Department of Fisheries and Oceans. 2015. Quebec Marine
Fisheries - Annual Statistics Review 2012-2013, 222 p.

Foreword

The hard times that the Quebec fishing industry has been experiencing in recent years underscore the importance of producing reliable statistics that are as up to date as possible. The requests for information that we receive have not only become more numerous and more pressing, but above all more complex. This is the background to this annual statistical report.

The twenty-eight edition of the Annual Statistics Review of Quebec marine fisheries, produced by the Department of Fisheries and Oceans (DFO), paints a detailed portrait of the industry in 2012 and 2013. In a nutshell, in this last year, the volume of landings totalled 57,537 metric tons and had an associated value of close to 162 million dollars and in 2013 the volume of landings totalled 60 761 metric tons and had an associated value of close to 169 million dollars.

In the present edition, you will find a section entitled: “**Statistical Profile of Seal Fishery**”. In this section, we are presenting an overview of the activities related to seal fishery in the Quebec Region. You will find information concerning the number of licences issued per type and maritime areas as well as information concerning the landings of harp seal by fleet, and finally, data relating to the seal fishery observation activities.

A supplement entitled “Quebec Marine Fisheries: 2012 and 2013 Highlights”. This handy, comprehensive reference tool was prepared jointly by the Statistics and Licensing Division and the Policy and Economics Branch to provide a snapshot of the state of Quebec’s fishing industry in 2012 and 2013.

The Statistics and Licensing Division, which is responsible for this publication, is mandated to compile, process, analyse and publish data on Quebec marine fisheries. The statistics produced are of vital importance, first, to assess and highlight the economic value of the industry, and second, to provide managers and scientists with a basis for the various analyses required for effective fishery resource management.

It is important to note that a federal-provincial agreement between the Department of Fisheries and Oceans (DFO) and the Quebec Department of Agriculture, Fisheries and Food (MAPAQ – Ministère de l’Agriculture, des Pêches et de l’Alimentation du Québec) has laid the groundwork for greater coordination in collecting data. It aims to eliminate duplication of effort by public servants seeking information from fishing industry players and to promote intergovernmental data sharing.

The three types of data in this report have been obtained in different ways. Catch data are based on the sales transactions between fishers and fish buyers when each vessel lands its catch. For data on fishing effort, used by scientists in their research work, we rely upon the excellent cooperation of skippers, who provided information on fishing grounds, type of gear, target species and species caught, among other things. Finally, statistics on fishermen, fishing fleets and licences come from the licensing process.

The quality of the data in this review depends on (a) the quantity of data that our system gathers from fishermen, buyers and processing plants, and (b) the accuracy of the data. With limited resources, the Statistics and Licensing Division does everything within its power to check the data it gathers, but cannot guarantee that everyone involved submitted all their data. We turn to resource management programs such as enterprise allocations (quota licences), for which strict monitoring methods exist, to ensure that data entered into the system are consistent with observations of landings by dockside monitors.

Methodology

The data in this publication are taken from the statistical system of Fisheries and Oceans Canada, Quebec Region. The system consists of three components, all of which were used to produce this report: catch-effort-quotas, people-vessels-licences, and processing plant production and workforce.

Data on people, vessels and licences come from licensing paperwork. The number of licence holders corresponds to the number of people registered with the Department of Fisheries and Oceans, who operated authorized fishing gears under the terms of a commercial fishing licence in 2012 and 2013. The number of vessels is the number of fishing boats licensed in 2012 and 2013. The number of licences is the total number of fishing licences issued, but not necessarily active, in 2012 and 2013.

Data on fish and shellfish landings are provided by commercial buyers, who are required to provide us with a copy of the DFO form to record their purchases from fishermen. Each transaction of this type generally corresponds to one fishing trip. The Enterprise Allocation Monitoring Program, initiated in 1989, now covers some mobile and fixed gear vessels less than 64' 11" and some 65'-100' long, for groundfish in areas 4RST and 3PN. The program also affects all crabbers and shrimpers, as well as many scallopers and surf clam fishers. For these fleets, an additional check has to be carried on the data supplied to the Statistics Service.

Furthermore, to estimate the volume of fish eaten by commercial fishermen and their families, the volume of fish sold directly to the public or used as bait and processed by fishermen themselves, we use an estimation methodology which takes into consideration socio-economic elements, data provided by fisheries officers and resource managers as well as information obtained from fishermen's associations. **This type of data, called “supplementary purchase slips” is being included only in tables where we added a note to that effect.**

Data are gathered, coded and entered locally in each of the maritime sectors: Gaspé, Sept Îles and Cap aux Meules. The concepts and definitions used meet the standards set by the Statistical Coordinating Committee for the Atlantic Coast (STACAC) and are thus compatible with the systems of the other Atlantic regions (the Gulf, Nova Scotia and Newfoundland).

Papers published by the STACAC provide more information on the concepts and definitions used here (see reference list). Some of them are available from Statistics Service at the Quebec City Regional Office.

Figures in the tables on landings have been rounded, so they may not add up to the totals shown.

It should also be noted that some data on salmon, eel, smelt, tomcod, capelin and sturgeon landings were supplied by the Quebec Department of Agriculture, Fisheries and Food (MAPAQ - Ministère de l'Agriculture, des Pêcheries et de l'Alimentation du Québec).

Another important point is that until 1992, seal fishery licences were issued in the maritime sectors and did not figure in the publication of the various statistical tables on fishing licences. In 1993, the policy on licensing for the seal fishery was amended to make it much more like the ones for other types of licences, so seal fishery licences are now counted the same way as other existing licences. To avoid skewing the trend analysis, we decided to publish the seal fishery data separately. Statistical table 4A gives the number of seal fishery licences according to quite specific parameters.

It should be noted that the process of gathering data at the source is the result of the Federal-Provincial Harmonization Agreement on the Quebec Marine Fisheries, the main objective of which was to eliminate duplication of effort in this area.

Maritime territory

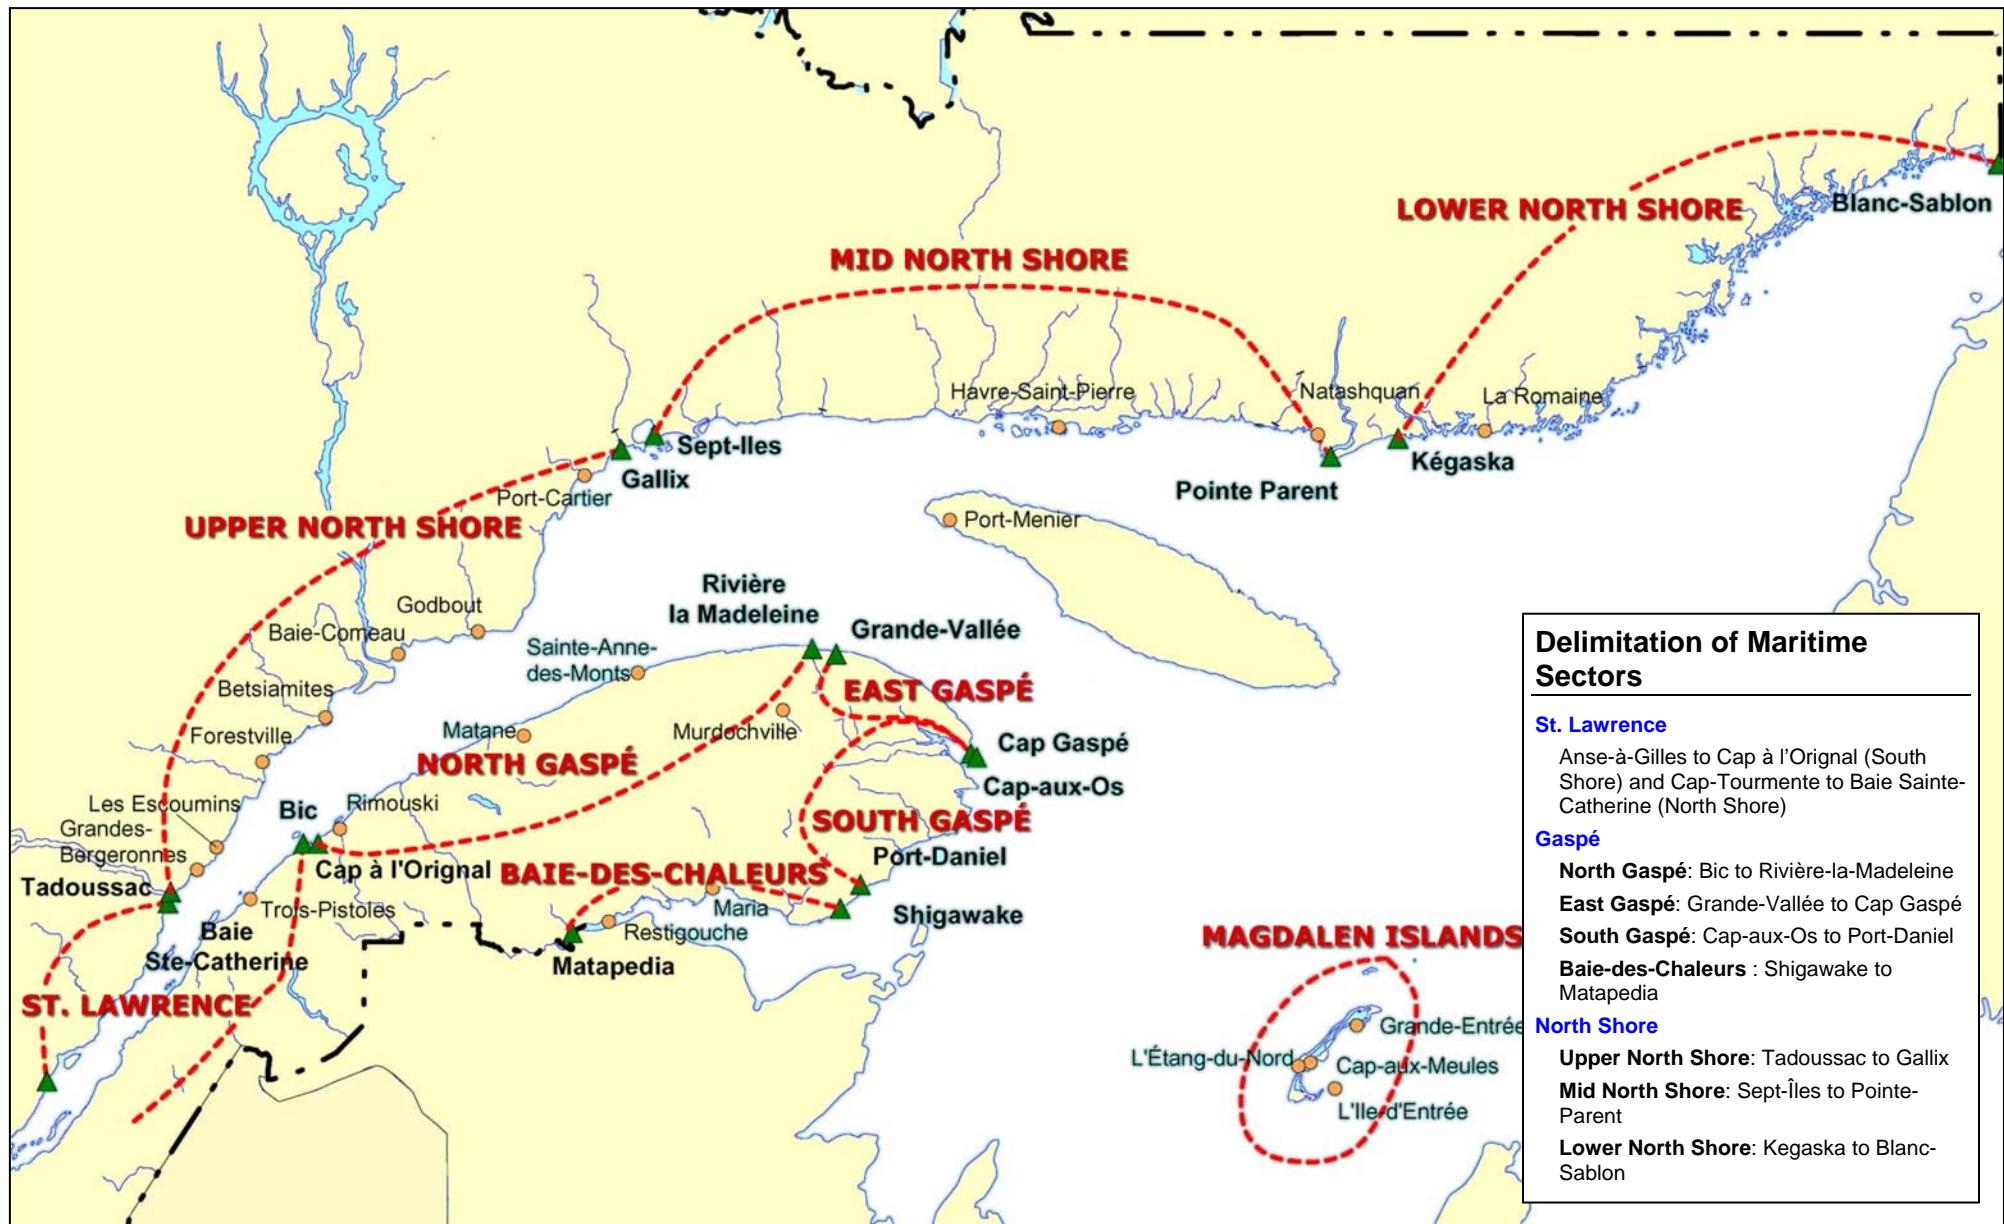

Quebec maritime territory begins at the eastern tip of Île d'Orléans and is divided into four sectors.

The St. Lawrence Sector extends from Anse à Gilles to Cap à l'Original (on the south shore) and from Cap Tourmente to Baie Sainte Catherine (on the north shore). The North Shore Sector lies between Tadoussac and Blanc Sablon (including Anticosti Island). The Gaspé Sector begins at Le Bic and stops at Matapedia. The fourth sector comprises the Magdalen Islands. For more details, refer to the map titled "Maritime Sectors in Quebec" on next page.

On another basis, the Quebec Region maritime territory is subdivided into twenty-eight statistical districts. These districts are defined by limits represented by geographic points and are used in most statistical systems. This standardization makes it possible to compare the data that DFO has been collecting in Quebec since 1984 with those published by the Bureau de la statistique du Québec for previous years.

The twenty-eight statistical districts, with their geographic limits, are listed in an Appendix.

MARITIME SECTORS IN QUEBEC

Conventional Symbols

o	Less than half of the smallest unit used
-	Nil or zero
%	Proportion of a quantity to another expressed as a percentage
Var. %	Percentage variation indicating the size of increases or decreases from one year to the next and calculated as follows:
Var. % =	$\frac{\text{figure from target year} - \text{figure from preceding year}}{\text{figure from preceding year}} \times 100$
N.B.:	All variations presented in this review refer to the years 2011 and 2012 only.
N/A	Information not applicable
N/AV	Information not available
MT	Metric ton
...	Not applicable because of different units
◇	Not publishable, because there were fewer than three buyers or fewer than three fishermen for this fishery (protected information)

Definitions of terms used in this publication

Active fisherman	Fisherman or fisherman's helper who has made at least one landing in the season.
Active fishing enterprise	Fishing enterprise that has made at least one landing in the season.
Active registered licence holders	Any person registered with BAPAP (Bureau d'accréditation des pêcheurs et des aides-pêcheurs) who uses fishing gear authorized by a commercial fishing licence. This definition does not cover fishermen helpers.
Active vessel	A vessel for which at least one landing in the reference year has been counted.
Actual deviation	Difference between data for the year under consideration and the preceding year.
Administrative regions	Regions defined by DFO. In this publication, we refer to the Atlantic administrative regions: Quebec Region: Encompasses the province of Quebec Gulf Region: Encompasses coastal areas of the Gulf in New Brunswick and Nova Scotia, as well as the province of Prince Edward Island Nova Scotia: Encompasses the waters of the Bay of Fundy, the Scotian Shelf and Georges Bank which is the ocean side of Nova Scotia Newfoundland Region: Encompasses the geographic sector of the same name.
Atlantic Coast	Covers the Quebec, Gulf, Nova Scotia and Newfoundland regions.
Average Price	Total value of all landings sold divided by the total weight landed.

Buyer	Person or firm that commercially purchases fish directly from fishermen.
Certified plant	Any place that fish is processed for export or stored before exporting.
“Commercial fisherman” (southern Gulf)	In the Gulf, a commercial fisherman is a registered fisherman who does not take part in the fisheries fished by vessels with an LOA of 15.2 m (50') or longer and does not meet the requirements of a bona fide full-time or part-time fisherman.
Commercial fishing licence	Designate an instrument by which the Minister of Fisheries and Oceans authorizes, pursuant to his discretionary authority under the Fisheries Act, grants permission to a person including an Aboriginal organization to harvest certain species of fish or marine plants subject to the conditions attached to the licence. This is in no sense a permanent permission; it terminates upon expiry of the licence. The licensee is essentially given a limited fishing privilege rather than any kind of absolute or permanent “right or property”.
Conversion factor	Ratio used to convert the weight of a product or form of a product on landing into equivalent live weight.
Core	<p>In order to qualify as a member of the core group, a person must meet the following criteria:</p> <ul style="list-style-type: none"> - be the head of an active fishing enterprise, i.e., have fished full time for the previous two years (1994 and 1995) and have a vessel in the fishery; and - hold either two key licences, OR one key licence and in two of the years 1993, 1994 and 1995, have fished for 10 weeks with minimum reported landings of \$5,000 from their own licences for vessels less than 35' and of \$10,000 from their own licences for vessels longer than 35', OR one key licence and, in two of the years 1993, 1994 and 1995, have earned at least 75% of their income from fishing

License holders who meet the eligibility criteria for the Atlantic Groundfish Strategy (TAGS) or the Northern Cod Adjustment and Recovery Program (NCARP) may use the TAGS or NCARP qualifying years instead.

Key licences are defined as shrimp, crab, lobster, groundfish other than handline, scallop, herring and, on the Lower North Shore, capelin.

Division	NAFO (Northwest Atlantic Fisheries Organization) divisions.
Fishing day	Day in which fishing gear was used with the goal of catching fish to sell.
Gear	Any equipment used to catch fish.
Gulf of St. Lawrence	Coastal areas of the Gulf in New Brunswick, Nova Scotia, western Newfoundland and southern Labrador, as well as Prince Edward Island and Quebec.
ITQ	Individual transferable quota
Landed value	Monetary value of the recorded landed quantity, that is, the landed quantity multiplied by the unit price, or the value supplied by the buyer.
Landing	Quantities of fish and shellfish (molluscs and crustaceans) landed, excluding discards, measured as live weight.
Live weight	Weight (round weight) of a live fish, which can be estimated, if necessary, on the basis of the form at landing using a standard conversion factor.
Non-core	Any fisherman not qualified for membership in the core group.
Non registered active licence holders	Non registered holders of active licence refer only to companies, shellfish harvesters, aboriginal fishermen, successions and to licences bought back by DFO.

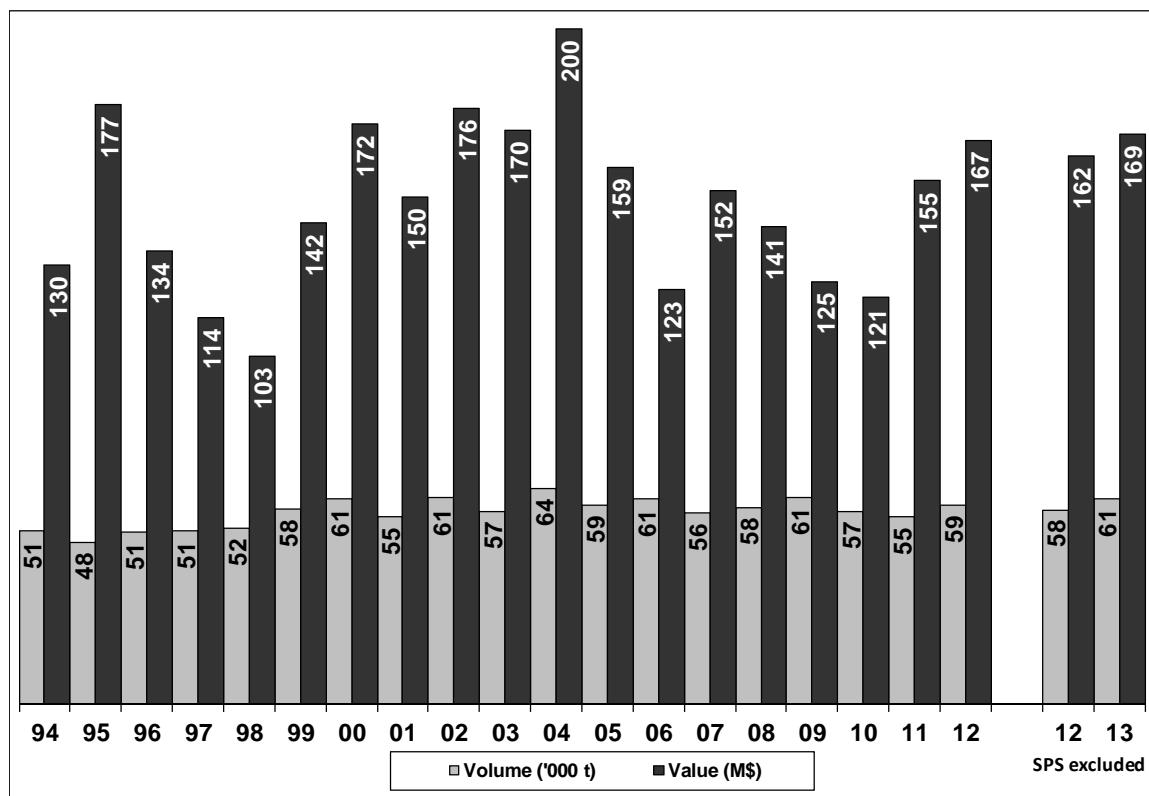

Other items	Includes sea urchins, lumpfish caviar, scallop roe, other seafood, and seal products.
Outside the Gulf of St. Lawrence	Waters of the Bay of Fundy, the Scotian Shelf and Georges Bank that is, the ocean side of Nova Scotia as well as the province of Newfoundland, not including the west coast and southern Labrador.
Quota	For a given species and fishing area, the catch limit set for a segment of the commercial fleet.
Specialized enterprise	Fishing enterprise that has recorded at least 25% of the average value of landings of its reference fleet.
Supplementary purchase slips	These data are used to compile all landings not recorded on general purchase receipts. This information comes from estimates from four different sources: <ul style="list-style-type: none"> - Fish processed by fishermen - Direct sales to the public - Fish used as bait by fishermen - Other landings (including personal consumption by fishermen and their families and sport fishing)
Value	Statistics on value are expressed in current Canadian dollars.

CATCH PORTRAIT OF
QUEBEC SECTOR

Catch portrait of Quebec sector for 2013

Total Quebec landings 60,761 t, worth \$168.5 million in 2013, show an increase of 6% in volume and 4% in value, compared to 2012 (Figure 1). The increase in total landed volume is due to the increase of the landed volume of snow crab (+17%), shrimp (+10%) and lobster (+8%).

**Figure 1: Landing trends for the Quebec fishing industry,
1994-2012 SPS included and 2012-2013 SPS excluded**

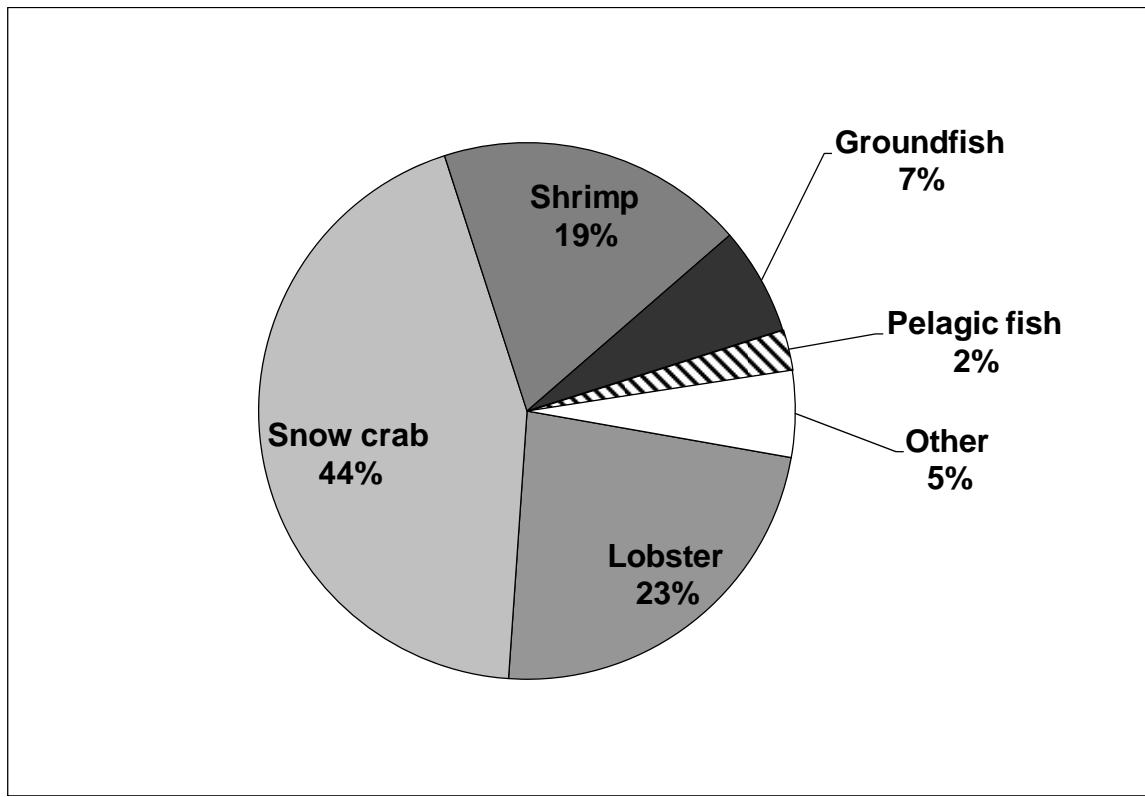

Source : DFO, Quebec region.

SPS : Supplementary purchase slips.

There was also an increase in total landed value for other species. It is namely the case for snow crab (+21%), mackerel (+32%), Stimpson's surf clam (+30%) and scallop (+16%).

The value of landings breakdown according to species (Figure 2) shows that snow crab is the first most important species in Quebec with \$74 million, or 44% of total landings. Lobster is the second species in importance with a value of \$39.3 million, or 23% of the total. In third place was shrimp with landings of \$31.4 million, or 19% of the total. Together, these three crustaceans accounted for 86% of the total value in 2013. Far behind, the landed value of groundfish and pelagic fish respectively totalled \$10.9 million and \$4.1 million in 2013.

**Figure 2: Breakdown of the value of Quebec landings by species,
2013 SPS excluded**

Source : DFO, Quebec region.

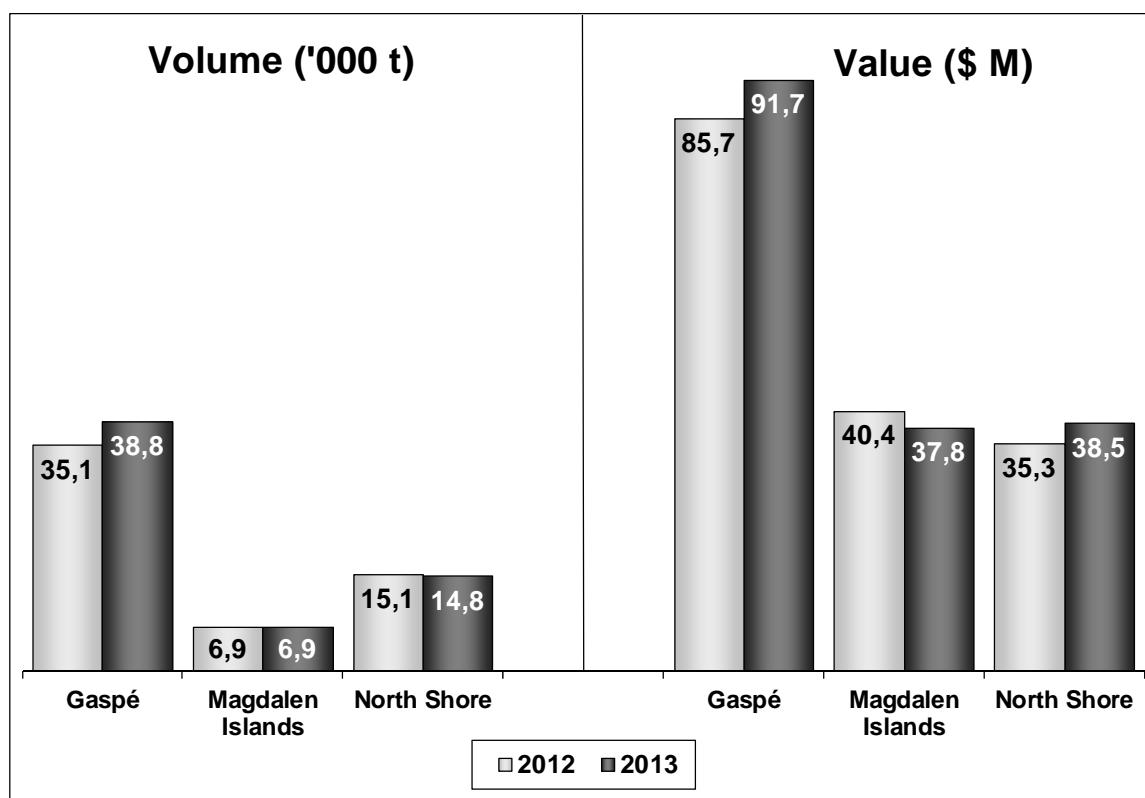

With respect to the breakdown of landings per maritime sector (Figure 3), 2013 was marked by significant variations.

On the North Shore, the total landed increased by 9%. This is mainly due to the 17% increase of the landed value of snow crab.

On the Gaspé Peninsula, the total landed value increased by 7%, which is mainly due to the increase in the value of 28% snow crab.

In the Magdalen Islands, the total landed value decreased by 6%. This is due to a decrease in the value of lobster by 13%.

**Figure 3: Landing trends by maritime sector,
2012 and 2013 SPS excluded**

Source : DFO, Quebec region.

	2013	99		60 761		100

(1) The buyers are filed according to their physical location.

RESOURCE
ACCESSIBILITY

Resource accessibility

In order to achieve its objective of conserving and preserving various fish stocks, DFO imposes control measures each year. Licensing and quotas are responding to this necessity.

Quotas are used to determine the quantities allocated to each fishery, while licensing is an efficient means of controlling access to the various resources.

Licences for anadromous and catadromous species are issued by the Government of Quebec, while the Federal Government looks after licensing for all other species.

TABLE 9

FISHING QUOTAS APPLICABLE TO QUEBEC

- YEAR 2013 -

SPECIES	(1) DIVISION	Type of fishing gear and category of vessel	(5) PERIOD	QUOTA with adjustments	9 Catches landed in Quebec (MT) (final figures)	4 Total catches under this quota (preliminary figures)	% of catches under this quota landed in Quebec
Snow Crab	4S	Area 13 - Inshore crab fishers	(8)	188 ⁽²⁾	127	158	80.38
		Area 14 - Inshore crab fishers	(8)	448 ⁽²⁾	448	448	100.00
		Area 15 - Inshore crab fishers	(8)	592 ⁽²⁾	591	591	100.00
		Area 15 - Temporary allocations	(8)	61 ⁽²⁾	61	61	100.00
		Area 16 - Inshore crab fishers - Group A	(8)	4 251 ⁽²⁾	4 275	4 275	100.00
		Area 16 - Inshore crab fishers - Group B	(8)	336 ⁽²⁾	334	334	100.00
		Area 16A - Temporary allocations	(8)	467	468	468	100.00
TOTAL: Snow Crab				32 246	15 767	32 467	48.56

- (1) Refers to NAFO (Northwest Atlantic Fisheries Organization) divisions except for Shrimp where we use the management areas as established by the Department of Fisheries and Oceans.
- (2) This global quota is subdivided into individual quotas and is set for Quebec fishers only.
- (3) This global quota is subdivided into individual quotas.
- (4) For this total, figures originating from Newfoundland, Gulf and Scotia Fundy Regions are not final.
- (5) Dates indicating the duration of the fishery except for Herring where we identify the various Spring and Fall fisheries.
- (6) Unit 1 is grouping 4RST from January to December and 3Pn and 4Vn from January to May, and unit 2 is grouping 3Ps, 4Vs et 4Wfgj from January to December, and 3Pn and 4Vn from June to December.
- (7) For this species only, quantities are indicated in meat weight.
- (8) Considering that these are individual quotas, duration periods are not specified.
- (9) In accordance with Access to Information Act, we are reporting landings against quotas only where there were at least three participants, unless we have the authorization from the concerned participants.
- (10) No global quota for sub-areas 16E, 16F and 18A as per the three-year scallop management plan for 2011 to 2013.

Average landed price

The average landed price by species as indicated here reflects the prices paid to fishermen and is determined by dividing the total value of all landings by the total landed weight.

The average price takes into account the condition of the catch at landing. The advantage of this method is that the significance of the price given can be specified. An identical approach is used for each of the maritime sectors.

It should also be pointed out that the average prices in the following tables exclude supplementary purchase slips, which explains why no figure is given for some species.

TABLE 14

***STATISTICAL PROFILE
OF SEAL FISHERY***

2013 Data on Sealing Activities

This section aims to present an overview of the activities related to sealing in the Quebec Region. It contains information concerning the number of licences issued per type and per maritime area, as well as information concerning the harp seal catches by fleet sector, and finally, data relating to the seal fishery observation activities.

Summary of the Magdalen Islands seal fishery in 2013

At the request of the industry, to allow adult seal meat supply, a first fishing period ran from late January to March 1. The fishery reopened on March 15, with the authorization to catch a maximum of 6 seals until March 21 where the competitive fishery opened. The activities were conducted near the Magdalen Islands and in the area of Prince Edward Island. The total catch for the 2013 fishing season was 1,610 seals. 43 landsmen and 6 vessels have been active in 2013.

Summary of the Quebec North Shore harp seal fishery in 2013

The commercial and personal use fisheries were both opened from December 8, 2012 to April 10, 2013 on the Upper and Middle North Shore. With regards to the Lower North Shore, the fishing season took place from April 4 to May 14, 2013.

In total, 14 vessels and 40 sealers took part in the commercial fishery and caught 173 seals.

Aborigines did not take part to the seal fishery in 2013.

Statistics and graphics 2012-2013

In 2013, the Quebec portion of the 400,000 seals total allocation represented 39,528 seals for the commercial fishery, including a developmental allocation of 10,000 seals granted to the Magdalen Islands.

Here is the breakdown of the 2013 Quebec Region allocation:

Area	Quota
Magdalen Islands	21,092
North Shore	8,436
Gaspe Peninsula	0
Developmental allocation	10,000
Total Quebec	39,528

In addition, 6,840 seals were allocated to the Aboriginal Communities from the Atlantic Provinces and Quebec while 2,000 seals were allocated to the personal use licence holders.

The Quebec Region harp seal catches reached 1,783 seals distributed as follows:

2013

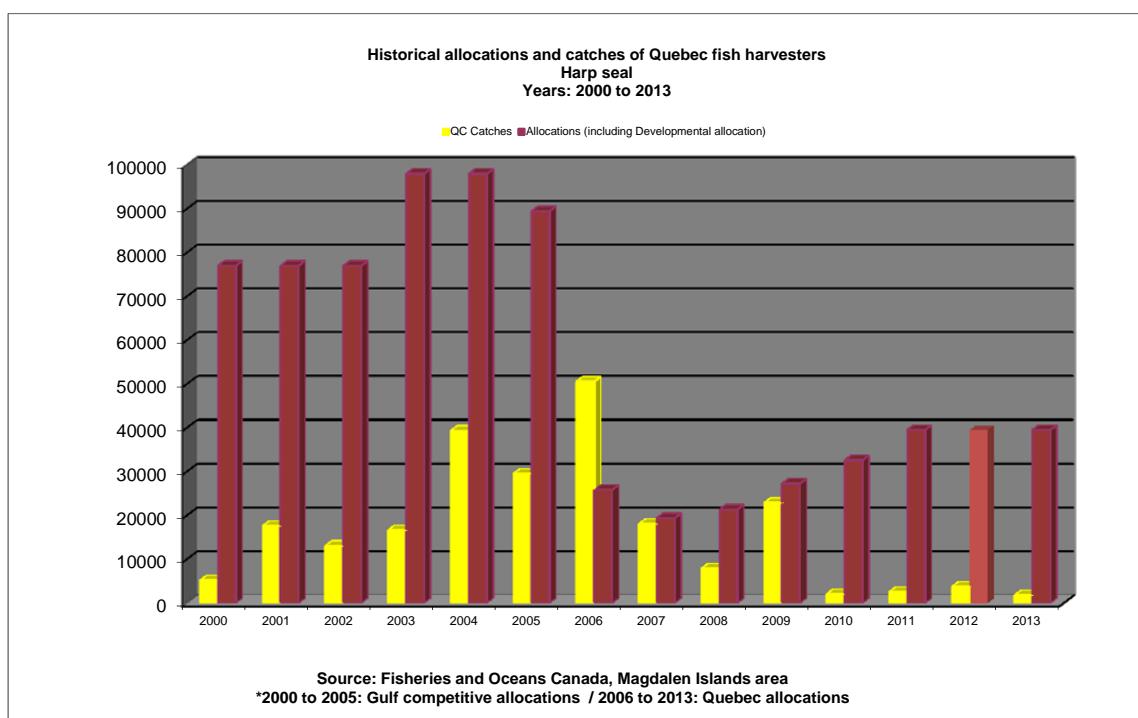

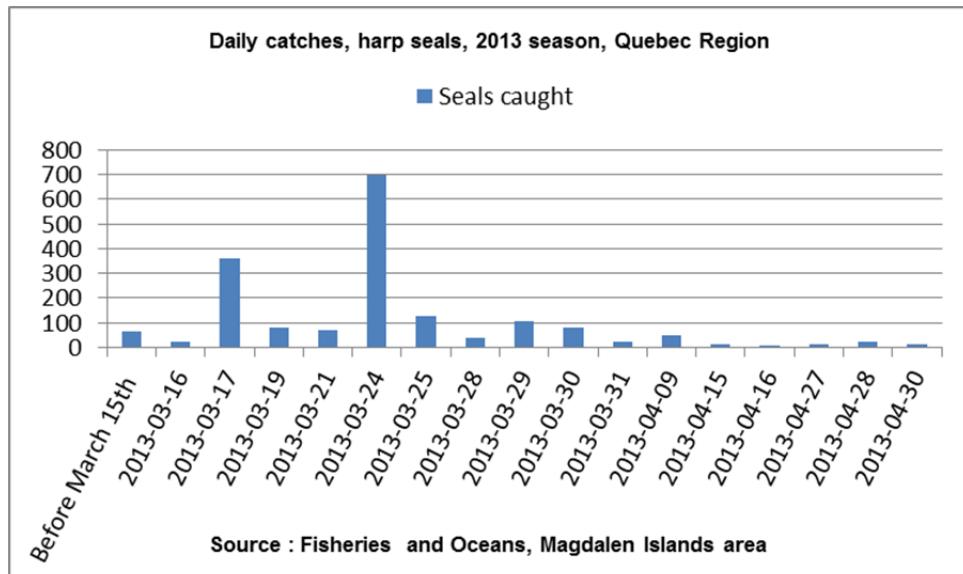

Fleet	Magdalen Islands		North Shore		Gaspe Peninsula (1)		Total Quebec	
	Number of seals caught	Number of active vessels	Number of seals caught	Number of active vessels	Number of seals caught	Number of active vessels	Number of seals caught	Number of active vessels
<35' vessels and landsmen	48	1	173	14	0	0	221	15
Vessels between 35' and 45'	347	3	0	0	0	0	347	3
>45' vessels	748	2	0	0	0	0	748	2
Developmental allocation	467	1	N/O	N/O	N/O	N/O	467	1
TOTAL	1,610	6	173	14	0	0	1,783	20

(1) No catches registered by sealers from the Gaspe Peninsula in 2013.

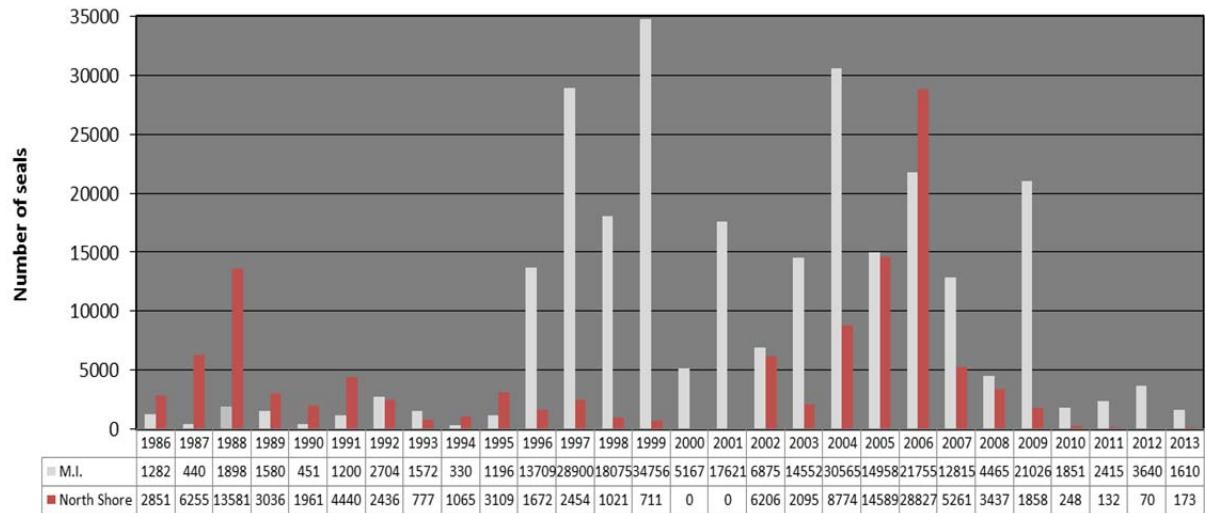

2012

Fleet	Magdalen Islands		North Shore		Gaspe Peninsula (including Aboriginals) (1)		Total Quebec

(1) : N/A - Confidential data due to the low number of participants.

**Harp seal catches, Quebec Region, 1986-2013,
Magdalen Islands and North Shore areas**
Source: Fisheries and Oceans Canada, Magdalen Islands area

Note : There were no catches registered at DFO for the Gaspe Peninsula for the years mentioned above except for 2012 where data remain confidential.

Sealing licences

A freeze on the issuance of new harp seal fishing licences is in place since June 2004, with exception for personal use licences which are issued upon request since March 2010 and grey seal fishing licences. The freeze does not apply to Aboriginal Communities.

Number of sealing licences issued by type and by maritime area

Number of licences issued	Magdalen Islands		North Shore		Gaspe Peninsula		Total Quebec	
	2012	2013	2012	2013	2012	2013	2012	2013
Commercial Professional	809	764	786	742	53	52	1,648	1,558
Commercial Assistant	0	0	0	0	0	0	0	0
Personal use	158	173	637	607	64	58	859	838
Total	967	937	1,423	1,349	117	110	2,507	2,396

Note: Not all licences are active. The approximate number of participants is available in the sections presenting the summary of the 2013 fishing season.

Licences to observe sealing activities

Each year, observers come to observe the commercial sealing activities. In order to be authorized near the sealing sites, observers must obtain a seal fishery observation licence. An observation licence is valid for one day or for a half day and may be renewed upon request. In 2013 the observation mainly took place on the Front and in the northern part of the Gulf of St. Lawrence (Belle Isle strait).

Data on seal fishery observation licences

	2012	2013
	Areas: Front, Southern and Northern Gulf	Areas: Front, Southern and Northern Gulf
Number of requests received	22	12
Number of licences issued ⁽¹⁾	19	10
Number of days of observation	114	32

(1) Some applicants did not make any follow up on their request.

Processing and value

In 2013, seal catches by the Quebec Region sealers were sold and processed in Quebec. The meat is processed for the local and Quebec markets (niche), and also for personal consumption. Data on commercial value remain confidential because of the low number of participants.

***ECONOMIC PROFILE
OF QUEBEC MAIN
FISHING FLEETS***

Economic Profile of Quebec Main Fishing Fleets

The Annual Statistics Review 2012-2013 proposes a section intended to the Quebec main fishing fleets. You will find in the following pages, information related to the size of the fleets, the manpower, the fishing effort as well as the average landings for these various Quebec fleets.

In order to characterize each fleet, we have classified them by main species landed, and in some cases, by fishing area, gear type and vessel length. For example, for a fisherman who is fishing crustaceans, we will classify him in the fleet where he gets the higher value for his landings, being groundfish, pelagic fish or crustaceans.

In addition, we want to inform you that the data concerning the fleets presented in the next section exclude the statistics for aboriginal fleets to ensure that the average value of the landings could be calculated from comparable data.

Please note that shrimpers group A, scallops fleets of the North Shore (fisheries on individual quotas and competitive fisheries), of the Gaspe Area and Magdalen Islands have very few participants. Consequently, data concerning these fleets cannot be disclosed in this review for confidentiality considerations.

Snow Crab	Round.....	4.943	4.868	-1.5

2012 - 2013 Landings St. Lawrence Sector

The St. Lawrence Sector is distinguished by a low level of marine fishing activity. Landings made in 2012 and in 2013 for the sector between Anse à Gilles and Cap à l'Orignal on the south shore, and between Cap Tourmente and Baie Sainte Catherine on the north shore, represented respectively 324.3 and 198 metric tons for an assorted value .738 and .625 million dollars. Thus, 2013 landings are lower in quantity and their value has decreased of 15.4% compared to 2012.

In 2013, we had 18 active registered licence holders, 1 less than in 2012. Concerning the number of buyers, we have 4 buyers in 2013 compared to 3 buyers in 2012.

To abide by confidentiality regulations, it is not possible for the Department to reveal any information concerning St. Lawrence Sector landings. The small number of participants in marine fishery activities as well as the small amount of catches justify the application of such a confidentiality measure.

2012 - 2013 Landings

Northern Quebec

The Department of Fisheries and Oceans has no registered data for 2012 and 2013 for the Northern Quebec Sector.

***PRODUCTION AND
MANPOWER IN PLANT***

Plant production data

This section concerns fish and seafood processed in Quebec in 2012 and 2013. In this review, production refers to any processing by a plant or any sale of a product to a merchant who buys directly from fishermen. Most of the enterprises listed here are located in the Gaspé Peninsula, the Magdalen Islands or on the North Shore. Our data-collection network is concentrated in these three regions, although we did obtain information from a few firms in the Quebec City and Montreal areas.

The volume of the various products listed is based on information provided by each of the processing plants and merchants. Value is calculated on the basis of selling prices for each type of seafood. It is important to note that the tables shown in this section are not covering seal fishing data.

Some figures were adjusted if there were discrepancies with the rest of the available data. When making these adjustments, we used the following information as reference points: purchase value of raw material, value of same types of products when processed and, wherever possible, from the same geographic sector, the selling price of the preceding year taking into account variations in prices and inflation.

The data are given for the total of Quebec and by maritime sector. Note that for reasons of confidentiality, in some cases we have grouped a number of products together.

Plant workforce data

The number of employees in the 2012-2013 statistical review represents the maximum number of people who worked in the same plant over the course of the year (the month with the highest number of employees was used as the yardstick). This method of accounting is based on the following definition of an employee: “An employee is any person working for a definite period for an employer operating an establishment that processes or deals in any seafood product.”

The annual employment survey of processing plants is the source of our information on employment. A few plants, however, provided us with employment information over the telephone. In a few rare cases, we made estimates, based on information gathered by DFO staff.

APPENDICES

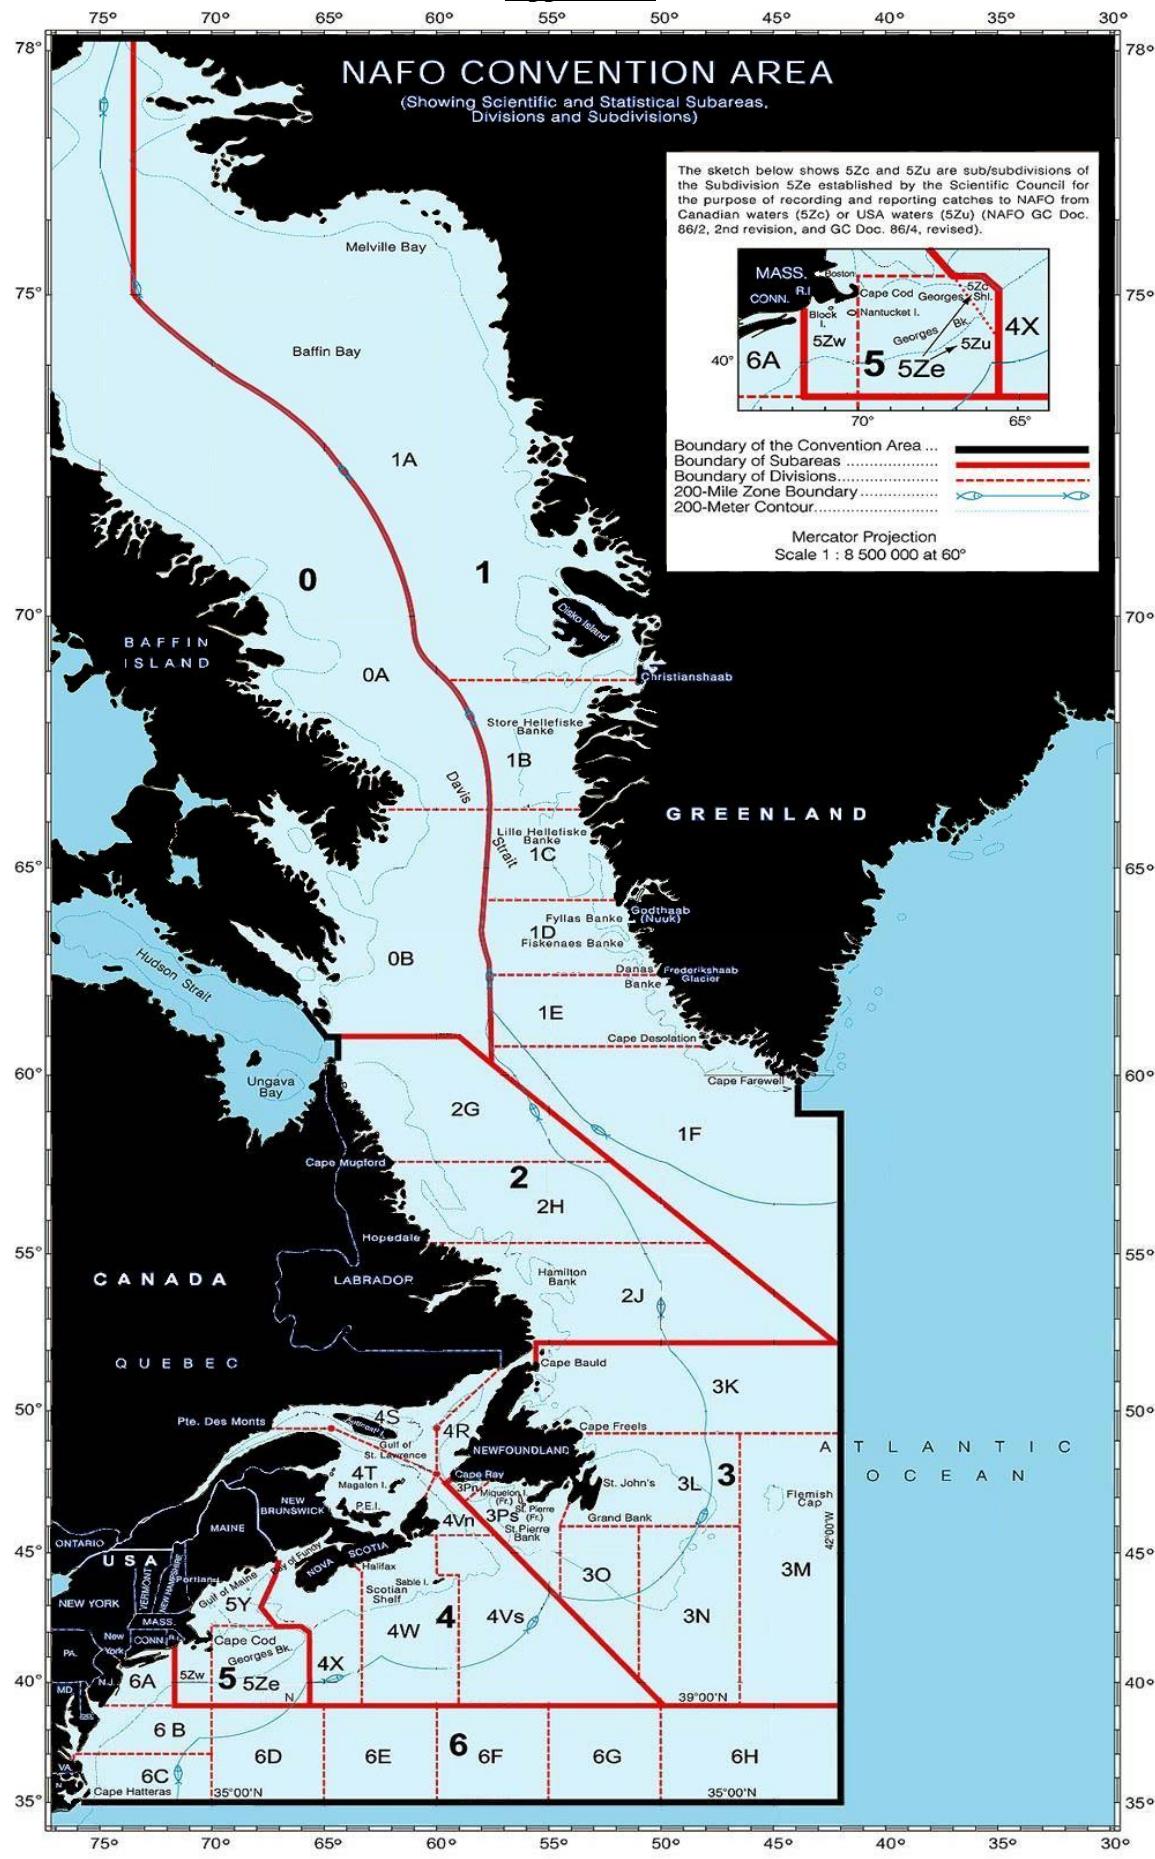

APPENDIX 1

Boundaries of Quebec maritime statistical districts

<u>District</u>	<u>Geographic point</u>	<u>Landing point</u>
1	Anse à Gilles to Pointe Rouge	Anse à Gilles to St-Roch-des-Aulnaies
2	Pointe Rouge to Notre-Dame du Portage	Ste-Anne de la Pocatière to St-André
3	Notre-Dame du Portage to Ste-Luce	Notre-Dame du Portage to Cap-à-l'Original
4	Ste-Flavie to eastern boundary of Matane County	Ste-Flavie to Petits Méchins
5	Cap-Chat to Duchesnay	Fonderie to Ruisseau Castor
6	Duchesnay to St-Hélier	Ruisseau à Rebours to Anse à Thibault
7	St-Hélier to Petite Rivière-au-Renard	Ruisseau à l'Ail to Petit Cap
8	Petite Rivière-au-Renard to Cap des Rosiers	Petite Rivière-au-Renard to Cap des Rosiers
9	Cap Gaspé to Pointe St-Pierre	Cap Gaspé to Pointe Navarre
10	Pointe St-Pierre to Brèche à Manon	Malbay to Weygand
11	Brèche à Manon to Pointe Maquereau	Brèche à Manon to Newport
12	Pointe Maquereau to New Carlisle	Pointe Maquereau to Cullens Brooks
13	New Carlisle to Rivière Grande-Cascapédia	New Carlisle to St-Siméon ouest
14	Rivière Grande-Cascapédia to Pointe Miguasha	Maria to Pointe Bourg
15	Pointe Miguasha to Rivière Restigouche	Miguasha to Matapédia
16	Cap Tourmente to Rivière Saguenay	Petite Rivière St-François to Cap-Brûlé
17	Rivière Saguenay to Bersimis	Tadoussac to Anse à Bouleau
18	Bersimis to Rivière Ste-Marguerite	Bersimis to Îles de May
19	Rivière Ste-Marguerite to Rivière Pigou	Sept-Îles to Malioténam
20	Rivière Pigou to Havre St-Pierre	Rivière aux Graines to Rivière Pigou
21	Havre St-Pierre to Rivière Kégaska	Havre St-Pierre to Pointe Parent
22	Rivière Kégaska to Baie des Moutons	Rivière Kégaska to Chevery
23	Baie des Moutons to Bonne Espérance	Baie des Moutons to Rivière St-Paul
24	Bonne Espérance to Blanc Sablon	Bonne Espérance to Îles Demoiselles
25	Île d'Anticosti	Anticosti
26	Îles-de-la-Madeleine, northern division	Havre-aux-Maisons to Lapointe
27	Île du Havre Aubert to l'Île d'Entrée	Havre Aubert to l'Île d'Entrée
28	Île de Cap-aux-Meules	Cap-aux-Meules to Cap Vert

N.B. The geographic points that mark the boundaries of the statistical districts are shown here with the corresponding points of landing. There are thus two types of boundaries for each district.
