

# HOUSING NOW

## Vancouver and Abbotsford CMAs

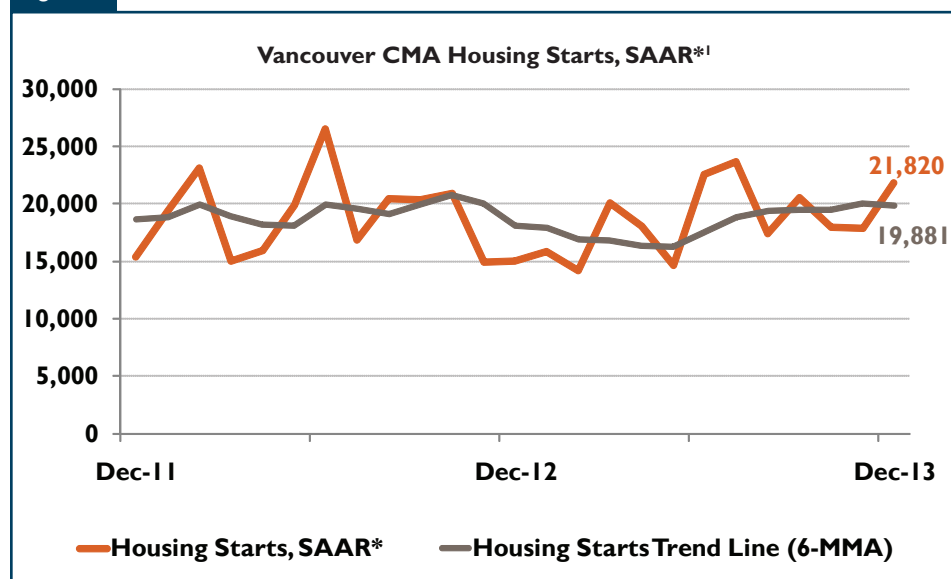

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: January 2014

### Highlights

- A increase in multiple-family housing starts kept total Vancouver CMA housing starts steady at an annual total of 18,696 in 2013;
- Housing starts in the Abbotsford-Mission CMA recorded a total of 749 in 2013; and
- MLS® resale market conditions turned around as the number of sales picked up pace and prices recovered in the second half of 2013.

Figure 1

\* Seasonally adjusted annual rate  
Source: CMHC

<sup>1</sup> The seasonally adjusted annual rate (SAAR) is a monthly figure for starts adjusted to remove normal season variation and multiplied by 12 to reflect annual levels. By removing seasonal ups and downs, seasonal adjustment allows for a comparison from one season to the next and from one month to the next. Reporting monthly figures at annual rates indicates the annual level of starts that would be obtained if the monthly pace was maintained for 12 months. This facilitates comparison of the current pace of activity to annual forecasts as well as to historical annual levels.

## Housing Market Overview

Total housing starts in the Vancouver Census Metropolitan Area (CMA) were trending at 19,881 units in December 2013, down marginally from 20,009 in November (Figure 1). The trend is a six-month moving average of monthly seasonally adjusted annual rates (SAAR) of total housing starts. This brought the annual total to 18,696 housing starts, just 1.7 per cent lower than the previous year.

A pick-up in multiple-family starts during the second half of 2013 was partially off-set by a moderation in single-family housing starts. There were 1,450 multiple-family starts in December, bringing the annual total to 14,692 multiple family starts. Approximately 63 per cent of these were condominium apartment starts and these were mostly concentrated in the cities of Vancouver, Burnaby, and Surrey. Part of the lift in multiple-family starts in 2013 was due to an increase in purpose-built rental apartment starts. Approximately 1,800 such units were started during the year. CMHC's rental market surveys show that vacancy rates for newer purpose-built rental apartments and for rental condominium apartments tend to be lower than vacancy rates in older purpose built rental buildings<sup>2</sup>. The existing stock of purpose-built rental apartments was primarily built before the year 2000.

Single-family housing starts moderated in 2013 as the inventory of completed and unabsorbed single-family homes rose steadily through the first three quarters of the year. The inventory of completed and unabsorbed single-family homes was nearly 25 per cent higher in 2013 Q3 than in 2012 Q3.

Figure 2

Source: CMHC

During 2013 Q4, however, the number of such homes started to decline due mostly to a higher rate of absorption (Figure 2).

## Abbotsford-Mission CMA New Housing Market

Housing starts in the Abbotsford-Mission CMA were trending at 694 units in December, compared to 740 units in November. The number of homes started in the Abbotsford-Mission CMA in December 2013 was 106, which brought the annual total to 749 housing starts (Figure 3). The majority of these starts – 84 per cent – were in the City of Abbotsford.

Like in the Vancouver CMA, single-family housing starts in the Abbotsford-Mission CMA moderated in 2013. Compared to the previous year, single-family housing starts were

down approximately 10 per cent. Multiple-family housing starts closed the year at 548 starts, up from less than 200 starts in 2012. Of these, approximately 52 per cent were condominium townhouse and apartment starts, 37 per cent were rental starts, and 11 per cent were social housing starts.<sup>3</sup>

This level of apartment rental starts is the highest in the last 10 years. A number of reasons contributed to the increase in rental starts. One reason is relative land prices. The average price for land zoned residential in the Abbotsford-Mission CMA is lower than centres in the Vancouver CMA, such as Surrey and Langley. Another reason is higher demand for newer rental units relative to older units. The vacancy rate for rental suites built after the year 2000 was 1.9 per cent, which was lower than the overall average of 3.2 per cent for all rental units.<sup>4</sup>

<sup>2</sup> CMHC Rental Market Report: Vancouver and Abbotsford-Mission, Fall 2013.

<sup>3</sup> Rental housing starts include accessory suites. About 170 units were purpose-built market rental apartment starts.

<sup>4</sup> CMHC Rental Market Report: Abbotsford-Mission, Fall 2013

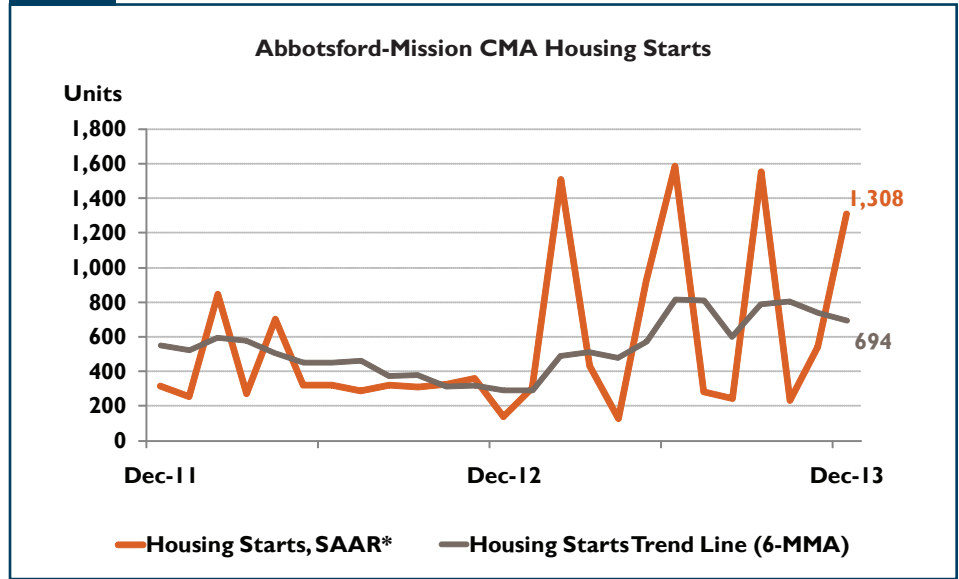

## Greater Vancouver MLS® Market<sup>5</sup>

In areas covered by the Real Estate Board of Greater Vancouver (REBGV), pent-up demand was one factor that propelled fourth quarter MLS® sales up year-over-year to 8,316 sales, bringing the total number of MLS® sales for 2013 to 28,984. Even though this represented a 14 per cent year-over-year increase on the previous year, it was still below the 15-year average of 31,536 sales. Since purchasing a home is a significant, long-term financial commitment for most, growth in full-time employment is essential to support strong home sales. However, full-time employment conditions in the Vancouver CMA have been tepid and this could have tempered home sales somewhat.

During 2013, homebuyers may have seen the softer market conditions as an opportunity to change their housing situation to meet evolving housing needs. The following trends were observed:

- Areas covered by REBGV gained market share in 2013 – REBGV sales represented 70 per cent of all MLS® sales in the Lower Mainland, up from 67 per cent in 2012;<sup>6</sup>
- Increased interest in ground-oriented housing, such as single-family houses and townhouses, in 2013 as evidenced by relatively higher market share;
- Single-family home sales shifted towards some of the pricier markets, such as West Vancouver, Vancouver West, and Richmond; and
- Sales of condominium apartments shifted towards some of the less expensive markets, such as Coquitlam, Burnaby, Maple Ridge, and Pitt Meadows.

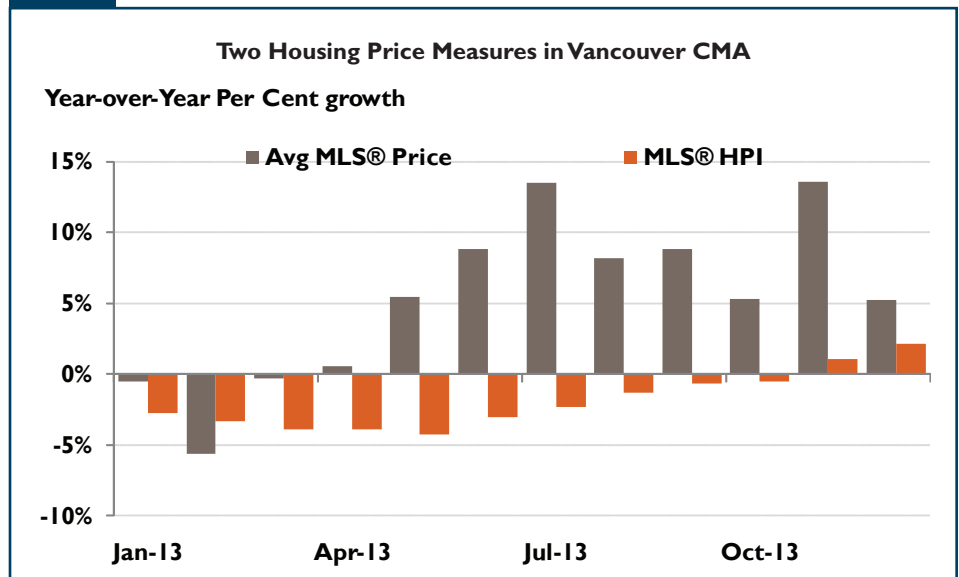

Figure 3

\* Seasonally Adjusted Annual Rate

Source: CMHC

Figure 4

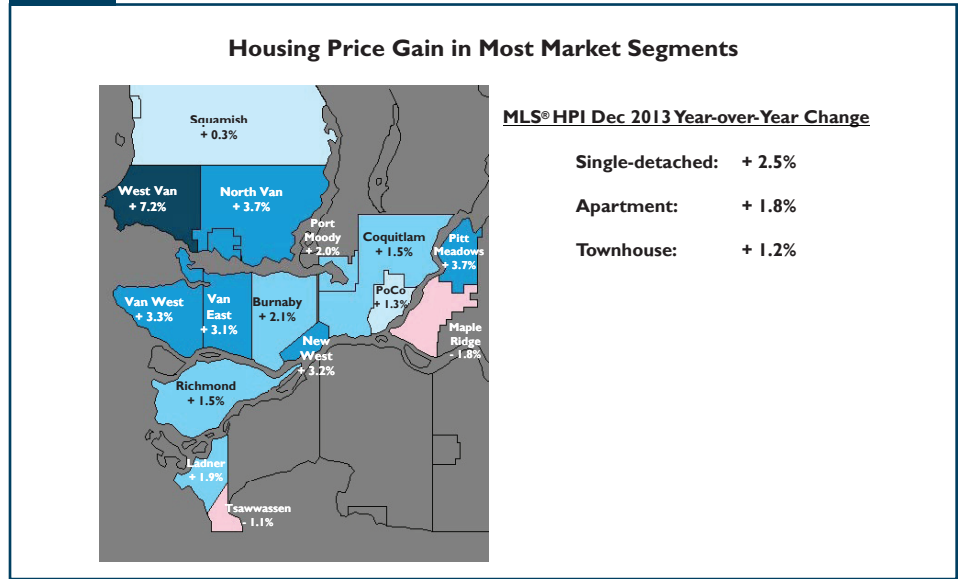

Source: CMHC, adapted from Statistics Canada

<sup>5</sup> MLS® is a registered certification mark of the Canadian Real Estate Association (CREA)

<sup>6</sup> Here, Lower Mainland refers to markets covered by both the Real Estate Board of Greater Vancouver (REBGV) and the Fraser Valley Real Estate Board (FVREB).  
 $Market\ Share_{REBGV} = \frac{MLS^{\circ} Sales_{REBGV}}{(MLS^{\circ} Sales_{REBGV} + MLS^{\circ} Sales_{FVREB})}$

The increase in sales of existing homes pushed housing prices higher. Although much of the observed gain the average MLS® price was due to the compositional shifts, prices by other measures registered growth by year-end. The MLS® Home Price Index (HPI) showed that prices in the REBGV area grew 2.1 per cent year-over-year and the average MLS® price posted a six per cent increase (Figure 4).<sup>7</sup> Among the different housing types, single-family homes saw the largest year-over-year MLS® HPI gain; in terms of market areas, West Vancouver led with a 7.2 per cent gain in MLS® HPI for all housing types (Figure 5).<sup>8</sup>

Figure 5

Source: CMHC, adapted from REBGV

## Fraser Valley MLS® Market

In areas covered by the Fraser Valley Real Estate Board (FVREB), MLS® sales of existing homes picked up pace in the latter part of 2013 and reached an annual total of 12,895 sales, just about one per cent lower than the 13,083 MLS® sales recorded in 2012. Unlike markets covered by REBGV, the market share of different dwelling types in the FVREB remained essentially unchanged, with single-detached homes accounting for 57 per cent of sales, townhouses 24 per cent, and apartments 23 per cent.

The second-half turnaround in sales and demand helped to lift the average MLS® price in the FVREB to such a degree that by December 31, 2013, any shortfall relative to 2012 was erased. Much of the strength observed in prices was concentrated in the single-detached market segment. Single-detached homes in the FVREB recorded a three per cent increase in average MLS® price in 2013, whereas

apartment and townhouse home prices slipped one per cent. The MLS® HPI also showed price gains for single-detached homes, which offset lower prices observed for townhouses and apartments.

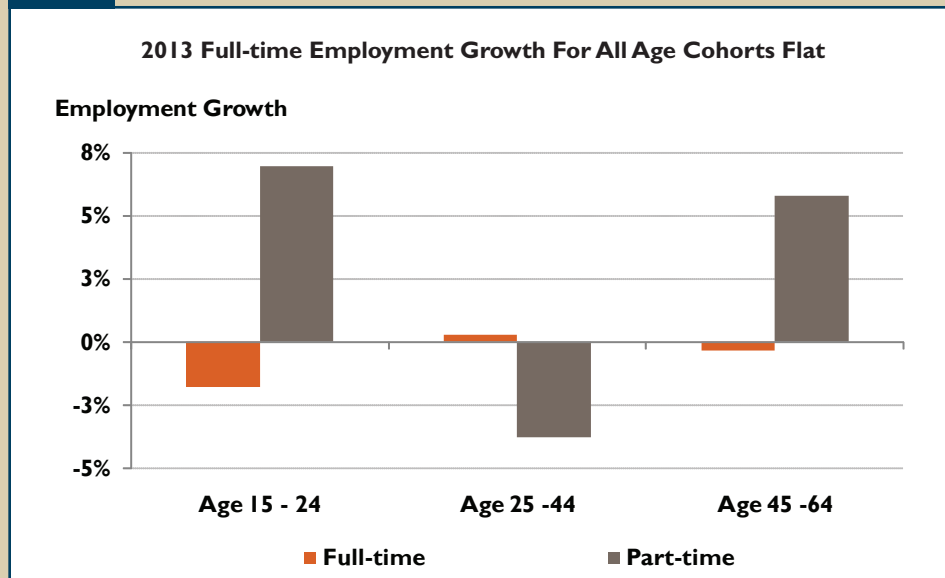

<sup>7</sup> The MLS® HPI concept is modelled after the Consumer Price Index and strives to measure the rate at which housing prices change over time while controlling for the type of homes sold.

<sup>8</sup> REBGV

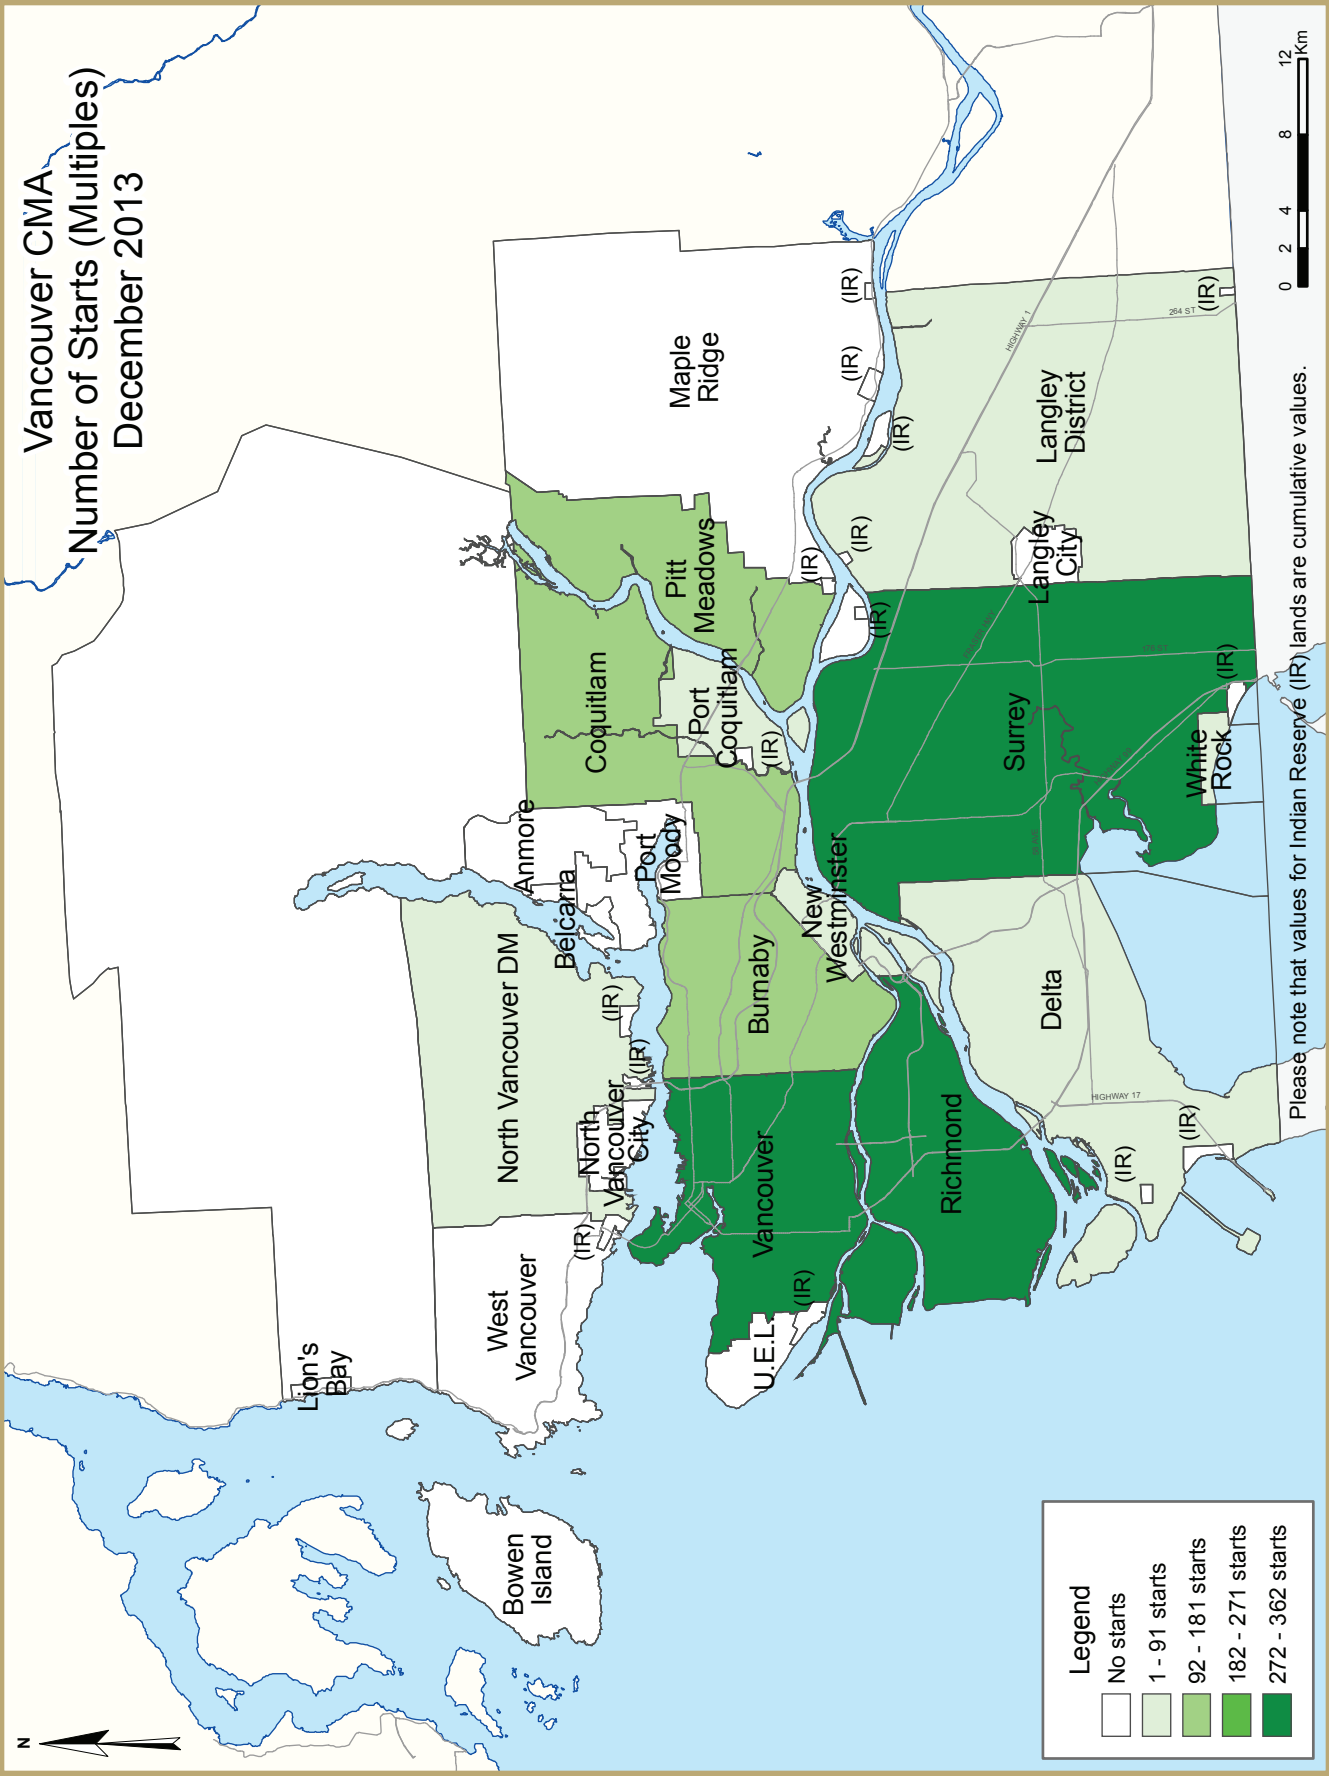

## SPOTLIGHT: Recent Trends in Employment

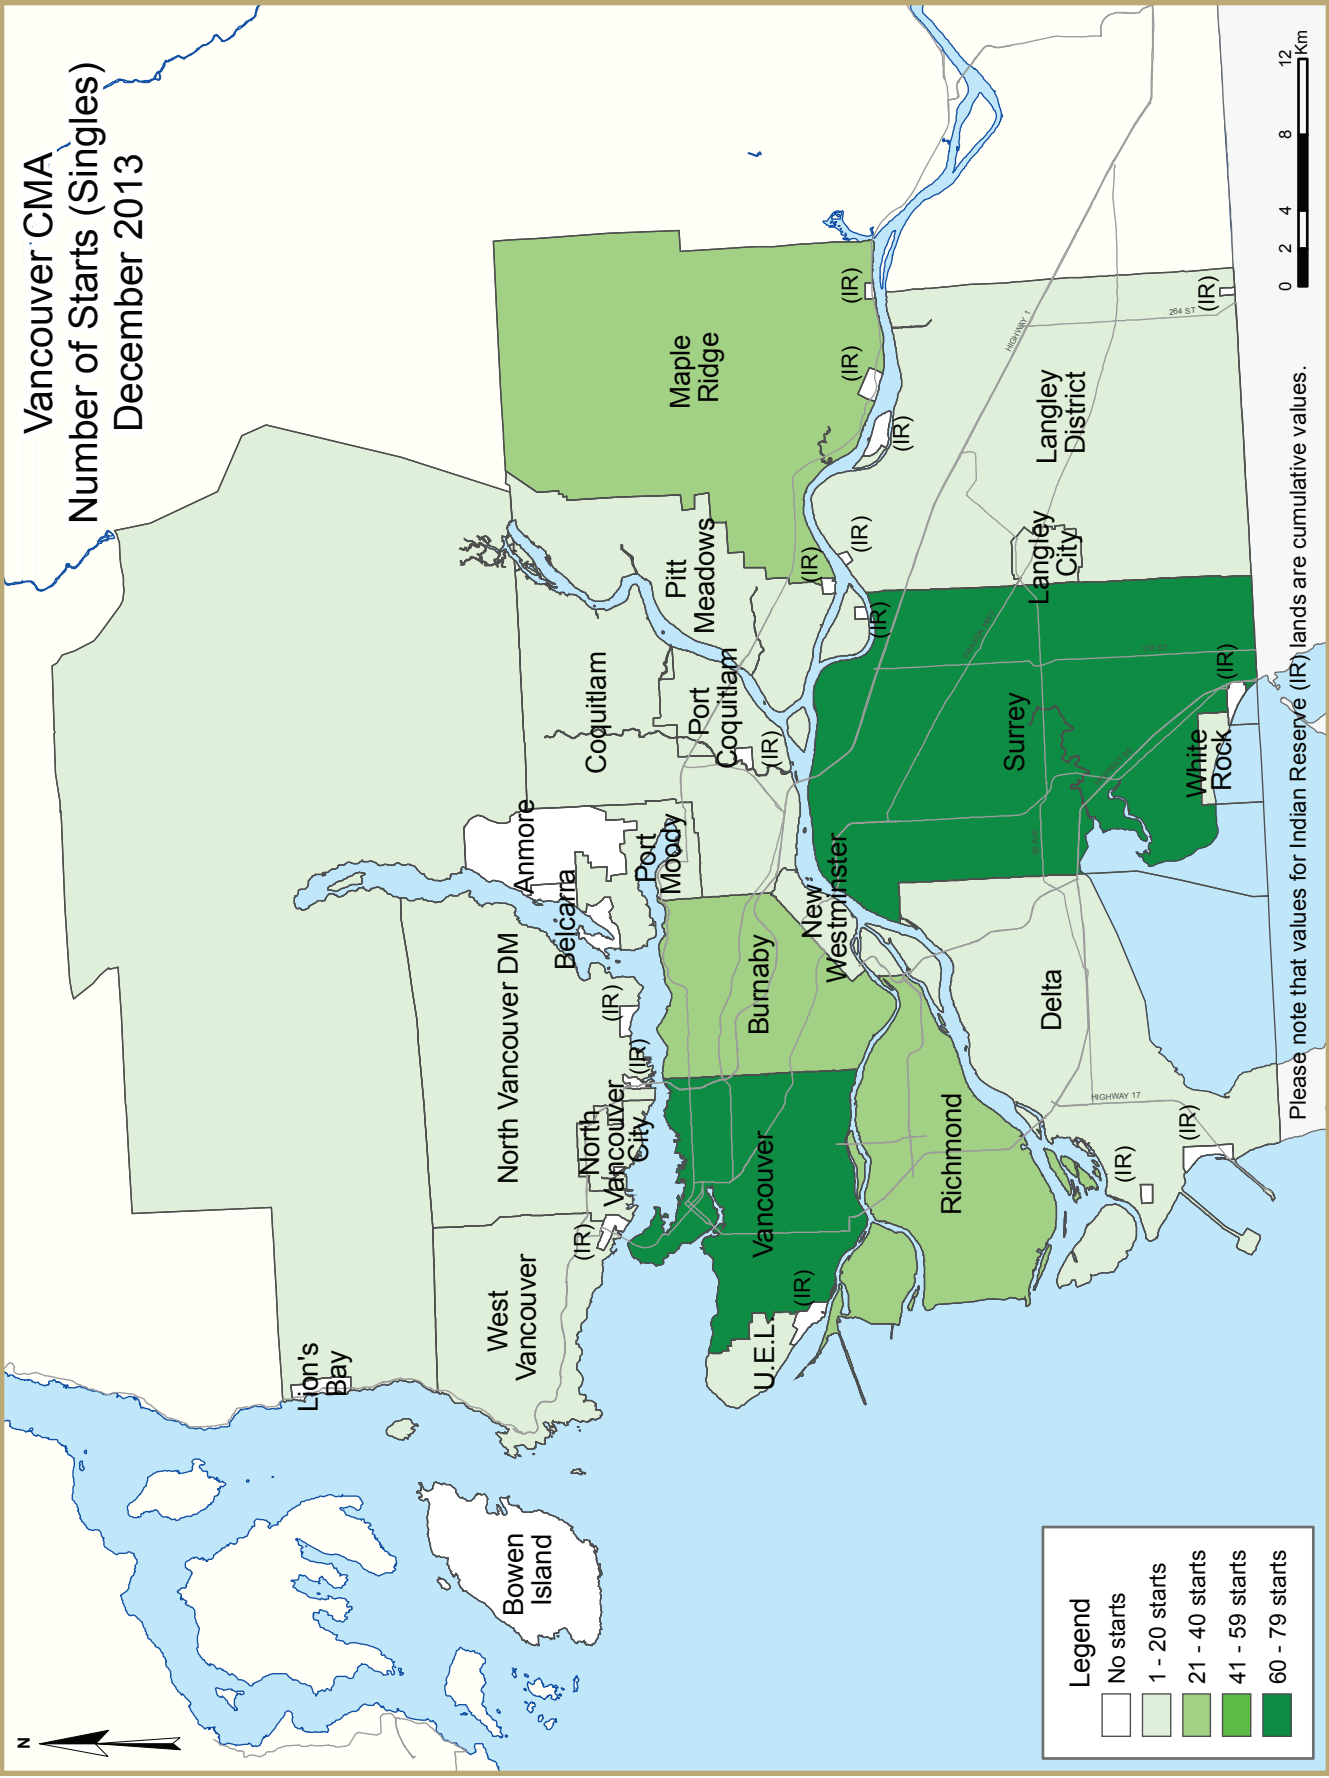

After growing less than one per cent in 2012, overall employment conditions in the Vancouver CMA showed little improvement in 2013. Overall employment ended 2013 on a flat note. Still, with a marginal increase in labour force, the unemployment rate declined to 6.0 per cent in December 2013 from 6.2 per cent a year ago. Part-time employment grew three per cent during the same period whereas full-time employment edged lower. A closer look by age cohort revealed weak growth in full-time employment across all age cohorts (Figure 6). Real average weekly earnings increased about two per cent, due mostly to a very low rate of inflation in the Vancouver CMA.

Detailed data available upon request

Some data for 2012 have been restated in the above table, to allow comparison with 2013 data. Other CMHC reports do not contain this restated data, therefore figures for 2012 may not match the above. Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Some data for 2012 have been restated in the above table, to allow comparison with 2013 data. Other CMHC reports do not contain this restated data, therefore figures for 2012 may not match the above. Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Some data for 2012 have been restated in the above table, to allow comparison with 2013 data. Other CMHC reports do not contain this restated data, therefore figures for 2012 may not match the above. Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Source: CMHC (Starts and Completions Survey)

Some data for 2012 have been restated in the above table, to allow comparison with 2013 data. Other CMHC reports do not contain this restated data, therefore figures for 2012 may not match the above. Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Source: CMHC (Starts and Completions Survey)

Some data for 2012 have been restated in the above table, to allow comparison with 2013 data. Other CMHC reports do not contain this restated data, therefore figures for 2012 may not match the above. Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Detailed data available upon request

Some data for 2012 have been restated in the above table, to allow comparison with 2013 data. Other CMHC reports do not contain this restated data, therefore figures for 2012 may not match the above. Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Some data for 2012 have been restated in the above table, to allow comparison with 2013 data. Other CMHC reports do not contain this restated data, therefore figures for 2012 may not match the above. Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

## METHODOLOGY

### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2011 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modeled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

## DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

## INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

**Freehold:** A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

**Rental:** Dwelling constructed for rental purposes regardless of who finances the structure.

## GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
