

# The Fiscal Monitor

## A publication of the Department of Finance

---

### Highlights

#### **March 2015: budgetary deficit of \$3.0 billion**

There was a budgetary deficit of \$3.0 billion in March 2015, down \$3.7 billion from the budgetary deficit reported for March 2014. Revenues increased by \$4.6 billion, or 18.6 per cent, reflecting significant increases in corporate income tax revenues and other revenues. Program expenses increased by \$1.3 billion, or 4.5 per cent, reflecting increases in major transfers to persons and other levels of government and direct program expenses. Public debt charges decreased by \$0.4 billion, or 16.6 per cent, largely reflecting a lower average effective interest rate on the stock of interest-bearing debt.

#### **April 2014 to March 2015: budgetary surplus of \$2.9 billion**

For the April to March period of the 2014–15 fiscal year, the Government posted a budgetary surplus of \$2.9 billion, compared to a deficit of \$11.4 billion reported for the same period of 2013–14. Revenues were up \$11.7 billion, or 4.4 per cent, reflecting increases in most revenue streams. Program expenses were down \$1.2 billion, or 0.5 per cent, reflecting a decrease in direct program expenses, offset in part by increases in major transfers to persons and other levels of government. Public debt charges were down \$1.5 billion, or 5.3 per cent, reflecting a lower average effective interest rate on interest-bearing debt.

The April 2014 to March 2015 monthly results are not the final results for the year as a whole. The final results will also reflect end-of-year adjustments that will be made once further information becomes available, including the accrual of tax revenues reflecting assessments of tax returns and valuation adjustments for assets and liabilities. In addition, these results do not include the fiscal impact of announced Government initiatives such as enhancements to the New Veterans Charter (\$1.6 billion) and the Universal Child Care Benefit (\$1.1 billion). The fiscal impact of these initiatives will be recorded once Bill C-59, the *Economic Action Plan 2015 Act, No. 1*, receives Royal Assent. Taking these and other expected year-end adjustments into account, results to date are broadly in line with a small deficit in 2014–15, as projected in Budget 2015.

The Government will release the final audited outcome for 2014–15 in the *Annual Financial Report of the Government of Canada* in the fall.

### March 2015

There was a budgetary deficit of \$3.0 billion in March 2015, down \$3.7 billion from the budgetary deficit reported for March 2014.

Revenues in March 2015 totalled \$29.1 billion, up \$4.6 billion, or 18.6 per cent, from March 2014.

- Personal income tax revenues were up \$0.6 billion, or 5.5 per cent, reflecting timing issues which lowered February 2015 results but increased the March 2015 results.
- After declining in January and February, corporate income tax revenues were up \$2.4 billion, reflecting, in part, timing issues.
- Non-resident income tax revenues were up \$0.1 billion, or 10.6 per cent.
- Excise taxes and duties were up \$0.1 billion, or 2.5 per cent. Goods and Services Tax (GST) revenues increased by \$14 million, energy taxes decreased by \$0.1 billion, and customs import duties and other excise taxes and duties each increased by \$0.1 billion.

- Employment Insurance (EI) premium revenues were down \$9 million, or 0.4 per cent, reflecting a one-time downward adjustment in March 2015 to incorporate updated information on EI premiums for the fiscal year as a whole.
- Other revenues, consisting of net profits from enterprise Crown corporations, revenues of consolidated Crown corporations, revenues from sales of goods and services, returns on investments, net foreign exchange revenues and miscellaneous revenues, were up \$1.4 billion, or 33.7 per cent, reflecting updated information on Crown corporations.

Program expenses in March 2015 were \$30.2 billion, up \$1.3 billion, or 4.5 per cent, from March 2014.

- Major transfers to persons, consisting of elderly, EI and children's benefits, increased by \$0.6 billion, or 9.1 per cent. Elderly benefits increased by \$0.2 billion, or 5.4 per cent, due to growth in the elderly population and changes in consumer prices, to which benefits are fully indexed. EI benefit payments increased by \$0.6 billion, or 35.7 per cent. Children's benefits, which consist of the Canada Child Tax Benefit and the Universal Child Care Benefit, decreased by \$0.2 billion, or 12.1 per cent.
- Major transfers to other levels of government consist of federal transfers in support of health and other social programs (primarily the Canada Health Transfer and the Canada Social Transfer), fiscal arrangements and other transfers (Equalization, transfers to the territories, as well as a number of smaller transfer programs), transfers to provinces on behalf of Canada's cities and communities, and the Quebec Abatement. Major transfers to other levels of government increased by \$0.3 billion, or 6.3 per cent, reflecting legislated growth in the Canada Health Transfer, the Canada Social Transfer, Equalization transfers and transfers to the territories as well as a decrease in estimated recoveries under the Quebec Abatement, which are netted against major transfers to other levels of government. These increases were offset in part by a decrease in transfers to Canada's cities and communities.
- Direct program expenses include transfer payments to individuals and organizations not included in major transfers to persons and other levels of government, and other direct program expenses, which consist of operating expenses of National Defence, other departments and agencies, and expenses of Crown corporations. Direct program expenses were up \$0.4 billion, or 2.1 per cent. Within direct program expenses:
  - Transfer payments increased by \$0.8 billion, or 12.2 per cent, largely reflecting an increase in Aboriginal claims expenses.
  - Other direct program expenses decreased by \$0.4 billion, or 3.7 per cent.

Public debt charges decreased by \$0.4 billion, or 16.6 per cent, largely reflecting a lower average effective interest rate on the stock of interest-bearing debt.

## April 2014 to March 2015

For the April to March period of the 2014–15 fiscal year, the Government posted a budgetary surplus of \$2.9 billion, compared to a deficit of \$11.4 billion reported for the same period of 2013–14.

Revenues increased by \$11.7 billion, or 4.4 per cent, to \$279.0 billion.

- Personal income tax revenues were up \$3.2 billion, or 2.5 per cent.
- Corporate income tax revenues were up \$4.3 billion, or 12.2 per cent.
- Non-resident income tax revenues were down \$0.2 billion, or 2.5 per cent.
- Excise taxes and duties were up \$1.4 billion, or 3.0 per cent. GST revenues increased by \$0.5 billion, or 1.8 per cent, energy taxes by \$10 million, customs import duties by \$0.3 billion, and other excise taxes and duties by \$0.5 billion.
- EI premium revenues were up \$0.8 billion, or 3.5 per cent, reflecting growth in earnings.
- Other revenues were up \$2.3 billion, or 7.9 per cent.

Program expenses were \$249.4 billion, down \$1.2 billion, or 0.5 per cent, from the same period the previous year.

- Major transfers to persons were up \$2.5 billion, or 3.4 per cent. Elderly benefits increased by \$1.9 billion, or 4.5 per cent, reflecting growth in the elderly population and changes in consumer prices, to which benefits are fully indexed. EI benefit payments increased by \$1.0 billion, or 5.5 per cent, and children's benefits were down \$0.4 billion, or 2.8 per cent.
- Major transfers to other levels of government were up \$2.5 billion, or 4.1 per cent, largely reflecting legislated growth in the Canada Health Transfer, the Canada Social Transfer, Equalization transfers and transfers to the territories.
- Direct program expenses were down \$6.1 billion, or 5.2 per cent. Within direct program expenses:
  - Transfer payments decreased by \$2.8 billion, or 7.2 per cent, largely reflecting the one-time accrual in 2013–14 of a liability for disaster assistance related to the 2013 flood in Alberta as well as a decrease in expenses associated with the revaluation of the Government's liability to Ontario for the province's one-third participation in the value of the Government's equity holdings in General Motors. These decreases were offset in part by an increase in Aboriginal claims expenses.
  - Other direct program expenses decreased by \$3.4 billion, or 4.3 per cent, due in large part to a decrease in pension and benefit costs based on the Government's latest actuarial valuations.

Public debt charges decreased by \$1.5 billion, or 5.3 per cent, largely reflecting a lower average effective interest rate on the stock of interest-bearing debt.

## Financial requirement of \$4.3 billion for April 2014 to March 2015

The budgetary balance is presented on an accrual basis of accounting, recording government revenues and expenses when they are earned or incurred, regardless of when the cash is received or paid. In contrast, the financial source/requirement measures the difference between cash coming in to the Government and cash going out. This measure is affected not only by changes in the budgetary balance but also by the cash source/requirement resulting from the Government’s investing activities through its acquisition of capital assets and its loans, financial investments and advances, as well as from other activities, including payment of accounts payable and collection of accounts receivable, foreign exchange activities, and the amortization of its tangible capital assets. The difference between the budgetary balance and financial source/requirement is recorded in non-budgetary transactions.

With a budgetary surplus of \$2.9 billion and a financial requirement of \$7.2 billion from non-budgetary transactions, there was a financial requirement of \$4.3 billion for the April 2014 to March 2015 period, compared to a financial source of \$15.5 billion for the same period the previous year. The change in the financial source/requirement over the previous year mainly reflects reduced repayments in 2014–15 of principal on assets maturing under the Insured Mortgage Purchase Program, offset in part by the improvement in the budgetary balance in 2014–15.

## Net financing activities up \$6.2 billion

The Government financed the financial requirement of \$4.3 billion and increased cash balances by \$1.9 billion by increasing unmatured debt by \$6.2 billion. The increase in unmatured debt was achieved primarily through the issuance of marketable bonds.

The level of cash balances varies from month to month based on a number of factors including periodic large debt maturities, which can be quite volatile on a monthly basis. Cash balances at the end of March 2015 stood at \$28.0 billion, up \$1.9 billion from their level at the end of March 2014.
