comparisons (e.g., percentage change) between 1981 and 1986 are not exact. While for higher level geographic areas (Canada, provinces, census metropolitan areas and census agglomerations) the impact of the missing data is very small, the impact can increase for smaller areas containing a larger proportion of affected reserves and settlements.

While it is not possible to estimate the population of each incompletely enumerated reserve, estimates of the missed total population and total occupied dwellings at the provincial level have been made and are shown in Appendix 1.

Note, however, that it was not possible to estimate any characteristics of the missed population, even at the provincial level.

Additional information on this subject can be obtained by referring to the User Information Bulletin, Number 1, "Summary of the Methodology for Estimating the Population and Occupied Private Dwellings on Incompletely Enumerated Indian Reserves".

A list of incompletely enumerated Indian reserves and Indian settlements is shown in Appendix 2 together with the province and associated sub-provincial area(s).

## **ZERO CELLS**

Due to the method of production, it was not possible to use the standard symbols normally adopted in census publications. Consequently, a cell containing a "zero" value may represent any one of the following:

- nil or zero

- figures not appropriate or not applicable
- amount too small to be expressed
- figures not available
- land area is included in neighbouring census subdivision
- figures suppressed to protect confidentiality (see "Confidentiality and Random Rounding")
- incompletely enumerated Indian reserve or Indian settlement (see "Special Notes")

### CENSUS SUBDIVISION LIMITS

In a few cases, errors have been found in the 1986 geographic limits of certain census subdivisions following the release of final population counts. Due to operational constraints, it was not possible to make adjustments to the 1986 Census data shown in the tables for these individual areas. However, by combining the data for the affected areas in the manner indicated below, users can minimize the impact of the error. Data for the following census subdivisions are known to be in error at the time of printing. For these areas, the original and revised total population counts are shown. Users should note that the counts in the basic summary tables will differ from the revised total population counts given below due to weighting and the exclusion of institutional residents. For further information, see the special note "Count Discrepancies Between 100% Data and 20% Sample Data".

## COMPARABILITY OF DATA ON ETHNIC ORIGIN

**Comparison between 1981 and 1986.** The 1981 and 1986 ethnic origin data are not directly comparable.

The 1981 ethnic origin question: To which ethnic or cultural group did you or your ancestors belong on first coming to this continent?, was modified for the 1986 Census. The phrase "on first coming to this continent" was removed from the 1986 version as it was viewed as being inappropriate for persons of aboriginal origin. The 1986 question was: To which ethnic or cultural group(s) do you or did your ancestors belong?

In 1986, respondents were instructed to mark or specify as many groups as apply. This instruction along with the addition of two more write-in spaces contributed significantly to an increase in multiple ethnic origin responses.

As well, the mark boxes in the question were ordered on the basis of 1981 incidence reporting of single ethnic origins. This changed the relative position of the mark boxes Chinese and Polish.

In light of the recommendations of a Parliamentary Commission on Visible Minorities in Canadian Society in the report Equality Now and the Abella Commission on Equality in Employment, the mark box Black was added to the 1986 ethnic origin question.

The mark boxes for aboriginal peoples were also changed. In 1986, status and non-status Indian categories which had been part of the 1981 ethnic origin question were replaced by North American Indian. It should be noted that persons of non-aboriginal cultural origin but status Indian under the Indian Act of Canada, for example, persons who obtained Indian status at marriage, could have been included in 1981 data for aboriginal peoples. These persons may not have identified their ethnic origin to be North American Indian in 1986 and thus would not be included in the 1986 count of aboriginal peoples. Also, in 1986, an undetermined number of persons of Métis origin could have indicated their ethnic origin as being the multiple response North American Indian and some other ethnic or cultural origin(s).

### Single and Multiple Response

A **Single Response** occurs when the respondent provides only one origin. For example, for Canada, 709,585 gave Italian as their only ethnic origin.

A **Multiple Response** occurs when the respondent provides more than one origin. Some 297,325 Canadians gave a response which included Italian and one or more ethnic or cultural origin(s). For example, 31,495 provided the multiple response combination: Italian and French.

In the ethnic origin legend for this profile, the single origins are shown as unique groups. The multiple origins are shown as one group: multiple origins. In the case of the 31,495 Italian and French multiple response combination, it would be included in the multiple origins count (6,986,345 for Canada).

For further information regarding the data on ethnic origin, please contact the Housing, Family and Social Statistics Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-2574.

## CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this tabulation have been subjected to a confidentiality procedure known as "**random rounding**" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census tabulations. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to 100. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data.

Of concern to some users is that small cell counts may suffer a significant distortion as a result of random rounding. This distortion is the protection against disclosure and individual data cells containing these small numbers may lose their precision as a result. Since the rounding is of a random nature, however, when data cells are re-aggregated by the user, the rounding errors tend to cancel out. Distortions may be further reduced by building in the appropriate subtotals into tabulations. Also available is the option of requesting custom tabulations from the census microdata bases. With custom products, random rounding occurs after data cells have been aggregated thus minimizing any distortion.

In addition to random rounding, procedures such as **area and cell suppression** have been adopted to further protect the confidentiality of individual responses.

With **area suppression**, all characteristic data for the geographic area are deleted and replaced with zeros. The extent to which data are suppressed depends upon whether the area is a standard geographic area, i.e. aggregated from enumeration areas (federal electoral districts, census divisions, census subdivisions, census tracts, etc.) or a non-standard area specified by the user for a custom tabulation. Data are deleted if the population is less than 40 persons for standard areas and less than 100 persons for non-standard areas. For

tables involving income distributions, the suppression of data is extended to geographic areas with a total population of less than 250. Suppressed data are, however, included in the appropriate higher aggregate subtotals and totals. This technique is being implemented for all products involving subprovincial data (i.e. Profile series, basic summary data products, semi-custom and custom data products) collected on a 100% or 20% sample basis.

Note: For data collected on a 20% sample basis, area suppression is based on the non-institutional population rather than the total population since sample data were not collected for the institutional population.

With **cell suppression**, the minimum acceptable value for a cell is specified. All cell values below the designated cut-off are deleted and replaced by zeros. However, the suppressed data are included in the appropriate higher aggregate subtotals and totals. For 1986 data products, two different methods of cell suppression are being implemented. For publications in "The Nation" and "Dimensions" series involving income, detailed occupation or detailed industry, the distribution is being suppressed where less than 250 persons or units are involved. In semi-custom and custom tabulations of variables collected on a sample basis, all cells with a value of "5" (after random rounding) are being suppressed.

## Appendix 4

## Appendix 4

### 1986 Census Products and Services

The 1986 Census product line is designed to serve the diverse needs of our users. Using as a base the most demanded publications of past censuses, a full series of data, reference and analytical publications will be offered.

In addition to the tabulations shown in publications, census data are available in machine-readable form. In particular, there is a set of 44 basic summary tabulations for small geographic areas including enumeration areas, census tracts and census subdivisions. The data contained in the published profiles for census subdivisions and census divisions, census tracts, federal electoral districts, census metropolitan areas and census agglomerations are also available in machine-readable form.

While many tabulations are available from the planned output program, census tabulations can also be customized to individual users' needs. A range of products is offered, from predetermined basic data tabulations available for user-selected geographic areas, to complete custom tabulations which are developed to the exact requirements of the client. The products thus offer, on a cost-recovery basis, varying levels of flexibility in content, geography and medium.

### Reference Products

Users, who may require assistance in understanding and interpreting the data and geographic concepts appearing in this set of tabulations, should refer to the **1986 Census Dictionary** (Catalogue No. 99-101E or F). The **Dictionary** provides definitions for all variables and terms used in 1986 Census data products.

Further details on the products and services available from the census are provided in the **1986 Census Products and Services - Final Edition** (Catalogue No. 99-103E or F).

All users wishing to obtain more information about the range of census products available to serve their needs are invited to contact their nearest Statistics Canada Regional Office. They will be glad to help. Addresses and phone numbers are listed in Appendix 5.

### **Additional Data Products and Reports**

1. "Summary Tabulations of Ethnic and Aboriginal Origins, Canada, Provinces, Territories and Census Metropolitan Areas" - December 1987. Available from the nearest Statistics Canada Regional Office (see Appendix 5 for addresses).
2. Demographic Characteristics of the Total Population Residing on Selected Census Subdivisions (Indian Reserves, Settlements or Communities) - February 1988. Available from the nearest Statistics Canada Regional Office (see Appendix 5 for addresses).
3. "Socio-Economic Characteristics of the Total Population Residing on Selected Census Subdivisions (Indian Reserves, Settlements, or Communities)" - March, 1989. Available from the nearest Statistics Canada Regional Office (see Appendix 5 for addresses).
4. "Canada's Aboriginal Population by Census Subdivision for the 1986 Census" - March, 1989. Available from the nearest Statistics Canada Regional Office (see Appendix 5 for addresses).
5. "1986 Census- Ethnic Origin: Note on Comparability, Single and Multiple Responses", by Pamela M. White, November 1987. Available from Housing, Families and Social Statistics Division, Statistics Canada, Ottawa, Ontario, K1A 0T6.

## Appendix 5

## ACCESSIBLE FROM COAST TO COAST

Statistics Canada's regional reference centres provide a full range of the census products and services. Each reference centre is equipped with a library and a sales counter where users can consult or purchase census publications, microcomputer diskettes, microfiche, maps and more. Each centre has facilities to retrieve information from Statistics Canada's computerized data retrieval systems - CANSIM and TELICHART. A telephone inquiry service is also available with toll-free numbers for regional clients outside local calling areas. Many other services - from seminars to consultations - are offered. Call or write your regional reference centre for information. For a brief description of the products and services available from the 1986 Census, consult the section on Guidelines for Using This Publication.
