## EXPLANAT ION OF THE METHOD USED TN PREPAR ING THE MONTHLY STATISTICS OF EMPLOYMENT AND PAYROLIS.

The monthly surveys of employment and payrolls extend to all branches of the following industries: manufacturing, logging, mining, commications, transportation, construction and maintenance, trade and finance; the establishments for which data are given under the heading "services" are chiefly hotels and restaurants and laundries and dry-cleaning plants. For practical reasons of collection and tabulation, the surveys are in the main limited to firms usually employing 15 persons and over. Firms reducing their staffs below this minimum are not necessarily remored from the mailing list. Establishments are asked to furnish data for all classes of employees irrespective of their functions in the business, but to exclude statistics for the owners. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different industries and areas.
1.- COVERAGE - The virtual limitation of the monthly surveys to establishments having 15 employees or more results in a relatively even representation of employment in the various provinces and in the larger cities for which data are segregated, but alco results in variations in the coverage of different industries, depending upon whether a given industry is ordinarily organized in large or small units of operation. Complete information respecting the distribution of the working population is available only at 10 year intervals, and sometime after the Census dates; comparisons of the data of the monthly surveys and those obtained elsewhere in the Bureau are complicated by the fact that the industrial classifications differ in several important respects. The distribution of the persons employed at June 1, 1941, by the cc-operating firms in comparison with the distribution of the wage-earners and salaried employees enumerated in the Census of June 1, 1941, was discussed in the 1944 Annual Review of Employment and Payrolis. This showed in the monthly enquiry, an industrial coverage of all employees enumerated in the Census which ranged from over $41 \mathrm{p} . \mathrm{c}$. in the hotel-and-restaurant and laundry-and-dry-cleaning group, and more than $47 \mathrm{p} . \mathrm{c}$. in trade, to over $93 \mathrm{p} . \mathrm{c}$. In manufacturing and nearly $97 \mathrm{p} . \mathrm{c}$. in mining. Differences in the industrial classifications of establishments and individuals contributed to an important extent to these disparities, exaggerating the high coverage in mining and manufacturing, and minimizing that in trade. The present coverage in the above-mentioned service divisions and in trade may be ostimated at 48 p.c. and 52 p.c., respectively.

It should be noted that the statistics of persons eroployed, as published in various tables in the monthly bulletins, do not represent estimates of the total numbers engagod in the specified areas or industries, but show the distribution of the workers on the staffs of the co-operating firms at the indicated dates, togetnor with the distribution of their weekly payrolls, and the per capita weokly earnings of such employees.
2.- THE QUESTIONNAIRE - From 1921 to 1941, the questionnaire used in collecting current data on employment called for a statement of. the number of persons at work on the last working day of the month. With the introduction of the statistios of payrolle in the spring of 1941, it became necessary to ask for information showing the numbers of employeer on the payrolls in the last pay periods in the month, to relate to the salaries and wages. The difference in the coverage of employment as a result of this change was considerable, especially in industries with high proportions of casual labour. In so far as was possible, adjustment in the records was made in 1941, to preserve the comparability of the data collected prior to the 8 pring of 1941 , and those thereafter collected. The inclusion of casual workers to a greater extent than was the case in the earlier surveys nevertheless constitutes an element of incomparability in the present statistics of employment and tnose tabulated prior to the institution of the complementary statistics of payrolls in April, 1941. The questionnaire now used asks employers to furnish data showing the gross earnings of their salaried employees and wage-earners in the last pay periods in the month, the employees and their earnings. to be grouped according to the duration of their pay periods, whether these be monthly, semf-monthly, fortnigntly, weekly, etc. The payrolls reported include amounts deducted for taxes, unemployment insurance contributions, etc. Cost-of-living allowances, incorporated in the basic wage-rates as from Feb. 15, 1944, are included, as was the case before their incorporation in the basic rates. Commissions and incentive and production bonuses are also included.
3.- THE PROCESSING - In the Bureau, the statistics of salaries and wages reported for any pertod exceeding a weok are reduced, for tabulation purposes, to the proportions which would be earned in one week in the period, the numerator of the fraction ordnarily used for this purpose

## EXPLANATION OF THE METHOD USED IN PREPARING THE MONTHLY STATISTICS OF KMPLOYMENI AND PAYROLLS. (Cont'd.)

boing six days, the standard working weok; the denominators of the fractions are the numbers of working days in the different pay periods, excluding only the Sundays. Where operations are continuous, the numerator of the fraction is seven, the cienominator being the total number of days in the pay period, including Sundays. In the case of omployees paid at annual or monthly rates, so that thoir earaings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the oarnings to a weokly basis, without rogard to the length of the calendar month. The sums resulting from these various calculations aro then aggregated to give the total amounts, which, on the average, would be paid for services rendered in one weok by the persons on the payrolls of the co-operating establishenents. The omployeos reported are not in all cases necessarily omployed for a period of a weok by one firm. Bmployers are urged to make a practioe of furnishing data oniy for tho last pay period in the month for their various olassos of omployees rather than to aggregate statistics for soveral pay periods. since the lattor mothod tends to oxaggerate the amount of duplication possible in the statistics of employment in cases where individuals may be employed by more than one co-operating establishment in a period of soveral meoks.
4.-THB TABULATION - The data tabulated monthly show the number of porsons drawing pay from the establishments furnishing returns at the given dato, and their weokly earaings, togetner with the numbers of employees and the payrolls of the same firms in the proceding month, and in the basic periods. The statistics of the first tabulation are preliminary, the re-tabulation of the statistics on the succeeding month's tabulation incorporating revisions in the roturns originally tabulatod, as well as reports recoived too lato for inclusion in the proliminary tabuiation.
5.- THA INDEX NUNBKRS OF EMPLOYNBNT - The index numbers represent the percentage relationship botweon the numbor of persons omployed by tho ostablishonts currently furnishing data and the number which they had omployod in the basic period. The number of workers employed in the basic period by firms which then operated but have sirice gone out of business are continued in the basic average figures, while firms or branchos opening for business since the basic period are tabulated with zero base figures. The basic averages of establishments which operated in the base period but have $\varepsilon$ inoe boen added to the mall ing list are incorporated in the basic figures from the date when their co-operation was first obtained.
6.- THB INDEX NUMBERS OF PAYROLLS - Shortly after the institution of the atatistios of payrolls, it became necessary to prosent the data in the form of inder numbers. The earliest period which could be adopted as a base was solected for the purpose, mamely, the week of June 1, 1941. The current disbursements are thus related to the sums expended in salaries and wages by the co-operating employers on or about June 1, 1941, as 100 p.c. To provide a measurement of the changes in omployment and payrolls from the establishment of the latter series, the monthiy indexes of employment are related to June 1,1941, as 100, in the tables giving the two sets of data. For all purposes apart from comparison with the statistios of payrolls, however, the indexes ompiled on the original 1926 base should be used.
7.- THE WBERLY EARNINGS - The average weokly earnings represent the division of the aggregate weokly salarios and wages reported by the co-operating establishments, by the number of their omployees in the sane pay periods; the index numbers of average weukly oarnings given in the table on page 4, are based on the averages reported in the wook of June 1, 1941, as 100.

Statistics of average hourly and weekly earnings of wage-earners for whom the larger employers keep record of hours worked are contained in the monthly bulletins on manhours and average hourly earnings, available from the end of 1944.

# THED BCEMBAR <br> TOGETHERWITH <br> INTHELASTWHKKINNOVMMBER, 19480 

| Dominion Statisticiant | Herbert Marshall |
| :--- | :--- |
| Director, Labour and Prices Division: | H. F. Greenway |
| Chief, Employnent Statistics Sectiona | M. F. K. Roughsedge |

Notos- In addition to the statistios of the present bulletin, other available data respectine the current labour situation are publishod in the Monthly Labour Gazette, the official journal of the Department of Labour. These comprise information ragarding the oparations of the Unemploment Insurance Coranission, including statistics of the Employnent Service, and statoments showing unomployment as reportod quarterly by trade unions

GENERALSUMMAIRY.

> MPLOMMTY

Industrial employment at the beginning of December showed a further slight inoroase, amounting, to 0.2 p.c. This gain was the smallest indicated at Dec. 1 in any year since 1940. Prior to thon, the trond indicated at jec. 1 in the period since 1920 had generally been downard. Soasonally heightened activity in logeing and retail trade was largely responsible for the latest advance. Curtailnent was indicated, however, in nanufacturing as a whole, and in mining, transportation, construction and maintenance and hotels and restaurants. For the most part, these lossos were also soasonal in character.

Within the manufacturing division, (in which the general deduction was slight), there ere rather marked changos in several industries. This was notably so in tho food, lunber and pulp and paper groups, where there were considerable declines, and in toxtile, tobacco and iron and steel plants, in which fairly large advances in employment were indicatod.

Acoording to information received by the Dominion Bureau of Statistics from 19,561 leading industrial establishnents, the slight rise, on the whole, in the number of persons on their worling forces at Dec. 1 as compared with a month oarlier was accompanied by an increase of $0.4 \mathrm{p} . \mathrm{C}$. in their disbursenents in woekly sularies and wages.

Based on the 1926 average as 100 , the genoral index number of employment at Dec. 1 , 1948, reached a new all-time maximura, standing at 204.1, as compared with 203.6 in the preceding month, and 199.6 at Doc. 1,1947 . The indexes at Dec. 1 in 1946, 1945, 1944, 1943 and 1942, were $185.7,173.2,185.7,190.5$, and 186.5 , respectively. In the last 12 months, there has been a rise of $2.3 \mathrm{p} . \mathrm{c}$. in the index number of employment. This aurance was smallor than that indicated in a similar comparison in an y other month in 1948.
(Tho latest figures ars aubjact to revision).

 and stons products. The non-durablo group inolude the romining manufaturing industries, es isted in Tables 1 and 9 , with the oxception of olectrio Iight and power.
2/Mainly hotele and restmurnats and laundry end dry aloaning plants.

The aggregate weekly salaries and wages $1 /$ disbursed at Dec, 1 by the larger employers in the eight leading industries were 0.4 p.c. higher than their payroll expenditures at the begiming of November. The index of payrolls, based on June 1, 1941, as 100, stood at 218.7 , as compared with 218.0 at Nov. 1, 1948, and 193.9 at Dec. 1 , 1947. In the last 12 months, the index of payrolls has advanced by $12.8 \mathrm{p} . \mathrm{c}$. The latest figure of payrolls is the highest in the record of about $7 \frac{\pi}{2}$ yoars.

The per capita weekly earmings also showed a slight increase at the date under review, when the average was $\$ 42.20,2$ as compared with $\$ 42.15$ at Nov. 1 ; this is the smallest advance betwen any two consooutive nonths in a fairly lenthy period, a fact which is associated with the changes in the industrial distribution indicated at the beginning of December. A year earlier the mean had boen 338.28 , while in 1946, 1945, 1944, 1943, 1942 and 1941, the Doc. I averages wore 333.95, 32.63, 332.19, 31.61, $\$ 30.06$, and 227.32 respectively. The most recent capita ricture exceeds any.previously indicated. The payment of higher wage-rates in a number of industries and establishmonts, together with slightly groater industrial activity, contributed to the increases in the figures of payrolls and average earnings at the first of Docember.

Including the statistics received from financial institutions, the latest monthly inquiry into employnent and payrolls shows that the total number of employees on the payrolls of the leading firms was greator by 0.2 p.c. than at the beginning of Novombor. The amounts distributed in wookly salarios and wages to these persons advanced by 0.4 p.c. The avorage weckly earnings of the workers for whom monthly data are available in the nine main industrios, including finance, wore ${ }_{8} 42.08$, us compared with $\$ 42.03$ at the begiming of November, 1948, \$38.24 at Dec. 1, 1947, 334.02 at Dec. 1, 1946, \$31.75 at Dec. 1, 1945, \$32.20 at Dec. 1, 1944, and \$31.61 at Dec. 1, 1943.

Table A on page 2 sumarizes the latest statistics of employment and payrolls for the leadinf industrial groups, the provinces and comomic areas, and the 20 leading industriul cities, and gives comparisons as at Nov. 1, 1948, and Dec. 1 in 1947 and 1946. Table B on page 4 contains a monthly record for the eight and the nine loading industrier, and for manufacturing, showing the movonents of employment and payrolls from 1944. The indexes of payrolls are based on the anounts disbursed by the cooperating firms at June 1, 1941, as 100 ; to facilitate comparisons of the trends of employment and payrolls, the index numbers of ernployment in these tables have beon convorted fron their original base, $192 \varepsilon=700$.

The table on page 4 shows that in the period for which data aro available, there has boen an increase of 33.7 p.c. in the number of persons in recorded employment in the eight loading industrial groups (listod in the table on page 2), while the aggregate weekly salaries and wages of these parsons have rison by $118.7 \mathrm{p} . \mathrm{c}$. Including finance, the gain in employment fron June 1 , 1941, to Dec. 1 , 1948 , has amounted to 34.1 p.c.e and that in payrolls, to 117.7 poc. These increases are the maxirnum in the recordo The explanation given in eariee builetins for the ralatively greater rise in the roported sularios and wages than in the numbers employed nay again be stated; - (1) the payment of higher wago-rates in extremoly large numbers of industrios and ostablishments, in addition to the general increase resulting from the compulsory payment of cost-of-living allowances to the majority of vorkers during the war; tho ratos at which these bonuses were paid wore increased on more than one occasion before they were absorbed in the basic wage-rates as from Feb. 15,1944 , (2) the progressive up-grading of onployeos as

For estinates of total expenditures in wages, salarios and supplementary labour incone, see the bulletins "Monthly Estinates of Labour Income" now issued by the Dominion Bureau of Statistios.
2/ The attention of those interestod in hourly carminfs and woekly wages is drawn to the statistics published in the monthly bulletins on man-hours and average earnings.

(The latest figures er subject to refieson).

they gained experience in thair work, and (3) reductions in tho proportions of women workers, particularly as compared with the period of the war.

The index of employment in manufacturing during the poriod for which monthly statistics of payrolls are availabla has advanced by 23.8 p.c., end that of aggregate weokly payrolls, by 108.1 p.c.e while the woekly carnings por omployoe roported by loading establishments have rison by $70.9 \mathrm{p} . \mathrm{c}$. In tho included non-manufacturing industries taken as a unit, the index of omplomont at Dec. I showed a gain of 46.6 p.c. from tho comencement of the racord of payrolls. The index of aggregate woekly salaries and wages in the included non-manufacturing classes was hicher by 131.6 p.c. than at June 1, 1941.

In the last 12 months, the index of employment in manufacturing has advanced by 1.4 p.c., accompanied by an incroase of $12.9 \mathrm{p} . \mathrm{c}$. in the weekly payrolls. The avorage weekly aamings of the persons employed by the lurger manufacturing concerns have risen by 13.4 p.c. A comnosite indox of omploynent for the non-manufacturing industries for which data are availabla shows a fain of $3.3 \mathrm{p}, \mathrm{c}$. in tho 12 months, while the index of wookly payrolls in the some group of industrios has rison by $12.6 \mathrm{p} . \mathrm{c}$. in 12 months' comparison.

In rogard to the marked variations in the avorafe earnings of workers in the difforent industrial classes, (shown in Tables 1 to 5 at the end of this roport and in Table $A$ on page 2), it must again be pointed out that the sox distribution of such persons is an important factor, frequently associated with variations in the ago groups. In general, the ferale workors tond to bolong in the younger ago classes, in which the earnings are naturally lower than among those of greator experience. The matter of short-tine or overtime may also considerably influence the roportad aggrogatos and averages, which likewiso raflect variations in the extent to which cusual labour is used; the degree of skill generally requirad of workers in the industry is of course a factor of outstanding importance.

## THE SEX DISTRIBUTION OF THE PERSONS IN RECORDED DYPLOMASNP.

The slight increase in employment in leadinc industrial establishments at Dec. 1 as compared with a month earlier took place among wonen, whose numbers rose by 1.9 p.c.; their male employees, howaver, declined by 0.2 p.c. Soasonal filuctuations in the different industries were largely responsible for the variation in the trends of employment for workers of the two sexes. The ratio of wonen per 1,000 persons reported in the oight major industrial divisions was 212 at Dec. 1。as compared with 209 at the beginning of Novenber; at Dec. I in 1947 and 1946, the proportions of women were 212 and 221 per 1,000, respectively.

There woro pronounced incraases in emplomont for mon as compared with Nov. 1 in logging camps and in retail trade. On the other hand, construction work released many men, and there were also losses in manufacturing. mining, transportation, and hotels and restaurants. In many industries, the changes indicated were soasonal in character.

Among women, there was substantial seasonal curtailmont in employmont in animal and vegetable food factories, and in lumber mills, but textile, tobacco, rubber, printing and publishing, beverage, iron and steel. electrical apparatus, non-ferrous metal and other factories reported the amployment of greater numbers of fomale wageoarnars and salariod employees. Among the non-manufacturing classos, the trend was docidedly upward in retail trade, in which tho roported number of womon rose by 9.3 p.c. Construction, transportation, hotels and restaurants and wholesale trade, on the other hand, showed doclines.

In the nine major industries, the co-operating firms reported a general incroase of 0.2 p.c. in their staffs since Nov. 1; among womon, the gain amounted to 1.8 p.c, but the loss among men was $0.2 \mathrm{p}, \mathrm{c}$. The ratios in this group of industrius woro

Table C. - The Sex Distribution of the Forkere in Recorded Bmployment in the Provinces, the leading Cities, and the Hine Major Industrial Groups at Deo. 1, 1948, with Comparisons as at Nov. 1, 1948 and Dec. 1, 1947.

| Goographical and Industrial Unit | Dec. 1. $19488^{3 /}$ |  |  |  |  | Nov. 1, 1948 |  | Dec. 1, 1947 |  |

[^0]777 men and 223 women por 1,000 omployces, as compared with 781 and 219 , respectively, at Nov. 1, 1948, and 778 men and 222 women por 1,000 workers reported at Doc. 1, 1947.

As compared with Dec. 1, 1947, the indicatad number of men in the nine major industrial divisions showed an advance of 2.3 p.c.., and there was a riso of 2.5 p.c. in the reported female omployoos.
TABLBS.

The latost statistics of employment and payrolls are sumarized in Table $\Lambda$ on page 2, while Tablos 1 to 5 at tho end of this roport contain the latost data of employment and payrolls, togother with index numbers as at Nov. 1 and Doc, 1, 1948, and Dec. 1, 1947. In these tables, the index numbers of emnloyment, calculated on their original base, $1926=100$, havo boen convorted to June 1, 1341, for comparison with the data of aarnincs. For all feneral purposes, apart from conparison with the payroll statistics, howovor, the indox numbors of amploymunt in T'ablas 6 to 11 , based cn 19\%6"100, should. be usad.

Tablo C on page 6 sumarizes for the provinces, the citios and the major industrial divisions, the latest statistics of employnont, showing, the numbers and proportions of male and female workers reported at Dec. l, with comprisons iron ourlier surveys; in this table, the provincial and city figuros givon aro those for tho nine loading industrios, including tho employees reported in financial institutions, oxcluded in mast casos from the data given in the table on nage 2. Table 12 shows tho sex distribution in a considerablo list of industrios in the Doninion as a whole at the date under review, with comparative statistics as at Nov. 1, 1944, and Dec. 1, 1947.

Manufacturing.
Thare was a further slight recession in employment in manufacturing on the whole at the beginning of Decmber, according to information rocoived from 9,585 leading establishments, in which tho employoes doclinod by 0.1 p.c.as compared with Nov. 1. Tho weokly salaries and wages disbursod by these factorios, however, showed an advance of $0.6 \mathrm{p} . \mathrm{c}$. , largely as a result of upward adjustments in the wage rates, togethor with longer working hours in certain plants.

The indox of omployment in manufacturing, based on the 1926 avorage as 100 , stood at 208.0 at the date under review; this was fractionally lower than the Nov. 1 figure, but was higher by 1.4 p.c. than that of 205.1 at Dec. 1, 1947. The maximum index for Dec. 1 was in 1943, when the figure, at 230.2 , was 11 p.c. above that indicated for manufacturing in the most recont monthly survey.

Although the situation fenerally showed only slight chance as conpared with a month oarlier, there were fairly large advances in some proups of manufacturing, with similar doclinas in othors. The most pronouncod lossos were roportod in tho dairy and fish products $[$ roups, veretable food canning, lumber and pulp and papar mills, in which they wore seasonal in charactor. Curtailment on a maller sealo was also indicated in nonforrous notal and miscellaneous non-mutalic aincral works. On tho other hand, there wore considorable incrouses in iron and stecl, textile, tobacco and olectrical apparatus factorios, together with moderate gains in tho meat products, chocolate and confectionery, loather, printing and publishing, rubbor, bevorage, and clay, glass and stone divisions. In sevaral cases, the improvomont was seasonal.

Payrolls in Manufacturing - Based on tho woekly salarios and waces reported by the co-oporating man ufacturors at Junc 1, 1941, as 100, the indox numbor of payrolls at

PAYRELIS-MILIONDOLLARS

Dec. 1. was 208.4. as compared with 207.1 at the bogiming of Novomber, 1948, and 184.6 at Dec. 1. 1947. Thore was thus an increase of 0.6 p .0 . during the month, and of 12.9 p.c. in the 12 months. Tho latter gain was accompanied by that of 1.4 p.c. in the index of enploynent." Although the lavel of employnont at the date under review was lower than during the period of intonsifiod activity in manupacturing during the war, the most recont index of payrolls is the highest in the rocord, dating from the spring of 1941.

The indicated wookly ournings at Dec. I averaged \$43.70, a new maximurn as compared with $\$ 43.38$ at Nov. 1. 1948 , and $\$ 39.25$ at Dec. 1, 1947 . At that date in earlier yoars for which data are availables the per capita figures were as fullows:- 1946, 334.54; 1945. 332.44; 1944, 333.35; 1943, \$32.86; 1942, \$31.17; and 1941, \$28.15. In 1939 the annual average per veok in tho largor establislunents was wỉ. 11. Since June 1, 1941. when the monthly series on weekly salarias and warges was institutode tho averaç Garnings of workers in manufacturing establishments usually employing 15 persons and over have risen by 70.9 p.c.

The Sox Distribution in Manufacturing - $\Lambda$ difforence in the tronds of employment for men and vomen was indicated in manufacturing at the beginning of Decembor. The plants furnishing data then roported an incroase of $0.4 \mathrm{p} . \mathrm{c}_{\mathrm{o}}$. in the number of their female omployees, with a decling of $0.2 \mathrm{p} . \mathrm{c}$. arnong their nale workers, a.s compared with Nov. 1. These changes, which were partly due to seasonal couses, only sliphtly altored the ratios of men and womon which stood at 771 per 1,000 and 229 per 1,000, rospectivaly, at Dec. 1 , as compared with 772 and 228 per 1,000 , rospoctivelv at Nov. 1. A year earlier, the proportions had been 770 men and 230 wonen per 1,000 persons on the staffs of loading manufacturers, whilo at Dec. 1. 1946, the ratios were 763 men and 237 women por 1,000 persons in recorded employment.

Among men, there were considerable advancos in employment as compared with Nov. I, in tobacco, toxtile, electrical upparatus and iron and stool plants, but the trend was downard in lumber, animal and vegetable food, pulp and paper and non-ferrous metal factories. Among women, activity increased in luathor, toxtile, printing and publishing. rubber tobacco, beverage. olectrical apparatus and non-ferrous metal plants. On the other hand, there were large lossos in certain branches of animal and vogetable food processinge with smaller declinos in lumber and some other classes. In many casos, tho changes wore soasonal in charactor.

In the last 12 months, an increase of some 1.6 p.c. in the number of men was reported by leading manufacturers at the beginning of December, together with an advance of approximatoly $0,9 \mathrm{p} . \mathrm{c}$. in the number of fomalo employees.

Lorging: Seasonal activity in bush work resulted in substantial additions to the personnel of the leading logging operators, 680 of which reported a gain of 7.4 p.c., as compared with Nov. l. This incroase was much smaller than that indicated at Deo, I, 1947. and was also loss-than-average for that dato in the experionce of the period since 1920. This was partly due to unfavourable physical conditions for tho industry in certain areas. The index of employment, at 345.3 , was $14.8 \mathrm{p.c}$. below that of 405.2 at Doc. 1, 1947, the highest for that date in the rocord. In the last 12 months, thero has been a decline of 17.6 p.c. in the index of parrolls. The mesty sularios and wapes disbursed bv the co-operating firms at the latest date wore higher by ? 5 p.co than at the beginning of November, 1948。

The per capita weokly carnings rose slightly. from $\$ 37.92$ in the last return, to $\$ 37.95$ at the date under review, when the mean was lower than that of $\$ 39.20$ at Dec. 1,

[^1]
1947. Unsatisfactory weather during the prosent wintor was al so a factor in the falling-off in the latter comparison. In considering the indicated aggregate and average eamings in logfing, it must bo recalled that they do not include the value of board and lodging, frequently a part of the remmeration of workors enfaged in bush oporations. The high labour turnover in may camps also affects the reportod carnings. These vary to a sirmi Cicant extent, the avorage in Mritish Columbia boing decidodly higher than in any other province (see Table 2 towards the ond of tljes bulletin).

1月ining.- Coal mining wes bristor at Doc. 1, 1948, but there were losses in employmont in the extraction of other non-metallic nincrals as conpared with a month oarlier; the metallic ore group was also quictor. Tho 672 loading mining oporators whoso roturns were tabulated had roducad their staffs by 0.4 p.c. as comparod with the boginning of November. Tho index in the mining group was 180.8 , exceoding by $5.7 \mathrm{p} \cdot \mathrm{c}$. the Dec. 1 , 1947, figure of 171.0 . In the 12 months, the index of payrolls has risen by 18.5.p.c. The salarios and wafos disbursud by tho co-oporating omployers at the boginning of Decamber ware higher by 0.1 p.c. than at Tov. 1. Tho per capita weekly aurniness were docidedly higher, avoraging \$51.81, as comparod with 51.41 in the preceding period of obsarvation. The Jec. 1 s 1947, figure had been \$46.19.

Commications. - Employnent in the telegraph and telephone division showed a slight falling-off, the indox number standing at 182.6 , as compered with 182.7 at Nov. 2. The reportod weckly payrolls foll by 0.3 r.c. in the same comparison. The averare oamines por armloyeo declined from $\$ 39.11$ at tinut date, to $\$ 39.01$ at tho dute undor review; the Doc. I, 1947, par canita figure had boen $\$ 35.60$. The nost rocont index number of employment was 9.7 p.c. higher than that of 166.4 a yoar oarlior, sinco when there has been a grain of $12.5 \mathrm{p}, \mathrm{c}$. in the indox of payrulls.

Transportation. - The trond in transportation was slightly downard at the beEiming of December, when the index stood at 144.2, as compared with 144.6 a month carlior, and 140.0 at Doc. 1, 1947. There was an incraase as compared with Nov, 1 in shipping and stevedoring, but local transportation and storage and stuan railwny operatior relaased somo employeas. The weckly salaries and wagos distributed by the roporting ostablishmonts were lass by 0.8 p.c. than at Nov. 1 , but the most recent indox number of pryrolls was higher by 16.9 p.c. than in the woek of Doc. 1, 1947. The latest figuro of average weekly arnings was $\$ 51.47$, being lower than the Nov, I avarare of $\$ 51.75$, but higher than that of $\$ 45.41$ at Dec. $1,1947$.

Construction and Maintenance. - Phero was an important satsonal racossion in this division. Building, highay and railway construction and maintonance roported lowered activity. Data wore receivod from 2,533 of the largor onployors whose working forces declined by 4.1 p.e. as compared with the bofinning of November. The weekly salarius and wages paid by those contractors wore less by $4.7 \mathrm{p} . \mathrm{c}$. Tho por capita arnings of their employees stood at $\$ 40.37$ at Dec. 1 , as comparad with $\$ 40.62$ at tho beginning of November, and 736.46 at Dec. 1, 1947. In considerjng the averages in this incustry, it should be recallod that large numbers of casual and unskilled workors are employed, as well as many hifhly skilled trudasnon.

The Dec. 1 general inlox for construction, at 184.7 , was 8.3 p.c. higher than that of 170.5 at the berinning of Decombor, 1947. This incroase in the year was accompanied by that of $20 \mathrm{p} . \mathrm{c}$. in the index numbor of payrolls. It may also be noted that the index numbers of omploynent and payrolls in building construction havo rison by 13.4 p.c. and 33.5 p.c.e respoctivoly, in the last 12 months, while the averafo wookly earnings in that branch of construction have mounted by 8.4 p.c. Tho Doc. 1, 1948, per capita figura was \$44.05.

Sorvices. - Lowered activity was indicatod in the service industries for which monthly data aro available, there boine considerablo curtuilmont in hotels anc restaurants, with small losses in laundrios and dry-cloaning, establishments. Twelve hundrud and forty-two leading employers in the branchos of this group represented in

## EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS INDUSTRIES OTHER THAN AGRICULTURE

The arve is based uponthe number, of employees at work at the first day of the nonth as indicaled by the firms reporting in compacisor with the average employment they afforded during the calendar year 1926 as 100 . Curves axe plofted for 1925, the year of maximim industrial activity; for 1933 , wher employment was at its minimum in The recard. since 1920, and forthe years since 1938
the survey showed a falling-off of 1.3 p.c. in their porsonnel as compared with Nov. 1. The weokly salaries and wages which they distributed at the date under review, on the other hand, mounted by 0.3 p.c.

In the last year, there has been an advance of $3.7 \mathrm{p} . \mathrm{c}$. in the index number of employment, while that of payrolls has showm a gain of 12.4 p.c. The averago weekly earnings were $\$ 27.28$ at Dec. 1 , and $\$ 26.85$ at Nov. 1 , 1948 , as compared with $\$ 24.96$ at Doc. 1, 1947. Attention must again be dram to the fact that in hotels and restarants, as in logginf many of those employed receive board and lodging as part of their remuneration. Fimployes the corner division constituted about 65 p.c. of the total reported in the service division as a whole at the berinning of Decomber.

Trade. - The seasonal expansion in trade was slightly below-normal for Dec. $l_{\text {, }}$ according to the experionce of the years since 1920. The 3,874 leading emnloyers cooperating in the last survey had incraased their staffs by 3.9 p.c. as comparad with Nov. 1. Many of those added to the forces wore part-time workers. The weakly salaries and wages reported at Dec. 1 exceeded by 2.9 p.c. the sums disbursed by the same firms at the beginning of November. The per capita earnings sasonally declined, standing at $\$ 35.18$, as compared with $\$ 35.50$ in the preceding return; the figure at Dec. 1, 1947, had been lower, at $\$ 32.06$.

The index number of employment in trado at Dec. 1, 1948, was 239.4, being 4.9 p.c. above that of 228.3 at the same date in 1947. This gain was accompanied by rise of 14.6 p.c. in the index of payrolls.

Financial Institutions. - The 1,022 financial institutions whose returns were tabulated employed 0.3 p.c. more persons than at Nov. l. The weekly salaries and wages paid by these ostablishments at the date under reviev were higher by 0.5 p.c. The average earnings of their omployees stood at $\$ 39.16$, as compared with $\$ 39.08$ at Nov. 1 , 1913, and 37.36 at Dec. 1, 1947. The index of employment in financial institutions, at 166.1 , was higher by 4.9 p.c. than that of 158.1 at Bec. 1, 1947, while that of payrolls was hicher by 9.7 p.c.

THE SITUATION AS REPORTED BY THE LARGER FIRMS I／IN THE ECONOMIC AREAS．
Industrial employment at the beginning of December was in greater volume than at Nov．I in Nova Scotia．New Brunswick，Quebec，Ontario，Manitoba and Alberta，while declines were indicated in Prince Edward Island，Saskatchewan and British Columbia。 In most areas，the changes were generally moderate．The most important reduction was that of 2.5 p．c．in British Columbia，while the largest percentage increases took place in Ontario and Nova Scotia．

The aggregate weekly salaries and wages reported by leading establishments in the major industrial divisions were higher than at Nov． 1 in all provinces except Manitoba，Saskatchewan and British Columbia；in all areas，the latest index numbers of payrolls were higher than at Decol，1947．The per capita earnings indicated in Nova Scotia，Manitoba，Saskatchewan and British Columbia at Dec．I were slightly lower than at Nov． 1 but increases in that comparison were elsewhere recorded．In all provinces，the general averages exceeded those reported at Dec． 1 in 1947 and earlier years．

Maritime Provinces－On the whole，there was a gain in employment in the Maritime Area at Dec．I in accordance with the movenent indicated annually at that date in the last seven years．Heightened activity was noted in Nova Scotia and New Brunswick，but there was a falling ooff in Prince Edward Island。 Information was furnished by 1,418 leading employers in the major industrial divisions in the Maritime Provinces，whose working，forces increased by $l_{0} 1$ p．c．as compared with the beginning of November．The latest index of employment was 197．1，as compared with 192.3 at Dec．1， 1947.

Manufacturing in the Maritime Provinces as a whole showed curtailment，there being losses in the animal food，lumber and pulp and paper divisions；the general decline in manufacturing amounted to 1.5 p．c．Among the non－manufacturing industries， logging，mining，transportation and retail trade afforded considerably more employment， but the construction and maintenance group was seasonally slacker．

The salaries and wages paid by the reporting firms at Dec．l，for services rendered in the preceding week，rose by 1.3 poc．as compared with their Nov． 1 disbursements．The per capita earnings of their employees advanced from $\$ 37.09$ in the last report，to $\$ 37.18$ at the date under review．The average at the same date in 1947 had been $\$ 33.73$ ．In the last 12 months，the index of payrolls in the Maritime Provinces has risen by $13.1 \mathrm{p}, \mathrm{c}_{0}$ ，and that of employment，by $2.5 \mathrm{p} . \mathrm{c}_{\mathrm{c}}$

Quebec：－The index number of employment in Quebec showed a small advance， rising from 207．1 at Nov． 1 to 207.5 at Dec．1．These figures are computed from information from 5，190 leading firms in the eight major industrial divisions．Con－ siderable expansion took place in logging，in which the seasonal increase of 10.8 p．c． was not equal to that reported at Dec．1，1947．There were also important seasonal gains in retail trade．On the other hand，manufacturing，steam railway operation， construction and maintenance and hotels and restaurants showed curtailment．Within the manufacturing division，animal food，lumber，pulp and paper，chemical and non－ ferrous metal plants reported lowered employment，but substantial improvenent was noted in textile factories．The general advance in industrial employment in this province conforms to the seasonal movement indicated in the early winter of immediately preceding years．

The amounts disbursed in weekly salaries and wages by the co－operating establishments at the beginning of December were higher by 0.4 p．c．than the sums they had paid on or about Nov．l．The latest per capita earnings of their employees were $\$ 40.40$ ，as compared with $\$ 40.33$ at Nov．1，1948；the Dec。1，1947，average was $\$ 36.82$ 。 The index number of employment at the date under review was only slichtly above that I／See explanatory notes on pages I and II．
of 205.6 at Dec． 1 of the year before，but the index number of payrolls has risen by 10.7 p．c．in the 12 months．

Cntario．－Industrial activity in Ontario showed continued but slight expansion at Dec．l，1948．Statistics were tabulated from 7，868 leading employers，whose working forces rose by 0.8 p．c．as compared with Nov． 1 ．This gain was smaller than that which had been reported at Dec．1，1947．The weekly salaries and wages paid to the persons in recorded employment at the date under review were higher by l．l p．o． than in the week of Nov，1，1948．The latest per capita figure was \＄43．63，as compared with $\$ 43.49$ a month earlier，and $\$ 39.63$ at the beginning of Decenber， 1947. The index of employment stood at 210.2 ，as compared with 208.6 at the beginning of November，1948，and 205.0 at Dec．1，1947．The latest index of payrolls was 12.9 p．c．higher than that indicated 12 months earlier，while the gain in the employment index amounted to 2.5 p．c．

Manufacturing in Ontario afforded more employment than in the preceding period of observation．There were large advances in iron and steel plants，with smaller gains in leather，rubber，textile，tobacco，clay，glass and stone，electrical apparatus and miscellaneous manufactured product factories．On the other hand，the animal and vegetable food，lumber，pulp and paper and miscellaneous non－metallic mineral product divisions reported contractions which in most cases were seasonal in character．In the non－manufacturing industries，improvement was noted in logging and trade．Mining and communications showed little general change．Transportation， construction and hotels and restaurants released employees，the losses being seasonal．

Prairie Provinces．－Moderate gains，on the whole，were noted at Dec． 1 in the Prairie Provinces；the movement was upward in Manitoba and Alberta，but downward in Saskatchewan．The general advance in the area was in accordance with the seasonal trend indicated at the beginning of December in recent years，althouph the increase was below－average．Data were received from 2，662 leading emplovers whose staffs exceeded by 0.2 p．c．，the number they had employed at the beginning of November． On the other hand，the weekly salaries and wages distributed by these establishments declined by $0.4 \mathrm{p} . \mathrm{c}$ ．in the month．The loss was partly due to reduced working hours in construction and maintenance；changes in the distribution of the reported emplovees also contributed to the lower total at the date undor review．The per capita earnings fell from $\$ 42.80$ at Nov．1，to $\$ 42.56$ at Dec．1， 1948 ，but the average was then substantially higher than that of $\$ 37.90$ at Dec． 1 ，1947．In the last 12 months，the index of industrial employment in the Prairie Provinces taken as a unit has increased by 5.1 p．c．，to 180.5 at the date under review，while there has been a gain of 18.1 p．c．in that of weekly salaries and wages．

Expansion as compared with Nov． 1 was recorded at Dec．1，1948，in logging， coal mining and trade，but there were declines in other branches of mining，in transportation and in construction and maintenance．The seasonal contraction in the last－named was considerable．Manufacturing showed little general change；within this division，there were increases in animal food，printing and publishing and iron and steel plants．Lumber，vegetable food processing and clay，glass and stone factories， however，showed seasonal losses．

British Columbia．－Curtailment in emplovment was indicated at Dec。l by the larger establishments in the major industrial divisions in British Columbia，where information received from 2,420 leading firms showed a reduction of $2.6 \mathrm{p}, \mathrm{c}$ 。 in the number of their workers as compared with Nov。 l，with the same percentage decrease in their weekly salaries and wages．Curtailment in food and lumber factories resulted in a considerable falling－off in employment in manufacturing as a whole，in spite of slight increases in many other branches of the industry．amone the non－manufacturing classes，trade reported improvement，while logging，mining，transportation，building and highway construction and maintenance，and hotels and restaurants released employees．

The weekly earnings of the persons on the payrolls of the larger industrialists averaged 44．99 at Dec．I，1948，as compared with $\$ 44.99$ at Nov．I and $\$ 40.95$ at Dec． 1，1947．Standing at 206．7，the latest index number of employment was hirher by two poc．than that recorded a year earlier，since when the index number of payrolls has risen by 12.1 poco

## THE SITUATION AS REPORTED BY THE LARGER FIRRS $1 /$ IN CERTAIN CITIES．

The following paragraphs deal briefly wi th the situation reported at Dec． 1 by employers in cities having populations of 35,000 persons and over．

Halifax．Considerable expansion in industrial activity was showm in Halifax at the beginning of December．Manufacturing and construction afforded rather less em－ ployment，but seasonal improvement was noted in transportation and trade．The gain in the former was large．Statements were received from 267 leading firms whose employees increased by 5.9 poco as compared with Nov．1．There was the same percentage rise in the weekly salaries and whes which they disbursed．The average earnings per emplovee were $\$ 33.94$ ，as compared with $\$ 33.95$ at Nov．1，and $\$ 31.91$ at Dec。1．1947。 Since then， the index numbers of employment and weekly payrolls in Halifax have advanced by 6.4 p．c．and 12.9 p．co．respectively。

Saint Johno－There was no general change in the level of industrial employment in Saint John at the beginning of December，according to data fumished by 192 of the larger establishments．The index number was the same as at Nov。1，but was 2.2 poc． lower than at Dec．1，1947．Manufacturing was quieter，particularly in the lumber and vegetable food divisions，and construction also released workers．Transportation and trade，however，showed seasonal improvement．

There was an advance in the weekly salarles and wages paid hy the co－operating firms at Dec．$I_{\text {，}}$ when their disbursements rose by $l_{0} 2 \mathrm{p}_{0} \mathrm{c}_{0}$ as compared with the be－－ ginning of November．The per capita weekly earnings of their employees were \＄34．24 at the date under review，as compared with $\$ 33.83$ at Nov。 1 ；the average at Dec。1，1947， was \＄31．05．In the last 12 months，the index of payrolls has risen by nine p．c．

Montreal．－Industrial activity in this city continued to expand．There were considerable gains in employment in manufacturing，transportation，building and trie． Within the manufacturing division，textile，iron and steel and non－ferrous metal factories showed improvement．Infomation was received from 2，947 leading employers in Montreal，whose staffs were larger by 1.3 poco than at Nov．1．Their weekly pay－ rolls increased by $l_{.9}$ poco in the month．The latest per capita figure was $\$ 41.22$ ， as compared with $\$ 40.97$ at Nov．1，1948，and \＄37． 10 at Dec．1，1947．The index of em－ ployment，at 192.5 at the date under review，was 3.7 poc．above that of 185.8 at the beginning，of December 12 months earlier，since when the payroll index has risen by 15.2 poc。

Quebec City－There was a moderate recession in emplovment at Dec．I in the major industrial divisions in quebec，where data received from 356 leading firms in－ dicated a loss of one poc．in their working forces as compared with the beginning of November．Their weekly salarios and wages were also lower，falling by lof poco at Dec．1．The average earnings declined from $\$ 55.04$ at Nov．1，1948，to \＄34．88 at Dec． I，as compared with $\$ 32.69$ paid on or about the same date in 1947．Manufacturing showed curtailment at the beginning of Decomber，when employment in leather，pulp and paper，textile and iron and steel plants was quieter than at Nov。1。Construction and hotels and restaurants also afforded rather less employment，while seasonal improve－ ment was indicated in trade．

[^2]The index of employment at Dec. 1, 1948, stood at 200.0 , differing little from that of 199.7 recorded at the same date a year earlier. In the 12 months, there was an increase of 6.6 poco in the index of weekly payrolls.

Sherbrooke. - Employment in this city showed improvement at the beginning of December, when 120 of the larger establishments increased their staffs by 4.3 p.c. as compared with Nov. 1. The trend was favourable in manufacturing, notably in the textile group. The changes in the non-manufacturing classes were small. The weekly payrolls reported at the date under review were 6.2 poc. higher than the disbursements of the same firms at Nov. 1 , when the per capita earnings of their omployees, at $\$ 34.86$, were also below the latest average of $\$ 35.47$; the mean at Dec. 1, 1947, had been $\$ 32.54$. Since then, the index of employment has risen by 2.7 p.c.os and that of payrolls, by 12.1 p.c.

Three Riverso- The trend of emplovment in Three Rivers was downward at the first of December, when there were reductions in mafacturing, mainly of pulp and peper, and in transportation。 Returns were furnished by 107 leading establishments, in which the staffs decreased by 3.2 p.c. as compared with Nov. 1 . The weekly salaries and wages disbursed by these employers declined by 3.3 p.c. in the month. The averace per employee fell slightly, from $\$ 41.69$ at Nov. 1 , to $\$ 41.66$ at Dec. 1 , when the figure considerably exceeded that of $\$ 37.06$ at Dec. 1, 1947. Since then, there has been a loss of 0.8 poc 。 in the index of employment, accompanied by a rise of 11.3 poco in the index of payrolls.

Toronto - Manufacturing in Toronto showed fairly general improvenent at Dec. 1, although there was a recession in employment in the vegetable food and a few other groups; moderate gains were indicated in lumber, textile, clav, glass and stone, eloctrical apparatus and iron and steel plants. The changes from Nov. I in the nonmanufacturing divisions were generally slight except in trade, which showed considerable seasonal expansion. These statements are based on data furnished by 2,760 leading establishments co-operating in the monthly surver of emploment and pavrolls at Dec. l, when the number of their emplovees and their woekly salarios and wages increased by $l_{.4} p_{0} c$ a as compared with Nov. l. The latest per capita figure showed little change in the month, standing at $\$ 42.96$, as compared with $\$ 42.95$ at Novol, 1948 , and $\$ 39.01$ at Dec. 1, 1947.

The index of emplorment at the date under review was 206.3; this was three poco above that of 200.2 at the same date of 1947 , since when the index of payrolls has risen by 13.4 p.c.

Ottawa.- Industrial activity in Ottawa reached a slightly higher level at the beginning of December, the gain from Nov, l taking place mainly in trade. Construction was slacker. The changes in the remaining industries were slight. Data were received from 332 of the larger emplovers in the ma,jor industrial divisions whose working forces were larger by 0.3 poco than in their preceding return. The weekly salaries and wages distributed by these firms at Dec. 1 were insignificantly higher than at Novol, the index of payrolls rising by only a small fraction. The avarage earnings per worker were $\$ 35.92$ at the date under review, as compared with $\$ 36.01$ a month earlier, and $\$ 33.15$ at Dec. 1, 1947. The inder of erployment at the date under review was 201.7, as compared with 201. 1 at Nov. 1, 1948, and 185.5 at Dec. 1, 1947; in the latter comparison, there was an advance of 8.7 p.c., while the latest index of payrolls showed a gain of 17.3 poc. in 12 months.

Hamiltono Moderate expansion was indicated in Hamilton, where 465 leading firms reported a gain of one poco in their personnel, together with an increase of four poc. in their woekly disbursements in salaries and wages as compared with Nov. 1. Upward revisions in the wage rates in several important industries contributed to the latter increase. The per capita earnings advanced from \$43.92 in the preceding period of observation, to $\$ 45.19$ at Dec, 1, 1948, At the same date in 1947 the weekly
averace had been $\$ 40.36$. Thore were increases in omployment at the first of December in trade and manufacturing; within the latter division, iron and steel and olectrical apparatus works showed improvement on a moderate scale. In the period from Dec. 1 , 1947, the index of employment has risen by 5.6 p.ce, to 202.6 , while that of payrolls has increased by 18.3 p.c.

Windsor - The situation in Windsor showa little mencril change at Dec. 1 , according to data tatulater rrom $88 \%$ of the larger emplovers who reported a rise of 0.2 poc. in thoir stafes as compared with Novo1. Manufacturing continued at much the same level as a month earlier, but there was some seasonal improvement in trade. The indicated weekly salaries and wages were lower by 1.8 p.c., largely as a result of reduced working hours, together with changes in the industrial distribution of the reported employees. The latest per capita was $\$ 50.35$, as compared with $\$ 51.38$ at the beginning of November, and $\$ 46.67$ at Dec. 1, 1947 . The most recent index of employment stood at 288.9 ; as compared with the Dec. 1, 1947, figure of 273.9 , there was an increase of 5.5 p.c. In the 12 months, the index number of payrolls has advanced by 14.1 poc.

Fort William - Port Arthuro- A slight decline in industrial activity was reported in Fort William and Port Arthur: the 149 loading employers making returns roduced their staffs by 1.4 poc. as compared with Nov. 1 . The weekly salarios and wages of these workers were also lower, falling by 1.1 poc. at the date under review. The earnings averaged $\$ 45.37$ at the beginning of November, and $\$ 45.51$ at the beginning of Docember, while the per capita figure at Deco 1, 1947, was $\$ 42.18$. There was curtailmert in employment as compared with a month earlior in manufacturing, particularly in the pulp and paper and iron and stoel divisions, together with losses in building. Retail trade, on the other hand, showod seasonal improvement. In the last 12 months, the index number of employment in Fort William and Port Arthur has rison by two $p_{\circ} c_{0}$, and the payrolls, by 10.5 poc.

London.- There was little general change in the employment situation in London at the beginning of Decomber, according to data furnished by 298 of the largor ostablishmonts in the major industrial divisions. Their working forces declined by 0.1 p.c. as compared with Nov. 1. Manufacturing generally was rather quieter, but trade afforded more employment. The disbursements in veekly salaries and wagos reported by the firms making returns at Decel exceeded by $0 . Z$ poco thoir weokly payrolls at the beginning of November. The latest per capita figure was 839.75 , as compared with $\$ 39.58$ in the freceding survey, and $\$ 35.88$ at the beginning of December in 1947 . Since then, the index number of employment in London has increased by three p.c., and that of weekly payrolls, by 14.1 poc。

Kitchener - Waterloo- Emplovment in the larger industrial establishnents in Kitchener - Waterloo advanced by 106 poco at Dec. 1 , when the weekly selaries and wages which they disbursed showed a relatively smaller gain, rising by 0.8 p.c. from Nov. 1. The latest average earnings of their employees amounted to $\$ 40.65$, as compared with $\$ 41.00$ at the beginning of November, and $\$ 37.90$ at Dec. 1, 1947. In the year, the index of industrial employment in the Kitchner - Waterloo Area has fallen by 1.7 poco, but the index of payrolls has risen by 5.3 poc. There was moderately heightened activity in manufacturing at Dec. 1, 1948, as compared with a month earlier, since when employment in leather, lumber, rubber, electrical apparatus and iron and steel factories showed rather slight gains. Trade and building also reported some inprovement, while the other nonmanufacturing classes indicated little general change.

Winnipeg.c The upward movement continued in Winnipeg, where manufacturing and trade afforded more employment at Dec. 1; within the group of factory employment, animal food and printing and publishing plants showed greater activity than at the beginning of November. On the other hand, transportation and construction were quieter. The forces of the 763 leading emplovers were greater by two p.c. than at Nov. 1 , while their weekly payrolls rose by 1.6 poce in the same comparison. The most recent per
capita figure was $\$ 38.39$, as compared with $\$ 38.53$ at the beginning of November, 1948 , and $\$ 34.68$ at Dec. 1, 1947. The latest index number of employment, at 171.6 , was 3.4 p.c. above that of 165.8 at the first of December in 1947 , since when there has been an increase of 14.3 p.c. in the index nunber of weokly payrolls.

Regina.- Further improvement in the industrial situation was shown in Regina at Dec. l; the 183 leadi ng; establishrients co-operating, in tlat city reported the emplovnent of 2.1 poc. more workers than at the beginning or November. There were larfe advances in trade, while small numbers of persons wero released from manufacturing and construction. The weokly salaries and wapes distributed by the firms furnishing data in the most recent survey were higher by 0.5 p.c. than at Nov. 1. The latest figure of average eamings per employee was 36.59 ; that in the preceding report was $\$ 37.14$, while the Dec. 1, 1347 , per capita figure was $\$ 33.06$. In the last 12 months, the index of emploment in Regina has risen by 4.2 p.c., and that of weokly payrolls, by 12.4 p.c.

Saskatoon.- Employment in Saskatoon showed little general change at Dec. 1, when construction was quieter, but manufacturing and trade afforded rather more employment. On the whole, the 154 loading firms from which statistics were received roported a gain of $0.2 \mathrm{p} . \mathrm{c}$ 。 in their personnel as compared with the beginning of November. The indicated weokly arnings rose by $\mathrm{i} .2 \mathrm{p} . \mathrm{c}$. in the month. The average per emplovee advanced from $\$ 35.81$ in the preceding survev, to $\$ 36.28$ at the first of December, when the figure considerably excoeded that of $\$ 33.77$ recorded a yoar earlier. Since then, the index number of industrial employment in Saskatoon has declined by 5.1 p.c., but there has been an increase of 2.7 p.c. in the index of payrolls.

Calcary. - There was a moderate increase in activity in the principal industrial groups in Calgary at Doc. 1, according to information furmished by 328 of the larger establishments in which the staffs increased by two p.c. as compared with Nov. 1. The reported salaries and wages rose by $2.9 \mathrm{p} . \mathrm{c}$. in the month. The woekly earnings per emplovee averaged $\$ 40.01$, as compared with $\$ 40.58$ at the first of November, and $\$ 36.08$ at Dec. 1, 1947. Trade showed considerable seasonal improvement at the date under review, when manufacturing was slightly brisker. On the other hand, construction and some other classes were slackor. The changes in the remaining industries were slight. In the last 12 months, the index of omployment in Calgary has advanced by 4.3 p.c., and that of payrolls, by 18.6 p.c.

Edmonton. - Employment in Edmonton showed a moderately upward movement at the beginning of December, mainly in animal food processing and iron and steel plants, and in rotail trade; mining and construction, on the other hand, released omployees. Statistics were tabulated from 275 leading amplovors in the city whose working forces increased by 0.5 p.c. as compared with Hov. 1, while their weekly salaries and wages rose by 0.3 p.c. in the month. The latest averago per employeo, however, was rather lower, at $\$ 40.17$, as compared with $\$ 40.24$ at Nov. 1 ; the earnings figure, however, considerably oxceeded that of $\$ 35.20$ at Dec. 1, 1947. The inciex number of ermplovment since then has risen by $11.6 \mathrm{p}, \mathrm{c}$. , and there has been a gain of 24.5 p.c. in the index of weekly payrolls.

Vancouver:- Further declines in industrial emploment were indicated in Vancouver, there being reduced activity at Dco. 1 in manufacturing, transportation, hotels and restaurants and construction. Retail trade, however, showed important seasonal improvement. Within the manufacturing division, there was curtaiment in the food, lumber and iron and steel groups. Data were furnished by 1,051 of the larger establishments in the major industrial divisions whose emplovees decreased by 1.1 p.c. as compared with Nov. 1. The index of employment, at 237.2 , was higher by 2.1 p.e. than at Dec. 1, 1947, since when the index of payrolls has risen by 13.3 p.c. The latest per capita figure was $\$ 42.67$, as compared with $\$ 42.76$ at Nov. 1 , 1948; the mean a year earlier was $\$ 38.39$.

Victoria.- Industrial activity in Victoria showed a slightly downard trend at Dec. 1, when the 223 co-operating emplovers reported a loss of $0.2 \mathrm{p} . \mathrm{c}$. in the number of persons on their paylists. Their weekly salaries and wages, however, increased by 1.8 p.c. as compared with Nov. 1. The average per employee was then $\$ 39.06$, rising to $\$ 39.84$ at the date under review, as compared with $\$ 36.85$ at Dec. 1, 1947. Increases in employment at the beginning of December as compared with Nov. 1, 1948, took place in manufacturing, mainly of iron and steel products, and in trade. In the last 12 months, the index of emplovment in Victoria has fallen by 5.8 p.c., but that of weekly salaries and wages has risen by 1.8 p.c.

## TABLES.

The latest statistics of emplovment and payrolls are summarized in the table on page 2, while Tables 1 to 5 at the end of this report contain more detailed data on emploment and payrolls, together with the index numbers as at Nov. 1 and Dec. 1, 1948, and Dec. 1, 1947. In these tables, the index numbers of emplovment, calculated on their original base, $1926=100$, have been converted to June 1, 1941 , for comparison with the data of earnings. For all general purposes, apart from comparison with the payroll statistics, however, the index numbers of employment which are given in Tables 6 to 11, based on $1926=100$, should be used.

The table on page 6 summarizes for the provinces, the cities and the major industrial divisions, the latest statistics of employment, showing the numbers and proportions of male and female workers reported at Dec. l, with comparisons from earlier surveys; in this table, the provincial and city figures given are those for the nine leading industries, including the employees reported in financial institutions, excluded in most cases from the data given in the table on page 2.

Table 12 shows the sex distribution in a considerable list of industries in the Dominion as a whole at the date under revicw, with comparative statistics as at Nov. 1, 1948 and Dec. 1, 1947.

(The latest ilgures ars subjoct to revision).
