INTRODUCTION

The collection of genotypes and the conservation of gene pools of cultivated and related wild species are essential for genetic research and plant breeding. Collecting has become increasingly important in recent years, because the introduction of improved cultivars from the west in and around the existing centers of genetic diversity of many of our important crop species, together with a higher standard of farming practice, has resulted in the erosion of the genetic variation inherent in the old land races and wild weedy species related to these crops. These races and species are thus being slowly eliminated by improved standards of local farming. Oats are no exception.

The largest world collection of cultivars and genetic stocks of cultivated oats is maintained by the United States Department of Agriculture. However, the additional need for an extensive collection of land races and wild species of oats was recognized by the Research Branch, Canada Department of Agriculture, and several expeditions have been undertaken. The first expedition, in 1964, explored many areas in the Mediterranean region; the second collection was made in Israel in 1966; and the third expedition in 1970 covered mainly the Middle East. Members of the Welsh Plant Breeding Station joined the 1964 and 1970 expeditions. Various small collections of seeds were also received from several workers through seed exchanges. In 1972 the Canada Department of Agriculture was maintaining the largest world collection of wild species of the genus *Avena* (CAV collection), and published the first edition of Wild Oat Gene Pool to describe the collection.

Since then the number of samples in the CAV collection has doubled as a result of additional collecting expeditions sponsored by the Research Branch, Canada Department of Agriculture. These expeditions covered areas in Kenya, Ethiopia, Tunisia, Algeria, Morocco, and the Canary Islands. The second edition of Wild Oat Gene Pool has been published to update and enlarge the listing first published in 1972.

The diploid entry with a question mark instead of a specific epithet in the first edition has been described as a new species, *A. damascena* (Rajhathy and Baum 1972), in this second edition. Furthermore, two new diploid species, *A. prostrata* (Ladizinsky 1971) and *A. canariensis* (Baum, Rajhathy, and Sampson 1973), have been included. The accession of *A. macrostachya*, a perennial species, which is considered as *Avena*, also appears here as part of the *Avena* gene pool. The habitat and distribution of some species have been summarized previously by Baum *et al.* (1972).

With the exception of China-Mongolia, Tadzhikistan, and vicinity, all the major regions of the primary distribution area of *Avena* are now well represented in the CAV collection. Therefore no substantial additions are expected in the near future. Consequently we do not envisage publishing a third edition of the gene pool for some time.

Numerous requests for updated listings and, as mentioned above, the doubling in accession numbers since the first edition, together with the discoveries of new species, have prompted the publication of this revised edition.

The aim of these expeditions and accessions is to collect an extensive range of genetic variation of each wild species for the following purposes:

- to provide initial material for oat breeding, particularly for new sources of resistance to diseases and for quality breeding programs;
- to provide material for genetic and cytogenetic research on the genetic architecture of *Avena*;
- to provide material for taxonomic studies of *Avena*;
- to obtain information on the distribution and habitat of various taxa of *Avena*.

The collecting strategy concentrated on exploring large areas to obtain wide geographic variation as well as information on the habitats and ecology of each taxon. This strategy seemed practical in view of time limitations and the extensive areas to be explored. These preliminary expeditions will provide an adequate basis for the planning of subsequent trips, if they should become necessary, which would place greater emphasis on local genetic variation.

NAMES OF SPECIES AND SUMMARY OF THE COLLECTION

The last comprehensive monograph of the genus *Avena* was published by Malzew (1930) and is now out of date. Because of this situation some names in Malzew's monograph have not been used by various workers concerned with oats. A new monograph of *Avena* is now in preparation by B.R. Baum, and it is already apparent that some names used by Malzew and by various oat workers are not correct. At this stage we decided to make a compromise by employing those names that have been commonly used by oat workers in their reports, publications, and personal correspondence in the last two decades.

The names used in this catalog and their respective chromosome numbers are as follows:

<i>A. abyssinica</i>	$2n = 28$
<i>A. barbata</i>	$2n = 28$
<i>A. byzantina</i>	$2n = 42$
<i>A. canariensis</i>	$2n = 14$
<i>A. clauda</i>	$2n = 14$
<i>A. damascena</i>	$2n = 14$
<i>A. fatua</i>	$2n = 42$
<i>A. hirtula</i>	$2n = 14$
<i>A. longiglumis</i>	$2n = 14$
<i>A. macrostachya</i>	$2n = 28$
<i>A. magna</i>	$2n = 28$
<i>A. murphyi</i>	$2n = 28$
<i>A. occidentalis</i>	$2n = 42$
<i>A. pilosa</i>	$2n = 14$
<i>A. prostrata</i>	$2n = 14$
<i>A. sterilis</i>	$2n = 42$
<i>A. strigosa</i>	$2n = 14$

<i>A. vaviloviana</i>	2n = 28
<i>A. ventricosa</i>	2n = 14
<i>A. wiestii</i>	2n = 14

A summary of the collection for each species within each country or region is given in the following table.

	<i>abyssinica</i>	<i>barbata</i>	<i>byzantina</i>	<i>canariensis</i>	<i>clauda</i>	<i>damascena</i>	<i>fatua</i>	<i>hirtula</i>	<i>longiglumis</i>	<i>macrostachya</i>	<i>magna</i>	<i>murphyi</i>	<i>occidentalis</i>	<i>pilosa</i>	<i>prostrata</i>	<i>sterilis</i>	<i>strigosa</i>	<i>vaviloviana</i>	<i>ventricosa</i>	<i>wiestii</i>

COMPUTERIZED CATALOG AND REQUESTS FOR PRINTOUTS

This catalog contains data that are otherwise on auxillary storage such as disc or magnetic tape. These data can be readily retrieved by means of a program package. Input of new accessions or input of changes as a result of new findings is being done constantly. Furthermore, we are able to produce various specific listings that are always up to date.

The following listings are available on request:

- 1) the entire inventory in CAV Number sequence;
- 2) the entire listing in Site sequence within species, within country or region;
- 3) the entire listing in Original Number sequence, within species, within country or region;
- 4A) the entire listing in Site sequence, within country or region, within species – a continuous listing;
- 4B) the entire listing in Site sequence within country or region, within species – with page skipping on a change in country or region;
- 5A) the entire listing in Original Number sequence, within species, within country or region – a continuous listing;
- 5B) the entire listing in Original Number sequence, within species, within country or region – with page skipping in species;
- 6) a listing for a specified country or region in Site sequence within species;
- 7) a listing for a specified country or region in Original Number sequence within species;
- 8) a listing for a specified species in Site sequence within country or region;
- 9) a listing for a specified species in Original Number sequence within country or region.

A number of other reports are also available, but they will not be detailed here. Requests should be forwarded to B.R. Baum.

REQUESTS FOR SEEDS

The seeds of oats maintained by the Canada Department of Agriculture are available to anyone interested in *Avena* for research and breeding purposes. Requests should be forwarded to Dr. R. Loiselle, Central Office, Canada Committee on Plant Gene Resources, Research Station, Central Experimental Farm, Ottawa, Ontario K1A 0C6.

THE LISTING OF THE COLLECTION

This listing is arranged according to the sequence of original numbers within sites; the sites are given in alphabetical order within each country or region; and the countries or regions appear in alphabetical sequence within the species. The species are ordered alphabetically. ORIG. # means ORIGinal or field number, CW refers to the 1964 expedition (Rajhathy, Zillinsky, and Hayes 1966), and ME, to the 1970 expedition. Similar abbreviations are other field assignment codes. CAV # means Canadian AVena number. For requests, please refer to the CAV numbers only.

ACKNOWLEDGMENTS

We wish to thank Mr. M.D. Fleming and Mr. M.B. Witbeck, Data Processing Service, Canada Department of Agriculture, Ottawa, for programming assistance.

The following people helped us in our expeditions or by sending us seeds: Dr. Vamik Taysi, Dr. Ebbe Kjellquist, and Miss Ayla Sencer, Agricultural Research and

Introduction Center, Karsiyaka-Izmir, Turkey; Dr. M. Bounaga, Laboratoire des Sciences Biologiques, Faculté des Sciences, Université d'Alger, Algeria; Dr. Jean Belcourt, Canadian International Development Agency, Algiers, Algeria; Dr. Adib Saad, American University, Beirut, Lebanon; Drs. M.E. Cacouris and Sabah A. Moar, Ministry of Agriculture, Republic of Iraq; Dr. Yassir Kanafani, Directorate of Agricultural Affairs, Dr. Orvar Draz, FAO Range and Forage Crops Expert, and Mr. F. Fokeladeh, UNDP Program Assistant, Damascus, Syrian Arab Republic; Dr. A. Dinoor, Department of Plant Pathology of the Hebrew University, Israel; Dr. Edward J. Rice, Agronomy Advisor, Afghanistan; Miss E. Bennett and Dr. J. Leon, Plant Production and Protection, FAO, Rome, Italy; Dr. F. Adali, FAO Country Representative, Tehran, Iran; Mr. P. Parvaneh, Seed and Plant Improvement Institute, Karadj, Iran; Dr. R.G. Anderson, CIMMYT, Mexico; Dr. D. Yirgou, Imperial Ethiopian Government, Institute of Agricultural Research, Addis Ababa, Ethiopia; Drs. N. Fadda and F. Pinto, FAO-UNDP Project, Addis Ababa, Ethiopia; Drs. R. Pelletier and A. Price, Canadian International Development Agency, Morocco; Drs. R. Edwards, C. Searl, A. McSwain, and W. Davies, USAID, Morocco; Dr. G. Saari, Ford Foundation, Beirut, Lebanon; Dr. N. Kadra, Wheat Project, Ministry of Agriculture, Algeria; Drs. W.L. McCuistion, W. Nelson, and H. Floyd, Ford Foundation and CIMMYT, Algeria; Mr. C. Thibault, Canadian Embassy, Algiers; Drs. J. Doolette and T. Lyons, CIMMYT, Tunisia; and Dr. G. Walker, USAID, Tunisia.
