EXPLANATION OF THR METHOD USED IN PREPAR ING THB MONTHLY STATISTICS OF BMPLOYMENT AND PAYROLS.

The monthly surveys of employment and payralls extend to all branohes of the following industries: manufacturing, logging, mining, commications, transportation, construction and maintenance, trade and finance; the establishments for which data are given under the heading "services" are chiefly hotels and restaurants and laundries and dry-cleaning plants. For practical reasons of colleotion and tabulation, the surveys are in the main limited to firms usually omploying 15 persons and over. Firms reducing their staffs below this minimum are not necossarily remored from the mailing list. Bstablishments are asked to furnish data for all classes of employees irrespective of their functions in the business, but to exclude statistics for the owners. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishonts in the different industries and areas.
1.- COVERAGE - The virtual limitation of the monthly survays to establishments having 15 employees or more results in a relatively even representation of employment in the various provinces and in the larger cities for which data are segregated, but also results in variations in the coverage of different industries, dopending upon whether a given industry is ordinarizy organized in large or small units of operation. Complete information respecting the distribution of the working population is available only at 10 year intervals, and sometine after the Census dates; comparisons of the data of the monthly surveys and those obtained elsewhere in the Bureau are complicated by the fact that the industrial classifioations differ in several iroportant respects. The distribution of the persons employed at June 1, 1941, by the cc-operating firms in comparison with the distribution of the wage-earners and salaried employoss enumerated in the Census of June 1, 1941, was discussed in the 1944 Annual Review of Employment and Payrolls. This showed in the monthly enquiry, an industrial coverage of all employees enmerated in the Census which ranged from over 41 p.c. in the hotel-and-restaurant and laundry-and-iry-cleaning group, and more than 47 p.c. in trade, to over $93 \mathrm{p} . \mathrm{c}$. in manufacturing and nearly $97 \mathrm{p} . \mathrm{c}$. in mining. Differences in the industrial classifioations of ostablishments and individuals contributed to an important extent to these disparities, exageorating the high coverage in mining and manufacturing, and minimizing that in trade. The present coverage in the above-mentioned service divisions and in trade may be estimated at $48 \mathrm{p} . c$. and $52 \mathrm{p} . \mathrm{c}$. . respectively.

It should be noted that the statistics of persons employed, as published in varlous tables in the monthly bulletins, do not represent estimates of the total numbers engaged in the specified areas or industries, but show the distribution of the workers on the staffs of the co-operating firms at the indicated dates, togetner with the distribution of their weekly payrolls, and the per capita weokly earnings of such employees.
2. - THE QUEST IONNAIRE - From 1921 to 1941, the questionnaire used in collecting current data on employment alled for a statement of the number of persons at work on the last working day of the month. With the introduction of the statistics of payrolls in the spring of 1941 . it became necessary to ask for information showing the numbers of employees on the payrolls in the last pay periods in the month, to relate to the salaries and wages. The difference in the coverage of omployment as a result of this change was considerable, especially in industries with high proportions of casual labour. In so far as was possible, adjustment in the records was made in 1941, to preserve the comparability of the data collected prior to the spring of 1941, and those thereafter collected. The inclusion of casual workers to a greater extent than was the case in the earlier surveys nevertheless constitutes an element of incomparability in the present statistics of employment and tnose tabulated prior to the institution of the complementary statistics of payrolls in April, 1941. The questionnaire now used asks employers to furnish data showing the gross earnings of their salaried employees and wage-earners in the last pay periods in the month, the employees and their earnings to be grouped acoording to the duration of their pay periods. whether these be monthly, semi-monthly, fortnightly, weekly, etc. The payrolls reported include amounts deducted for taxes, unemployment insurance contributions, etc. Cost-of-living allowances, incorporated in the basio wage-rates as from Feb. 15, 1944, are included, as was the case before their incorporation in the basio rates. Commissions and incentive and production bonuses are also included.
3.- THE PROCESSING - In the Bureau, the statistics of salaries and wages reported for any period exceeding a week are reduced, for tabulation purposes, to the proportions which would be earned in one week in the period, the numerator of the fraotion ordinarily used for this purpose

## EXPLANATION OF THE METHOD USED IN FREPARING THE MONTHLY STAT IST ICS OF EMPLOYMENT AND PAYROLLS. (Cont'd.)

being six days, the standard working woek; the denominators of the fractions are the numbers of working days in the different pay periods, excluding only the Sundays. Where operations are continuous, the numerator of the fraction is seven, the denominator being the total number of days in tne pay period, including Sundays. In the case of employess paid at annual or montnly rates, so that their earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the oarninge to a weokly basis, without regard to the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts, which, on the average, would be paid for services rendered in one week by the persons on the payrolls of the co-operating establishments. The employes reportad are not in all cases necessarily employed for a period of a week by one firm. Employers are urged to make a practice of furnishing data only for the last pay period in the month for their various classes of employees rather than to aggregate statistics for sereral pay periods, since the latter method tends to exaggerate the amount of duplication possible in the statistics of employment in cases where individuals may be employed by more than one co-operating establishment in a period of soveral weeks.
4.-THE TABULATION - The data tabulated monthly show the number of persons drawing pay from the establishments furnishing returns at the given date, and their weekly earninge, togetner with the numbors of omployees and the payrolls of the same firms in the proceding month, and in the basic periods. The statistics of the first tabulation are preliminary, the re-tabulation of the statistics on the succeeding month"s tabulation incorporating revisions in the returns originally tabulated, as well as reports received too late for inclusion in the proliminary tabulation.
5. - THK INDEX NUNBKRS OF EMPLOYMENT - The index numbers represent the percontage relationship between the number of persons employed by tho establishments currently furnishing data and the number which they had employed in the basic period. The number of workers employed in the basic period by firms which then operated but have since gone out of business are continued in the basic average figures, while firms or branohes opening for busfeess since the basic period are tabulated with zero base figures. The basic averages of establishments which operated in the base period but have $\varepsilon$ ince boen added to the mail ing list are incorporated in the basic figures from the date when their co-operation was first obtained.
6.- THE INDEX NUNBERS OF PAYRDLLS - Shortly after the institution of the statistics of payrolls, it became necessary to present the data in the form of inder numbers. The earliest period which could be adopted as a base was selected for the purpose, namely, the week of June 1, 1941. The current disbursements are thus related to the sums expended in salaries and wages by the co-operating employers on or about june 1, 1941, as 100 p.0. To provide a measurement of the changes in employment and payrolls from the ostablishment of the latter series, the monthly indexes of employment are related to June 1, 1941, as 100, in the tables giving the two sets of data. For all purposes apart from comparison with the atatistics of payrolls, however, the indexes compilod on the original 1926 base should be used.
7.- THE FRERLY BARNIMGS - The average weokly oarnings represent the division of the aggregate weekly salaries and wages reported by the co-operating establishments, by the number of their employees in the same pay periods; the index numbers of average weekly earninge given in the table on page 4 , are based on the averages reported in the weok of Jure 1, 1941, as 100.

Statistics of average hourly and weokly earnings of wage-earners for whom the larger employers keep record of hours worised are conteined in the monthly bulletins on manhours and average hourly eamings, avallable from tho end of 1944.

## DEPARTMENT OF TRADE AND COMMERCE DOMINION BUREAU OF STATISTICS EMPLOYNENT AND PAYROLL STATISTICS SECTION OTTANA - CANADA

THE NOVEMBER EMPLOYMENT SITUATION,
TOGETHER WITH STATISTICS OF PAYROLLS
IN THE LAST WEEK IN OCTOBER, 1948 .

Dominion Statistician:
Director, Labour and Prices Division:
Chief, Employment Statistics Section:

## Herbert Marshall

H.F. Greenway
M.E.K. Roughsedge

Note:- In addition to the statistics of the present bulletin, other available data respecting the current labour situation are published in the Monthly Labour Gazette, the official journal of the Department of Labour. These comprise information regarding the operations of the Unemployment Insurance Commission, including statistics of the Employment Service, and statements showing unemployment as reported quarterly by trade unions.

GENERALSUMMARY.
EMPLOMMENT.
There was a further small increase in industrial employment in the Dominion at the beginning of November, when the advance was the sixth in as many months. The percentage rise in the index number between May 1 and Nov. 1 in 1948 was rather less than in the corresponding months in 1947, although it slightly exceeded the average increase recorded in the same period in the years, 1939-47, and was also greater than that generally indicated in pre-war years.

The 19,488 leading establishments ${ }^{1 / c o-o p e r a t i n g ~ i n ~ t h e ~ D o m i n i o n ~ B u r e a u ~ o f ~}$ Statistics' latest survey of employment and payrolls in the eight major industrial divisions reported a gain of 0.1 p.c. in their staffs as compared with Oct. 1 . This increase was accompanied by that of 0.9 p.c. in the weekly salaries and wages disbursed at Nov. l by these firms. An advance in employment between Oct. 1 and Nov. 1 is usual according to the experience of the years since 1938. The latest gain, however, was not equal to the average at the beginning of November in the last nine years.

Improvement over Oct. 1 was noted at the date under review in logging, mining and trade, in which recorded employment rose by 19.6 p.c.. 0.7 p.c. and 2.6 p.c., respectively. The trend in the remaining major industrial classes was downard。 The percentage losses varied from 2.4 p.c. in construction and 3.8 p.c. in the service industries for which data are available, to 0.8 p.c. in communications and 0.9 p.c. in manufacturing. Within the last-named group, there were marked increases in the textile division, with smaller advances in the paper product, printing and publishing, rubber, electrical apparatus, miscellaneous manufactured product and some other industries. Lumber and pulp and paper mills, vegetable food-processing and iron and steel plants, however, showed curtailment, which in some cases was seasonal. The seasonal factor also influenced the changes in many other industries.

1/ Soe explanatory statonente on pages I and II.
1/ Imis olaselfication comprises tho following: - Iron and steol, non-forrous matals, oleotriomi apparatum, iumber, mus ionl instrumonts and olay, flasi and stone products. Tho noo-durable group inciudes the remaining manufocturing industrios, as ilstod in Iables ind 9 , with the exoeption of eioctrio
2/ Kainly hotels and restaurante and laundry and dry-aleaning plants.

Based on the 1926 average as 100 , the peneral index number of employment in the eight leading industries at the beginning of November was 203.5 , as compared with 203.3 at Oct. 1, 1948, and 197.8 at Nov. 1, 1947. In 1946, 1945, 1944, 1943 and 1942, the Nov. 1 indexes had been $182.7,171.2,183.8,188.7$ and 183.3 , respectively. The latest index is the hiphest in the record of 28 years. As compared with Nov. 1, 1947, there was an increase of 2.9 p.c., accompanied by that of $14.8 \mathrm{p} . \mathrm{c}$. in the index of payrolls, which also reached a new all-time maximum at the date under review.

Payrolls.- The employers whose returns were tabulated reported a rise of 0.9 p.c. in the weekly salaries and wages $1 /$ they disbursed at Nov, 1 as compared with Oct. 1. A further upward movement in wage rates in several industries was a factor in the higher expenditures, also favourably affected by slightly expanding employment at Nov. 1. The indicated weekly earnings then averaged $\$ 42.16 \%$, as compared with $\$ 41.8$ n at Oct. 1, 1948, and $\$ 37.79$ at Nov。 1, 1947. At the same date in oarlier vears for which statistics are avallable, the per capita figures were as follows:- 1946, \$33.33; 1945, \$31.95; 1944, \$32.29; 1943, \$31.50; 1942, \$29.81, and 1941, \$27.02. In the period from June 1, 1941, the average weekly earnines of the typical person in recorded employment have risen by 67 p.c.

If the statistics for financial institutions are included, the latest survey of employment and payrolls shows that the number of persons in recorded employment rose by 0.1 p.c. as compared with the beginning of October. The sums received in salaries and wages by these persons at the date under review were higher by 0.9 p.c. The average weokly earnings per employee in the nine principal inclustrios, including finance, were $\$ 42.04$; this exceeded the per capita figure of $\$ 41.69$ indicated at the beginning of October. At Nov, 1, 1947, the averape in the nine leading industrial groups was \$37.77.

Table A on parge 2 summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and econonic areas, and the 20 larger industrial cities, and gives comparisons as at Oct. 1, 1948, and Nov, 1, 1047. Table B on pafe 4 contains a monthly record for the eight and the nine leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls in the period since 1944. The index numbers of payrolls are based on the amounts disbursed by the co-operating, firms at June 1,1941 , as 10 . To facilitate comparisons of the trends of employment and payrolls, the index numbers of employment in these tables have been converted from their original base, $1926=100$.

The table on page 4 shows that in the period for which data are available, there has been an increase of $33.3 \mathrm{p} . \mathrm{c}$. in the index number of employment in the eight leading industrial groups (listed in the table on page 2), while that of aggregate weekly salaries and wages has risen by 117.8 p.c. Including finance, the gain in employment from June 1, 1941 , to Nov. 1, 1848, has amountad to 33.6 p.c., and that in payrolls, to 116.7 poc. These are the maximum increases so far rocorded. The explanation given in earlier bulletins for the relatively greater rise in the reported salaries and wapes than in the numbers omploved may again be stated:- (1) the payment of higher rage-rates in extremely large numbers of industries and establishments, in addition to the general increase resultings fron the compulsory payment of cost-ofliving allowances to the majority of workers during the war; the rates at which these bonuses were paid were increased on more than one occasion before they were absorbed in the basic wage-rates as from Feb.15, 1944, (2) the progrossive up-prading of employees as they gained experience in their work, and (3) reductions in the proportion of women workers.
1/For estimates of total expenditures in wages, salaries and supplementary labour income, see the bulletins "Monthly Estimates of Labour Incone".
2/The attention of those interested in hourly earnings is drawn to the statistics published in the monthly bulletins on man-hours and average hourly oarnings.
(The latest figuros are subjoct to realeion).

| Dec. | 1 | 133.6 | 216.7 | 164.9 |  |  |  |  |  |  |  |  |  |

The index of employment in manufacturing during the period for which monthly statistics of payrolls are available has advanced by 23.9 p.c.; the salaries and wages have mounted by 106.8 p.c., and the weokly earnings per person in recorded employment have risen by 69.5 p.c. In the included non-manufacturing industries taken as a unit, the index of employment at Nov. 1 showed an advance of 45.5 p.c. from the commencement of the record of payrolls, while the index of aggregate weokly salaries and wages in these classes was higher by 131.5 poc. than at June 1 , 1941.

In the last 12 months, the indexes of employment and payrolls in manufacturing have risen by 1.5 p.c. and 14.1 p.c., respectively, while the average weekly earnings of the persons in recorded employment have mounted by 12.5 p.c. A composite index for the non-manufacturing industries for which data are available shows a gain of 4.5 p.c. in the 12 months, accompanied by a rise of 15.4 p.c. in the index of weekly payrolls.

In regard to the marked variations in the average earnings of workers in the different industrial classes, (shown in Tables 1 to 5 at the end of this report, and in Table A on page 2), it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course a factor of outstanding importance.

## THE SEX DISTRIBUTION OF THE PERSONS IN RECORDED EMPLOYMENT.

Leading industrial establishments reported slightly heightened employment for workers of both sexes at the beginning of November as compared with Oct. 1; in the eight major industries, the gain among men and women amounted in each case to approximately 0.1 p.c. The outstanding change among men was the seasonal increase in employment in logeing camps. Kining and trade also showed improvement. On the other hand, there were considerable losses in employment among male workers in manufacturing, transportation and construction.

Among women, there was a minor flaling-off in employment in manufacturing as a whole. Important seasonal losses were recorded in vegetable food processing, while textile factories provided work for considerably more workers of that sex than at Oct. 1. Trading establishments also indicated substantially higher levels of employment. In communications and hotels and restaurants, however, there were large seasonal reductions in the number of female employees.

In the nine major industries, the co-operating establishments reported an increase of 0.1 p.c. in their forces since Oct. 1. The increases amounted to O.l p.c. in the case of male and of female workers. The ratios in this group of industries at Nov. l were 781 men and 219 women per 1,000 emplovees; these proportions were the same as those indicated at Oct. 1, 1948.

In comparison with Nov。1, 1947, the reported number of men in the nine major industrial divisions showed an increase of some three poc., while there was a gain of about 2.6 p.c. in the indicated number of women. The proportions per 1,000 persons in recorded employment were then 780 in the case of men, and 220 in the case of women. A vear earlier, the ratios had been 772 men and 228 women per 1,000 persons in recorded employment.

Table C.- The Sex Distribution of the Workers in Recorded Employment in the Provinces, the Loading Cities, and the Nino Major Industrial Groups at Nov, 1, 1948, with Comparisons as at Oct. 1, 1948 and Nov. 1, 1947.

## TABIES.

The latest statistics of employment and payrolls are summarized in Table A on page 2, while Tables 1 to 5 at the end of this report contain the latest data of employment and payrolls, together with index numbers as at Oct. 1 and Nov. 1, 1948, and Nov. 1, 1947. In these tables, the index mumers of employment, calculated on their original base, $1926=100$, have been converted to June 1, 1941, for comparison with the data of aarnings. For all general purposes, apart from comparison with the pavroll statistics, however, the index numbers of employment in Tables 6 to 11 , based on $1926=100$, should be used.

Table C on page 6 summarizes for the provinces, the cities and the major industrial divisions, the latest statistics of employment, showing the numbers and proportions of male and female workers reported at liov. l, with comparisons from earlier surveys; in this table, the provincial and city figures given are those for the nine leading industries, jncluding the employees reported in financial institutions, excluded in most cases from the data given in the table on page 2.

Table 12 shows the sex distribution in a considerable list of industries in the Dominion rs a whole at the date under review, with comparative statistics as at Oct. 1, 1948, and Nov. 1, 1947.

EMPLOYNENT AND PAYROLLS AS REPORTED BY IEADING FIRMS1/IN TIE MAJOR INDUSTRIAL GROUPS.

## 1. Manufacturing.

Employment. - Curtailment in employment in manufacturing was roported at the first of November, when the trend was generally retrogressive in the durable and the non-durable manufactured goods industries. The loss in the former category was stated at 0.5 p.c., and that in the latter, at 1.3 p.c. The decline reported in manufacturing as a whole, amounting to 0.9 p.c., was largely seasonal in character, the movement at Nov. 1 having been downard in 19 of the 28 years for which monthly data are available. The latest reduction approximated the average in size.

Based on the 1926 average as 100 , the index fell from 210.0 at Oct. 1, 1948, to 208.1 at the date under review. This decrease was accompanied by a small increase in the weakly salaries and wages disbursed by the 9,600 firms furnishing data in the manufacturing group.

The most pronounced change at the beginning of November took place in the vegetable food industries, in which a decline of 11.7 p.c. was recorded as the season's work drew to a close. There were fairly larpe decreases in animal food, lumber, pulp and paper, beverage and iron and steel plants. On the other hand, improvement was indicated in leather, printing and publishing, paper product, rubber, textile, electrical apparatus and miscellaneous manufactured product factories. T'he outstanding, gain was that of 1.5 p.c. in the textile group, in which the change was seasonal in character.

Payrolls in Manufacturing. - In spite of the decline in the index number of employment in manufacturing at Nov. l, there was an increase of $\cap .3$ p.c. in the index number of payrolls. The latest figure was the highest in the record of $7 \frac{1}{\mathrm{~L}}$ years. The per capita earnings also reached a new maximum at \$43.35, as compared with \$42.85 at Oct. 1, and $\$ 38.52$ at Nov. 1, 1947. At the same date in earlier years for which statistics are available, the averages were as follows:- 1946, 33.45; 1945, \$32.64; 1944, \$33.20; 1943, \$32.62; 1942, \$30.70, and 1941, \$27.59.
See explanatory notes on pages I and II.

Based on the weekly salaries and wages paid by the co-operating establishments on or about June 1, 1941, as 10 p .c., the index of payrolls at Nov. 1, 1948, reached a new maximum, standing at 206.8 , as compared with 206.3 at Oct. 1,1948 , and 181.2 at Nov. 1, 1947. There was an increase of 14.1 poc. in the payroli fipure at the date under review as compared with 12 months earlier, while the advance in the index of employment amounted to 1.5 p.c. The most recent index of payrolls exceeded by 18.9 p.c. the wartime peall figure of 174.0 indicated at Dec. 1,1943 , although the index of employment was then 11 poc. above the latest index in manufacturing.

The Sex Distribution in Kanufacturing.- Employment for persons of both sexes was at a lower lavel in manufacturing at Nov. l than at Oct. I. The loss among women was slight, amounting only to 0.3 poc., while that among men was 1.1 p.c. Fimployees of the former sex made up 228 per 1,000 workers reported at the date under review, as compared with 226 per $1,00 n$ a month earlier.

Among men, there were gains over Oct. 1 in leather, printing and publishing, rubber, textile, electrical apparatus and some other classes. Animal food processing, lumber, vecetable food, pulp and paper, beverage and iron and steel factories, however, reported smaller numbers of male employees. Among women, there were increases at Nov. I as compared with a month earlier in the lumber, paper product, printing and publishing, textile, tobacco, beverage, electrical apparatus, non-ferrous metal and miscellaneous manufactured product divisions. On the other hand, there were declines among such workers in animal and vegetable food processing.

As compared with Nov. 1, 1947, there was an advance of about 1.8 p.c. in the number of men employed by leading manufacturers, together with a gain of approximately 0.5 p.c. in their female employees. The proportions of men per 1,000 persons in recorded employment at the beginning of November in 1947 had stood at 770 , and that of women, at 230 , while in 1946 , the ratios were 763 and 237 per 1,000 , respectively, at the beginning of November.

## THE SITUATION AS REPORTED BY THE LARGER FIRVIS/IN THE MAJOR non-manufacturing industries.

Logeing. - There was further important expansion in logging at Nov. 1, 1948, according to information furnished by 678 leading operators, whose staffs were higher by 19.6 p.c. than at Oct. 1. This increase was of approximately the same size as that indicated a month earlier, but was somewhat smaller than the gain noted at Nov. 1 , 1947. The index of employment, at $32 \mathrm{n}_{\mathrm{I}} 1$, showed a decrease of 9.1 p.c. as compared with Nov. 1, 1947, but was otherwise the highest figure in the record for that date. The weekly salaries and wages reported by the firms co-operating, in the latest survey showed an advance of 17.1 p.c. over the sums which they had distributed in the preceding period of observation. The index of payrolls, however, was 9.6 p.c. below that indicated at Nov. 1, 1947.

The per capita earnings fell from \$38.46 at October 1, 1948, to \$37.66 at the date under review, when several factors affected the figure. Among these may be mentioned the fact that many camps opened later in 1948 than in recently-preceding years, so that a considerable proportion of the reported employees did not work throughout the period reviewed. Another factor was the payment of unsually high proportions of bushmen in Quebec at the basic rates, their production allowances being accunulated for disbursement at a later date. While this method of payment has alwavs been common in certain parts of the country, the practice had a greater-than-usual effect upon the most recent statistics of earnings. As a result of these and other factors, the per capita figure in logging at Nov. 1, 1948, was slightly lower than that of $\$ 37.83$ indicated at Nov. 1, 1947, although it exceeded the average of $\$ 30.28$ indicated at Nov. 1, 1946, and was also higher than in any other November of the record. In considering the statistics of aggregate and average earnings in logging, it must be recalled that they do not include the value of board and lodginge 1/See explanatory notes on pages I and II.

frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also a factor in lowering the reported earnings; these differ greatly in various parts of the country, the averape in British Columbia being considerably higher than in any other province. (See Table 2 towards the back of this report).

Mining - Moderately heightened activity was indicated in mining at the beginning of November, when information tabulated from 671 leadinf operators showed a combined working force which exceeded by 0.7 poc. the staffs reported in their last return. The extraction of coal and metrllic ores afforded more emplomnent, but there was a decline in the production of miscellaneous non-metallic minerals. The index of emplovment in the mining group at Nov. 1, at 180.9 , was 7.7 p.c. nbove that of 168.0 at the same date in 1947. In the 12 months, the index of payrolls has risen by 23 p.c.

The weekly payrolls reported by the co-operating firms at the latest date were higher by $1.2 \mathrm{p} . \mathrm{c}$. than at Oct. 1 . The per capita earnings were also higher, at $\$ 51.28$, as compared with $\$ 51 . \cap 4$ in the preceding period of observation. The latest figure of average earnings was considerably hicher than that of $\$ 44.87$ at Nov. $1,1947$.

Communications. - The trend in the communcations division continued seasonally dommard. The staffs of the co-operating establishments were lower by $0.8 \mathrm{p} . \mathrm{c}$. at Nov. 1 than at Oct. 1. On the other hand, there was an advance of 0.5 p.c. in the payrolls distributed by these establishments. The per capita earnings of their emplovees rose from $\$ 38.56$ a month earlier, to $\$ 39.07$ at the first of November; a year earlier, the figure had been \$35.37. Based on the 1926 average at 100 , the latest index of emplovment was 182.7 ; this was 8.8 p.c. above that of 168.0 at Nov. 1, 1947, since wher there was a gain of $19.1 \mathrm{p} . \mathrm{c}$. in the index of payrolls.

Transportation and Storage. - Considerable seasonal curtailment wns noted in transportation at Nov. 1. All branches of the industry shared in the decline, which was particularly marked in the shipping and stevedoring division. Emplorment in transportation as a whole, however, was in greater volume than at the same date in any earlier year of the record. The index stood at $144.3,-4.4$ p.c. above that of 138.2 at Nov. 1, 1947; this gain in the vear was accompanied by a rise of 20. p p.c. in the index number of payrolls.

The staffs of the 870 firms and branches furnishing returns were lower by 1.6 p.c. than at Oct. 1, while their ageregnte disbursements in weokly salaries and wages were lower by $0.7 \mathrm{p} . \mathrm{c}$. The average earnings of their employees, however, advanced from $\$ 51.31$ at Oct. 1 , to $\$ 51.77$ at the first of liovember, when the mean substantially exceeded that of $\$ 45.03$ indicated 12 months earlier.

Constiruction and Naintenance. - There was further recession in emplorment in construction; while this was seasonal in character, it was rather less-than-average for the time of vear. Building construction was more active, but the trend was decidedly downward in work on the railroads, streets and hiphways. Statements were tabulated from 2,473 contractors who reported a falling-off of 2.4 p.c. in their staffs as compared with Oct. 1, together with a loss of 0.9 p.c. in the weekly salaries and wages which they disbursed at Nov. 1. The per capita earnings stoos at $\$ 40.97$ at the date under review, as compared with $\$ 40.35$ at the beginning of October. The Nov. 1, 1947, fipure was $\$ 36.65$.

The latest index in construction, at 192.6 , was 6.2 p.c. above that of 181.3 at the beginning of November of last vear, and was also higher than in any earlier November in the record. In the 12 months, the index of weekly payrolls has mounted by $20.2 \mathrm{p} . \mathrm{c}$.

Services.- A pronounced seasonal decline was indicated in hotels and restaurants, while employment in laundries and dry-cleaning plants and other branches of the service

# EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS INDUSTRIES OTHER THAN AGRICULTURE 1929 AND 1933 AND 1939 TO 1948. 

The curve is based upon the number. of employees at work al the first day of the month as indicaled by the firms reporting incomparisan with the average employment they afforded during The calendar year 1926 as 100. Curves are plofled for 1920 , the year of maximim industrial activity; for 1933, when omployment was at ils minimum in the record since 1920, and for the years since 1938
division for which data are available was also quieter. The 1,236 co-operating, establishments had reduced their staffs by 3.8 p.c. from Oct. 1. The salaries and wages distributed by the reporting firms at the beginning of November were less by 1.8 p.c.

Diring the last 12 months, there has been an advance of $3.6 \mathrm{p} . \mathrm{c}$. in the index number of emplovment in these industries, while the index of payrolls showed a gain of 13.2 p.c. at Nov. 1, 1948. The per capita earnings stood at $\$ 26.86$ at Nov. 1 and $\$ 26.32$ at Oct. 1, 1948, as compared with $\$ 24.49$ at the first of liovember, 1947. Attention must again be drawn to the fact that in hotels and restaurants, as in logging, many of the workers receive board and lodging as part of their remuneration; emplovees in the former division constituted about two-thirds of the total staff reported in the service division as a whole at the beginning of Novenber.

Trade. - Trading establishments showed extremely marked seasonal expansion at Nov. F, partly due to the employment of large numbers of part-time workers. Data were furnished by 3,857 wholesale and retail houses in which the personnel was hipher by 2.6 p.c. than at Oct. l. The weekly salaries and wares paid by these employers rose by 3.2 p.c. in the month. The average earnings per worker advanced from $\$ 35.30$ at Oct. 1, to $\$ 35.52$ at the beginning of November. A vear earlier, the per capita figure had been \$32.36.

The index number of emploment in trade at Nov. 1 was 230.6 , as compared with 216.7 at the same date in 1947. The latest ripure therefore showed an increase of 6.4 p.c. in the 12 months, a period in which the index of payrolls gained by 16.3 p.c.

Financial Institutions. - Information from 1,020 financial institutions indicated the employment of a staff insignificantly smaller than at Oct. l. The weekly salaries and wages reported by these establishments at the date under review, hovever, mounted by 0. 2 p.c. as compared with Oct. 1. The per capita figure was $\$ 39.08$, as compared with $\$ 38.99$ in the last report, and $\$ 37.30$ at Nov. 1, 1947. The latest index of employment in financial institutions, at 165.7 , was higher by 4.6 p.c. than that of 158.4 at the same date in 1946, while the index of payrolls showed an increase of 9.3 p.c. in the same comparison.

EMPLOYNFNT AND PAYROILS AS REPORTED BY LEADING FIRIS 1/IN: TIE ECONONIC ARFAS.
Firms in Nova Scotia, New Brunswick, Quebec, Ontario and Mianitoba reported moderately heiphtened activity at Nov. 1 as compared with Oct. 1 , while the trend in this comparison was unfavourable in Prince Edward Island, Saskatchewan, Alberta and British Columbia. The reported weokly salaries and wages were higher in all areas except Saskatchewan, where there was a reduction of 0.7 p.c. In all provinces except in lianitoba, the average earnings at the date under review also exceeded those indicated at Oct. 1. In several provinces, the gains mere slisht. In all areas, the per capita figures were higher than at Nov. 1 in 1947 and earlier vaars of the record.

Maritime Provinces. - Industrial employment in Nova Scotia and New Brunswick showed an upward movement at Nov. 1, but there was a small decline in Prince Edward Island. The 1,418 co-operating establishments in these three provinces reported an increase of 0.8 p.c. in their working forces as compared with the beginning of October. This rise was accompanied by that of 0.9 p.c. in their expenditures in weekly salaries and wages. The general index of employment in the area stood at 194.2 , as compared with 192.8 at Oct. 1, 1948, and 193.3 at Nov. 1, 1947.

Manufacturing operations in the Maritime Provinces were slightly curtailed, moderate losses being indicated in the animal food, lumber, and beverage divisions; there was a small gain in activity in iron and steel plants. Among the non-manufacturing classes, logging, building, construction and trade showed improvement, which except in logring, was not on a large scale. The indicated advance in logging amounted to 41.7 p.c. I/ See explanatory notes on pages I and II.

Minor increases were noteu in mining and transportation, while the trend in communications, hotels and restaurants and hichway and railway construction and maintenance was unfavourable. The reduction in work on the highways was considerable.

The payrolls disbursed by the reporting firms for services rendered in the week preceding liov. I exceeded by 0.9 p.c. the sums they had paid their employees at Oct. 1. The per capita earnings showed little change, standing at \$37.16 in the last report, and at $\$ 37.19$ at the date under review. At Nov. 1, 1947 , the average had been $\$ 33.60$. In the last vear, the index of payrolls in the Maritime Provinces has advanced, by 11.4 p.co, while that employment has risen by 0.5 p.c.

Quebec. - There was a moderate gain in industrial activity in Quebec at Nov. 1 , in spite of losses in manufacturine, transportation, construction and hotels and restaurants. Logging operations and trade showed seasonal expansion, the indicated increase in employment in the bush amounting to 27.2 p.c. Mining and communications showed little change, on the whole. Within the manufacturing division, the trend was downward in food, lumber, pulp and paper and iron and steel plants. On the other hand, employment advanced in printing and publishing, rubber, textile and chemical factories. The noteworthy increase was that of a seasonal character in textile-using plants.

Information for Nov. 1 was furnished by 5,178 representative emplovers in the eight leading industries in Quebec, whose staffs were higher by 0.3 poc. than at the beginning of October. Their weekly payrolls mounted by 0.8 p.c. in the same comparison. The per capita eamings of their salaried emplovees and wace-earmers also showed a slightly upward movement, standing at $\$ 4 n .13$ at the date under review, as compared with \$4n.08 at Oct. 1, 1948, and $\mathrm{W}_{\mathrm{B}} 36.27$ at Nov. 1, 1947. The Latest index number of emplomment, at 207.1 , was 1.7 p.c. above the figure of 203.7 recorded a year earlier, while the index of parrolls was hipher by l2.4 p.c.

Ontario.- Little change in the general index number of employment was shown in Ontario at Nov. 1 as compared with Oct. 1, according to information furnished by 7,846 leading firms in the principal industrial divisions, Their working forces increased by $n_{0} \cap 3$ p.c. as compared with Ocit. l. Their reported weekly salaries and wages, however, showed a much larger increase of 1.1 p.c. in the month. The latest average earnings per employee were $\$ 43.50$, as compared with $\$ 43.04$ at oct. 1,1948 , and $\$ 38.99$ at the beginning of November, 1947. The index of employment, at 208.4 , was 3.1 p.c. above that of 2 n. .2 at Nov. 1 a year earlier, since when the index of payrolls has risenby 14.9 p.c.

There was a contraction in emploment in manufacturing as a whole in Ontario as compared with Oct. l. Vegetable food processing showed important seasonal declines, and animal food, lumber, pulp and paper, beverage and chemical factories were also quieter. On the other hand, there was some expansion in activity in leather, paper product, printing and publishing, rubber, tobacco, clay, glass and stone, electrical apparatus, iron and steel, non-ferrous metal and miscellaneous manufactured product plants. In the non-manufacturing group, logging, mining, building construction, laundries and dry-cleaning plants and trade afforded more emplorment. The seasonal gains in logging and trade were considerable. Commuications, transportation, highway and railway construction and maintenance, and hotels and restaurants released employees, the losses also beinf seasonal in charactor.

Prairie Provinces. - The trend of industrial emoloyment at Now, I was upward in Manitoba, but curtailment was indicated in Saskatchewan and Alberta. Statistics tabulated from 2,648 leading establishments in the Prairie Area indicated a loss of 0.3 p.c. in their combined staffs as compared with the beginning of actober. This general decrease was contra-seasonal according to the experience of the last eight years, although the trend was frequently unfavourable at Nov. 1 in earlier years for which data are available. In spite of the slight decline in employment, the weokly salaries and wages disbursed by the roporting firms at the beginning of November were higher by 0.7 p.c.
than at Oct. 1. The per capita earnings mere \$42.88, as compared with the Oct. I mean of $\$ 42.47$, also substantially exceeding the average of $\$ 37.71$ at Nov, 1,1947 . In the last 12 months, the index of industrial employment in the Prairie Provinces taken as a unit has advanced by six p.c., to 180.3 , and there has been a rise of $20.4 \mathrm{p} . \mathrm{c}$. in the index of weekly payrolls.

There were additions to the working forces at the date under review as compared with a month earlier in building, trade, and mining. Manufacturing, transportation, highway and railway construction and maintenance and hotels and restaurants, on the other hand, released emplovees. Within the manufacturing, group, the most noteworthy reduction was that of a seasonal character in vegetable fooci factories, while there were moderate gains in textiles and certain other industries.

British Columhia. - Emplovment in the larger establishments in the major industrial groups in British Columbia declined at the beginning of November, when the staff of the 2,398 larger emplovers furnishing data showed a loss of 1.5 p.c. as compared with Oct. 1.

Manufacturing establishments in this province reported curtailment, partly seasonal in character. There were fairly large reductions in employment in iron and steel, lumber and vegetable food factories. The trend was also unfavourable in numerous other classes, but except in the groups just mentioned, the losses were small. Anong the non-manufacturing divisions, employment decreased in logeing, mining, commuications, shipping and stevedoring, hiphway and railway construction and maintenance, hotels and restaurants, and laundries and dry-cleaning establishnents. On the other hand, greater activity was indicated in building construction and retail trade.

Declining employment in many industrial divisons was accompanied by lower disbursements in salaries and wages in these classes, but with heightened activity in building and trade, there was a small increase, on the whole, in the reported weekly payrolls; these exceeded by 0.2 p.c. the salaries and wages paid by the same firms in the week of Oct. 1. In a majority of industrial groups, the indicated average weekly earnings moved upward. The general per capita figure in the eight leading industries rose from $\$ 44.28$ in the preceding survey, to $\$ 45.03$ at lvov. 1,1948 , as compared with $\$ 40.66$ at that date in 1947. In the period since then, the index number of payrolls has advanced by 15.3 p.c., while that of employment, at 211.5 st the beginning of November, exceeded by 4.1 p.c. the index recorded 12 months earlier.

## THE SITTATION AS REPORTED BY LEADING FIRNS ${ }^{1 /}$ IN CEIRTAIN CITIES.

The following paragraphs deal briefly with the situation reported at Nov. 1 by leading employers in cities having populations of 35,000 persons and over.

Halifax. - Industrial employment in Halifax at the beginning of November showed practically no general change. Seasonal improvement was noted in transportation and trade, but there were slight losses in manufacturing, together with declines on a rather larger scale in communications, construction, and hotels and restaurants. The weekly salaries and wages disbursed by the 268 leading establishments furnishing data in the city rose by 0.3 p.c. as compared with Oct. 1. The average weekly earnings of their emplovees stood at $\$ 34.15$, as compared with $\$ 34.04$ at Oct. 1,1948 , and $\$ 32.58$ at Nov, 1, 1947. Since then, the index of payrolls has risen by 3.8 p.c., but that of employment has fallen by 0.9 p.c.

Saint John.- Heightened activity in employment was indicated in Saint John at Nov. 1, according to data received from 191 of the larger emplovers in the major industrial groups. Their staffs were higher by 1.3 p.c. than at Oct. 1. Iron and steel and lumber product manufacturing afforded more employment, and the trend was also favourable in transportation. Vegetable food processing, however, released some 1/See explanatory notes on pages I and II.
employees.
The geain in employment at Nov. I was accompanied by an increase of 2.1 p.c. in the weekly salaries and wages disbursed by the reporting fims. The average earnings per employee stood at $\$ 33.84$, as compared with $\$ 33.56$ at the becinning of October, and \$32.03 at Nov. 1, 1947. In the last 12 months, the index of employment in Saint John has fallen by 3.3 p.c., while that of weekly salaries and wages has risen by 3.3 p.c.

Montreal.- There was an upward trend in employment in Nontreal at Nov. 1, when improvement was noted in manufacturing, construction and trade. There were losses, on the other hand, in transportation and hotels and restaurants. Within the manufacturing group, fairly large advances were recorded in the textile group, with smaller gains in vegetable food, printing and publishing. clay, glass and stone and non-ferrous metal plants.

Statistics were received from 2,937 leading employers in the major industrial divisions, whose personnel was larger by 0.9 poc. than at Oct. 1 . The amounts which they disbursed in weekly salaries and wages at the date under review were higher by 1.7 p.c. The per capita earnings of their employees stood at $\$ 40.59$ at Oct. 1 and $\$ 40.91$ at Nov. 1, 1948, as compared with $\$ 36.74$ at Nov. 1, 1947. In the year, the index of employment has advanced by four p.c., to 190.2 , while there has been a gain of $15 \mathrm{p} . \mathrm{c}$. in the index of payrolls.

Quebec City.- Moderate curtailment in industrial employment was shown in Quebec at Nov. l according, to data from 355 leadinf, emplovers whose working forces declined by one p.c. as compared with the beginning of October. The reported salaries and wages rell by 0.6 p.c. The weekly earnings per employee, however, were rather higher standing at $\$ 34.92$, as compared with $\$ 34.77$ at Oct. 1,1948 , and $\$ 32.70$ at Nov. 1 , 1947. There were rather small but widely-distributed decreases in employment at the date under review in manufacturing, together with slight losses in shipping, building construction, and hotels and restaurants. Trade, on the other hand, showed greater activity.

The index of employment in the city stond at 201.8 , as compared with 198.8 a year earlier. This rise of 1.5 p.c. in the 12 months was accompanied by that of 8.4 p.c. in the index of weekly payrolls.

Sherbrooke, - The employment situation in Sherhrooke at Nov. I showed little change as compared with a month earlier. Information was furnished by 120 leading firms, whose personnel was lower by O. 2 p.c. than at Oct. 1. The weekly salarics and wayes paid by these establishments at Nov. 1, however, exceeded by 0.7 p.c. their disbursements at Oct. 1. The latest per capita earnincs were $\$ 34.89$. as compared with $\$ 34.57$ at Oct. 1, and \$32.24 at Nov. 3. 1947. Since then, the index of employment has risen fractionally, while that of weekly payrolls has mounted by 8.5 p.c.

Three Rivers. - There was a slightly downward movement in employment in Three Rivers at the first of November, according to statistics tabulated from 106 of the larger employers in the city, whose working forces declined by 0.6 p.c. as compared with Oct. I. Their weekly payrolls at Nov。 1, however, were slightly higher, the index number rising by $0.4 \mathrm{p}, \mathrm{c}$. in the month. The earnings of their employees averaged $\$ 41.63$, as compared with 41.24 at Oct. 1, 1948. The mean at the beginning of November, 1947, had been $\$ 36.65$. Manufacturing was quieter at the date under review than in the preceding month, there being curtailment in pulp and paper mills and some other classes. Transportation and trade, however, were more active. In the last 12 months, there has been a decline of 1.7 p.c. in the index of employment in Three Rivers, but the index of payrolls has advanced by 11.4 p.c.

Toronto.- Important increases in industrial activity were noted in Toronto at the beginning of November, when data were compiled from 2,754 leading establishments
employing 1.4 p.c. more workers than at Oct. 1 . The general gain was rather greater-than-average in the experience of some 28 years. Manufacturing showed further improve. ment, notably in animal food, lumber, printing and publishing, textile, clay, glass and stone, electrical apparatus, iron and steel, non-ferrous metal, miscellaneous non-motallic mineral product, and miscellaneous manuractured product plants. Vegetable food and beverage factories, however, afforded less employment. Among the non-manufacturing classes, building and trade reported greater activity. The gains in the latter were considerable. On the other hand, transportation and communications were quieter.

The weekly salaries and wages disbursed at Nov. 1 by the establishments furnishing returns were higher by 2.2 p.c. than at Oct. 1 . The index of employment at the latest date was 203.0 , exceeding by 3.3 p.c. the Novo 1, 1947 , figure of 196.5 . The indicated payrolls have risen by $15 \mathrm{p}, \mathrm{co}$ in the 12 months. The average earnings per employee were $\$ 42.96$ at Nov. 1 and $\$ 42.60$ at Oct. 1. 1948, as compared with $\$ 38.59$ at Nov. 1, 1947.

Ottawa. - There was a 2.4 p.c. advance in the index of industrial employment in Ottawa at Nov. 1. Manufacturing was brisker, particularly in the iron and steel division. Improvement, was also noted in building and retail trade. The weekly payrolls disbursed by the 332 co-operating firms rose by $3.8 \mathrm{p}, \mathrm{c}$ 。 in the month. The average earnings per person in recorded employment stood at $\$ 36.01$. as compared with $\$ 35.53$ at Oct. 1. The Nov. 1, 1947, per capita figure was \$32.67. The latest index of emplovment, at 201.2, was ten p.c. above that of 182.9 at Nov. 1. 1947, and that of payrolls was higher by 20.6 p.c.

Hamilton. Expansion in industrial activity was indicated in Hamilton at Nov. 1 , when the 464 co-operating firms reported a working force one p.c. greater than at Oct. 1. There were moderate gains in manuracturing, notably in textile and electrical apparatus plants. Construction, hotels and restaurants and trade also showed improve. ment. The weekly salaries and wages distributed at Nov. 1 by the reporting firms rose by $n_{0} \epsilon p_{0} . c$. in the month. The average earnings of their employees, however, were rather lower, falling from \$44.12 at 0ct. 1 o to $\$ 43.92$ at the date under reviewo The latter figure considerably exceeded the Nov, 1, 1947, average of \$38.70. In the 12 months, the general index of employment has risen by 5.6 pocos to 200.4 , while that of payrolls has advanced by 20.1 p.c.

Windsor... Industrial employment in Windsor was quíeter at Nov. 1, according to data received from 282 of the larger industrial establishments, in which the staffs were lower by 1.2 p.c. than at Oct. 1. Thair weekly salartes and wages declined in the same comparison by 2.2 p.c., reduced working hours in some cases contributing to the falling-off. The average earnings per employee were reduced from $\$ 51.90$ at Oct. 1, to $\$ 51.38$ at the date under review, but the figure was then deciciedly higher than that of $\$ 45.60$ at Nov. 1, 1947. Manufacturing showed lowered activity, particularly in the vegetable food division. Trade afforded more employment than at the beginning of October, while little general change was indicated in the remaining non-manufacturing industries.

The latest index of employment, at 288.4 , exceeded by 3.5 poo. that of 278.7 at the beginning of November, 1947; the index number of payrolls has risen by 16.9 poc. in the twelve months.

Fort William - Port Arthur. - Slight improvement in industrial employment was noted in Fort William and Port Arthur, where statistics tabulated from the 149 leading firms showed an advance of 0.4 poc.in their employees as compared with Oct. 1. The weekly salaries and wages distributed by these establishments, however, were rather lower, there being a decline of 0.2 p.c. in the montr: this was partily due to reduced overtime work. The latest average per employee was $\$ 45.37$, as compared with $\$ 45.66$ at Oct. 1, 1948, and $\$ 41.80$ at Nov. 1, 1947. Since then the index of employment in Fort William and Port Arthur has risen by 4.1 p.c.. and that of payrolls, by 13.6 p.c.

Bmployment increased at the date under review as compared with a month earlier, in construction and trade, but manufacturing was quieter, notably in the iron and steel group.

London.- Information received from 297 leading firms in London indicated a higher level of industrial activity at Nov. I than at Oct. ?, their staffs having been increased by 1.1 p.c. in the month. Manufacturing, building construction and trade afforded more employment at the date under review. The weekly salaries and wages disbursed at Nov. I by the comoperating establishments rose by 9.5 p.c. as oompared with Oct. 1. The most recent per capita figure was $\$ 39.60$, as compared with $\$ 39.44$ in the preceding report, and $\$ 35.43$ at the beginning of November, 1947. In the last 12 months, the index number of employment in London has mounted by 3.5 p.c. , and that of weekly payroll.s by $16 . ?$ poc.

Kitchener - Waterlco.- There was an increase in incustria? employment in Kitchenem Waterloo at Nov. I, due in part to greater activity in manufacturing, notably in rubber, textile and lumber plants, and in buil ding and trade. Statistics were compijod from 197 leading establishments in which the staffs were larger by one poco than at the beginning of October. The weakly salaries and wages showed an inportant advance, rising by 4.1 p.c. in the month. This increase partly resulted from heightened employment, but upward revisions in wage rates and overtime payments were also factors. The average earnings per employee amounted to $\$ 41.04$, as compared with $\$ 39.80$ at the beginning of October, and $\$ 37.46$ at Nov. 1, 1947. In the latter comparison, the index of emplcyment showed a decline of ?.8 p.c., but the index of aggregate werkly payrolls was higher by 7.8 p.c.

Winnipeg.- Industrial employnent in Wirnipeg showed considerable improvement at Nov. Ip when manufacturing was more active, particularly in the food and lunber divisions. There were also gains in omployment in building, hotels and restaurants and trado; the increases in the lastmamed were substantial. The combined working force of the 757 co-operating firms was higher by 1.9 p.c. at Nov. 1 than at Oct. 1 . This was accompanied by a similar percentage gain in the woekly salaries and wages distributed by these omplayers. The per capita figure showed little change, standing at $\$ 38.56$ at the first of October and $\$ 38.55$ at the beginning of November. The Nov. 1 . 1947, figure was \$34.21.

The index number of employment, at 168.0 , was 3.6 p.c. above that of 162.2 a year earlior. The index of payrolls in the 12 months has risen by 16.5 p.c.

[^2]Calgary. - Thore was an upward movement in omployment in Cal gary at tho boginning of November, when manufacturing was quieter than at Oct. 1 , but moderate improvement was noted in building and trade. The personnel of the 324 larger employers co-operating in the monthly survey increased by 0.6 p.c. as compared with Oct. 3. while their weekly salaries and wages advanced by two p.c. The average oarnings per omployoe were higher, standing at $\$ 40.74$ at the date under reviow, as compared with $\$ 40.20$ at the beginning of October, and $\$ 36.21$ at Nov. 1, 1547. In the last year, the index of omployment has risen by $3.7 \mathrm{p} . \mathrm{c}$., and there has been a gain of 16.3 p.o. in the index of payrolls.

Edmonton.- Industrial omployment in Edmonton at Nov. I was brisker than at the beginning of Octobor. Manufacturing showed littlo genoral change, but building and trade reported improvement. Data were compiled from 274 leading firms with a combinod working force excooding by 1.2 p.c. their staffs at Oct. 1. The reported woekly payrolls wer also higher, rising by throe p.c. in the month. The latest por capita figure, at $\$ 40.51$, was considerably above the Oct. 1 mean of $\$ 39.89$, and that of $\$ 34.72$ indicated at Nov. 1, 1947. Since then, the index of employment has increased by 15.2 p.c.. and that of weekly sataries and wages, by 31.6 p.c.

Vancouver.- There was a slight decline in industrial activity in Vancouver at the first of November, when manufacturing, cormunications, transportation, hotels and restaurants, and laundries and dry-cleaning plants showed curtailment in employment. The trend was upward, however, in builaing and trade. Within the manufacturing division, there were losses in iron and steel. lumber and vegetable food factories, with moderate advances in the animal food, textile and beverage groups. The 1,047 leading establishments from which returns were received showe a a general decrease of 0.2 p.c. as compared with Oct. 1. The latest index of employment stood at 238.1 , exceeding by eight p.c. the Nov. 1, 1447, figure of 220.4 . The weekly salaries and wages disbursed at the date under review by the co-operating employers were higher by two p.c. than at Oct. 1, while as compared with Nov. 1, 1947, there was an increase of 21.4 p.c. in the latest index of payrolls. The average per employee at the date under review was $\$ 42.76$, as compared with $\$ 41.86$ at the first of October; the per capita figure indicated at Nov. 1, 1947, was $\$ 37.97$.

Victoria.- Industrial employment in Victoria showed little general change at Nov. 1 as compared with a month earlier, according to data from 220 of the larger firms in the city, whose working forces were higher by 0.1 p.c. than at Oct. 1 . Building and trade were more active, while there was an insignificant lcss in manufacturing. Hotels and restaurants also released a few employees. The sums disbursed in weekly payrolls by these establishments at Nov. 1 were lower by 0.1 p.c. than at Oct. 1. The latest per capita earnings were $\$ 39.08$; the average at Oct. 1, 1948, was $\$ 39.16$, and that at Nov. 1, 1947, $\$ 36.28$. In the year, che index of employment in Victoria has fallen by 1.3 p.c., but that of weekly aalaries and wages has shown a gain of 5.9 p.c.

Relative Woight of Employment by Industrios as at Nov. 1. 1948.
$\begin{array}{llllllllll}100.0 & 51.4 & 4.8 & 4.0 & 2.3 & 8.9 & 12.0 & 3.3 & 13.5\end{array}$
Notel - The "Rolative Feight", as given just above, shows the proportion of omployees in the indicated induetry, to the total number of ill omployves reported in Canada by the firme making returns at tho date under review.

- Consisting almost sitiroly of hotels and restaurents and laundry and dry-oleaning plants.

TABLE 9.- INDEX NUMBERS OF EUPLOYNENT BY INDUSTRIES (AVERAGE 1926=100).

BIBLIOTMEQUE SZATISTIDUE CANADA

[^0]:    I/See explanatory notes on pages I and II.

[^1]:    1/This classification comprises the followings- irom and steel, non-forrous metals, electrical apparatus, lumber, musical instrumente and clay, glase and stone products. The non-durable group includes the remaining manufacturing industries mith the exception of lectric light and power.
    2/Mainly hotels, restaurants, laundrios and dry-cisaning plants.
    $3 /$ The November dete are subjeot to revision.

[^2]:    Regina.- The trend of industrial employment in Regina was favourable; the 182 loading omployers in the major groups who furnished statistics at Nov. 1 had increased their staffs by 0.9 p.c. since the boginning of October. Slight losses were indicated in manufacturing, and work on the streets and roads was also quieter, but improvernent was indicated in building and trade. The wookly payrolls disbursed by the co-operating firms were highor by 2.2 p.c. than at Oct. 1 。 The average earnings per porson amounted to $\$ 37.18$ at the date undor review, as compared with $\$ 36.72$ at Oct. I, and $\$ 33.25$ at Nov. 1, 1947. Since then, the index of employment has risen 5.1 p.c., and that of payrolls, by 14.6 p.c.

    Saskatoon.- Modorato curtailment in industrial omployment was noted in Saskatoon at Nov. I; trado omployod larger numbers of workers than at Oct. I, but manufacturing and construction wor quioter. The forces of the 154 establishments from which statistics wore received declinod by $1.2 \mathrm{p}, \mathrm{c}$. as compared with the beginning of October. The indicated wookly payroll.s wore lower by 1.7 p.c. The average per omployeo fell from $\$ 36.09$ in the precoding roport, to $\$ 35.91$ at the date under review; when it excoeded the per capita figure of $\$ 33.85$ indicated a year oarlier. In the 12 months, the index number of emplcyment in Saskatoon has decreased by 5.8 p.c., but that of payrolls has mounted by 0.7 p.c.
