Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Monthly Measures Section,
Industry Measures and Analysis Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9145) or
to the Statistics Canada reference centre in:

| | | | |

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des mesures mensuelles,
Division des mesures de l'analyse des industries,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9145) ou au
centre de consultation de Statistique Canada à:

| | | | |

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- nil or zero.
- amount too small to be expressed.

Note

Annual averages of seasonally adjusted data are identical to annual levels except for minor variations which are due to rounding.

Codes

SNA Industry Code: a System of National Accounts industry code appearing in the tables should be interpreted as follows:

An S code corresponds more or less to a division code from the Standard Industrial Classification, broken down between the business and non-business sectors of the economy. For the business sector, the industry code goes from S01 to S13 and, for the non-business sector, it goes from S17 to S25.

An M code corresponds to a major group within a division.

An L code corresponds to the lowest level at which estimates of GDP for an industry or a group of industries can be linked across various industrial classifications.

Finally a W code corresponds to the most detailed level at which estimates of GDP by industry are prepared using a given SIC.

A Note on CANSIM®

All tabular data appearing in this publication, as well as many other data series, are available to the public from CANSIM via terminal, on computer printouts, or in machine readable form.

For further information write to CANSIM, Statistics Canada, Ottawa, K1A 0T6, or call (613)951-8200.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- néant ou zéro.
- nombre infimes.

Nota

La moyenne annuelle désaisonnalisée est identique au niveau annuel sauf pour des différences mineurs dues à l'arrondissement.

Codes

Codes des industries du SCN: le code des industries du Système de la comptabilité nationale figurant aux tableaux doit être interprété ainsi:

Un code S correspond plus ou moins au code d'une division de la classification type des industries, ventilée entre le secteur des entreprises et le secteur non commercial. Pour le secteur des entreprises, le code des industries va de S01 à S13 et, pour le secteur non commercial, il va de S17 à S25.

Un code M correspond au grand groupe à l'intérieur d'une division.

Un code L correspond au niveau le plus bas auquel les estimations du PIB pour une industrie ou un groupe d'industries peuvent être raccordées à travers diverses classifications d'industries.

Enfin, un code W représente le niveau le plus détaillé auquel les estimations du PIB par industrie sont préparées en utilisant une CTI donnée.

Note au sujet de CANSIM®

Toutes les données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous une forme lisible par la machine.

Pour plus de renseignement, écrivez à CANSIM, Statistique Canada, Ottawa, K1A 0T6, ou téléphonez à (613)951-8200.

Revisions

With this issue, Real Gross Domestic Product at factor cost by Industry has been revised back to July 1987.

Révisions

Avec cette livraison, le produit intérieur brut réel au coût des facteurs par industrie a été révisé rétrospectivement jusqu'en juillet 1987.

HIGHLIGHTS

Real Gross Domestic Product at Factor Cost by Industry (seasonally adjusted data)

October 1987

Monthly Overview

Gross Domestic Product at Factor Cost in 1981 prices increased 0.5% in October, following increases of 0.7% and 0.8% in September and August respectively. The gain in October was the ninth consecutive monthly increase, and left output 5.1% above its level of January 1987. Forty percent of the October gain resulted from the exceptional increase in the volume of activity on stock exchanges associated with the stock market crash. Brokerages and exchanges paradoxically earned more commissions with the crash, as the volume of activity rose dramatically. In November and early December, activity on stock exchanges returned to lower levels. Output of services producing industries increased 0.8%, while goods producing industries advanced 0.2%.

Services Producing Industries

The 0.8% gain in services producing industries was the largest monthly increase since last April. About 70% of this gain stemmed from growth within the finance, insurance and real estate industry, where stock exchanges and security brokers and dealers were the main sources of growth. The volume of shares traded on Canadian stock exchanges advanced sharply in October, especially following the market crash of October 19. Elsewhere, following a substantial decrease in September, real estate activity picked up in October as the resale housing market improved.

Retail trade advanced 1.0% in October compared to a 0.5% gain in September. Most of the October growth was due to increases among motor vehicle dealers and department and clothing stores. Other industries reporting substantial gains were accommodation and food services, storage, and railway transport.

FAITS SAILLANTS

Produit intérieur brut réel au coût des facteurs par industrie (données désaisonnalisées)

Octobre 1987

Revue mensuelle

Le produit intérieur brut au coût des facteurs aux prix de 1981 progresse de 0.5% après des gains de 0.7% en septembre et de 0.8% en août. L'économie est en hausse pour un neuvième mois consécutif et se retrouve à un niveau de 5.1% plus élevé que celui de janvier 1987. 40% de l'augmentation en octobre résulte d'une hausse exceptionnelle du volume d'activité sur les marchés boursiers qui coïncide avec la chute des prix boursiers. Les courtiers et les bourses paradoxalement gagnent plus de revenus de commission avec le krach parce que le volume d'activité s'élève dramatiquement. En novembre et au début de décembre, le niveau d'activité sur les marchés boursiers revient à des niveaux plus bas. La production des industries productrices de services monte de 0.8%, tandis que celle des industries productrices de biens n'y va que de 0.2%.

Industries productrices de services

L'augmentation de 0.8% de la production des industries productrices de services est la plus forte depuis avril dernier. Environ 70% de ce gain provient des progrès dans la finance, les assurances et les affaires immobilières, plus particulièrement et essentiellement les marchés boursiers de même que les courtiers et négociants en valeurs mobilières. Le volume des actions échangées sur les marchés boursiers canadiens s'élève vigoureusement en octobre, surtout après à la chute du marché du 19 octobre. On retrouve de plus une reprise du marché immobilier en octobre suite à la baisse marquée en septembre, grâce à une amélioration du marché de la revente domiciliaire.

Le commerce de détail progresse de 1.0% en octobre suite à une augmentation de 0.5% en septembre, grâce surtout à des gains chez les concessionnaires d'automobiles, les grands magasins et les magasins de vêtements. Parmi les industries rapportant des gains importants, on retrouve également l'hébergement et la restauration, l'entreposage et le transport ferroviaire.

Major declines during the month occurred in the communication industry due to a two week postal strike, and in wholesale trade.

Goods Producing Industries

Output of goods producing industries slowed to 0.2% in October, compared to gains of 1.2% in August, and 0.7% in September. During October, output increases were reported in the mining, logging and forestry, and agriculture industries. Increased production of crude petroleum, natural gas and gold mines accounted for almost all of the growth in mining.

Manufacturing output was virtually unchanged from the September level, while construction activity fell 0.5%. Within manufacturing substantial increases by motor vehicle manufacturers, by chemical products industries and by machinery industries were offset by significant output decreases in office and store machinery, pulp and paper, and sawmills.

On retrouve de fortes baisses de production dans l'industrie des communications, à cause d'une grève de deux semaines dans les services postaux, et dans le commerce de gros.

Industries productrices de biens

La production des industries productrices de biens progresse de 0.2% en octobre, suite à des hausses de 1.2% en août et de 0.7% en septembre. Au cours du mois, on retrouve des augmentations de production dans l'industrie minière, l'exploitation forestière et dans l'agriculture. Des augmentations de production de pétrole brut, de gaz naturel et d'or rendent compte de presque toute la hausse dans l'industrie minière.

Le niveau de la fabrication varie à peine par rapport à celui de septembre, tandis que celui de la construction diminue de 0.5%. Dans l'industrie manufacturière, on retrouve des gains de production chez les fabricants de véhicules automobiles, dans l'industrie chimique et dans celle de la machinerie et des pertes compensatoires chez les fabricants de machines de bureau, de pâtes et papiers et dans les scieries.

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at factor cost as well as Productivity Measures.

Both the Input Output Tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication: *A System of National Accounts* (Studies in Methods, Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) portent le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les publications dont le numéro de catalogue commence par 15 comprennent aussi les mesures de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs ainsi que les mesures de productivité.

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont le numéro de catalogue commence par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les comptes du bilan des actifs et passifs en circulation sont disponibles annuellement.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études Méthodologiques, Série F, No 2, Rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).
