

HOUSING NOW

Vancouver and Abbotsford CMAs

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: July 2015

Highlights

- In the Vancouver CMA, actual housing starts totalled 9,938 in the first half of 2015, with a small increase in both single-detached and multi-family home starts, compared to the same period of last year.
- An increase in single-detached home starts in the Abbotsford-Mission CMA pushed total housing starts to 270 units in the first half of 2015.
- In the first half of 2015 MLS® sales in both the Real Estate Board of Greater Vancouver and the Fraser Valley Real Estate Board areas were up 34 per cent, and 32 per cent, respectively, compared to the first half of 2014.

Figure 1

* Seasonally adjusted annual rate

Source: CMHC

¹ The seasonally adjusted annual rate (SAAR) is a monthly figure for starts adjusted to remove normal season variation and multiplied by 12 to reflect annual levels. By removing seasonal ups and downs, seasonal adjustment allows for a comparison from one season to the next and from one month to the next. Reporting monthly figures at annual rates indicates the annual level of starts that would be obtained if the monthly pace was maintained for 12 months. This facilitates comparison of the current pace of activity to annual forecasts as well as to historical annual levels.

Vancouver CMA New Housing Market

Total housing starts in the Vancouver Census Metropolitan Area (CMA) were trending at 20,091 units in June, compared to 19,408 units in May (Figure 1). The trend is a six-month moving average of monthly seasonally adjusted annual rates (SAAR) of total housing starts.

Actual housing starts totalled 9,938 units in the first half of 2015, nine per cent above the same period of last year. A decline in townhouse construction was more than offset by increases in single-detached, semi-detached and apartment starts. Over half of all housing starts in the CMA were concentrated in the cities of Vancouver, Surrey and North Vancouver (City and District Municipality).

Single-detached home construction continued the upward trend established last year, with a thirteen per cent increase from the first half of 2014. Although the number of completed single-detached homes at 1,906 was at par with last year, the number of completed and unabsorbed (unsold) homes was 26 per cent lower than last year, indicating a higher demand. Increased demand along with a rise in the resale price of single-detached houses has contributed to the higher pace of new home building.

Similar to single-detached homes, multiple-family home construction moved higher in the first half of 2015. Increases in semi-detached and apartments starts, especially in the cities of Vancouver, Surrey, North Vancouver and Richmond; more than

offset the decline in new construction activity for townhouses, bringing the total multiple-family starts to 7,684, eight per cent above last year's first-half total. Rental multiple-family units were up by 25 per cent compared to last year with more than half of the units started in the cities of Vancouver and Surrey. According to the April 2015 Rental Market Survey, the apartment vacancy rate in the Vancouver CMA was 1.4 per cent, down from 1.8 per cent in April 2014, suggesting a higher demand for rental units.

Abbotsford-Mission CMA New Housing Market

Total housing starts in the Abbotsford-Mission CMA were trending at 555 units in June, down from 577 units in May (Figure 2). The trend is a six-month moving average of the monthly seasonally adjusted annual rates

(SAAR)² of housing starts. Single-detached starts were trending at 289 units, slightly down from 293 units a month prior, and multiple-family starts were trending lower at 266, down from 284 units in the previous month.

At 270 units, actual housing starts in the Abbotsford-Mission CMA in the first half of 2015 were 14 units above the same period a year prior. Single-detached construction activity increased from 96 units during the first six months of last year to 137 units while multiple-family units declined from 160 units to 133 units this year. Close to one-sixth of the year-to-date total starts in the CMA were rental units.

In the month of June, there were twice as many units completed as started, bringing the overall number of residential units under construction down to 536, 14.4 per cent below last year's number. The main reason behind

Figure 2

* Seasonally adjusted annual rate

Source: CMHC

² The seasonally adjusted annual rate (SAAR) is a monthly figure for starts adjusted to remove normal season variation and multiplied by 12 to reflect annual levels. By removing seasonal ups and downs, seasonal adjustment allows for a comparison from one season to the next and from one month to the next. Reporting monthly figures at annual rates indicates the annual level of starts that would be obtained if the monthly pace was maintained for 12 months. This facilitates comparison of the current pace of activity to annual forecasts as well as to historical annual levels.

the decline in the number of homes under construction this year was a drop in the number of rental units under construction from 133 to 62.

So far this year, 320 new homes were completed, up from 291 units a year ago. At the same time, absorptions (sales) of new homes were up by almost 29 per cent, from 174 units to 224 units. The number of completed and unoccupied homes was 169 units, 43 units higher than the year before. Close to half of these homes available for immediate move-in were apartment condominiums.

Greater Vancouver MLS® Market³

In the areas covered by the Real Estate Board of Greater Vancouver (REBGV), there were 22,405 sales during the first half of the year, an increase of 34 per cent compared to the same period last year, and were 28 per cent above the 10 year average for the same time period. At 5,089, total sales in the month of June were the highest for any month historically. Low mortgage rates together with a higher level in full-time employment, and population growth have supported demand for housing.

The increased level of resale activity was broad based across all home types and across the region. Compared to the first six months of last year, single-detached home and townhouse sales were up 30 per cent and condominium apartment sales increased 40 per cent. More than two-third of these sales were in the cities of Vancouver, Richmond, Burnaby, North Vancouver and Coquitlam.

Market conditions favoured sellers in the second quarter of 2015 in the Greater Vancouver area. The overall sales-to-active listing ratio, which indicates the balance between supply and demand, has remained above 30 per cent in the second quarter which signals a market where buyers face a shortage of listings and potentially above-asking sale prices. Through the first half of 2015, the number of active listings has been below the previous year on a consecutive monthly basis due to rising sales despite a slight increase in new listings.

As a result of these trends, the MLS® benchmark price in June increased for all home types. The benchmark price for single-detached homes, led with 14.8 per cent year-over-year growth. Double-digit growth in the benchmark price for single detached homes was observed in fourteen of the twenty submarkets that comprise the board

area. For multiple-family homes, the benchmark townhouse price increased by nearly seven per cent, while the condominium apartment price was up five per cent. The benchmark condominium apartment price in Greater Vancouver was more than twice the price compared with Fraser Valley (Figure 3).

Fraser Valley MLS® Market

Strong resales growth continued in the second quarter in the Fraser Valley. The Fraser Valley Real Estate Board recorded a 34 per cent increase in sales over the same quarter last year. This increase boosted sales in the first half of 2015 by over one-third of last year's total to 9,897 sales.⁴ Most of the increase in sales was attributed to ground-oriented housing. Detached home sales were up 36 per cent, townhouse sales up 31 per cent and condominium apartment sales

Figure 3

Source: Canadian Real Estate Association (CREA)

³ MLS® is a registered certification mark of the Canadian Real Estate Association (CREA)

⁴ Fraser Valley Real Estate Board covers markets in North Delta, Surrey, South Surrey / White Rock, Langley, Abbotsford, and Mission.

increased 18 per cent. Detached home sales accounted for a larger share (60 per cent vs. 58 per cent in 2014) of total activity, while the share of apartment sales moved lower, from 18 per cent to 16 per cent. Townhouse sales, at 24 per cent, remained the same share as last year (Figure 4).

In the second quarter, market conditions for townhouses and apartment condominiums remained balanced, while the market for single-detached home transitioned into seller's territory (Figure 5). The MLS® HPI benchmark price⁵ of single-detached homes and townhouses in the FVREB area increased by 7.3 per cent and 1.6 per cent, respectively, compared to June 2014. On the other hand, the benchmark price of apartments declined year-over-year by 2.6 per cent.

Figure 4

Source: Fraser Valley Real Estate Board, CMHC Calculation, June 2015 latest data point

Figure 5

Source: Fraser Valley Real Estate Board, CMHC Calculation, June 2015 latest data point

⁵ The HPI benchmarks represent the price of a typical property within each market. The HPI takes into consideration what averages and medians do not – items such as lot size, age, number of rooms, etc. These features become the composite of the 'typical house' in a given area.

Spotlight: A Closer Look at New Single-Detached Home Prices

The average price of a new single-detached home in the Vancouver CMA has been on an upward trajectory since 2005 with a few interruptions. Many factors in addition to mortgage rates influence home prices, including population, employment and income growth, construction and land costs, regulations and buyers preference. However, trends in the average monthly mortgage payment allow us to gain some insight into the relationship between mortgage rates and prices. Looking at the average monthly mortgage payments for a new single-detached home, it is clear that mortgage rate declines partially offset some of the impact on buyers' budgets of the increase in prices.

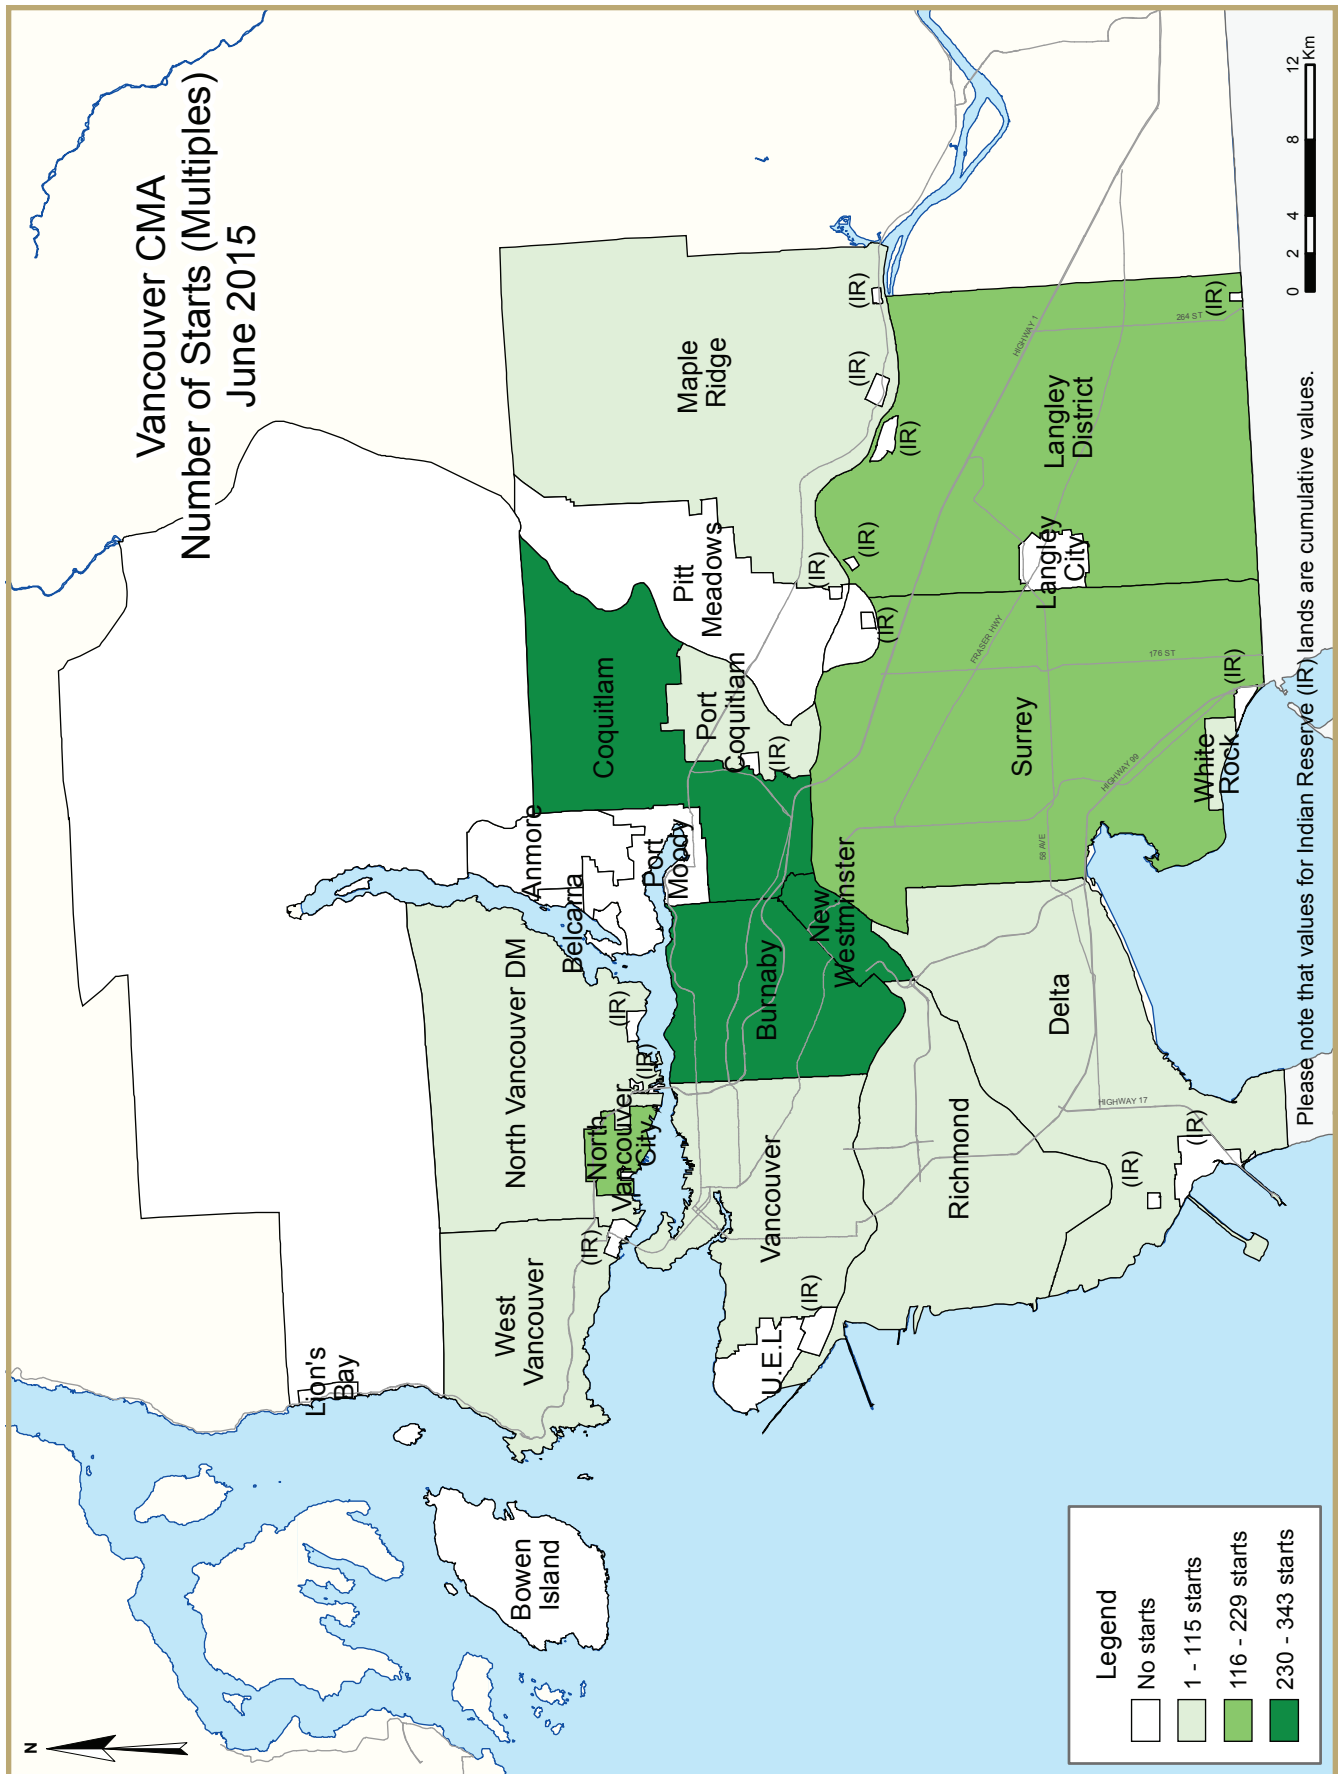

Two examples can be seen from 2008 to 2009 and 2013 to 2014. A sharp drop in mortgage rates from 7.15 per cent to 5.85 per cent from 2008 to 2009 combined with a slight drop in price brought down monthly payments in 2009. A similar story can be seen in mortgage payments from 2013 to 2014 – despite the fact that there was no change in price, a decrease in mortgage rate from 5.14 to 4.79 resulted in a decrease in mortgage payments (Figure 6).

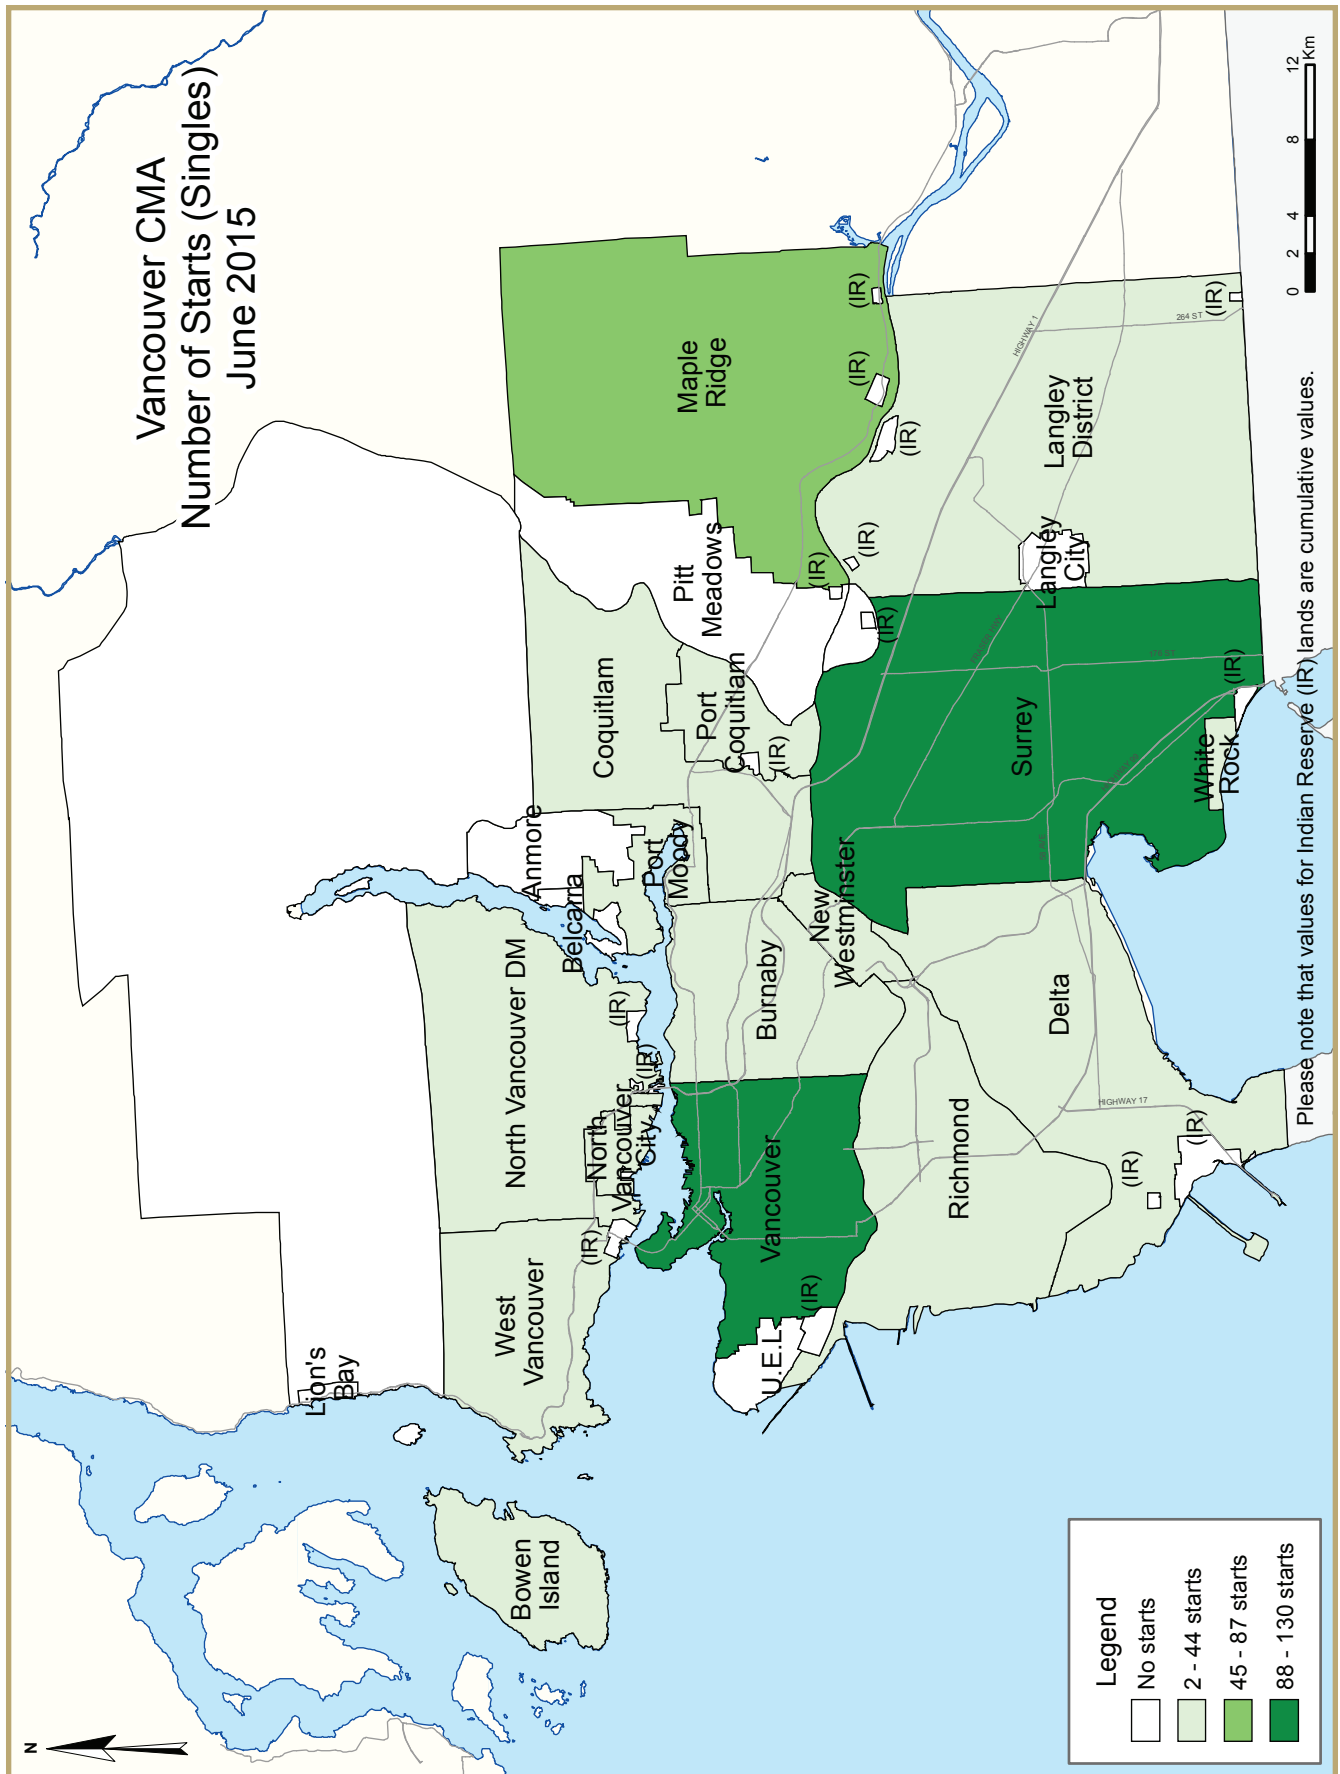

In 2015, the Bank of Canada lowered its target for the overnight rate by one-quarter of one percentage point in January and again in July resulting in a decrease in mortgage rates. So far in 2015, the new single-detached average price has increased. As a result, the monthly mortgage payment has moved higher this year.

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Source: CMHC (Starts and Completions Survey)

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2011 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modeled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
