

# HOUSING NOW

## Atlantic Region

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: Fourth Quarter 2014

### Third Quarter Housing Starts

Declines in population and weak economic conditions across the region resulted in weak housing starts in Atlantic Canada with a small one per cent increase in the third quarter of 2014 compared to the third quarter 2013, which was by historical standards a significantly weaker

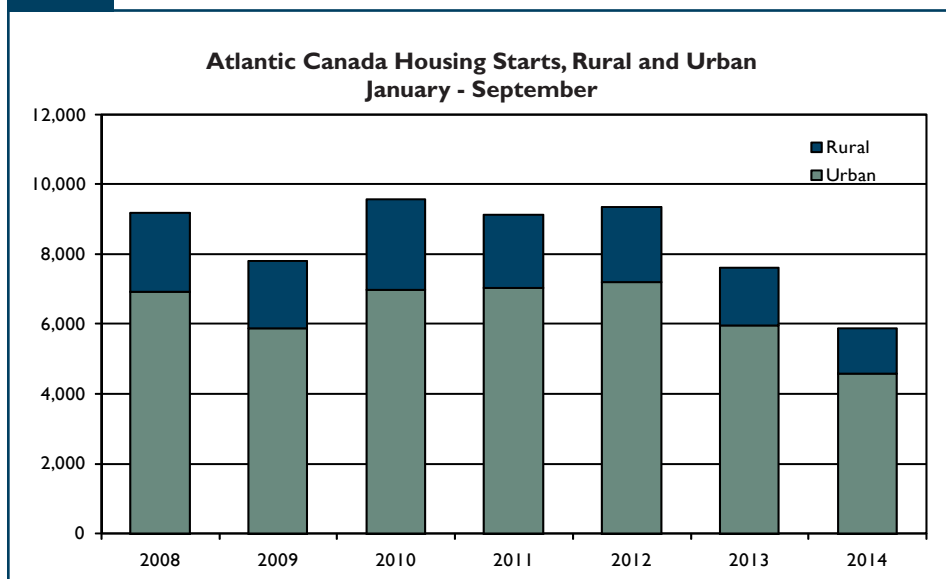

quarter from previous years. Multiple-unit starts reported a sharp increase of 26 per cent in the quarter, whereas singles declined 16 per cent.

All four of the Atlantic Provinces showed year-over-year declines in single starts in the third quarter. This included a 17 per cent decrease in Newfoundland and Labrador (NL), a six per cent decline in Prince Edward Island (PE), a 23 per cent decline in

Source: CMHC

Nova Scotia (NS) and nine per cent decline in New Brunswick (NB).

Multiple-unit starts in Atlantic Canada were up significantly as a result of increases of over thirty per cent in both NS and NB in the third quarter compared to the same period in 2013. Apartment starts accounted for the majority of the increase for Atlantic Canada in the quarter as they were up 46 per cent. Row unit starts were down 25 per cent compared to the third quarter of 2013, whereas semi-detached starts declined five per cent from the third quarter 2013 level of activity. Current weak economic conditions will continue to hamper the overall level of multiple starts as vacancy rates remain elevated in several markets in Atlantic Canada.

## Urban Starts

Of the six large urban centres in Atlantic Canada, four reported declines in the third quarter. Saint John recorded the smallest decline at close to two per cent. The other centres reporting a significant slowdown in activity for the quarter included

St. John's down 27 per cent, Fredericton down 34 per cent and Charlottetown down 39 per cent. The two centres returning to positive growth in the quarter included Halifax, which was up over 27 per cent and Moncton, which was up more than 100 per cent in the third quarter.

Of the smaller centres in the Atlantic region, a total of ten including Bay Roberts, Gander, and Corner Brook NL; Kings Subdivision A, New Glasgow, Queens RGM, and Yarmouth NS; and Bathurst, Miramichi and Campbellton NB, reported higher starts activity in the third quarter compared to the third quarter in 2013.

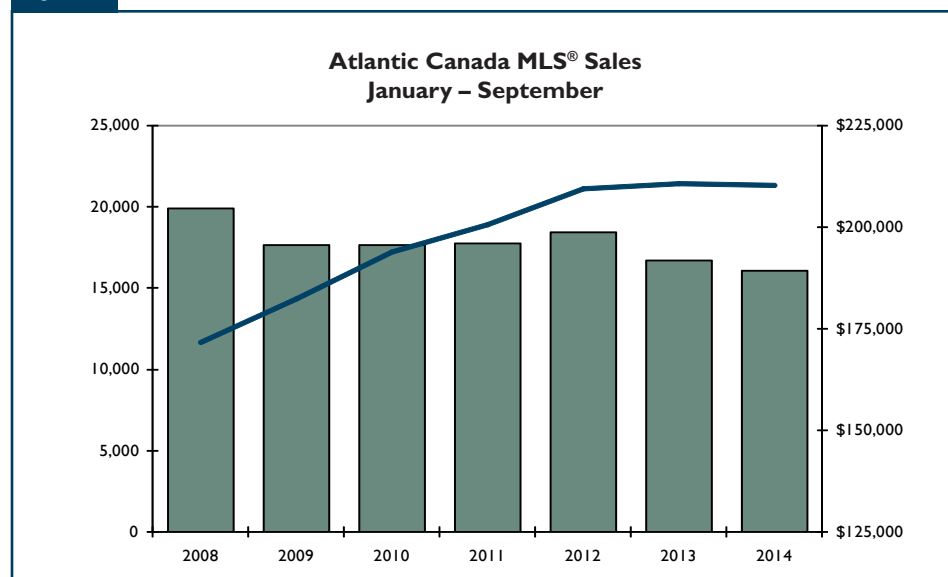

There were 2,159 completions in Atlantic Canada in the third quarter compared to 3,096 completions in the third quarter of 2013.

## MLS® Market

MLS® sales in Atlantic Canada were up three per cent in the third quarter (unadjusted) compared to a year ago. Two of the four provinces, including NB and PE, had increased sales activity of 12 and seven per cent, respectively. NS was down less than one per cent and NL was down close to two per cent.

The average MLS® price in Atlantic Canada was down 0.2 per cent to

Figure 3

\*MLS® Average Price: September (Year to Date), Price for each year unadjusted, MLS® Sales: September (Year to Date)

the end of September compared to the same period in 2013. Prices to the end of September declined in two of the four provinces, including NS with a decline of 0.9 per cent and NB marginally down 0.4 per cent. PE was up 2.2 per cent and NL up 1.5 per cent to the end of September.

The number of new listings reported in the third quarter, on an unadjusted basis, increased over eight per cent compared to the third quarter of 2013. The significant rise in inventory has been accompanied by higher out-migration tied to weak employment and sluggish economic growth. As a result, the overall level of housing inventory is higher than the longer-term historical average.

## Economic Factors

The labour force and employment were mixed in terms of direction in the third quarter in Atlantic Canada (seasonally adjusted) with the labour force declining 0.1 per cent and employment rising 0.1 per cent. At the end of the quarter, the overall unemployment rate in Atlantic Canada was down to 10.0 per cent compared to 10.2 per cent at the end of September 2013, as a result of the increase in employment compared to the labour force.

Demographic factors, including population and migration, continued to weaken based on the most recent quarterly data available. The population was down 0.1 per cent in the third quarter as a result of a 0.5 per cent rise in PE being offset by a 0.2 per cent decrease in both NB and NL. NS remained stable, with no change in the third quarter for the first time since the first quarter of 2013.

The most recent migration data from the first two quarters of 2014 supports the overall indications for the year that the decline in the population for Atlantic Canada is related to the rise in out-migration. For the first half of 2014, there have been 4,694 persons leaving Atlantic Canada to go elsewhere in the country. This was not offset by international migration, as a smaller number of 3,791 persons were estimated to have come to Atlantic Canada in the first half of 2014, resulting in a total decline of 903 persons.

There were two provinces, NB and NL, who reported net-migration declines of 677 and 1,241 people, respectively in the first half of 2014. NS reported a small increase of 230 people and PE a larger increase of 785 people for the first-half of 2014.

The most recent data on retail sales remains positive for the year, up three per cent to the end of July 2014, with retail spending positive for the year in all four provinces. For NB, there has been an increase in retail spending of 3.4 per cent, NL is up 2.9 per cent, with NS rising 2.7 per cent and PE up 2.4 per cent to the end of July.

Weekly earnings are up 3.4 per cent to the end of June 2014. With the rate of inflation up close to two per cent across Atlantic Canada, real income growth is estimated to be up about 1.5 per cent so far in 2014.

## HOUSING NOW REPORT TABLES

### Available in ALL reports:

- 1 Housing Starts (SAAR and Trend)
- 1.1 Housing Activity Summary of Region
- 2 Starts by Submarket and by Dwelling Type – Current Quarter
- 2.1 Starts by Submarket and by Dwelling Type – Year-to-Date
- 3 Completions by Submarket and by Dwelling Type – Current Quarter
- 3.1 Completions by Submarket and by Dwelling Type – Year-to-Date
- 4 Absorbed Single-Detached Units by Price Range
- 5 MLS® Residential Activity
- 6 Economic Indicators
- 6.1 Growth of Economic Indicators

### Available in SELECTED Reports:

- 1.3 History of Housing Activity (once a year)
- 2.2 Starts by Submarket, by Dwelling Type and by Intended Market – Current Quarter
- 2.3 Starts by Submarket, by Dwelling Type and by Intended Market – Year-to-Date
- 2.4 Starts by Submarket and by Intended Market – Current Quarter
- 2.5 Starts by Submarket and by Intended Market – Year-to-Date
- 3.2 Completions by Submarket, by Dwelling Type and by Intended Market – Current Quarter
- 3.3 Completions by Submarket, by Dwelling Type and by Intended Market – Year-to-Date
- 3.4 Completions by Submarket and by Intended Market – Current Quarter
- 3.5 Completions by Submarket and by Intended Market – Year-to-Date

## METHODOLOGY

### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2011 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modeled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

## DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

## INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

**Freehold:** A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

**Rental:** Dwelling constructed for rental purposes regardless of who finances the structure.

## GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
