

HOUSING NOW

Montréal CMA

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: May 2015

Highlights

- The pronounced downward trend in housing starts in the Montréal CMA continued in April.
- Since the beginning of the year, the decline in housing starts in the metropolitan area has been mainly apparent in the condominium segment.
- At the end of the first four months of 2015, Centris® transactions were up by 4 per cent over a year earlier.

*SAAR¹: Seasonally Adjusted Annual Rate

¹ All starts figures in this release, other than actual starts and the trend estimate, are seasonally adjusted annual rates (SAAR)—that is, monthly figures adjusted to remove normal seasonal variation and multiplied by 12 to reflect annual levels. By removing seasonal ups and downs, seasonal adjustment allows for a comparison from one season to the next and from one month to the next. Reporting monthly figures at annual rates indicates the annual level of starts that would be obtained if the monthly pace were maintained for 12 months. This facilitates comparison of the current pace of activity to annual forecasts as well as to historical annual levels.

New home market

Housing starts in the Montréal census metropolitan area (CMA) were trending at 14,526 units in April 2015, compared to 16,038 in March 2015.² The trend is a six-month moving average of the monthly seasonally adjusted annual rates (SAAR) of housing starts.

The pronounced downward trend in housing starts in the Montréal CMA therefore continued in April. According to the actual results, 3,206 dwellings were started from January to April 2015, for a drop of 40 per cent from the same period in 2014. The most significant decrease in activity was observed in the condominium segment (-53 per cent). Freehold home starts, for their part, were down by 25 per cent. Conversely, rental housing construction increased by 19 per cent.

The soft conditions on the resale market and the high inventory of unsold new homes were the main factors accounting for the decrease in residential construction, especially in the condominium segment. In fact, there were 2,655 completed and unsold condominiums in the metropolitan area in April, up by 33 per cent over a year earlier, and nearly a quarter of them had still not found takers more than a year after they were completed. The increase in the inventory therefore likely prompted builders to slow the pace of production in the first four months of the year.

Figure 2

Source: CMHC

The new home market results by geographic sector reflected essentially the same scenario as in the overall CMA. For the period from January to April 2015, total residential construction effectively slowed down in all large sectors, except Laval, where the small gain was mainly attributable to an increase in rental housing starts. Condominium construction, however, slowed down in all sectors.

Despite the major decrease in activity observed in the CMA since the beginning of the year, the start of several large multi-unit housing projects planned over the coming months will limit the decline in residential construction.

Resale market

According to the Quebec Federation of Real Estate Boards (QFREB), home sales in the Montréal

metropolitan area climbed by 14 per cent in April over the same month in 2014, reaching 4,163 transactions. During the month, sales of plexes (with 2 to 5 units) posted the greatest gain (+15 per cent).

The figures for the first four months showed a year-over-year increase of 4 per cent in total transactions. By market segment, sales posted increases for single-family houses and condominiums (with gains of 5 per cent and 4 per cent, respectively) but registered a small drop of 2 per cent in the case of plexes. The strong activity observed on the resale market particularly reflected the employment recovery in the Montréal metropolitan area in recent months.

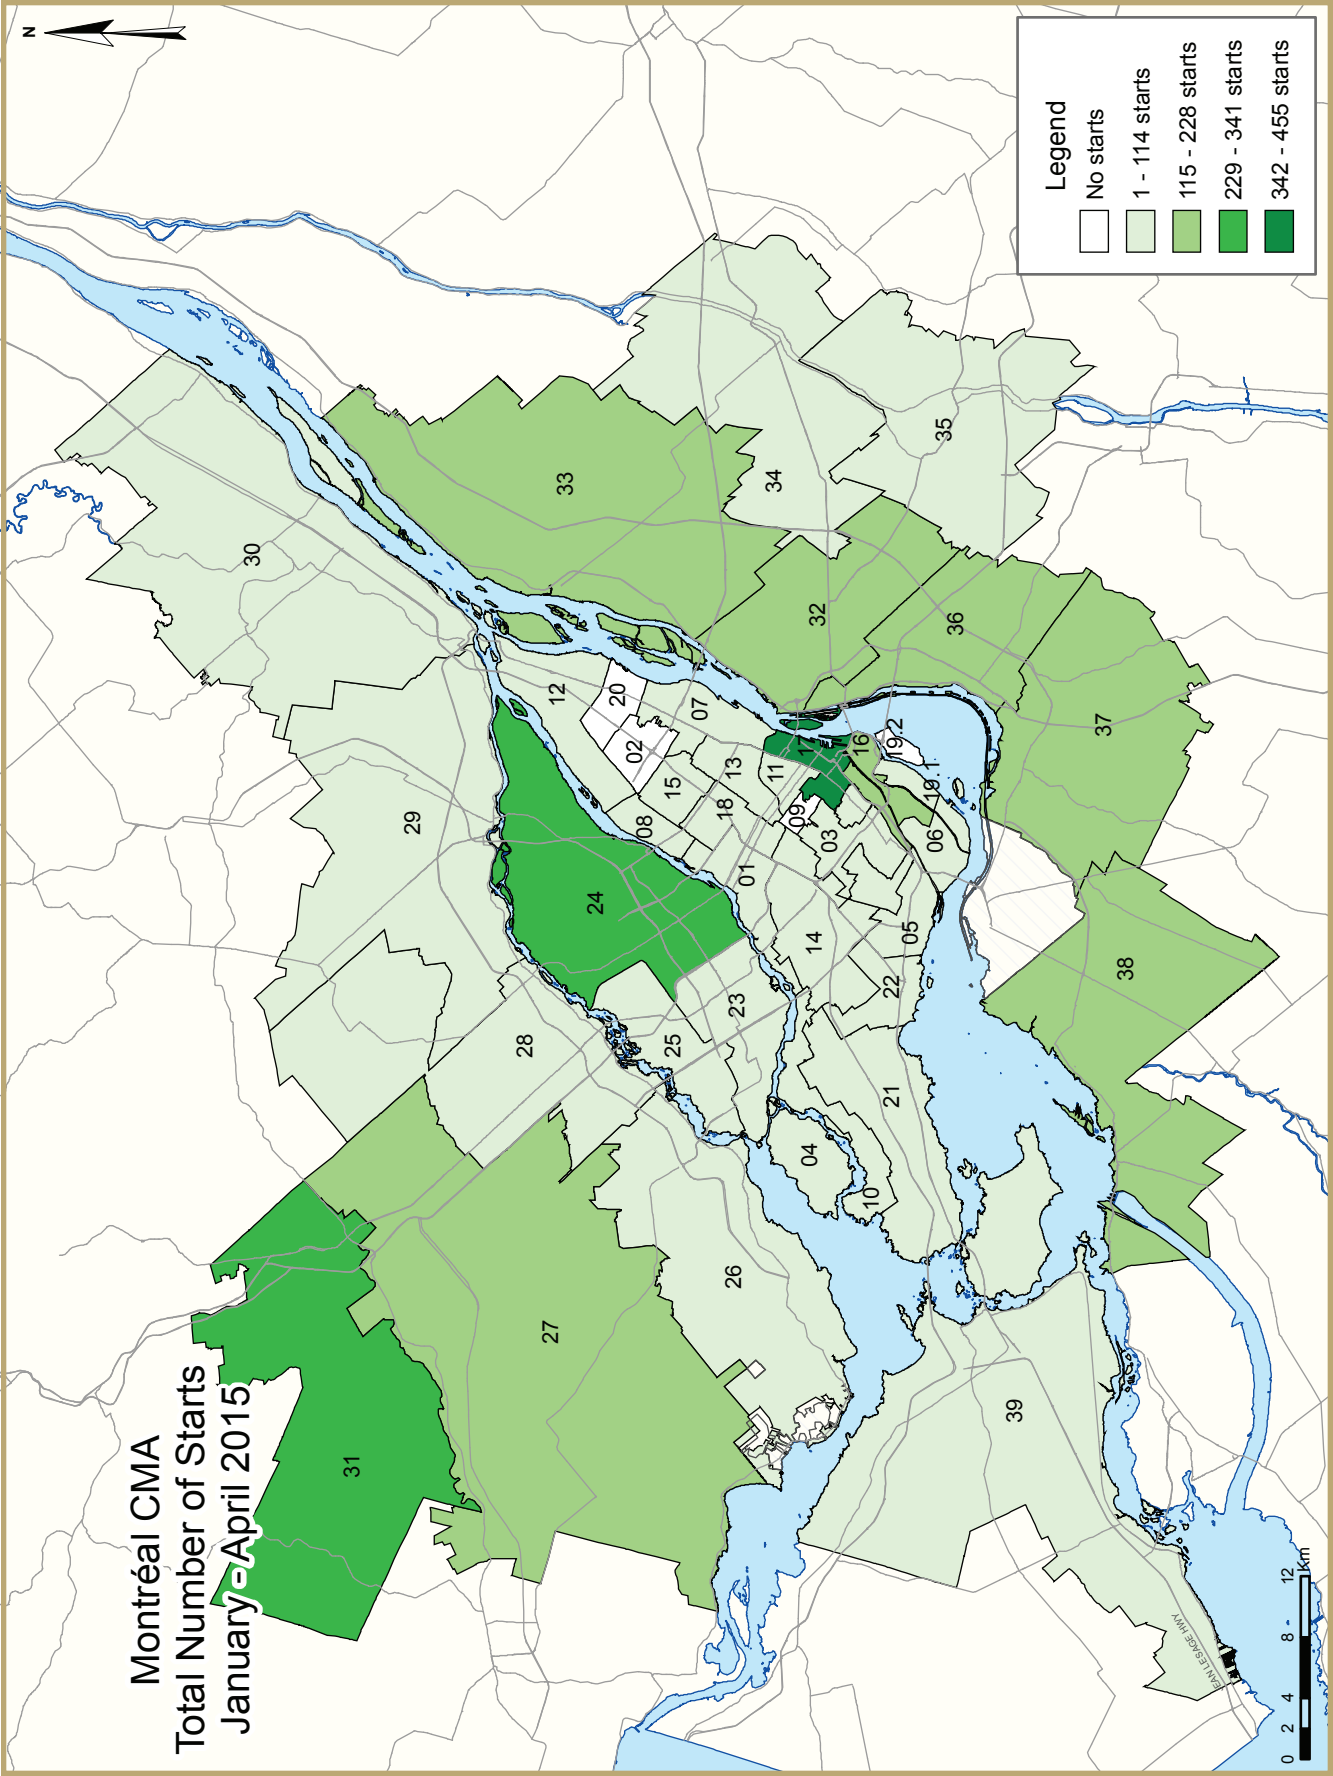

A review of the results by geographic sector revealed that resale activity picked up on the Island of Montréal

² The stand-alone monthly SAAR was 10,627 units in April 2015, down from 11,785 in March 2015.

and on the South Shore, with sales up by 8 per cent in both of these sectors for the first four months over a year earlier. In Laval, transactions also rose slightly (+2 per cent). Conversely, the North Shore and Vaudreuil-Soulanges sectors registered decreases in Centris® sales, with declines of 1 per cent and 7 per cent, respectively.

On the supply side, active listings continued to rise in the first four months, with an increase of 5 per cent over a year earlier. By market segment, the greatest increase in listings was observed in the case of plexes (+8 per cent), followed by single-family houses (+6 per cent) and condominiums (+4 per cent).

With demand picking up and supply rising more slowly than in past years, market conditions stabilized, in all market segments. In the case of single-family houses and plexes, conditions remained at the boundary between a balanced market and a buyer's market, while the condominium market remained favourable to buyers. At the end of the first four months, the median prices were up by 3 per cent year over year for condominiums and single-family houses and by 4 per cent in the case of plexes.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2011 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modeled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
