# THENOVEMBER EMPLOYMENTSITUATION, TOGETHER WITH <br> IN THE LAST WEEK INOCTOBER, O 9.49. <br> GENERAL SUMMARY。 

EMPLOYMENT.
Monthly returns received by the Dominion Bureau of Statistics from 20.712 representative emplovers in eight major industrial groups showed a further siggt decline in employment at the beginning of Noverber, together with a small advance in their expenditures in weekly salaries and wages as compared with Oct. $\mathrm{l}_{0}$. The reduction in the indicated working force again took place among male employees, whose nunbers fell by 0.3 p.c., while that of women rose by $0.5 \mathrm{p} . \mathrm{c}$. in the month; the difference in the trends was due to the changes which occurred in the industrial distribution of employment.

An examination of the monthly data collected over a period of some duration shows that since 1938, the movement in industrial employment generally at Nov. 1 has been uniformly favourable. In earlier years since 1920, improvement was recorded at that date on seven occasions, with curtailment at Nov. 1 in 11 vears. On the average, there was in pre-war years a percentage decline which approximated that indicated at the date under review.

Moderate expansion on the whole was reported in New Brunswick, Quebec and Saskatchewan, with similar reductions in the remaining provinces. Industrially, improvenent over Oct. I was shown at the date under review in logging, mining and trades in these divisions, recorded employnent rose by 23.2 p.co, 0.4 poc. and 1.8 p.c., respectively. The trend in the other major industrial classes was downward. The percentage losses varied from 0.7 p.c. in communications and one p.c. in mamafacturing, to 1.9 p.c. in transportation and two p.c. in construction. In direction, the changes indicated at the date under review in the more important industries followed the seasonal pattern, and in several cases, were similar in magnitude to those noted, on the average, in preceding years. The general advance in logging, however, was rather below-average; the decline in construction was also smaller than that usually recorded at Not. $l_{\text {. }}$

Within the manufacturing division, there were substantial losses as compared with Oct. I in vegetabla food factories, in which the decline was nevertheless not so large as that often noted at Nov. I。 Considerable reductions were also shown in lumber, pulp and paper and iron and steel plants, while the trend was unfavourable in numerous other industries. The falling-off in rubber was mainly due to industrial disputes. Hoderate gains were shown in textile, printing and publishing and some other classes.

Based on the 1926 average as 100, the general index number of employment in the eight leading industries at the beginning of November was 201.9, as compared with 202.2 at Oct. 1, 1949, and 203.6 at Nov. 1, 1948. In 1947, 1946, 1945, 1944, 1943 and 1942, the Nov. 1 indexes had been 197.8, 182.7, 171.2, 183.3, 188.7 and 183.3, respectively. Except for Nov. 1, 1948, the latest index is the highest in the record of 29 vears. Although the Nov. 1, 1949, figure was 0.8 poc. below that indicated 12 months previously, there was an increase of three poc. in this comparison in the index of payrolls, which reached a new all-time maximurn at the date under review.
1/See explanatory notes on pages I and II at the ond of this bulletin.

## PAYROLIS.

The co-operating employers reported a rise of $0.4 \mathrm{p} . \mathrm{c}$. in their disbursements in woeklv salaries and wages 1 at Nor. 1 as compared with Oct. 1. Further upward adjustments in wage rates in several industries contributed to the higher expenditures, in which another factor was longer working hours in some industries. The indicated weekly earnings averaged $\$ 43.78$ at Nov. 1 , as compared with $\$ 43.55$ at Oct. 1.1949 , and $\$ 42.15$ at Nov. 1, 1948. At the same date in earlier years for which statistics are available, the per capita figures were as follows:- 1947, \$37.79; 1946, \$33.33; 1945, \$1.95; 1944, \$32.29; 1943. \$31.50; 1942, \$29.81, and 1941,\$27.02. In the period from June 1, 1941, when the monthly record of earnings wes instituted, to Nov. 1 . 1949, the average weokly earnings of persons emploved by the larger firms have risen by 73.4 p.o.

If the statistics for financial institutions are included, the latest survey of omploment and payrolls shows that the number of persons in recorded emploment fell by 0.1 p.c. as compared with the beginning of October. The sums received in salaries and wages by these persons at the date under review were higher by 0.4 p.c. The average weokly earnings per emplovee in the nine principal industries, including finance, wore $\$ 43.67$; this exceeded the per capita figure of $\$ 43.46$ indicated at the boginning of October, and that of $\$ 42.03$ at Nov. 1. 1948.

Table A on page 2 sumarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the 22 larger industrial cities, and gives comparisons as at Oct. 1, 1949, and Nov, 1, 1948. Table B on page 4 contains a monthly record for the eight and the nine leading industries as a whole, and for manufacturing, showing the movements of employnent and payrolls in the period since 1945. The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and pavrolls, the index numbers of employment in these tables have been oonverted from their original base, 1926=100.

The table on page 4 shows that in the period for which data are available, there has been an increase of $32.2 \mathrm{p}, \mathrm{c}$. in the index number of employment in the eight leading industrial groups (listed in the table on page 2), while that of aggregate weokly salaries and wages has risen by $124.6 \mathrm{p} . \mathrm{c}$. Including finance, the gain in emploment from June 1, 1941, to Nov. 1, 1949, has amounted to 32.8 p.c., and that in payrolls, to $124.0 \mathrm{p} . \mathrm{c}$. The increases in the payroll figures are the highest so far recorded. The explanation given in earlier bulletins for the relativelv greater rise in the reported salaries and wages than in the numbers emploved may again be stated:(1) the pavment of higher wage-rates in extremely large numbers of industries and establishments, in addition to the general increase resulting from the compulsory paynent of cost-of-living allowances to the majority of workers during the war; the rates at which these bonuses were paid were increased on more than one occasion before they were absorbed in the basic wage rates as from Feb. 15, 1944, (2) the progressive up-grading of employees as they gained experience in their work, and (3) reductions in the proportions of women workers as compared with the period of the war.

The index of employment in manufacturing during the period for which monthly statistics of payrolls are available has advanced by 22.9 p.c.; the salaries and wages have mounted by $113.4 \mathrm{p}, \mathrm{co}_{0}$, and the weokly earnings per person in recorded employment have risen by $76.3 \mathrm{p} . \mathrm{c}$. In the included non-manufacturing industries taken as a unit, the index of employment at Nov, 1 showed an advance of $44.4 \mathrm{p} . \mathrm{c}$. from the commencement of the record of pavrolls, while the index of aggregate wreekly salaries and wages in //For estimates of total expenditures in wages, salaries and supplementary labour incomo, see the bulletins Monthly Estimates of Labour Income".
2/The attention of those interested in hourly earnings is drawn to the statistics publishod in the monthly bulletins on man-hours, average hourly earnings and average weokly wages.

（The latest flgurea are eubjeot to revielon）．

these classes was higher by 138.4 p.o. than at June $1,1941$.
In the last 12 months, the index of employment in manufacturing has falien by 0.9 p.c.. while that of payrolls has risen by thrsa p.c. The average weekly earnings of the persons in recorded employment have mounted by 3.9 p.c. A composite index for the non-manufacturing industries for which data are available shows a loss of 0.9 p.c. in the 12 months, accompanied by a rise of three poce in the index of weekly payrolls.

In regard to the marked variations in the average earnings of workers in the different industrial classes, (shown in Tables 1 to 5 at the end of this report, and in Table $A$ on page 2), it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age proups. In general, the female workers tend to belong, to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported agisregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generallv required of workers in the industry is of course a factor of outstanding importance.

## THE SEX DISTRIBUTION OF THE PERSONS IN RECORDED EMPLOMMENT.

Leading industrial establishments reported a loss of 0.3 p.c. in employment for male workers at the beginning of November as compared with a month earlier, together with a rise of $0.5 \mathrm{p} . \mathrm{c}$. in the number of their female emplovees. The most noteworthy change among men was the sensonal increase in emploment in logging camps. Mining also showed improvement. On the other hand, there were considerable decines in emplorment among male workers in manufacturing, transportation and construction.

Among women, there was a falling-off of $0.9 \mathrm{p} . \mathrm{c}$. in emplorment in manufacturing as a whole, largelv due to seasonal conditions in the food processing group. Textile factories, however, provided work for considerably more workers of that sex than at Oct. 1. Trading establishments also indicated substantially higher levels of amployment. In communications and hotels and restaurants, on the other hand, there were large, seasonal reductions in the number of female employees.

In the nine major industries, the co-operatinf, establishments reported a decrease of 0.1 p.c. in their forces since Oct. l; the indicated number of wornen rose by 0.5 p.e., but that of men was lower by 0.3 p.c. The ratios in this group of industries at Nov. 1 were 774 men and 226 women per 1,000 omplovees, as compared with 776 men and 224 women recorded at act. 1, 1949.

In comparison with Not. 1, 1948, the reported number of men in the nine major industrial divisions showed a decrease of $1.5 \mathrm{p} . \mathrm{c}$. , but there a gain of about 2.3 p.c. In the indicated number of women. The proportions per 1,000 persons in recorded emploment were 781 in the case of men, and 219 in the case of women. A vear earlier, the ratios had been 780 men and 220 women per 1,000 persens in recorded emplovment, while at Nov. 1, 1946, there were 772 men and 228 women per 1,000 workers on the staffs of leading establishments.
EMPLOMGENT AND PAYROLLS AS REPORTED BY LEADING FIRMS ${ }^{1 / 2 N}$ THE MAJOR INDUSTRIAL GROUPS.

## 1. Manufacturing.

Employment. - The trend of employment in manufacturing continued downward at the first of Noverber, according to information furnished by 9,987 representative establishments. The general loss amounted to one p.c.; in the heapy manufactured goods industries, employment declined by 0.6 p.c., while the reduction in the licht I/See explanatory notes on pages I and II at the end of this report.

Tabl. C. - The Sex Distribution of the Workers in Rocorded Bmploymat in the Provinces, the Landing Cities, and tho Iino Major Industrial Groupe at Mov. 1, 1949, with Comparisone es at Oct. 1, 1949 and Nov. 1, 1948.

1/This clessification comprises the following - iron and steel, non-ferrous metals, eleotrionl apparatus, lumber, muaical instruments and clay, glass and stone products. The non-durable group includes the romining manuraoturing induetries with the exception of eleotric light and power.
2/Mainly hotels, restaurants, laundrien and dry-oleaning plants.
3 The Vow. 2 deta are subject to revision.
manufactured goods division was 1.4 p.c. The general recession was soasonal in character, the movement at Nov. I having been downward in 19 of the 28 years during which monthly data have been collected. The latest decline approximated the average in sizo, and was also similar to that indicated at Nov. $1,1948$.

Based on the 1926 average as 100, the index fell from 208.6 at Octo 1, 1949. to 206.5 at the date under review, as compared with 208.3 at Nov. 1,1948 , when the figure was higher than at Nov. I in any cther year of the record except 1942, 1943 and 1944.

There was a pronounced decline in emplovment at the beginning of November in the vegetable food industries, in which the reported loss of 8.5 p.c. was seesonal, although it was on a rather smallor scale than at Nov. I in recently-precoding vears, when a higher level of activity had been indicated in this group. There were fairly substantial decreases in animal food, lumber, pulp and paper, rubber, beverage and iron and steel plants. The loss in rubber was due in large pert to industrial disputes. Smaller reductions took place in tobecco, clay, glass and stone, nonferrous metal and miscellaneous non-metallic mineral product factories, notably in the petroleum division. On the other hand, improvement was indicated in printing and publishing, paper products, textiles, electrical apparatus and miscellaneous manufactured product factorios. The gains were moderate.

Payrolls in Nanufacturingo - The decline of one p.c. in the index number of omployment in manufacturing at Nov. I was accompanied by a loss of $0.5 \mathrm{p} . \mathrm{c}$. in the index number of payrolls as compared with Oct. l. The two most recent figures were the highest in the record of $8 \frac{1}{2}$ yoars. The por capita oaminfs reached a new maximum at the date under review, at $\$ 45.07$, a compared with $\$ 44.84$ at 0ct. 1, 1949, and $\$ 43.38$ at Nov. 1, 1948. At the same date in earlier vears for which statistics are available, the averages were as follows:- 1947, \$38.52; 1946, \$33.45; 1945, \$32.64; 1944, \$33.20; 1943, \$32.62; 1942, \$30.70, and 1941, \$27.59.

Based on the weekly salaries and wages paid by the co-operating establishments on or about June 1, 1941, as 100 p.C., the index of payrolls at Nov. 1, 1949, stood at 213.4 as compared with 214.4 at Oct. 1, 1949, and 207.1 at Nov. 1,1948 . The increase in the pavroll figure at the date under review as compared with 12 months earlier which amounted to three p.c. was accompanied by a decine of 0.9 p.c. in the index of employment.

The Sex Distribution in Manufacturing. - Emplovment for persons of both sexes in manufacturing was at lower level at Nov. 1 than at Oct. 1. The loss among women amounted to $0.9 p_{0} c_{0}$ and that among men, to one poc. Emplovees of the former sex made up 232 per 1,000 workers reported at the date under review, a proportion which was unchanged from that indicated a month earlier, but exceeded the ratio of 228 per 1,000 workers noted at Nov. 1, 1948.

Among women, there were gains over Oct. 1 in the printing and publishing, textile, beverage, electrical apparatus and miscellaneous manufactured products classes. Animal and vegetable food processing, pulp and paper and some other industries, however, reported reductions in their women employees. Among men, there were increases at Nov. I as compared with a month earlier in the paper product, printing and publishing, textile, electrical apparatus and miscellaneous manufactured product divisions. On the other hand, there were declines among such workers in the vegetable food, lumber, rubber, pulp and paper, tobacco, beverage, clay, glass and stone, fron and steel, nonferrous metal and miscellaneous non-metallic mineral product groups.

As compared with Nov, 1, 1948, there was an advance of about one p.c. in the number of women emploved by leading manufacturers, together with a loss of approximately 1.4 p.c. in their male employees. The proportion of men per 1,000 persons in recorded employment at the beginning of November in 1948 had stood at 772, and that of women, at

228, while in 1947 and 1946, the ratios of women were 230 and 237 per 1,000, respectively, at the beginning of November.

THE SITUATION AS REPORTED BY THE LARGER FIRMS IN THF MAJOR NON-MANUFACTURING INDUSTRIES.
Logeing:- There was further important expansion in logging at Nov. $I_{,} 1949$, according to information fumished by 666 leading operators, whose staffs were higher by 23.2 p.c. than at Oct. $1_{0}$ This increase considerably exceeded that indicated a month earlier, and was slightly larger than the gain noted at Nov. 1, 1948. The index of employment was then 31.5 poc. higher than the latest figure of 220.2 , which was lower than at Nov. 1 in ary earlier year since 1943.

The weekly salaries and wages reported by the firms co-operating in the latest survey showed an advance of 19.9 poco over the sums which they had distributed in the preceding period of observation. The index of payrolls, however, was 30.7 p.c. below that indicated at Nov. 1, 1948.

The per capita earnings fell from $\$ 39.73$ at October $l_{\text {。 }} 1949$, to $\$ 38.64$ at the date under review. The decline was seasonal in character, but was rather larger than that indicated at Nov. 1, 1948. This was partly due to the fact that many camps opened later in 1949 than in recently preceding years, so that many of the reported employees did not work throughout the period reviewed. Unsatisfactory weather in some areas was also a factor. The per capita figure in logging at Novol. 1948, was \$37.92, while in 1947, the average was $\$ 37.83$. The latest figure is the highest on record for the time of vear. In considering the statistics of aggregate and average earnings in logging. it must be recalled that they do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also a factor in lowering the reported earnings; these differ greatly in various parts of the country, the average in British Columbia being considerably higher than in any other province. (See Table 2 towards the back of this report).

Miningo- Moderately heightened activity was indicated in mining at the beginning of November, when information tabulated from 687 leading operators showed a combined working force which exceeded by $0.4 p_{0} c$. the staffs reported in their last return. The extraction of coal and metalic ores afforded more employment, but there was a decline in the production of miscellaneous non-metallic minerals. The index of employment in the mining group at Nov. $I_{\text {B }}$ at 184.9 , was 1.9 poc. above that of 181.5 at the same date in 1948. In the 12 months, the index of payrolls has risen by 7.1 poce

The weekly payrolls reported by the cowoperating firms at the latest date were higher by 3.4 poc. than at Oct. 1: upward revisions in the wage rates contributed to the higher total. Increased overtime work was also a factor. The per capita earnings were considerably higher, at $\$ 54.04$, as compared with $\$ 52.48$ in the preceding period of observation, and \$51.41 at Nov. 1. 1948.

Communicationso- The trend in the commancations division continued seasonally downward. The staffs of the cooperating establishments were lower by 0.7 poc. at Nov. 1 than at Oct. 1。 On the other hand, there was an advance of 1.4 p.c. in the payrolls distributed by these establishments. The per capita eamings of their employees rose from $\$ 41.32$ a month earlier, to $\$ 42.16$ at the first of Novembers a year earlier, the figure had been $\$ 39.11$. Based on the 1926 average as 100 , the latest index of emplovment was 199.2; this was nine p.c. above that of 182.7 at Nov. 1. 1948; since then there has been a gain of $16.9 \mathrm{p}, \mathrm{c}$. in the index of payrolls.

Transportation and Storage.- Considerable seasonal curtailment was noted in transportation at Nov. l. All branches of the industry shared in the decline, which was particularly marked in the steam railway division. The index of employment stood at 142.8 , slightly below that of 144.6 at Nov. 1, 1948 , the maximum in the reoord for

that date. In the last 12 months, the index number of payrolls has risen by 0.2 p.c.
The staffs of the 920 firms and branches furnishing returns were lower by 1.9 poc. than at Oct. $l_{0}$ while their aggregate disbursements in weekly salaries and wages were lower by 0.7 poc. The average earnings of their employees, however, advanced from $\$ 51.92$ at Oct. $l_{0}$ to $\$ 52.58$ at the first of November, when the mean exceeded that of $\$ 51.75$ indicated 12 monthe earlier.

Construction and Maintenance. . There was further recossion in employment in construction: this was seasonal in character, but was somewhat below-average for the time of the year. Building construction was rather less active, and the trend was decidedly downward in work on the railroads, streets and highways. Statements were tabulated from 2,777 contractors who reported a falling-off of two p.c. in their staffs as compared with Oct. 1, together with a loss of 1.5 p.c. in their weekly salaries and wages. The per capita earnings of their employess stood at $\$ 42.15$ at the date under review, as compared with $\$ 41.93$ at the beginning of October. The Nov. 1. 1948, figure was \$40.62.

The latest index in construction, at 198.6 , was 3.1 poc. above that of 192.7 at the beginning of November of last year, and was also higher than in any earlier November in the record. In the 12 months, the index of weekly payrolls has mounted by 6.8 p.c.

Services.- A considerable seasonal decline was indicated in hotels and restaurants, but employment was brisker in certain other branches of the service division for which data are avallable. On the whole, the 1,421 co-operating establishments in this group of industries had reduced their staffs by 1.3 p.c. from Oct. 1. The salaries and wages they distributed at the beginning of November were less by 0.7 p.c.

During the last 12 months, there has been a decline of 1.7 p.c. in the index number of employment in these industries, while the index of payrolls showed a gain of 5.6 poc. at Nov. 1. 1949. The per capita samings stood at $\$ 28.60$ at Nov. 1 , as compared with $\$ 28.43$ at Oct. 1,1949 and $\$ 26.85$ at the first of November, 1948。 Attention must again be drawn to the fact that in hotels and restaurants, as in logging, many of the workers receive board and lodging as part of their remuneration; emplovees in the former division constituted about two-thirds of the total staff roported in the service afvision as a whole at the beginning of November.

Trade. - Trading establishments showed extremely marked seasonal expansion at Nov. 1, partly due to the employment of large numbers of part-time workers. Data were fumished by 4,105 wholessle and retail houses in which the personnel was higher by 1.8 p.c. than at Oct. 1. The weekly salaries and wages paid by these employers rose by 1.9 p.c. in the month. The average earnings per worker slightly advanced, from $\$ 37.31$ at Oct. 1 to $\$ 37.38$ at the beginning of November. A year earlier, the per capita figure had been 35.50 .

The index number of employment in trade at Nov。 1 was 238.6 , as compared with 230.5 th the same date in 1948. The latest figure therefore showed an increase of 3.5 p.c. in the 12 months, a period in which the index of payrolls has gained by 8.7 p.c.

Financial Institutions.- Information from 1,046 financial institutions indicated little general change in their employment as compared with Oct. 1. The weekly salaries and mages reported by these establishments at the date under review were insignificantly higher than at Oct. 1 . The per capita figure was unchanged, at $\$ 41.20$, as compared with $\$ 39.08$ at Nov. 1, 1948. The latest index of employment in financial institutions, at 171.5 , was higher by $3.6 \mathrm{p}_{0} c_{\text {. t than that of } 165.7 \text { at the same }}$

date in 1948，while the index of parrolls showed an increase of 9.3 p．c．in the same comparison．

> EMPLOYTENT AND PAYROLLS AS REPORTED BY LSADING FIRMS I/ IN THE ECONOMIC AREAS.

Firms in Prince Edward Island，New Brunswick，Quebec and Saskatchewan reported moderately heightened activity at Nov， 1 as compared with Oct． 1 ，while the trend in this comparison was unfavourable in Nova Scotia，Ontario，Manztoba，Alberta and British Columbia．The reported weekly salaries and wages were higher in six of the older provincos，the exceptions being Prince Edward Island，Manitoba and British Columbia．In these areas，there were reductions of $0_{0} 9$ p．c．， 0.7 p．c．and 0.4 p．c．e rospoctivelv．In most aroas，the average earnings at the date under review exceeded those indicated at Oct．l；in Saskatchewan，there was no general change，while in Prince Edward Island and Manitoba the trend was downward．In all areas，except Prince Edward Island，the latest per capita figures were higher than at Nov．in 1948．The general figures in all provinces considerably exceeded the averages at Nov． 1 in 1947 and earlier vears of the record．

Maritime Provinces．－Industrial employment in Prince Edward Island and New Brunswick showed an upward movement at Nov，1，but there was a decline in Nova Scotia． The 1.471 co－operating establishnents in these three provinces reported a general decrease of 0.7 poce in their working forces as compared with the beginning of Dotober． This $108 s$ was accompanied by a rise of 0.5 pos。in their expenditures in weekly salaries and wages．The general index of employment in the area stood at 190．7，as compared with 192．0 at Oot．1．1949，and 294．9 at Nov．1． 1948.

Manufacturing operations in the Maritime Provinces were curtailed，moderate losses being indicated in the animal food，lumber，pulp and paper and iron and steal divisions；there was a gain in activity in vegetable food processing．Among the non－manufacturing classes，logging，coal mining．steam railway operation and trade showed improvement．Except in logging，the increases were not on a large scale；the indicated advance in logeing amounted to 59.5 poc．The trend in quarrying o construction and hotels and restaurants was unfavourable。 The reduction in work on the highway was fairly substantial．

The payrolls disbursed by the reporting firms for services rendered in the week preceding Noy． 1 exceeded by $0.5 p_{0} \imath_{\text {。 the sumb they had paid their employees at }}$ Oct．1．The per capita eamings showed an upward movement，rising from $\$ 37.53$ in the last report to $\$ 37.96$ at the date under review．At Nov．$I_{0} 1948$ ，the average had been \＄37．09．In the last vear，the index of payrolis in the liaritime Profinces has declined by 0.1 poce，and that of omployment，by 2.2 poco

Quebec．－There was a moderate gain in industrial activity in Quebec at Nov．1， in spite of losses in manufacturing，transportation and construction．Logging operations and trade showed seasonal expansion．the indicated increase in employment in the bush amounting to 39 poc．Mining，comnundcations and the service industries for which data are available roported little change on the whole．Within the man－ facturing division，the trend was downward in food，lumber，pulp and paper，iron and steel and non－ferrous metal plants．On the other hand，emplomment advanced in printing and publishing，rubber，textile and olectrical apparatus factories．The most noteworthy increase was that of a seasonal character in textile－using plants．

Information for Nov． 1 was furnished by 5469 representative emplovers in the oight leading industries in Quobec，whose staffs were higher by 0.9 poce than at the beginning of October．Their weekly payrolls mounted by one poce in the month．The por caplta earnings of their salaried emplovees and wage－oarners also showed a silghtly 1／See explanatory notes on pages I and II at the end of this report．

upward movement, standing at \$41.81 at the date under review, as compared with \$41.77 at Oct. 1. 1949, and $\$ 40.33$ at Nov. 1, 1948. The latest index number of employment, at 201.3 , was 2.8 p.c. below the figure of 207.1 recorded a year earlier, but the index of payrolls was higher by 0.9 p.c.

Ontario. There was a slight easing in industrial employment in Ontario at Nov. 1 as compared with Oct. 1, according to information furnished by 8,368 leading firms in the principal industrial divislons, whose working forces decreased by 0.4 p.c. as compared with Oct. 1. Their weekly selaries and wages, however, showed an increase of 0.2 poc. in the month. The latest figure of average earnings per emplovee was $\$ 45.25$, as compared with $\$ 45.00$ at Oct. 1,1949 , and $\$ 43.49$ at the beginning of November, 1948. The index of emploment, at 208.4, showed a slicht decline from that of 208.6 at Noy. 1 a year earlier, since when the index of payrolls has risen by 4.1 p.c.

There was a contraction in emplomnent in manufacturing as a whole in Ontario as compared with Oct. 1. Vegetabie food prooessing showed an important seasonal decline, amounting to 11.8 poc. Lumber, rubber, pulp and paper, tobacco, beverage, clay, glass and stone, iron and steel, miscellaneous non-metallic mineral factories and central electric power stations were also quieter. In some industries, industrial disputes contributed to or occasioned the losses reported. On the other hand, there was some expansion in activity in leather, paper product, printing and publishing. textile, electrical apparatus, non-forrous metal and miscellaneous manufactured product plants. In the non-manufacturing group, logging, metallic ore mining, building construction and trade afforded more employment. The seasonal pains in logging and trade were considerable. Commuications, transportation, highway and railway construction and maintenance and hotels and restaurants released employees in a seasonal movement.

Prairie Provinces.- The trend of industrial employment at Nov. 1 was downward in Mandtoba and Alberta, but there was slight improvement in Saskatchewan. Statistics tabulated from 2,852 leading establishments in the Prairie Area indicated a loss of 0.4 p.c. in their combined staffs as compared with the beginning of October. This general decrease was contra-seasonal according to the experience of the last nine vears, although the trend had frequently been unfavourable at Nov. I in earlier years for which data are available. In spite of the slight decline in emplovment at the date under review, the weekly salaries and wages then disbursed by the reporting firms were higher by 0.1 poce then at Oct. 1. The per capita earnings of their employees were $\$ 44.28$, as compared with the Oct. 1 mean of $\$ 44.02$, also exceeding the average of $\$ 42.80$ at Nov. 1, 1948. In the last 12 months, the index of industrial employment in the Prairie Provinces taken as a unit has advanced by $2.7 \mathrm{p} . \mathrm{c}$. , to 185.1 , and there has been a rise of $6.2 \mathrm{p}, \mathrm{c}$, in the index of weekly payrolls.

There were additions to the working forces at the date under review as compared with a month oarlier in manufacturing, mining and retail trade; those in the last-named were considerable. Communications, transportation, highway construction and maintenance and hotels and restaurants, on the other hand, released omployees. Within the manufacturing group, the most noteworthy increase was in animal food factories. There were moderate declines, however, in vegetable roods, beverages and some other classes.

British Columbia.- Employment in the larger establishments in the major industrial groups in British Columbia decifed at the beginning of November, when the staffs of the 2.522 larger emplovers furnishing data showed a loss of $1.6 \mathrm{p} . \mathrm{c}$. as compared with Oct. 1. Manufacturing establishments in this province reported considerable curtailment in their operations, partly due to seasonal causes. There were large reductions in emploment in vegetable and animal food factories. The trend was also unfavourable in numerous other divisions, but except in the classes just mentioned, the losses were small. Among the non-manufacturing groups, employment decreased in logging, shipping and stevedoring, building and highway construction and
maintenance，and hotels and restaurants．There was little general change in mining and communications，while greater activity was indicated in trade．

Declining emplovment in many of the industrial divisions for which data are available was accompanied by lower expenditures in salaries and wages，in which there was，on the whole，a reduction of 0.4 poc．as compared with the amounts disbursed by the reporting firms in the week of Oct．I。 In many industrial groups，however，the indicated average weokly earnings moved upward．The general per capita figure in the eight leading industries rose from $\$ 46.38$ in the preceding survey，to $\$ 46.95$ in the weok of Nov．1，1949，as compared with 44.99 at the same date in 1948．In the period since then，the index number of payrolls has risen by 2.7 p．co，but that of emplovment，at 196.4 at the beginning of November，was 7.4 p．c．below the index recorded 12 months earlier．

## THE SITUATION AS REPORTED BY LEADING FIRMS $1 /$ IN CERTAIN CITIES．

The following paragraphs deal briefly with the situation reported at Nov． 1 by leading emplovers in the larger cities．

Hallfax．－Industrial employment in Halifax at the beginning of November showed a decline，the index number falling by two p．c．Seasonal improvement was noted in trade，but there were slight losses in manufacturing，together with reductions on a rather larger scale in transportation and construction．The weokly salaries and wages disbursed by the 273 leading establishments furnishing data in the city fell by 2.4 poc．as compared with Oct． $\mathrm{l}_{0}$ ．The average weokly earnings of their emplovees stood at $\$ 35.17$ ，as compared with $\$ 35.33$ at Oct． 1 ， 1949 ，and $\$ 33.95$ at Nov．1， 1948 ． Since then，the index numbers of employment and payrolls have risen by 1.3 p．c．，and 4.1 poc．，respectively．

Saint John。 Hoightened activity in emplorment was indicated in Saint John at Nov．1，according to data received from 205 of the larger firms in the major industrial groups．Their staffs were higher by 1.2 poc．than at Oot． 1 ．Iron and steel manufac－ turing afforded less employment，but the trend was favourable in transportation， building and trado．

The gain in erployment at Nov． 1 was accompanied by an increase of 2.4 p．c． in the weokly salaries and wages disbursed by the reporting firms．The average earnings per employee stood at $\$ 36.05$ ，as compared with $\$ 35.63$ at the beginning of October，and \＄33．83 at Nov．1，1948．In the last 12 months，the index of employment in Saint John has risen slightly，and that of weokly salaries and wages，by 8.2 poc．

Montreal．－There was an upward trend in employment in Montreal at Nov．1， when improvement was noted in manufacturing．There were losses，on the other hand，in transportation．Within the manufacturing group，advances were recorded in the textile group，in vegetable foods，printing and publishing and electrical apparatus．

Statistics were received from 3， 130 leading emplovers in the major industrial divisions，whose personnel was larger by 0.3 p．c．than at Cct．2。 The amounts which they disbursed in weekly salaries and wages at the date under review were higher by 1．2 poc．The per capita earnings of their emplovees stood at $\$ 42.48$ at Oct． 1 and $\$ 42.85$ at Nov．1，1949，as compared with $\$ 40.97$ at Nov．1．1948．In the vear，the index of emplovment has risen by 1.4 poco，to 192.9 ．while there has been a gain of 6.2 p．c．in the index of payrolls．

Quebec City．－Littie general change in industrial employment was shown in Quebec at Nov．$l_{0}$ according to data from 383 leading emplovers，whose working forces incroased by 0.2 poc．as compared with the beginning of October．The reported salaries

[^0]and wages were insignificantly lower．The weokly earnings per emplovee fell slightly from $\$ 36.29$ at Oct．I to $\$ 36.23$ at the date under review，but exceeded the Nove 1 ， 1948，average of $\$ 35.04$ ．In manufacturing，there were moderate gains in employment in lumber and fron and steel factories，with rather small but widely－distributed decresses in numerous other classes．Building and trade showed some improvement over Oct．1，while thore were losses in road and street construction and maintenance，and cartain other non－manufacturing classes．

The index of employment in the city stood at 201．0，as compared with 201.9 a vear earlier．This fractional decline in the 12 months was accompanied by a rise of 5.3 p．c．in the inder of weekly parrolls．

Sherbrooke．－The employment situation in Sherbrooke at Nov．I showed a small improvement as compared with a month earlier．Information was furnished by 122 leading firms，whose personnel was higher by 0.9 poco than at oct。 10 The weekly salaries and wages paid by these establishments at Nov。I also exceeded by 0.9 p．c． their disbursements at Oct．1．The latest per capita earnings were $\$ 37.35$ ，the same as at Oct．1．1949，as compared with $\$ 34.86$ at Nov． $1_{\mathrm{p}}$ 1948．Since then，the index of employment has shown no general change，but that of weokly payrolls has mounted by 7.1 p．c．

Three Rivers．－There was a slightly downard movement in employment in Three Rivers at the first of November，according to statistics tabulated from 110 of the larger emplovers in the city，whose working foroes declined by 0.5 p．c．as compared with Oct．1。 Their weokly salaries and wages at Novol were also lower，the index number falling by 2.1 poc．in the months changes in the industrial distribution of the reported workers，and increased employment of casual workers，contributed to the relatively larger loss in parrolls．The earnings of the employees for whom data are available averaged $\$ 4.42$ ，as compared with $\$ 42.09$ at Oct。 1 ， 1949 ．The mean at the beginning of November，1948，had been \＄41．69．Manufacturing was quieter at the date under review than in the preceding month，there being curtailment in pulp and paper mills and some other classes．Construction also released workers．Transportation， however，was more active．In the last 12 months，there has been a decline of 2.9 p．c． in the index of employment and of $3.5 \mathrm{poc}$. in that of payrolis．

Toronto．－Important increases in industrial activity nom noted in Toronto at the beginning of November，when data were compiled from 2,931 leading establishments employing 1．1 poc．more workers than at Oct．1．The general gain was rather greator－ than－average in the experience of some 29 vears．Manufacturing showed improvement， notably in animal and vegetable foods，lumber，paper products，printing and publishing， textiles，electrical apparatus，iron and steel，and miscellaneous manufactured products． There was curtailment in rubber factories，largely as a result of industrial disputes． Among the non－manufacturing classes，building and trade reported greater activity．The gains in the latter were considerable．On the other hand，transportation was slacker．

The weekly salaries and wages disbursed at Nov． 1 by the establishments furnishing returns were higher by 1.8 poc．than at Oct． 1 ．The index of employment at the latest date exceeded by 2.3 poco the Novol。1948，figure of 203.4 ．The indicated payrolls have risen by 7.3 poc．in the 12 months．The average earninge per emplovee were $\$ 45.02$ at Nov．I and $\$ 44.68$ at Oct．I．1949，as compared with $\$ 42.95$ at Nov． 1. 1948。

Ottawa．－There was a decline of 0.7 poc．in the index of industrial employnent In Ottawat Nov．1．Manufacturing was brisker，there being small gains in a number of groups．Improvement was also noted in retail trade，but activity was reduoed in construction and wholesale trade．The weekly payrolls disbursed by the 359 co－operating firms fell by 1.3 poc．in the month．The average earnings per person in recorded employment stood at $\$ 38.19$ ，as compared with $\$ 38.41$ at Oct．1．The Novo1。1948，per capita figure wes $\$ 36.01$ ．The latest index of employment，at 198.6 ，was 1.2 poo． $168 s$
than that of 201．1 at Nov．1，1948，while that of payrolls was higher by 4.9 p．c．
Hamiltono－Expansion in industrial activity was indicated in Hamilton at Nov．1．when the 487 co－operating firms reported a working force． 0.6 poc．greater than at Oct．1。 There were moderate gains in manuracturing，notably in textile plants． Hotels and restaurants and trade also showed improvement．The weekly salaries and wages distributed at Nov， 1 by the reporting firms，however，fell by 104 poc．in the month．The average earnings of their employees were also lower，falling from \＄47．22 at Oct． 1 ，to $\$ 46.73$ at the date under review．The latter figure nevertheless considerably exceeded the Nov．1． 1948 ，everage of $\$ 43.92$ ．In the 12 months，the general index of employment has risen by 2.2 p．co．to 204.9 ，while that of payrolls has advanced by 8.4 p．c．

Windsor：－Industrial emploment in Windsor was quieter at Nov．1，according to data received from 298 of the larger industrial establishments，in which the staffs were lower by two poce than at Oct．1．Their weekly salaries and wages declined in the same comparison by 2.4 p．c．e reduced working hours in some instances contributing to the falling－off．The average earnings per omployee were lowered from $\$ 52.19$ at Oct．$l_{\text {。 }}$ to $\$ 51.97$ at the date under review，but the figure was then rather higher than that of $\$ 51.38$ at Novo 1．1948．Manufacturing showed lowered aotivitv， particularly in the vegetable food and iron and steel divisions．Construction and trade afforded more employment than at the beginning of October，while little general change was indicated in the remaining nonamanufaoturing industries．

The latest index of employment，at 294．1，exceeded by two p．c．that of 288.4 at the beginning of November，1948；the index number of payrolls has risen by 3.4 poce in the twelve months．

Brantford．－Little general change in the situation generally was indicated in Brant ford at Oct．I as compared with a month earlier，according to data received from 133 larger firms，whose personnel increased by 0.2 poco at the beginning of November．There were continued losses in the iron and ateel division of manufacturing． but vegetable food factories reported rather greater activity。Construction and trade also showed some improvement．The weekly salaries and wages disbursed by the co－ operating employers rose by 1.7 poc．at Nov． 1 as compared with Oct． 1 ，when the per capita earnings of their employees had stood at $\$ 42.73$ ，rising to $\$ 43.34$ at Nov． 1 。

Fort William－Port Arthuro－Industrial emploment was at a lower level in Fort Willam and Port Arthur than at Oct．1．Statistics were tabulated from the 162 leading establishments，in which the emploveos declined by $l_{0} 6$ poc．as compared with Oct．1。 The weekly salaries and wages distributed by these firms，however，showed little general change．The latest average per employee was $\$ 47.25$ ，as compared with $\$ 46.50$ at Oct．1，1949，and \＄4．37 at Nov．1．1948．Since then，the index of employment in Fort William and Port Arthur has fallen by 11.7 poces and that of parrolls，by 6.6 p．c．Employment deoreased at the date under review as compared with a month earlier in manufacturing，transportation and construction．Trade，however，was brisker．

London：－Information received from 319 leading firms in London indicated a sightly higher level of industrial activity at Nov． 1 than at Oct． 1 ，their staffs having been increased by 0.1 poc．in the month．Manufacturing an traie afforiad more emplovment at the date under review，but the general changes were extremely small．The weekly salaries and wages disburged at Nov，l by the co－operating establishments rose by 1.2 poc．as compared with Oct．l．The most recent per capita figure was $\$ 41.76$ ，as compared with $\$ 41.31$ in the preceding report，and $\$ 39.58$ at the beginning of November，1948．In the last 12 months，the index number of employment in London has risen by $2.7 \mathrm{p} . \mathrm{cos}_{0}$ ，and that of weokly payrolls，by 8.5 p．c．

Kitchener－Waterloo．There was a moderate increase in industrial employment in Kitchener－Waterloo at Nov．1，due to rather greater activity in manufacturing．
notably in leather and lumber plants, and in trade. Statistics wore compiled from 212 leading establishments in which the staffs were larger by 0.5 poc. than at the beginning of October. The weokly salaries and wages also showed an advance, rising by one poc. in the month. The average earnings per omplovee amounted to $\$ 41.79$, as compared With $\$ 41.58$ at the beginning of October, and $\$ 41.00$ at Nov. 2. 1348. In the latter comparison, the index of employment showed a gain of $504 \mathrm{p}_{0} \mathrm{c}_{0}$, and that of aggrogato woekly parrolls, of 7.5 poc.

St. Catharines - Wellando Curtailment in industrial omployment was indicated in the St. Catharines - Merritton - Thorold - Welland Area at Nov. 1, according to data from 201 leading establishments, in which the employees deciined by 109 poc。 and their weekly salaries and wages, by 104 poc. as compared with a month earlier. Manufacturing was slacker, notably in vegetable food and iron and steel plants. Construction, however, afforded more employment. The average earnings of the men and women for whom statistics were furnished averaged $\$ 49.93$ in the week of Nov. 1. as compared with $\$ 49.68$ in that of Oct. 1。

Winnipego- Industrial employment in Winnipog showed considerable improvement at Nov. $\overline{1}$, when manufacturing was more active particularly in the food divisions. There were also gains in employment in building and trades the seasonal increases in the latter were substantial. The combined working force of the 814 co-operating firms was higher by one poc. at Nov. 1 than at Oct. 1 , while their weokly salaries and wages mounted by 0.8 poc. in the month. The average earnings of their employees showed a small deciline, standing at $\$ 39.85$ at the first of October and $\$ 39.78$ at the beginning of November. The Nov. $1_{0}$ 1948, figure was lower, at $\$ 38.53$.

The index number of employment, at 172.3 , was $2.4 \mathrm{p} . \mathrm{c}$. above that of 168.3 a year earlier. The index of payrolls in the 12 monthe has risen by 5.9 p.c.

Rogina.- The trend of industrial employment in Regina was favourable; the 193 leading omplovers in the major groups who furnished statistics at Nove 1 had increased their staffs by 2.4 poce since the beginning of October. Practically no change on the whole was indicated in manufacturing; transportation was quieter, but improvement was indicated in construction and trade. The weekly payrolls disbursed by the co-operating firms were higho by 1.4 poc. then at Oct. $1_{0}$ The average earnings per person amounted to $\$ 38.61$ at the date under review, as compared with $\$ 39.00$ at Oct. 1, and \$37.14 at Nov. 1, 1948. Since then, the index of employment has risen by 3.2 p.o. and that of payrolls, by 7.6 poco

Sasketoono Moderat curtailment in industrial employment was noted in Saskatoon at Nov. 1; trade employed larger numbers of workers than at Oct. 1, but construction and other non-manufacturing classes were quister. There was practically no change in manufacturing. The forces of the 159 establishments from which statistics were received declined by 0.4 poc. as compared with the beginning of October. The indicated weokly payrolls, however, were higher by 0.6 poc. The average per employee rose from $\$ 38.35$ in the preceding report, to $\$ 38.74$ at the date under review, when it oxcooded the per capita figure of $\$ 35.91$ indicated a year earlier. In the 12 months. the index number of employment in Saskatoon has risen by 2.1 poco, and that of payrolls, by 10.2 poc.

Calgary. - There was a downward movement in employment in Calgary at the beginning of November, when manufacturing was quieter than at Oct. 1 , and there were moderate losses in transportation. Building, however, showed slight improvement. The personnel of the 348 larger employers coooperating in the monthly survey decreased by 0.5 poc. as compared with Oct. 1 , and their weekly salaries and wages, by 0.3 poc. The average earnings per employee were rather higher, standing at $\$ 42.62$ at the date under reviow, as comparod with $\$ 42.53$ at the beginning of October, and $\$ 40.58$ at Nov. 1 . 1948. In the last year, the index of omployment has risen by 504 pocoe and there hes
been a gain of 11.4 poc．in the index of payrolls．
Edmonton．－Industrial employment in Edmonton at Nov． 1 was brisker than at the beginning of October．Manufacturing showed improvement，mainly in animal food and iron and steel plants．Building and trade also reported heightened activity． Data were compiled from 316 leading firms，whose working forces exceeded by l．9 p．c． their staffs at Oct．l．The reported weekly payrolls were also higher，rising by 2.2 poc．in the month．The latest per capita Pigure，at $\$ 41.72$ ，exceeded the Oct． 1 moan of \＄41．61，and that of \＄10．24 indicated at Nov．1．1948．Since then，the index of emplovnent has increased by 5,2 p．c．，and that of weekly salaries and wages，by 9.9 poc。

Vancouver．－There was a slight rise in industrial activity in Vancouver at the first of November，when manufacturing and trade shoved improvement．The trend was downard，however，in transportation，construction and hotels and restaurants． Within the manufacturing division，there were small losses in clay，glass and stone and iron and steel factories，with moderate advances in the lumber and vegetable food groups．The 1,125 leading establishments from which returns were received showed a general decrease of 0.2 p．c．as campared with Oct． 1 ．The latest index of employment stood at 228.8 ，being 4.5 poc．below the Nov．1， 1948 ，figure of 239.7 ．The weekly salaries and wages disbursed at the date under review by the co－operating employers were lower by 0.1 poc．than at Oct．1．As compared with Nov．1，1948，there was a decrease of 0.2 poc．in the latest index of payrolls．The average per employee at the date under review was $\$ 44.72$ ，as compared with $\$ 44.87$ at the first of October； the per capita figure indicated at Nov． 1.1948 ，was \＄42．76．

Victoria。－Industrial employment in Victoria showed a recession at Nov． 1 as compared with a month earlier，according to information from 236 of the larger firms in the city，whose working forces were lower by 0.8 poco than at Oct． 1. Transportation was more active，but there were losses in manufacturing，trade and some other classes．The sums disbursed in weokly payrolls by these establishments at Nov． 1 wore lower by 0.5 poc．than at Oct．$l_{\text {。 The latest per capita earnings were }}$ \＄43．45；the average at Oct． 1.1949 ，was $\$ 42.89$ ，and that at Nov， $1,1948, \$ 39.06$ ． In the vear，the index of emplomment in Victoria has risen by 2.9 poco，and that of weekly salaries and wages，by 13.6 poc．

## TABLES．

The latest statistics of employment and payrolls are summarized in Table A on page 2，while Tables 1 to 5 at the end of this report contain more detailed data on emplorment and payrolls，together with index numbers as at Oct． 1 and Nov． $1_{0}$ 1949，and Nov．1．1948．In these tables，the index numbers of employment，caloulated on their original base， $1926 \pm 100$ ，have been converted to June 1,1941 ，for comparison with the data of earnings．For all general purposes，apart from comparison with the payroll statistics，however，the index numbers of employment which are given in Tables 6 to 11 ，based on $1926 \equiv 100$ ，should be used．

Table $B$ on page 6 sumarizes for the provinces，the cities and the major industrial divisions．the latest statistics of employment，showing the numbers and proportions of male and female workers reported at Nov．$l_{0}$ with comparisons from earlier surveys；in this table，the provincial and city figures given are those for the nine leading industries，including the employees reported in financial institutions，excluded in most cases from the data given in the table on page 2.

Table 12 shows the sex dietribution in a considerable list of industries in the Dominion as a whole at the date under review，with comparative statistics as at Oct．1．1949，and Nov．1．1948。

The monthly surveys of employment and payrolls extend to all branches of the following industriess manufacturing, logging, mining, comunications, transportation, construction and maintenance, trade and finances the ostablishmonts for which data are given under the heading " servioes " are chiefly hotels and restarants and laundries and dry-cleaning plants. For practical reasons of collection and tabulation, the surveys aro in the main limited to ifme usually amploying 15 persons and over. Firms reducing their staffs below this minimum are not nocessarily removed from the malling list. Establishments are ssked to furnish data for all classes of employees irrespective of their functions in the business, but to exclude statistics for the owners. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for tieir establishmeats in the different industries and areas.

1.     - COVERAGE - The virtual limitation of the monthly surveys to ostablishments having 15 employoes or more results in a relatively even representation of employment in the various provinces and in the larger citios for which data are segregated, but also results in veriations in the coverage of different industries, depending upon whether a given industry is ordinarily organized in large or small units of operation. Complete information respecting the distribution of the working population is avallable only at 10 year intervals, and some time after the Consus date: comparisons of the data of the monthly surveys and those obtained olsewhere in the Bureau are complicated by the fact that the industrial classifications differ in several important respects. The distribution of the persons omployed at June 1, 1941, by the co-operating firms in comparison with the distribution of the wagesarmers and salaried omployes enumerated in the Census of June 1 , 1941, was discussed in the 1944 Annual Rovew of Employment and Payrolls. Since 1944, there has been considerable growth in the number of firms reporting to the monthly survey. It is estimated that the coverage in the industrial divisions now ranges fram about $51 \mathrm{p} . \mathrm{c}$. In the hotel-and-restaurant and laundry-and-dry-cleaning group, and 56 p.c. in trade, to some $85 \mathrm{p} . \mathrm{c}$. In mining and $88 \mathrm{p} . \mathrm{c}$. in manufacturing. The last two figures are ased on the statistics of the Annual Census of Industry, relating to practically all establishments in the indicated industries. In manufacturing, certain adjustments in respect of industrial coverage ste required to bring about comparability in the two series. The proportion of 88 p.c. results from the use of the adjusted figures. It is estimated that the firms co-operating in the monthly surveys in the nine major induatrial groups employ approximately $82 \mathrm{p} . \mathrm{c}$. of the total wage-aarners and salarled employeos in the same industrios throughout Canada; of the total wage-earners and salaried smployees in all industries, including workers in the industries oxcluded from the monthly surveys as sell as in those represented, the coverage is estimated at about $61 \mathrm{p} . \mathrm{c}$.

It should be noted that the statistics of persons omployed, as published in various tables in the monthly bulletins, do not represent estimates of the total numbers ongaged in the specifled aress or industries, but show the distribution of the workers on the staffs of the com eperating firms at the indicated dates, together with the distribution of their weekly payrolls, and the per capita wookly oarnings of such employees.
2. - THE QUESTIONNAIRE - From 1921 to 1941 , the questionnaire used in collecting current data on employment called for statement of the number of persons at work on the last morking day of the month. With the introduotion of the statistics of payrolls in the spring of l94l, it became necessary to ask for information showing the numbers of employees on the payrolls in the last pay periods in the month, to relato to the salaries and wages. The difference in the coverage of amployment as a result of this change was considerable, especially in industries with high proportions of casual 2abour. In so far as was possible, adjustment in the records was made in 1941, to preserve the comparability of the data collected prior to the apring of 2941 , and those thereafter collected. The inclusion of casual workers th a greater oxtent thas wes the case in the arlier surveys noverthe less constitutes an element of incomparability in the present statistics of employment and those tabulated prior to the institution of the complementary statistics of payrolls in April, 1941. The questionnalre now used asks smployers to furnish data showing the gross earnings of their salaried omployees and wagearners in the last pay periods in the month, the omployees and their eamings to be grouped according to the duration of their pay periods, whether these be monthly, semi-monthly, fortnightly, weekly, etc. The payrolis reported include amounts deducted for taxes, unemployment insurance contributions, etc. cost-of-living allowances, incorporated in the basic wagerates as from Pob. 15, 1944, are Included, as Fas tha case before their incorporation in the basic rates. Comissions and incentive and production bum:3世: ate iso included.
3. - THE PROCESSING - In the Bureau, the statistics of salaries and wages reported for ady pozlcd azobeding weok arg reduced, for tabulation purposes, to the proportions which would be

## EXPLANATION OF THE METHOD USED IN PREPARING THE MONTHLY STATISTICS OF EMPLOYIENT AND PAYROLLS. (Cont'd.)

six days, the standard working week; the denominators of the fractions are the numbers of working days in the different pay periods, excluding only the Sundays. Where operations are continuous, the numerator of the fraction 18 seven, the denominator being the total number of days in the pay period, including Sundays. In the case of employees paid at annual or monthly rates, so that their earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to weekly basis, Without regard to the length of the calendar month. The sums resulting from these various calculations are then aggegated to give the total amounts, which, on the average, would be paid for services rendered in one week by the persons on the payrolls of the comperating establishments. The employees reported are not in all cases necessarily employed for a period of a week by one firm. Fmployers are urged to make a practice of furnishing data only for the last pay period in the month for their various classes of employees rather than to aggregate statistics for several pay periods, since the latter method tends to exaggerate the amount of duplication possible in the statistics of employment in cases where individuals may be employed by more than one co-operating establishment in a period of severel weeks.
4. - THE TABULATION - The data tabulated monthly show the number of persons drawing pay from the establishments furnishing returns at the given date, and their weekly earnings, together with the numbers of employees and the payrolls of the same firms in the preceding month, and in the basic periods. The statistics of the first tabulation are preliminary, the re-tabulation of the statistics on the succeeding month's tabulation incorporating revisions in the returns originally tabulated, as well as reports received too late for inclusion in the prelininary tabulation.
5. - THE INDEX NUMBERS OF EMPLOMMENT - The index numbers represent the percentage relationship between the number of persone employed by the establishments currently furnishing data and the number wilch they had omployed in the basic period. The number of workers employod in the basic period by the fims which then operated but have since gone out of business are continued in the basic average figures, while firms or branches opening for business since the basic period are tabulated with zero base figures. The basic averages of establishments which operated in the base period but have since been added to the mailing list are incorporated in the basic figures from the date when their co-operation was first obtained.
6. - THE INDEX NUVBERS OF PAYROLLS - Shortly after the institution of the statistics of payrolls, it became necessary to present the data in the form of index numbers. The earliest period which could be adopted as a base was selected for the purpose, nomely, the wook of June 1, 1941. The current disbursements are thus related to the sums expended in salaries and wages by the co-operating employers on or about June $1,1941,2.8$ 100 p.c. To provide a measurement of the changes in employment and payrolls from the establishment of the latter series, the monthly indexes of omployment are related to June 1 . 1941, as 100 , in the tables giving the two sets of data. For all purposes apart from comparison with the statistics of payrolls, however, the indexes compiled on the original 1926 base should be used.
7. - TAE WEEKLY EARNINGS - The average weekly earninge represent the division of the aggregate weokly salaries and wages reported by the co-operating establish= ments, by the number of their employees in the same pay periods; the index numbers of average weekly eamings, given in the table on page 4, are based on the averages reported in the week of $\mathrm{Jume}^{1,1941, ~ a s ~} 100$.
8.- HOURLY EARNINGS - Statistics of average hourly and weekly earnings of wage-amers for whom the larger employers keep record of hours worked are contained in the monthly bulletins on man-hours and average hourly earnings, avallable from the end of 1944.
