

RENTAL MARKET REPORT

Vancouver and Abbotsford-Mission CMAs

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: Fall 2014

Vancouver Highlights

- Increased rental demand pushed the average vacancy rate down to one and 0.7 per cent for purpose-built rental apartments and rental condominium apartments, respectively;
- For units common to the 2013 and 2014 fall surveys, the estimated rent increase was 2.5 per cent for a two-bedroom apartment;
- Higher same-sample rent growth compared to the 2014 allowable rent increase for existing tenants suggests more new leases signed during the past year compared to the year prior

Overview: Vancouver Census Metropolitan Area (CMA) Rental Market Tight

The Vancouver Census Metropolitan Area (CMA) rental market tightened as growth in demand outstripped an increase in supply. Purpose-built rental apartment vacancy rates declined to 1.0 per cent in October 2014 from 1.7 per cent in October 2013 (Figure 2).¹ Tighter purpose-built rental apartment market conditions were rather uniformly observed across the various market segments with just a few exceptions (e.g. bachelor suites in White Rock, Langley City and Langley District Municipality, and one-bedroom units in Richmond, Mount Pleasant / Renfrew Heights, and North Vancouver District Municipality). Similarly, lower vacancy rates were also noted for the rental condominium apartments in the Vancouver CMA, which continued to have vacancy rates below those for purpose-built rental apartments.

Four main factors fuelled the growth in rental demand during the past year:

1. Stronger labour market conditions, particularly for the younger 15 to 24 and 25 to 44 age cohorts;
2. Higher post-secondary student enrolment;
3. Higher home prices, which may delay movement to home ownership; and
4. Higher net migration.

The supply of rental units increased for both purpose-built rental apartments as well as rental condominium apartments. The number of purpose-built rental apartments edged up 0.5 per cent to 106,111 units in October 2014 and most of the increase was in the City of Vancouver and the University Endowment Lands. The number of newly completed purpose-built rental apartments was higher than a year ago but the downward shift in vacancy

Figure 2

¹ Based on privately-initiated rental apartment structures of three or more units. Due to seasonal factors, the results of the October 2014 Rental Market Survey are not directly comparable with the results from the April 2014 Rental Market Survey.

rates was much more apparent this year. Much of the new additions to the purpose-built rental apartment stock were completed prior to January 2014, which allowed for a longer rent-up period; in contrast, the majority of new additions a year ago were completed after January 2013.² For rental condominium apartments, the supply also rose but the increase was mostly in the markets outside the City of Vancouver.

In line with tighter rental market conditions, the availability rate for purpose-built rental apartments in the Vancouver CMA also moved lower to 1.6 per cent from 2.4 per cent a year ago. In addition to currently vacant units, the availability rate also includes rental units for which the existing tenant has given or received notice to vacate the unit and a new tenant has not signed a lease for said unit. The availability rate provides some insight on upcoming vacancies.

The allowable rent increase for existing tenants was 2.2 per cent for 2014 under the Residential Tenancy Act.³ This has kept the same-sample rent changes for purpose-built rental apartments, which measures rent growth based on those structures that were common to the survey sample for both years, relatively in check at 2.5 per cent for the Vancouver CMA. Tenant turnover and more new leases signed would allow the same-sample rent change to exceed the allowable rent increase for existing tenants.

The overall average rent reflects not just a growth in rents but changes in the composition of the rental stock

as well. With the addition of newly completed purpose-built rental units, which are often more updated and command higher rents, the average rent for one-bedroom and two-bedroom purpose-built rental apartments was \$1,038 and \$1,311, respectively in October 2014. For rental condominium apartments, however, the shift towards more Fraser Valley representation weighed down the average rents for one-bedroom units in the Vancouver CMA.

Submarket Results: Tight Conditions Overall

Purpose-built rental apartment vacancy rates were below three per cent for all the major rental markets in the Vancouver CMA. Market conditions were especially tight in the City of Vancouver (Zones 1 – 10) where vacancy rates were below one per cent for most submarket areas including the West End / Downtown (Zones 1 – 3), South Granville / Oak, and Kitsilano / Point Grey. Student and faculty rental demand drove the average vacancy rate in the University Endowment Lands down to just 0.2 per cent, which was the same level as English Bay⁴. Outside of the City of Vancouver, West Vancouver, North Vancouver City and North Vancouver District Municipality (DM) also had vacancy rates below one per cent. Burnaby (Zones 12 – 14), Richmond, the Tri-Cities, White Rock, and New Westminster had vacancy rates below two per cent. Vacancy rates for the remaining markets were between two and four per cent.

The same-sample rent increase was higher than the permissible rent raise for existing tenants under the BC Residential Tenancy Act for the year ending October 2014. The opposite was true for the year prior. The vacancy and availability rates were relatively higher in October 2013 compared to October 2014 as well. Taken together, these factors suggest there was a higher rate of tenant turnover and more new leases signed during the period October 2013 to October 2014 compared to the same period a year ago. The areas that most likely had tenant turnover and / or new leases signed included the City of Vancouver (Zones 1 – 10), Burnaby (Zones 12 – 14), and New Westminster (Figure 3).

The City of Vancouver had nearly 230 new purpose-built rental apartments completed during the period July 1, 2013 to June 30, 2014; about 120 units were completed during the same period a year prior. These new units were mostly rented up; the vacancy rate for purpose-built rental apartments built in 2005 or later was 0.7 per cent. Burnaby has had a few older purpose-built rental apartment buildings demolished or slated for demolition to make way for new condominium apartments in the Metrotown area.⁵ The supply of purpose-built rental apartments in Burnaby declined to 12,357 units, about 267 units lower than it was a year ago. Tenants in these buildings would have had to find alternative rental accommodations in and around the area, pushing vacancy rates lower and rents higher.

² For newly completed purpose-built rental apartments to be included in the survey sample, the building needs to be completed by June 30 to allow for sufficient rent-up time.

³ The annual allowable rent increase for conventional residential tenancies is determined by the formula in the Residential Tenancy Regulation. For a conventional residential tenancy rent increase that takes effect in 2014, the allowable increase is 2.2 per cent. Source: BC Government Residential Tenancy Branch

One-bedroom units are, by far, the predominant apartment unit type in the Vancouver CMA rental market, accounting for nearly 63 per cent of the rental stock. Newly renovated and newly completed rental units tend to offer more features (e.g. in-suite laundry, stainless steel appliances, etc.). The average rents for such units tend to be higher than those for older units. In fact, the average apartment rent for units that were built in 2005 or later (\$1,569 per month) was about 43 per cent higher than the overall average apartment rent (\$1,099 per month) in the Vancouver CMA. These newer units also had a higher vacancy rate of 1.9 per cent in October 2014.

Supply and Demand Factors: Demand outstripped supply

The number of purpose-built rental apartments in the survey universe increased 0.5 per cent to 106,111 in October 2014 for the Vancouver CMA. This increase includes both newly completed units as well as

updated units that were previously removed for renovations and refurbishments. Mostly driven by the addition of newly completed purpose-built rental apartments, the increases in supply were largely observed in the City of Vancouver, University Endowment Lands, North Vancouver City, and Richmond. During the period July 1, 2013 to June 30, 2014, the

Vancouver CMA had a higher number of purpose-built rental apartment completions compared to the same period a year ago (Figure 4).

There were four main factors that fuelled rental demand growth over the past year:

1. Stronger labour market conditions, particularly for the younger 15 to 24 and 25 to 44 age cohorts;
2. Higher post-secondary student enrolment;
3. Higher home prices, which may delay potential movement to home ownership; and
4. Higher net migration.

Labour market conditions fuelled rental demand. Total employment in the Vancouver CMA trended higher in 2014, showing a 2.7 per cent increase during the first ten months of the year. More importantly, full-time employment growth gained traction for all age groups since April 2014, especially for the younger age cohorts.

Figure 4

More purpose-built rental apartment were completed

Purpose-built Rental Apartment Completions, Units

Source: CMHC

Full-time employment for the 15 to 24 and 25 to 44 age cohorts has increased 6.1 and 6.4 per cent since January 2014. Comparatively, full-time employment gain over the same period for the 45 to 64 age cohort was 0.1 per cent (Figure 5). The two younger cohorts tend to be renters in the Vancouver CMA. Moreover, the increase was mostly in lower paying jobs; during the 12-month period between October 2013 and October 2014, there was a net loss of about 1,500 positions in occupations paying more than \$1,000 per week whereas the net gain was about 51,600 positions in occupations paying less than \$1,000 per week⁶ (Figure 6).

Purpose-built rental apartments are generally the least expensive market accommodation option, particularly in the City of Vancouver (Figure 7). With the strengthening resale market, housing prices have increased since October 2013. Even with a low mortgage interest rate, buying an apartment often requires a significantly higher monthly payment compared to renting, in addition to a significant down payment to qualify for a mortgage. The increase in the number of lower paying occupations may help to explain the strong rental demand despite a low mortgage interest rate environment and solid full-time employment gains.

Higher post-secondary student enrolment has also helped to drive up rental demand. Both the University of British Columbia Vancouver (UBCV) and Simon Fraser University (SFU), the largest post-secondary education institutions in the Vancouver CMA, saw an increase in overall student population.⁷ Although both the UBC

Figure 5

community colleges, and university-colleges, that do not offer on-campus residence and students would either need to stay with family or rent an apartment.

Migration to the Vancouver CMA has picked up, boosting population-based demand for rental accommodation, as new immigrants tend to rent before buying. There were approximately 30,000 to 35,000 migrants to Greater Vancouver Regional District during the period July 2013 to June 2014 compared to less than 24,000 during the same period a year prior.⁹ A large portion of these were temporary immigrants, such as foreign students (20 to 30 per cent) and temporary foreign workers (36 to 46 per cent),

and temporary immigrants tend to rent their accommodations.

Secondary Market: Vacancy rates edge lower

Reflecting the tight rental market conditions observed in the primary purpose-built rental apartment segment, vacancy rates for rental condominium apartments edged lower to 0.7 per cent in October 2014 from 1.1 per cent in October 2013. The exceptions to this trend were the Vancouver Westside and Suburban Vancouver where vacancy rates increased. For the Vancouver Westside, this reflects a combination of a boost in the supply of rental condominium apartments (up nearly five per cent)

as well as a decline in demand likely due to competition from other rental options. Not only was this competition coming from those newly completed purpose-built rental apartments in the City of Vancouver, but from the various accessory suites and laneway homes that accompany most new single-detached homes these days. For Suburban Vancouver, however, a smaller supply of rental condominium apartments (down two per cent) suggests that a decline in demand was the main reason behind the lower vacancy rate.

As a result of these developments, average rents for rental condominium apartments in the Vancouver CMA rose a little over one per cent over the past year. Weighed by the Vancouver Westside and Suburban Vancouver figures, the average rents for one-bedroom rental condominium apartments edged lower whereas the two-bedroom units recorded a nearly six per cent increase in average rents. In fact, the premium that one-bedroom rental condominium apartments have over their purpose-built rental counterparts has narrowed from 28 per cent to 15 per cent; for two-bedroom rental condominium apartments, the premium has increased from 23 per cent to 27 per cent.

⁹ CMHC, adapted from BC Statistics. Estimated off the net migration to British Columbia during the period July 2013 to June 2014; about 75 to 85 per cent tend to settle in the Greater Vancouver Regional District.

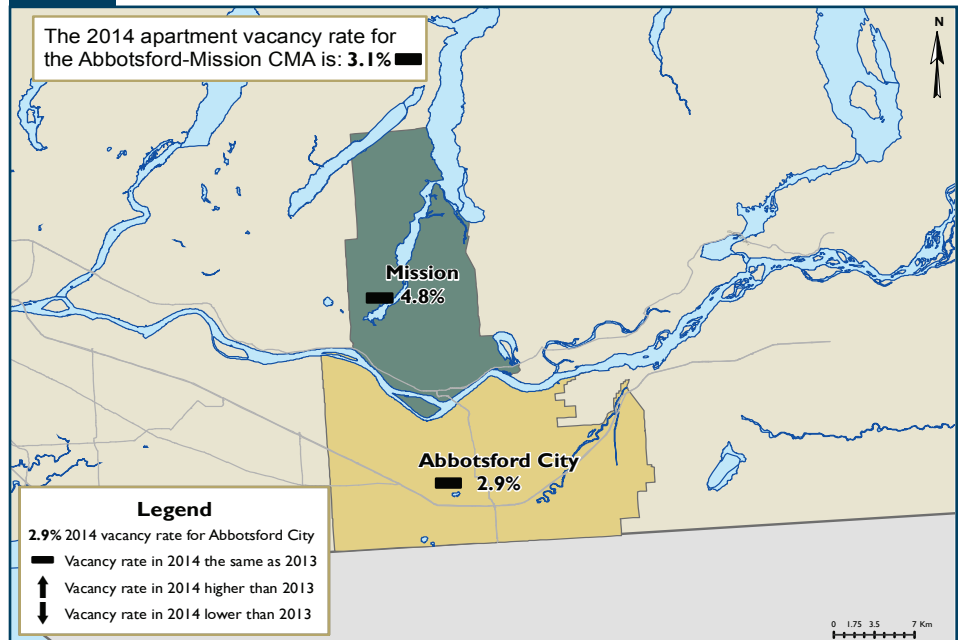

Abbotsford-Mission Highlights

- The average vacancy rate¹ in the Abbotsford-Mission CMA was stable in October 2014 at 3.1 per cent.
- The average rent for a two-bedroom apartment in new and existing structures was \$835 in October 2014.
- In rental structures common to both the October 2013 and 2014 surveys, the average rent for apartments rose 0.9 per cent on an annual basis.

Overview: Vacancy Rates Stable, Rents Increase Modestly

According to the rental market survey conducted by Canada Mortgage and Housing Corporation (CMHC) in October 2014, the average vacancy rate in privately initiated rental apartments with three or more units was relatively stable at 3.1 per cent, compared to 3.2 per cent in 2013. The vacancy rate held steady as rental demand kept pace with a marginal increase in the supply of rental units. The vacancy rate has been declining since 2011. Strong net migration to BC this year and the relative affordability of renting versus owning a home in the Abbotsford-Mission CMA has supported rental demand, putting downward pressure on the vacancy rate. Vacancy rates were down for

Figure 8

bachelor apartments and relatively stable for one-bedroom and two bedroom apartments.²

In terms of supply, the total number of purpose-built rental apartment units increased slightly in 2014. A net increase in the supply of rental units refers to the addition of new units and renovated units coming onto the market and takes into account the removal of existing units from the market for renovation, repair, and / or repurposing. In 2013, the number of rental starts was the highest in the past decade, accounting for 37 per cent of total starts. However, despite the addition of new rental units to the area's housing stock, the vacancy rate this year was relatively stable compared to 2013, reflecting solid demand for new rental units.

As a result of stable vacancy rates, the increase in average rent this year was 0.9 per cent on a same-sample basis.³ This percentage change is slightly lower than the change in rent from 2012 to 2013 which was 1.6 per cent, and below the provincially-mandated allowable rent increase of 2.2 per cent⁴.

The availability rate in 2014 increased for all bedroom types except for bachelor apartments.⁵ The overall availability rate increased from 3.9 per cent to 4.6 per cent. When an apartment unit becomes available for a new tenant, apartment owners can raise rents to reflect the cost of any renovations and improvements. The increase in the availability rate was reflected in slightly higher rents.

¹ Based on privately-initiated rental apartment structures of three or more units.

² For apartments with three bedrooms or more, data has been suppressed to protect confidentiality or data not statistically reliable.

³ When comparing year-over-year average rents, the age of the building needs to be taken into consideration because rents in newly-built structures tend to be higher than in existing buildings. By comparing rents for units that are common to both 2013 and 2014 October Rental Market Surveys, we can get a better indication of actual rent increase paid by most tenants

⁴ The annual allowable rent increase for conventional residential tenancies is determined by the formula in the Residential Tenancy Regulation. For a conventional residential tenancy rent increase that takes effect in 2014, the allowable increase is 2.2 per cent. Source: BC Government Residential Tenancy Branch

⁵ A rental unit is considered available if the unit is vacant, or the existing tenant has given or received official notice to move and a new tenant has not signed a lease. As the definition of availability includes vacancy, the availability rate will always be equal to or greater than the vacancy rate.

Submarket Analysis: Vacancies and Rents Vary by Type of Unit, Age and Size of Structure

In the Abbotsford-Mission CMA, rents and vacancy rates varied between the cities of Abbotsford and Mission. In this CMA, close to 91 per cent of purpose-built rental apartment units are in the City of Abbotsford. The average rent for a two-bedroom apartment in Abbotsford was \$844, \$104 higher than the average rent in Mission. On the other hand, the vacancy rate in Abbotsford, at 2.9 per cent, was below the vacancy rate for Mission, which was 4.8 per cent.

While the overall vacancy rate was stable in the CMA, the levels and changes in apartment vacancy rates differed across bedroom types. The vacancy rate for two-bedroom units, which account for almost half of all purpose-built rental units in the CMA, remained unchanged at 3.0 per cent. As well, one-bedroom vacancy rates which account for 46 per cent of all purpose-built rental units in Abbotsford-Mission were relatively unchanged at 3.2 per cent. Bachelor units had the lowest vacancy rate by bedroom type in 2014, and recorded a decrease to 2.4 per cent from 4.1 per cent in October 2013⁶.

In general, same sample rents in the CMA increased by 0.9 per cent on an annual basis. This increase was the result of a 0.8 per cent and a 1.1 per cent increase in rents for one-bedroom and two-bedroom apartments, respectively. Together these units make up almost all of the total rental apartment stock in the CMA.

Figure 9

Source: CMHC October 2014 Rental Market Survey

Average monthly rents for new and existing structures in the CMA ranged from \$581 per month for bachelor suites to \$958 per month for apartments with three-bedrooms or larger units in October 2014. The most common bedroom types, one- and two-bedroom apartments, on average were renting for \$684 and \$835 per month, respectively.

This year, vacancy rates were relatively the same (ranging between 2.8 and 3.1 per cent) for structures of all age ranges. As a result of the addition of new stock, vacancy rates for rental units constructed in 1990 or later moved higher to 2.8 per cent this year from 1.9 per cent in 2013. Newer rental apartments commanded a rent premium, on average. This trend is observed in other large urban centres in the province as some renters seek similar features and amenities to those offered by apartment condominiums. Newer buildings tend to have more modern features and various common amenities for

tenants compared to older buildings. As a result, units in structures built after 1990 had the highest average rent at \$829 per month, \$125 higher than units that were built between 1960 and 1974 and \$79 higher than those which were built between 1975 and 1989. For rental units constructed between 1960 and 1974, the vacancy rate was unchanged at 3.1 per cent and the average rent for all bedroom types was also unchanged at \$704 per month. For rental units constructed between 1975 and 1989, however, the vacancy rate moved lower to 3.1 per cent in October 2014 from 3.8 per cent in October 2013 and the average rent increased to \$750 per month.

The apartment vacancy rate also varied by the size of the structure, ranging from 2.9 per cent for structures with 20-49 units to 4.5 per cent for structures with 6-19 units. Of the structures surveyed, only those with 20 to 49 units reported a decline in the apartment vacancy

⁶ For apartments with three bedrooms or more, data has been suppressed to protect confidentiality or data not statistically reliable.

rate to 2.9 per cent this year from 4.1 per cent last October. On the other hand, vacancies for structures with 50 to 99 units increased to 3.2 per cent from 2.5 per cent.

Supply and Demand Factors: Demand Keeps Pace with New Supply

Demand for rental accommodation was up in 2014 compared to last year. One of the factors that supports rental demand is an increase in the population, which creates additional households in the area. According to the 2011 National Household Survey, 25 per cent of households in the Abbotsford-Mission CMA were renter households. The population in the Abbotsford-Mission CMA was up by 1,736 people annually during the past four years.⁷ Some of this increase is due to net migration which added 1,266 permanent residents annually during the same time⁸. Net international migration tends to have a greater impact on rental demand than domestic migration since the majority of new immigrants tend to rent when they arrive and stay in rental housing for about four years⁹.

Despite growth in the population, vacancy rates remained stable in the Abbotsford-Mission CMA, partly due to lower employment levels in 2014. Close to 14 per cent of the population is in the 15-24 year age group, which typically rents¹⁰. However, as of October 2014, the unemployment rate was higher for this age group compared to last

year. While total employment in the Abbotsford-Mission CMA has declined compared to October 2013, unemployment has also declined, suggesting the labour force has contracted due to some people choosing to return to school or pursuing activities other than work. In general, both full-time and part-time employment levels were lower than last year, which may have provided an incentive for some people to stay in rental accommodation rather than move to home ownership.

On the supply side, the total number of purpose-built apartment units in the Abbotsford-Mission CMA increased by a net 63 units to 3,773 in 2014. According to the 2013 Fall Rental Market Survey over 90 per cent of the rental units were built prior to the year 2000. However, demand is strong for newer units,

reflected in their relatively lower vacancy rate compared to older units (1.9 per cent compared to 3.2 per cent for all rental units in 2013). In addition, the average price of land zoned residential in the Abbotsford-Mission CMA is lower than centres in the Vancouver CMA. Partly due to the lower cost of rental development, by the end of 2013, 253 purpose-built rental apartment units were under construction, compared to 50 units at the end of 2012. By mid-2014, 144 apartment rental units were completed which is higher than the annual level of completions in the past ten years.¹¹

As a result of these rental market dynamics of demand keeping pace with the increase in supply of rental units, the vacancy rate remained stable while rents increased slightly compared to last year.

⁸ Citizenship and Immigration Canada

⁹ Statistics Canada, Longitudinal Survey of Immigrants to Canada (LSIC)

¹⁰ Statistics Canada, Census 2011

¹¹ The survey targets only privately initiated structures with at least three rental units, which have been on the market for at least three months.

Secondary Rental Market: Adds to the Stock of Rental Housing

CMHC's Secondary Rental Market Survey also collects information on households in rented single-detached houses, semi-detached (side-by side) houses, row/townhouses, duplex apartments, accessory apartments, and apartments which are part of a commercial or other type of structure containing one or two dwelling units. The number of renter households in the secondary rental market totalled 8,416 in 2014, up from 8,347 in 2013. Single-detached dwellings represented almost half of the secondary rental units this year while accessory suites held close to one-third of the total share.

For all secondary rental units, the overall rent in 2014 averaged \$1,035 per month. The highest average rent was recorded for single-detached units, at \$1,246 per month. On the other hand, accessory suites reported the lowest average rent at \$757 per month, while semi-detached, row, and duplex dwelling types collectively averaged \$973 per month.

RMS ZONE DESCRIPTIONS - VANCOUVER CMA	
Zone 1	West End, Stanley Park is the area between Stanley Park and Denman Street and extends to Coal Harbour to the north and English Bay to the south.
Zone 2	English Bay runs along Sunset Beach and English Bay to the south, connects to Davie Street to the North and Burrard Street to the East.
Zone 3	Downtown is the remainder of the West End not covered in Zone 1 and 2. Does not include the Downtown Eastside.
Zones 1-3	West End/Downtown
Zone 4	South Granville/Oak is west of Mount Pleasant and extends south to 33rd Avenue and west to Granville Street. Also includes the Fairview area and contains a section between Broadway to the north and 16th Avenue to the south, Burrard Street to the west and Granville Street to the east.
Zone 5	Kitsilano/Point Grey is the area west of South Granville/Oak that extends along 16th Avenue to the University Endowment Land.
Zone 6	Westside/Kerrisdale is the area south of Kitsilano/Point Grey and South Granville/Oak, and includes the areas: Kerrisdale, Mackenzie Heights, Dunbar, Shaughnessy and Oakridge.
Zone 7	Marpole is an area in South Vancouver that borders south of 57th Avenue between Cambie Street to the east and MacDonald Street to the west, and extends south down to the Fraser River.
Zone 8	Mount Pleasant/Renfrew Heights is the area that extends from the Mount Pleasant area to the west to Renfrew Heights to the east, and includes the neighbourhoods of Fraser and Knight. The area boundary to the north is Great Northern Way and Broadway, and roughly 33rd Avenue to the South.
Zone 9	East Hastings is the northeast area of Vancouver City, and includes the Downtown Eastside.
Zone 10	Southeast Vancouver includes the areas: Killarney, Fraserview, Collingwood and Champlain Heights.
Zones 1-10	Vancouver City
Zone 11	University Endowment Lands includes both the municipality and University of British Columbia. Note: the Rental Survey does not include student housing.
Zone 12	Central Park/Metrotown is the area between Boundary Road to the west and Royal Oak Avenue to the east, Moscrop Street and Gilpin Street to the north and Marine Drive to the south.
Zone 13	Southeast Burnaby extends to the border of New Westminster and includes the areas: Edmonds, Middlegate, Buckingham Heights, Deer Lake and Burnaby Lake.
Zone 14	North Burnaby is the northern half of Burnaby and includes the areas: Willingdon Heights, Brentwood Park, Capitol Hill, Sperling, Simon Fraser and Lougheed.
Zones 12-14	Burnaby City
Zone 15	New Westminster is the city boundaries.
Zone 16	North Vancouver City is the city boundaries.
Zone 17	North Vancouver DM is the district boundaries.
Zone 18	West Vancouver is the district boundaries.
Zone 19	Richmond is the city boundaries.
Zone 20	Delta is the corporation boundaries.
Zone 21	Surrey is the city boundaries.
Zone 22	White Rock is the city boundaries.
Zone 23	Langley City and Langley DM includes both the city and township boundaries.
Zone 24	Tri-Cities consists of Coquitlam, Port Coquitlam and Port Moody.
Zone 25	Pitt Meadows/Maple Ridge is the district boundaries for both municipalities.
Zones 1-25	Vancouver CMA

RMS ZONE DESCRIPTIONS - ABBOTSFORD CMA	
Zone 1	Abbotsford City - Includes census tracts 0001.00, 0002.00, 0003.00, 0004.00, 0005.01, 0005.02, 0006.00, 0007.01, 0007.02, 0008.01, 0008.03, 0008.04, 0009.01, 0009.02, 0010.00, 0011.00, 0012.01, 0012.02, 0013.00, 0014.00, 0100.00, 0101.00, 0102.00, 0103.00, 0104.00, 0105.00, 0106.03, 0106.04, 0106.05 and 0106.06.
Zone 2	Mission - Includes census tracts 0200.00, 0201.01, 0201.02, 0202.00, 0203.00, 0204.00, 0205.00, 0206.00 and 0207.00.
Zones 1-2	Abbotsford CMA

CONDOMINIUM SUB AREA DESCRIPTIONS - VANCOUVER CMA	
Sub Area 1	North Shore includes RMS Zone 16 (North Vancouver City), Zone 17 (North Vancouver DM), and Zone 18 (West Vancouver).
Sub Area 2	Burrard Peninsula includes RMS Zone 1 (West End, Stanley Park), Zone 2 (English Bay), and Zone 3 (Downtown).
Sub Area 3	Vancouver Westside includes RMS Zone 4 (South Granville/Oak), Zone 5 (Kitsilano/Point Grey), Zone 6 (Westside/Kerrisdale), Zone 7 (Marpole), and Zone 11 (University Endowment Lands).
Sub Area 4	Vancouver Eastside includes RMS Zone 8 (Mount Pleasant/Renfrew Heights), Zone 9 (East Hastings) and Zone 10 (Southeast Vancouver)
Sub Areas 3-4	Vancouver East/Westside includes RMS Zone 4 (South Granville/Oak), Zone 5 (Kitsilano/Point Grey), Zone 6 (Westside/Kerrisdale), Zone 7 (Marpole), Zone 8 (Mount Pleasant/Renfrew Heights), Zone 9 (East Hastings), Zone 10 (Southeast Vancouver), and Zone 11 (University Endowment Lands).
Sub Areas 2-3-4	City of Vancouver
Sub Area 5	Suburban Vancouver includes RMS Zone 12 (Central Park/Metrotown), Zone 13 (Southeast Burnaby), Zone 14 (North Burnaby), Zone 15 (New Westminster), Zone 19 (Richmond), and Zone 24 (Tri-Cities).
Sub Area 6	Fraser Valley includes RMS Zone 20 (Delta), Zone 21 (Surrey), Zone 22 (White Rock), Zone 23 (Langley City and Langley D.M.), and Zone 25 (Pitt Meadows/Maple Ridge).
Sub Areas 1-6	Vancouver CMA

NOTE: Refer to RMS Zone Descriptions page for detailed zone descriptions.

RENTAL MARKET REPORT TABLES

Available in ALL Rental Market Reports

Private Apartment Data:

- 1.1.1 Vacancy Rates (%) by Zone and Bedroom Type
- 1.1.2 Average Rents (\$) by Zone and Bedroom Type
- 1.1.3 Number of Units in the Universe by Zone and Bedroom Type
- 1.1.4 Availability Rates (%) by Zone and Bedroom Type
- 1.1.5 Estimate of Percentage Change (%) of Average Rent by Zone and Bedroom Type
- 1.2.1 Vacancy Rates (%) by Year of Construction and Bedroom Type
- 1.2.2 Average Rents (\$) by Year of Construction and Bedroom Type
- 1.3.1 Vacancy Rates (%) by Structure Size and Bedroom Type
- 1.3.2 Average Rents (\$) by Structure Size and Bedroom Type
- 1.4 Vacancy Rates (%) by Rent Range and Bedroom Type

Available in SELECTED Rental Market Reports

Private Apartment Data:

- 1.3.3 Vacancy Rates (%) by Structure Size and Zone

Private Row (Townhouse) Data:

- 2.1.1 Vacancy Rates (%) by Zone and Bedroom Type
- 2.1.2 Average Rents (\$) by Zone and Bedroom Type
- 2.1.3 Number of Units in the Universe by Zone and Bedroom Type
- 2.1.4 Availability Rates (%) by Zone and Bedroom Type
- 2.1.5 Estimate of Percentage Change (%) of Average Rent by Zone and Bedroom Type

Private Apartment and Row (Townhouse) Data:

- 3.1.1 Vacancy Rates (%) by Zone and Bedroom Type
- 3.1.2 Average Rents (\$) by Zone and Bedroom Type
- 3.1.3 Number of Units in the Universe by Zone and Bedroom Type
- 3.1.4 Availability Rates (%) by Zone and Bedroom Type
- 3.1.5 Estimate of Percentage Change (%) of Average Rent by Zone and Bedroom Type

Available in the Quebec, Montreal, Ottawa, Toronto, Winnipeg, Regina, Saskatoon, Edmonton, Calgary, Vancouver and Victoria Reports

Rental Condominium Apartment Data

- 4.1.1 Rental Condominium Apartments and Private Apartments in the RMS - Vacancy Rates (%)
- 4.1.2 Rental Condominium Apartments and Private Apartments in the RMS - Average Rents (\$) by Bedroom Type
- 4.1.3 Rental Condominium Apartments - Average Rents (\$) by Bedroom Type
- 4.2.1 Rental Condominium Apartments and Private Apartments in the RMS - Vacancy Rates (%) by Building Size
- 4.3.1 Condominium Universe, Rental Units, Percentage of Units in Rental and Vacancy Rate by Condo Sub Area
- 4.3.2 Condominium Universe, Rental Units, Percentage of Units in Rental and Vacancy Rate by Building Size

Available in the Montreal, Toronto, Vancouver, St. John's, Halifax, Quebec, Barrie, Ottawa, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Abbotsford, Kelowna and Victoria Reports

Secondary Rented Unit Data

- 5.1 Secondary Rented Unit Average Rents (\$) by Dwelling Type
- 5.2 Estimated Number of Households in in Other Secondary Rented Units by Dwelling Type

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b - Very good, c - Good, d - Fair (Use with Caution)

** Data suppressed to protect confidentiality or data not statistically reliable.

n/u: No units exist in the universe for this category n/s: No units exist in the sample for this category n/a: Not applicable

↑ indicates the year-over-year change is a statistically significant increase

↓ indicates the change is a statistically significant decrease

- indicates that the change is not statistically significant

¹The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b - Very good, c - Good, d - Fair (Use with Caution)

** Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

- No units exist in the universe for this category n/a: Not applicable

¹The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b- Very good, c - Good, d - Fair (Use with Caution)

** Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

- No units exist in the universe for this category n/a: Not applicable

¹The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b- Very good, c - Good, d - Fair (Use with Caution)

** Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

- No units exist in the universe for this category n/a: Not applicable

TECHNICAL NOTE:

Difference between Percentage Change of Average Rents (Existing and New Structures) AND Percentage Change of Average Rents from Fixed Sample (Existing Structures Only):

Percentage Change of Average Rents (New and Existing Structures): The increase/decrease obtained from the calculation of percentage change of average rents between two years (example: \$500 in the previous year vs. \$550 in current survey represents an increase of 10 percent) is impacted by changes in the composition of the rental universe (e.g. the inclusion of newly built luxury rental buildings in the survey, rental units renovated/upgraded or changing tenants could put upward pressure on average rents in comparison to the previous year) as well as by the rent level movement (e.g. increase/decrease in the level of rents that landlords charge their tenants).

Percentage Change of Average Rents from Fixed Sample (Existing Structures Only): This is a measure that estimates the rent level movement. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. However, some composition effects still remain e.g. rental units renovated/upgraded or changing tenants because the survey does not collect data to such level of details.

METHODOLOGY FOR RENTAL MARKET SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts the **Rental Market Survey (RMS)** every year in April and October to estimate the relative strengths in the rental market. The survey is conducted on a sample basis in all urban areas with populations of 10,000 and more. The survey targets only privately initiated structures with at least three rental units, which have been on the market for at least three months. The survey collects market rent, available and vacant unit data for all sampled structures. The survey is conducted by a combination of telephone interviews and site visits, and information is obtained from the owner, manager, or building superintendent. The survey is conducted during the first two weeks of April/October, and the results reflect market conditions at that time.

CMHC is constantly reviewing the Universe of rental structures in the rental market Universe to ensure that it is as complete as possible. Every year, any newly completed rental structures with at least 3 rental units are added to the Universe. In addition to this, CMHC undertakes comprehensive reviews by comparing the Universe listing to other sources of data to ensure that the list of structures is as complete as possible.

CMHC's Rental Market Survey provides a snapshot of vacancy and availability rates, and average rents in both new and existing structures. There also exists a measure for the change in rent that is calculated based on existing structures only. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. The change in rent in existing structures is an estimate of the change in rent that the landlords charge and removes compositional effects on the rent level movement due to new buildings, conversions, and survey sample rotation. The estimate of per cent change in rent is available in all Canada and Provincial Highlights publications, and also in the CMA reports (fall survey only). The rent levels in new and existing structures are also published. While the per cent change in rents in existing structures published in the reports are statistically significant, changes in rents that one might calculate based on rent levels in new and existing structures may or may not be statistically significant.

Use caution when comparing changes in statistics from one year to the next. Even if there is a year over year change, it is not necessarily a statistically significant change. These tables include indicators to help interpret changes. ↑ indicates the year-over-year change is a statistically significant increase, ↓ indicates the year-over-year change is a statistically significant decrease, while – indicates that the effective sample does not allow one to interpret any year-over-year change as being statistically significant.

METHODOLOGY FOR SECONDARY RENTAL MARKET SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts a survey of the **Secondary Rental Market (SRMS)** in September and October to estimate the relative strengths in the secondary rental market which is defined as those dwellings not covered by the regular RMS – rented single-detached homes, semi-detached (double) homes, rented freehold row/townhomes, rented duplex apartments (i.e., one-above-other), rented accessory apartments (separate dwelling units that are located within the structure of another dwelling type), rented condominiums (can be any dwelling type but are primarily apartments), and one or two apartments which are part of a commercial or other type of structure.

The SRMS has three components which are conducted in selected CMAs:

- A Household Rent Survey of all households to collect information about rents.
- A Condominium Apartment Rent Survey of households living in condominium apartments to collect information about rents.
- A Condominium Apartment Vacancy Survey of condominium apartment owners to collect vacancy information.

All three surveys are conducted by telephone interviews. For the condominium apartment vacancy survey, information is obtained from the owner, manager, or building superintendent and can be supplemented by site visits if no telephone contact is made. For the other two surveys, information is collected from an adult living in the household. All surveys are conducted in September and October, and the results reflect market conditions at that time.

CMHC publishes the number of units rented and vacancy rates for the condominium vacancy survey. For the condominium rent and household rent surveys, the average rent is published. A letter code representing the statistical reliability (i.e., the coefficient of variation (CV)) for each estimate is provided to indicate the data reliability. Rented condominium apartments were surveyed in the following CMAs: Vancouver, Victoria, Calgary, Edmonton, Regina, Saskatoon, Winnipeg, Toronto, Ottawa, Montréal and Québec (NOTE: Condo rent data was not collected for Regina and Saskatoon). Other secondary rental market units were surveyed in Abbotsford, Barrie, Calgary, Edmonton, Halifax, Montreal, Ottawa, Quebec, St. John's, Toronto, Winnipeg, Regina, Saskatoon, Kelowna, Vancouver and Victoria.

Every year CMHC reviews the method of estimation for Household Rent Survey, which may result in some changes to previously published estimates. All statistics in this report are reflective of the new method of estimation.

DEFINITIONS

Availability: A rental unit is considered available if the existing tenant has given, or has received, notice to move, and a new tenant has not signed a lease; or the unit is vacant (see definition of vacancy below).

Rent: The rent refers to the actual amount tenants pay for their unit. No adjustments are made for the inclusion or exclusion of amenities and services such as heat, hydro, parking, and hot water. For available and vacant units, the rent is the amount the owner is asking for the unit.

It should be noted that the average rents reported in this publication provide a sound indication of the amounts paid by unit size and geographical sector. Utilities such as heating, electricity and hot water may or may not be included in the rent.

Rental Apartment Structure: Any building containing three or more rental units, of which at least one unit is not ground oriented. Owner-occupied units are not included in the rental building unit count.

Rental Row (Townhouse) Structure: Any building containing three or more rental units, all of which are ground oriented with vertical divisions. Owner-occupied units are not included in the rental building unit count. These row units in some centres are commonly referred to as townhouses.

Vacancy: A unit is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

Definitions of Census Areas referred to in this publication are as follows:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

Data presented is based on Statistics Canada's 2011 Census area definitions.

Acknowledgement

The Rental Market Survey and the Secondary Rental Market Survey could not have been conducted without the cooperation of the rental property owners, managers, building superintendents and household members throughout Canada. CMHC acknowledges their hard work and assistance in providing timely and accurate information. As a result of their contribution, CMHC is able to provide information that benefits the entire housing industry.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
